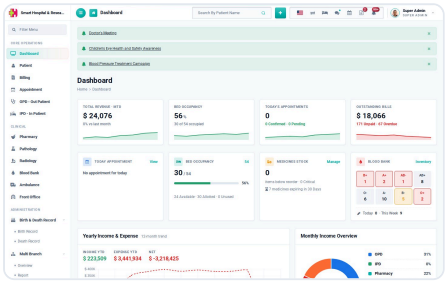
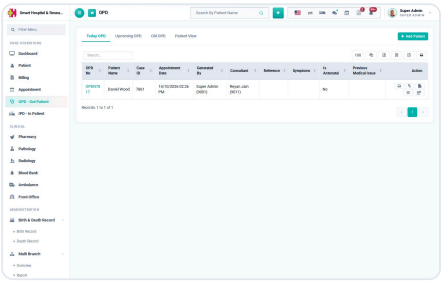
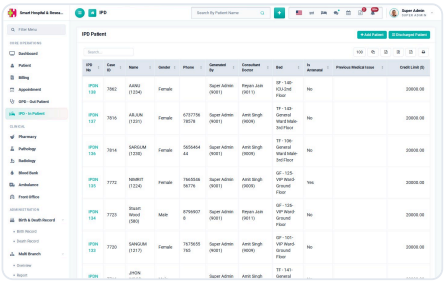
Smart Hospital Complete Guide

Feature catalogue · Screenshot reference · Operator wiki & help

Product	**Smart Hospital** — Hospital Management System (QDOCS)
Explored instance	demo.smart-hospital.in — Smart Hospital & Research Center
Screens documented	76 application screens, 96 forms/dialogs, 29 sub-screens, 5 record & tab views
Roles covered	Super Admin, Admin, Doctor, Nurse, Pharmacist, Pathologist, Radiologist, Accountant, Receptionist + Patient portal
Method	Automated browser exploration (login → every menu screen → every add/edit form → real records → all roles → public site)
Generated	2026-10-13







Contents: Part 1 Operator wiki & help handbook · Part 2 Screen-by-screen feature catalogue with screenshots · Part 3 Improvement backlog · Part 4 Vendor help library index · Part 5 Selected help articles in full. Application screenshots were taken on the live demo instance; help articles are mirrored from the vendor knowledge base.

Contents

How this guide is organised

Part 1 — Operator wiki & help handbook

1. Getting started

2. Initial configuration

3. Front-desk workflows

4. Clinical services

5. Administration & HR

6. Communication, content & documents

7. Reports

8. Patient portal & public website

9. Roles, permissions & security

10. Troubleshooting & FAQ

11. Glossary

Part 2 — Feature catalogue

1. Application map
- **1.1 The application shell**
- **1.2 Screen inventory at a glance**

2. Modules, screens and forms
- **2.1 Core Operations**
- **2.2 Clinical & Ancillary Services**
- **2.3 Administration & HR**
- **2.4 Communication, Content & Certificates**
- **2.5 Reports, Masters & Configuration**

3. Record-level screens (opened from real data)
- **3.1 Single-module billing screens (OPD / appointment)**
- **3.2 IPD patient case — every tab of an admitted patient**
- **3.3 OPD patient record — every tab of an out-patient**
- **3.4 AANU (1234) Admitted**
- **3.5 Patient**

4. Sub-screens reachable from the modules
- **4.1 Billing - Appointment module — /admin/bill/appointment**
- **4.2 Billing - OPD module — /admin/bill/opd**
- **4.3 Pathology Billing — /admin/bill/pathology**
- **4.4 Radiology Billing — /admin/bill/radiology**
- **4.5 Blood Issue Billing — /admin/bill/issueblood**
- **4.6 Blood Components Issue Billing — /admin/bill/issuecomponent**

- 4.7 Single Module Billing — /admin/bill/dashboard
- 4.8 Billing - OPD bill screen — /admin/bill/opd
- 4.9 Patient import — /admin/patient/import
- 4.10 IPD Discharged Patient — /admin/patient/discharged_patients
- 4.11 Patient import — /admin/patient/import
- 4.12 IPD Discharged Patient — /admin/patient/discharged_patients
- 4.13 Medicines Stock — /admin/pharmacy/search
- 4.14 Sale Return Bills — /admin/pharmacy/salereturnbills
- 4.15 Medicines Stock — /admin/pharmacy/search
- 4.16 Pathology Test — /admin/pathology/search
- 4.17 Sale Return Bills — /admin/pharmacy/salereturnbills
- 4.18 Pathology Test — /admin/pathology/search
- 4.19 Radiology Test — /admin/radio/search
- 4.20 Blood bank status board — /admin/bloodbankstatus
- 4.21 Radiology Test — /admin/radio/search
- 4.22 Blood bank status board — /admin/bloodbankstatus
- 4.23 QR Code Attendance — /admin/qrattendance/attendance/index
- 4.24 Payroll — /admin/payroll
- 4.25 Appointment queue — /admin/appointment/index
- 4.26 Payroll — /admin/payroll
- 4.27 Appointment queue — /admin/appointment/index
- 4.28 OPD patient view — /admin/patient/search
- 4.29 OPD patient view — /admin/patient/search

5. Roles and access model
- 5.1 Super Admin
- 5.2 Admin
- 5.3 Doctor
- 5.4 Pharmacist
- 5.5 Pathologist
- 5.6 Radiologist
- 5.7 Accountant
- 5.8 Receptionist
- 5.9 Nurse

6. Public website and patient portal

7. Cross-cutting platform features

8. Complete screen inventory

Part 3 — Improvement backlog

Findings & prioritised backlog

Part 4 — Vendor help library (mirrored index)

Part 5 — Selected help articles (full text)

Part 1 — Operator wiki & help handbook

Task-oriented help: how to run every module, day to day.

Smart Hospital — Wiki & Operator Handbook

> Practical, task-oriented help for the Smart Hospital hospital-management system (`demo.smart-hospital.in`). Written from a live exploration of the demo hospital **Smart Hospital & Research Center** — every workflow below was performed against the running application. Screenshots are in `docs/assets/screens/` ; the screen-by-screen reference is in `FEATURE-CATALOG.md` .

---

1. Getting started

1.1 Signing in

Portal	URL	Who uses it
Admin panel	`/site/login`	All hospital staff (9 roles)
Patient portal	`/site/userlogin`	Patients (self-service)
Public website	`/`	Visitors, prospective patients

1. Open `/site/login` .
2. Enter **Username** (e-mail address) and **Password**, click **Sign In**.
3. You land on the dashboard for your role. The bell icon, quick-add launcher and global patient search are always available.
4. **Forgot Password?** → `/site/forgotpassword` (patient portal: `/site/ufpassword`).

On the demo build the login page also offers **Quick demo login** buttons that fill the credentials for each role.

Role	Demo user	Password
Super Admin	`superadmin@gmail.com`	`password`
Admin	`jason@gmail.com`	`password`
Doctor	`sonia@gmail.com`	`password`
Pharmacist	`harry@gmail.com`	`password`
Pathologist	`belinat@gmail.com`	`password`
Radiologist	`johnhook@gmail.com`	`password`
Accountant	`bradf@gmail.com`	`password`
Receptionist	`maria@gmail.com`	`password`
Nurse	`april@gmail.com`	`password`

1.2 The application shell

- **Sidebar** — every module, grouped into five sections: *Core Operations*, *Clinical*, *Administration*, *Tools & Content*, *Reports & Setup*. Type in **Filter Menu** to find a screen by name.
- **Global patient search** — the "Search By Patient Name" box in the header searches the whole patient index from any screen and opens the patient profile.
- **Quick Add** — floating launcher with *Add Patient*, *New OPD Patient*, *New IPD Patient*, *New Appointment*, *New Bill*.
- **Bed status** — live bed/ward occupancy modal.
- **Notifications** — bell menu with module alerts (OPD/IPD/pathology/radiology/pharmacy/appointment), notices, chat and calendar/to-do.
- **Language switcher** and **user menu** (profile, password, logout).

1.3 The dashboard

The dashboard is role-aware. For a Super Admin it shows:

- KPI tiles — *Total revenue MTD*, *Bed occupancy*, *Today's appointments*, *Outstanding bills*, *Medicines stock*, *Blood bank inventory*.
- *Yearly income & expense* — 12-month trend (collected vs spent).
- *Monthly income overview* — donut of income share by module (OPD, IPD, Pharmacy, Pathology, Radiology, Blood Bank, Ambulance, Income).
- *Recent activity* — tail of the audit log (bills posted, patients registered…) with user, module, amount and timestamp.
- *Staff attendance* — role-wise present/absent summary for the day.
- *Income by module* — table with this-month vs last-month comparison.

Dashboard

---

2. Initial configuration (do this once, as Super Admin)

Recommended order — later modules depend on earlier masters:

1. **Settings** (`/schsettings`) — hospital name, logo, address, contact, currency, date format, time zone, session timeout.
2. **Hospital Charges** (`/admin/charges`) — the charge catalogue used by billing, OPD and IPD (consultation, procedure, room, investigation, etc.).
3. **Bed** (`/admin/setup/bed/status`) — wards, bed groups and individual beds; drives admission and the bed-status board.
4. **Print Header Footer** (`/admin/printing`) — per-module header/footer used on bills, reports, prescriptions, certificates.
5. **Finance** (`/admin/incomehead`) — income and expense heads.
6. **Front Office** (`/admin/visitorspurpose`) — visitor purposes, call log types, complaint types.
7. **Operations** (`/admin/operationtheatre/index`) — operation theatre master.
8. **Pharmacy** (`/admin/medicinecategory/medicine`) — medicine categories, units, suppliers and medicines.
9. **Pathology** (`/admin/pathologycategory/addcategory`) — test categories and tests (with parameters, ranges, units).
10. **Radiology** (`/admin/lab/addlab`) — imaging categories and studies.
11. **Blood Bank** (`/admin/bloodbank/products`) — components, bag types and stock.
12. **Symptoms / Findings / Vitals / ICD-10** — the clinical libraries used by OPD and IPD.
13. **Finance → Referral commission**, **Human Resource → Leave types**, **Appointment → slots / online appointment**, **Inventory → item categories**, **Custom Fields**.
14. **Users & roles**: create staff (HR → Add Staff) and assign the role that decides the menu they see.
15. **Notification settings** — per-event delivery over **e-mail, SMS, WhatsApp and mobile-app push** (*System Settings* → *Notification Setting*), plus the *SMS Setting* and *Email Setting* gateway credentials. See §6.2.
16. **Two-Factor Authentication** — 2FA setup for privileged staff (§9.2) using Google Authenticator.
17. **Zoom setting** (`/admin/zoom_conference`) if you will use teleconsultation.
18. **Front CMS** (`/admin/front/page`) to publish the public website.

> **Tip** — Most masters are ordinary list screens: DataTables search, an **Add** button opening a modal, row actions for edit/delete, and CSV/print export.

---

3. Front-desk workflows

3.1 Register a patient

Patient → Patient List (`/admin/admin/search`) → **Add New Patient** (or Quick Add → *Add Patient*).

Capture at minimum: name, guardian name, gender, date of birth/age, mobile, e-mail, address, blood group, marital status, photo and (optionally) TPA/insurance details. The system assigns the patient ID (MR number) that every other module uses.

- **Import Patient** — bulk import from CSV.
- **Disabled Patient List** — archive/restore patients instead of deleting.
- **Delete Selected** — bulk delete with the row checkboxes.

Patient list

3.2 Book an appointment

Appointment (`/admin/appointment/index`) with tabs **Today**, **Upcoming**, **Old**.

1. **Add Appointment** → choose patient (or *New Patient*), doctor, date, slot, priority and message.
2. Slots come from **Setup → Appointment** (`/admin/onlineappointment/index`); the *Doctor Wise* view shows a doctor's day.
3. **Queue** view prints/serves tokens for walk-ins.
4. Online bookings made from the public site arrive in **Setup → Appointment → Online Appointment** for approval.
5. Change status from the row (booked → confirmed → checked-in → consulted → cancelled).

3.3 OPD visit (out-patient)

OPD – Out Patient (`/admin/patient/search`) with tabs **Today OPD**, **Upcoming OPD**, **Old OPD**, **Patient View**.

1. Select a patient or **Add Patient**, then **New Visit**.
2. In the visit form record: appointment/date, consultant, symptoms (from the symptom library), ICD-10 diagnosis, findings, vitals, history, prescription rows, investigation orders and charges.
3. **Save & Print** produces the prescription; **Save** returns to the list.
4. Investigations ordered here appear in Pathology/Radiology billing and reporting queues.
5. **Discharge** an OPD patient when the episode is complete (vendor help: *How to Discharge patient from OPD*).

3.4 IPD admission → discharge (in-patient)

IPD – In Patient (`/admin/patient/ipdsearch`).

1. **New IPD Patient** → patient, consultant, ward/bed (from the bed master), admission date, TPA/insurance, guardian and case details.
2. Inside the case you get tabs for **Visit/Overview**, **Vitals** (with BMI), **Prescription**, **Lab Investigation**, **Radiology**, **Pharmacy**, **Billing**, **Timeline**, and specialty blocks such as previous obstetric / postnatal / antenatal history.
3. Nursing staff record vitals and notes from the same case (their role restricts them to ward work).
4. **Bed transfer** and **discharge summary** are available from the case; discharge frees the bed and unlocks the final IPD bill and certificates.

3.5 Billing & payments

Billing (`/admin/bill/dashboard`).

- **Single Module Billing** — bill one department (OPD, pharmacy, pathology, radiology, blood bank, ambulance…).
- **OPD/IPD billing through Case ID** — pull all charges booked against a case.
- Take full or **part payment**, choose the payment mode (cash, cheque, card, UPI/bank transfer, TPA), apply discount, then **Print** the receipt or **PDF** it.
- Outstanding amounts roll up into the dashboard tile *Outstanding bills* and the *Unpaid / Overdue* split.

3.6 Visitors, calls, post and complaints

Front Office (`/admin/visitors`) — four registers:

- **Visitor pass** — purpose, name, "visit to" (IPD/OPD/staff), phone, ID proof, in/out time.
- **Phone Call Log** — incoming/outgoing, caller, related patient, follow-up date.
- **Postal** — dispatch and receive register.
- **Complain** — complaint type, source, complainant, date, action taken, assigned to.

Purpose lists and call/complaint types are configured in **Setup → Front Office** (`/admin/visitorspurpose`).

---

4. Clinical services

4.1 Pharmacy

Pharmacy (`/admin/pharmacy/bill`) is the point of sale *and* store control.

- Add medicines in **Setup → Pharmacy** first (category, unit, supplier, batch, MRP, sale price, GST, reorder level).
- **Bill** — search a medicine, pick the batch (expiry shown), quantity, discount; the system deducts stock and posts the income to the dashboard.
- **Stock / Bad stock** — receive purchase, transfer between store and counter, mark expiry/bad stock (vendor help: *How to add Medicine Stock / Bad Stock*).
- **Import Medicines** — CSV import for large catalogues.
- Returns and refunds are handled from the bill list.

4.2 Pathology (laboratory)

Pathology (`/admin/pathology/gettestreportbatch`).

1. Order tests against a patient (or accept an OPD/IPD order).
2. **Sample collection** → **result entry** per parameter (value, unit, normal range) → **approve/verify**.
3. **Generate report** — single or **batch** (many patients at once), with configured header/footer and print/PDF output.
4. Payment for tests is posted to billing; the *Pathology Bill* screen tracks it.

4.3 Radiology (imaging)

Radiology (`/admin/radio/gettestreportbatch`) — same order → schedule → perform → report flow, with findings/impression text and attachments. Reports print in batch like pathology.

4.4 Blood bank

Blood Bank (`/admin/bloodbankstatus/`).

- **Stock** — component-wise (Whole blood, PRBC, FFP, platelets) and group-wise (A+, B+, O-, AB+ …) with bag numbers and expiry.
- **Donor registry** — donor details, screening, donation history.
- **Issue** — issue to a patient (with cross-match), record return or discard.
- Dashboard tile and alerts keep an eye on low stock.

4.5 Ambulance

Ambulance (`/admin/vehicle/getcallambulance`) — vehicle and driver master, call register (caller, patient, pickup address, date/time), charge for the trip and status (pending → dispatched → completed).

---

5. Administration & human resources

5.1 Staff and HR

Human Resource (`/admin/staff`) — staff directory with Staff ID, name, role, department, designation, mobile, photo.

- **Add Staff** — personal and professional details, role (drives permissions), login credentials, payroll and leave policy.
- **Card View / List View** toggle.
- From a staff record: **Staff Attendance**, **Payroll**, **Leaves**.

5.2 QR-code attendance

QR Code Attendance → Attendance (`/admin/qrattendance/attendance/index`) shows the monthly register (present/absent/half-day/late, in and out time).

- **Settings** (`/admin/qrattendance/setting/index`) configures the QR/check-in window and rules; staff scan the hospital QR to mark attendance.
- Attendance feeds the dashboard *Staff attendance* panel and HR reports.

5.3 Duty roster and calendar

- **Duty Roster** (`/admin/dutyroster/roster_report`) — assign shifts (morning/evening/night) per staff and department, per day; export/print the roster.
- **Annual Calendar** (`/admin/holiday/index`) — holidays, events and (per vendor help) to-do items.

5.4 Birth & death register

Birth Record (`/admin/birthordeath`) and **Death Record** (`/admin/birthordeath/death`) capture the statutory fields (child/parent details, hospital, doctor, certificate number) and print certificates. Both feed the *Birth Death* report.

5.5 Referral commissions

Referral (`/admin/referral/payment`) — referral doctor/agent master, commission percentage per service (Setup → Referral), and the ledger of commission payable/paid per referred case.

5.6 TPA / insurance

TPA Management (`/admin/tpamanagement`) — insurance companies, TPA master, patient policies and claim status tracking; TPA payments appear in the *TPA* report and in billing as a payment mode.

5.7 Finance ledger

- **Income** (`/admin/income`) and **Expenses** (`/admin/expense`) — head-wise entries with date, amount, invoice/reference, remark and attachment.
- Heads are maintained in **Setup → Finance** (`/admin/incomehead`).
- Both feed the *Finance* report, the dashboard trend chart and *Income by module*.

5.8 Multi-branch

Multi Branch has three screens:

- **Overview** (`/admin/multibranch/branch/overview`) — group KPIs per branch (patients, collections, beds) side by side.
- **Report** (`/admin/multibranch/branch/report`) — comparative reporting across branches.
- **Settings** (`/admin/multibranch/branch`) — the branch master (name, code, address, contact, admin) plus the branch switcher in the header.

Multi-branch overview

---

6. Communication, content and documents

6.1 Notice board / messaging

Messaging (`/admin/notification`) — publish notices to selected audiences (roles, staff, patients, branch) with title, message, date, attachment and publish/expiry window. Recipients see them in the bell menu.

6.2 Notifications, SMS, e-mail and WhatsApp

Notifications are **event driven**. For each event (for example *OPD Patient Registration*, *IPD Patient Discharge*, *Appointment Approved*, *Login Credentials*) you choose which channels deliver it:

Channel	Where it is configured	Notes
System / in-app	System Settings → Notification Setting	Bell menu + notice board
E-mail	Email Setting (SMTP credentials)	Used for credentials and reports
SMS	SMS Setting (gateway credentials)	Charged per message by the gateway
WhatsApp	WhatsApp Messaging → Meta (Cloud API) **or** Twilio	One provider at a time; the template configured for the event is used
Mobile app push	Android app integration	Free channel for installed patients/staff

> **WhatsApp setup** — open *WhatsApp Messaging*, choose the **Meta** tab (official WhatsApp Business Cloud API) or the **Twilio** tab (sandbox or approved sender), enter the credentials, enable exactly one provider, then switch WhatsApp on per event on the Notification Setting page. The same event template that already goes out by e-mail/SMS is reused. Mirror: `docs/help-library/whatsapp-messaging/`.

Patient credentials can be sent from the patient record over any enabled channel (e-mail/SMS/WhatsApp/push), which is how patients get access to the patient panel (see §8).

6.3 Survey forms

Survey Forms (`/admin/survey`) — build questionnaires (question types: text, textarea, radio, checkbox, dropdown, date, rating), publish them to selected roles/departments and read responses. **My Survey Forms** (`/admin/survey/staff_forms`) is the staff-facing list of forms assigned to the signed-in user.

6.4 Download center

Download Center (`/admin/content/upload`, `/admin/content/list`, `/admin/contenttype/`) — content types, upload/share files (reports, circulars, policies) with audience and download counters.

6.5 Certificates and ID cards

- **Certificate** (`/admin/generatecertificate`) — choose module (OPD/IPD), discharged patients and a certificate template; generate **single or multiple** at once and print.
- **Patient ID Card** (`/admin/generatepatientidcard/`) and **Staff ID Card** (`/admin/generatestaffidcard/`) — template-based cards with photo, ID and validity.

6.6 Inventory

Inventory (`/admin/itemstock`) — item categories (Setup → Inventory), suppliers, item master, issue/return to departments, stock ledger and reorder alerts; *Inventory* report shows consumption.

6.7 Front CMS (public website)

Front CMS (`/admin/front/page`) manages the public site: pages, banners/sliders, news & events, gallery, departments, doctors, contact and SEO metadata. Content published here appears on the hospital

website and in the "What's new" block of the login page.

6.8 Telemedicine

- **Live Consultation** (`/admin/zoom_conference/consult`) — schedule a Zoom teleconsultation for a patient, share the join link, start/end the session; the call is logged for reporting.
- **Live Meeting** (`/admin/zoom_conference/meeting`) — internal staff meetings with participants and schedule.
- Configure Zoom keys/secret in **Setup → Zoom Setting** (`/admin/zoom_conference`).

---

7. Reports

Reports menu (17 report screens in the admin UI). Every report shares the same pattern: **date range + module-specific filters → Search → results table → export/print**.

> The vendor help library documents **44 report articles** (per-report how-tos such as *Daily Transaction Report*, *Stock Report*, *Balance Amount Report*, *Pathology/Radiology Balance Report*). They are mirrored under `docs/help-library/reports/` and indexed in `docs/HELP-LIBRARY.md` .

Report	What you get
Finance	Collections, income vs expense, payment-mode wise summary
Appointment	Bookings by period, doctor, status
OPD	Visit counts, diagnosis mix, doctor-wise load
IPD	Admissions, discharges, bed-days, ward-wise census
Pharmacy	Sales, stock movement, expiry/bad stock, profit
Pathology	Test-wise counts, revenue, pending vs reported
Radiology	Study counts and revenue
Blood Bank	Donations, issues, component stock
Ambulance	Calls, trips, revenue
Birth Death	Birth and death register extracts
Human Resource	Staff list, attendance, leaves, payroll
TPA	Claim-wise and company-wise settlement status
Inventory	Item consumption and stock valuation
Live Consultation	Teleconsultation log and duration
OT	Operation theatre utilisation and procedures
Patient	Patient demographics and registration trend
Log	System audit trail (user, module, action, record, time)

Reports — Finance

8. Patient portal & public website

- **Patient portal** (`/site/userlogin`) — patients sign in with the credentials sent from the patient record and get their own **dashboard** (counts per module plus charts of medical history, findings and symptoms). Sections available to the patient:
- **My Appointments** — view and **book** an appointment (date, specialist, doctor, shift, slot, priority, message, live-consultation option).
- **OPD** — visits list; open a visit for overview, visits, charges, payment, lab investigations, timeline, medication, operation theatre and live consultation.
- **IPD** — overview, nurse notes, consultant register, lab investigations, timeline, prescription, charges, payment, treatment history, medication, operation theatre, live consultation and bed history.
- **Pharmacy / Pathology / Radiology / Blood Bank / Ambulance** — bill and payment history per module, printable bills and payment receipts.
- **Live Consultation** — join the Zoom teleconsultation booked from appointment, OPD or IPD.
- Reference: `docs/help-library/patient-panel/` .
- **Public website** — driven by Front CMS: home page with departments, doctors, services, health packages, news, gallery, contact and an **online appointment** form. Online bookings land in the admin *Online Appointment* queue.
- **New patient registration** on the public site creates a patient record that appears in the admin Patient List with the same MR number.

9. Roles, permissions and security

9.1 Roles and the audit trail

- Nine staff roles ship by default; each role maps to a permission set that controls the sidebar and every screen.
- The signed-in role is shown in the header (e.g. *Super ADMIN*); switching role requires re-login.
- Every form carries a CSRF token; passwords are hashed; sessions expire per the configured timeout.
- The **Log** report and dashboard *Recent activity* give an audit trail of who did what and when.
- The **Android app** (vendor addon) provides the same staff/patient flows on mobile with push notifications; see `docs/help-library/changelog/` and backlog E13 for mobile coverage.
- Vendor documentation covers SSL enablement, LAN deployment, and moving the installation between servers.

9.2 Two-factor authentication

The product ships a **Two Factor Authentication** module (Google Authenticator / TOTP):

1. Sign in as Super Admin (or the staff member) and open **Two Factor Authentication → Setup 2FA**.
2. Install **Google Authenticator** (or any TOTP app) on the mobile device.

3. Scan the QR code (or manually enter the key shown in the module) and confirm the 6-digit code to finish enrolment.
4. From then on, sign-in asks for the current code in addition to the password.
5. To reset a lost device, delete the 2FA account for that user from the same module and re-enrol.
6. If automatic enrolment fails, the key for superadmin/staff can be configured manually (vendor article).

> Mirror: `docs/help-library/two-factor-authentication/`. **Recommendation for DiziHospital:** enforce 2FA for every role that can reach billing or clinical records (backlog E4).

10. Troubleshooting & FAQ

Symptom	What to check
Cannot log in / login URL missing	Correct portal (`/site/login` vs `/site/userlogin`); see vendor article *Unable to Login or Missing Login URL*.
A menu item is missing for a user	Their **role** does not include that permission — adjust the role/staff record.
Blank page or 500 error	`ONLY_FULL_GROUP_BY` SQL mode on the MySQL server (vendor article), or missing PHP extensions (`mysqli` , `mbstring` , `zip` , `curl`).
"404 / Page not found" after installation	`mod_rewrite` disabled or `.htaccess` missing (vendor article *404 Or Page Not Found Error In Installation*).
Reports return no rows	Date range, branch filter and module status filters are cumulative — widen the range first.
Stock not decreasing in pharmacy	The bill must be **paid/saved**, not merely drafted; bad/expired stock uses the *Bad Stock* entry.
Lab report not printable	Results must be **approved/verified** before the report can be generated.
Patient portal shows no investigations	Reports are visible to the patient only after they are released/approved.
Slow pages	Enable caching/CDN, check server resources; PHP `max_execution_time` ≥ 60s is recommended by the vendor.
Need a field that does not exist	Add it non-invasively through **Setup → Custom Fields**.

Frequently asked (vendor articles, for depth): multi-hospital usage, running on a local LAN without internet, moving to a new server, enabling SSL, special characters, adding calendar events and to-dos, chat contacts.

11. Glossary

Term	Meaning
OPD	Out-Patient Department — walk-in/consultation visits
IPD	In-Patient Department — admitted patients
MR / Patient ID	Master record number identifying a patient across modules
Case ID	The episode identifier linking OPD/IPD visits, orders and bills
TPA	Third-Party Administrator handling insurance claims
ICD-10	International Classification of Diseases, 10th revision — diagnosis coding
Charge master	Catalogue of billable items and prices
Bad stock	Expired/damaged medicine stock written off
Roster	Duty/shift plan per staff member
Vitals	Temperature, pulse, blood pressure, respiration, SpO_2, BMI
Sample collection	Pathology step between ordering a test and entering results
Batch	A specific lot of a medicine identified by batch number and expiry
MRP / Sale price	Maximum retail price / the price charged to the patient
QR attendance	Staff attendance marked by scanning a QR code

Part 2 — Feature catalogue

Every screen, every form, every field — captured from the live application.

Smart Hospital — Complete Feature Catalogue

> **Evidence-based product documentation**, generated from a live screen-by-screen exploration of the **Smart Hospital** hospital-management system (by QDOCS) running at `demo.smart-hospital.in`.
>
> Captured on **2026-10-13**: 76 application screens, 96 data-entry dialogs, 2 record/tab views, 9 role dashboards and the public website.

Product	Smart Hospital — Hospital Management System
Vendor	QDOCS · https://www.smart-hospital.in
Explored instance	https://demo.smart-hospital.in (Smart Hospital & Research Center)
Sign-in used	`superadmin@gmail.com` / `password` (plus all nine demo roles)
Technology (vendor docs)	PHP (CodeIgniter MVC) + MySQL · Bootstrap · jQuery/DataTables · Chart.js (server-rendered views)
Navigation	5 sections → 30 menu items → 76 screens
Roles	Super Admin, Admin, Doctor, Nurse, Pharmacist, Pathologist, Radiologist, Accountant, Receptionist + Patient portal

Companion documents

File	Contents
`docs/WIKI.md`	Operator handbook — how to run every module, role by role
`docs/Smart-Hospital-Complete-Guide.pdf`	Printable guide: wiki + this catalogue + screenshots + backlog
`docs/IMPROVEMENT-BACKLOG.md`	Findings and the prioritised improvement backlog for the next phase
`docs/COVERAGE.md`	Exactly what was captured, how, and what is out of scope
`docs/HELP-LIBRARY.md`	Offline mirror of the vendor knowledge base (categories + every article)
`capture/`	Raw evidence: screenshots, DOM profiles, role menu trees, logs

1.1 The application shell

Every screen sits inside the same shell:

- **Sidebar** with a live *Filter Menu* box, grouped into the five sections above, collapsible sub-menus and per-item icons.
- **Header**: *Search By Patient Name* (global patient index search), the **Quick Add** launcher (Add Patient · New OPD Patient · New IPD Patient · New Appointment · New Bill), **Bed Status** board, language switcher, calendar, chat, the notification bell (module alerts) and the user menu (profile, password, sign out).
- **Work area** with breadcrumb/page title, DataTables grids (search, sort, paginate, export/print), Bootstrap modals for every add/edit form, and print/PDF output for documents.

1.2 Screen inventory at a glance

Section	Screens	Modules
Core Operations	6	Appointment, Billing, Dashboard, IPD - In Patient, OPD - Out Patient, Patient
Clinical	6	Ambulance, Blood Bank, Front Office, Pathology, Pharmacy, Radiology
Administration	14	Annual Calendar, Birth & Death Record, Duty Roster, Finance, Human Resource, Multi Branch, QR Code Attendance, Referral, TPA Management
Tools & Content	13	Certificate, Download Center, Front CMS, Inventory, Live Consultation, Messaging, Survey Forms
Reports & Setup	37	Reports, Setup

2. Modules, screens and forms

2.1 Core Operations

Day-to-day desk work: the dashboard, the master patient index, billing, appointments and the OPD/IPD clinical desks.

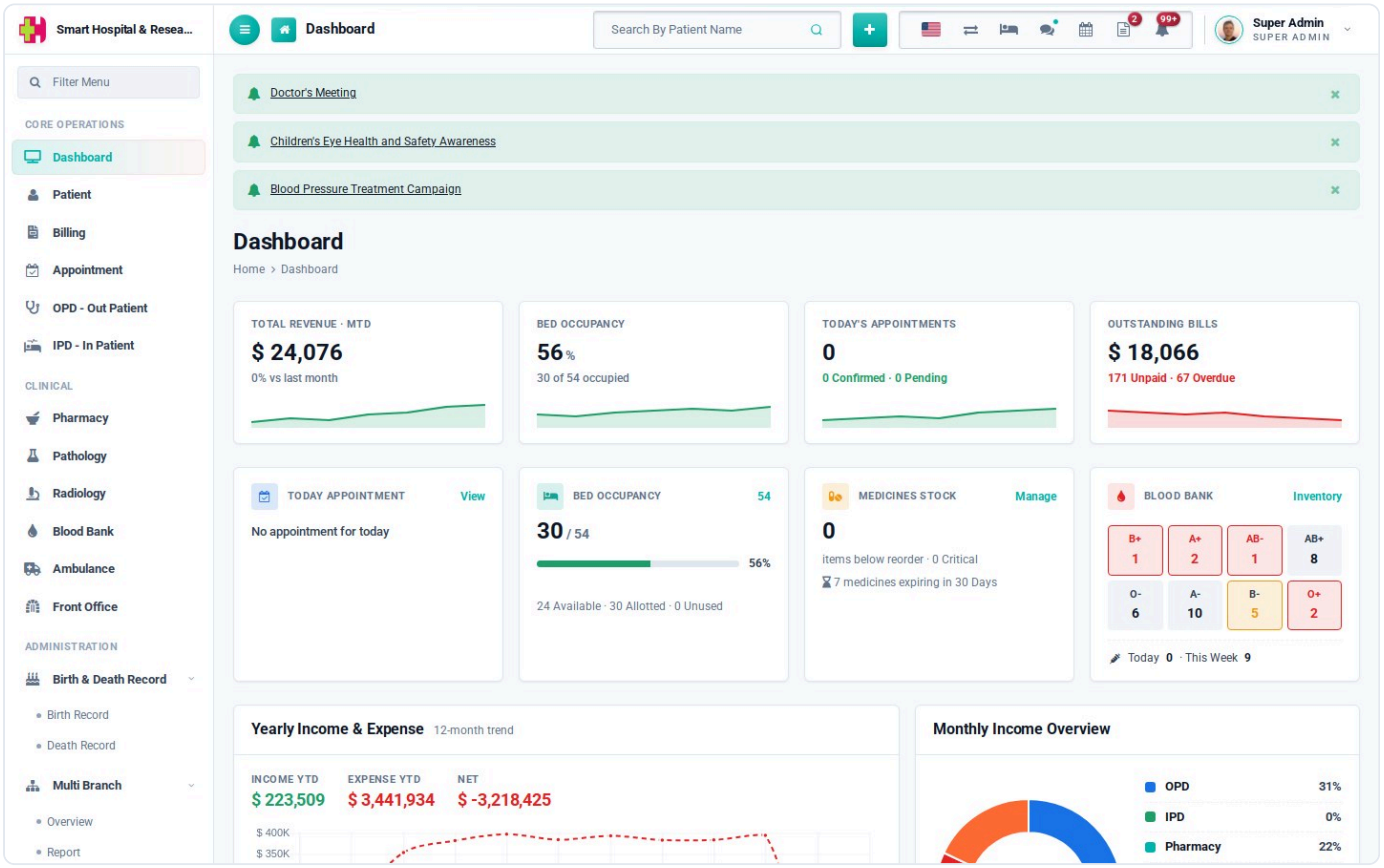
Key capabilities

- One dashboard aggregating revenue, bed occupancy, appointments, stock, blood bank and per-module income share.
- A single patient master index shared by OPD, IPD, billing, pharmacy, pathology and radiology.
- Appointment desk with doctor-wise slots, a queue/token view and online-appointment intake.
- OPD/IPD desks expose the whole clinical record: vitals, symptoms, ICD-10 diagnosis, prescription, lab and radiology orders and a timeline.

#	Screen	What it covers	Path
1	**Dashboard**	Role-aware landing page: KPI tiles (revenue MTD, bed occupancy, appointments, outstanding bills, medicine stock, blood-bank stock), a 12-month income-vs-expense trend, a module-wise income donut, the latest activity feed, staff attendance and module income table.	`/admin/admin/dashboard`
2	**Patient List**	Master patient index. Search, add or import patients, view disabled patients, open the full patient profile and jump straight into a bill.	`/admin/admin/search`
3	**Single Module Billing**	Billing workbench: single-module billing and OPD/IPD billing through a case ID, part payments, payment modes, discounting and printable receipts.	`/admin/bill/dashboard`
4	**Appointment**	Appointment desk with Today / Upcoming / Old tabs, doctor-wise and queue views, slot validation and online-appointment handling.	`/admin/appointment/index`
5	**OPD - Out Patient**	OPD desk: Today / Upcoming / Old visit lists plus the "New Visit" workflow (symptoms, ICD-10, prescription, investigations, charges) and the patient view.	`/admin/patient/search`
6	**IPD Patient**	IPD desk: admission, bed/ward allocation, consultant assignment, daily notes, medication, investigations, charges and discharge.	`/admin/patient/ipdsearch`

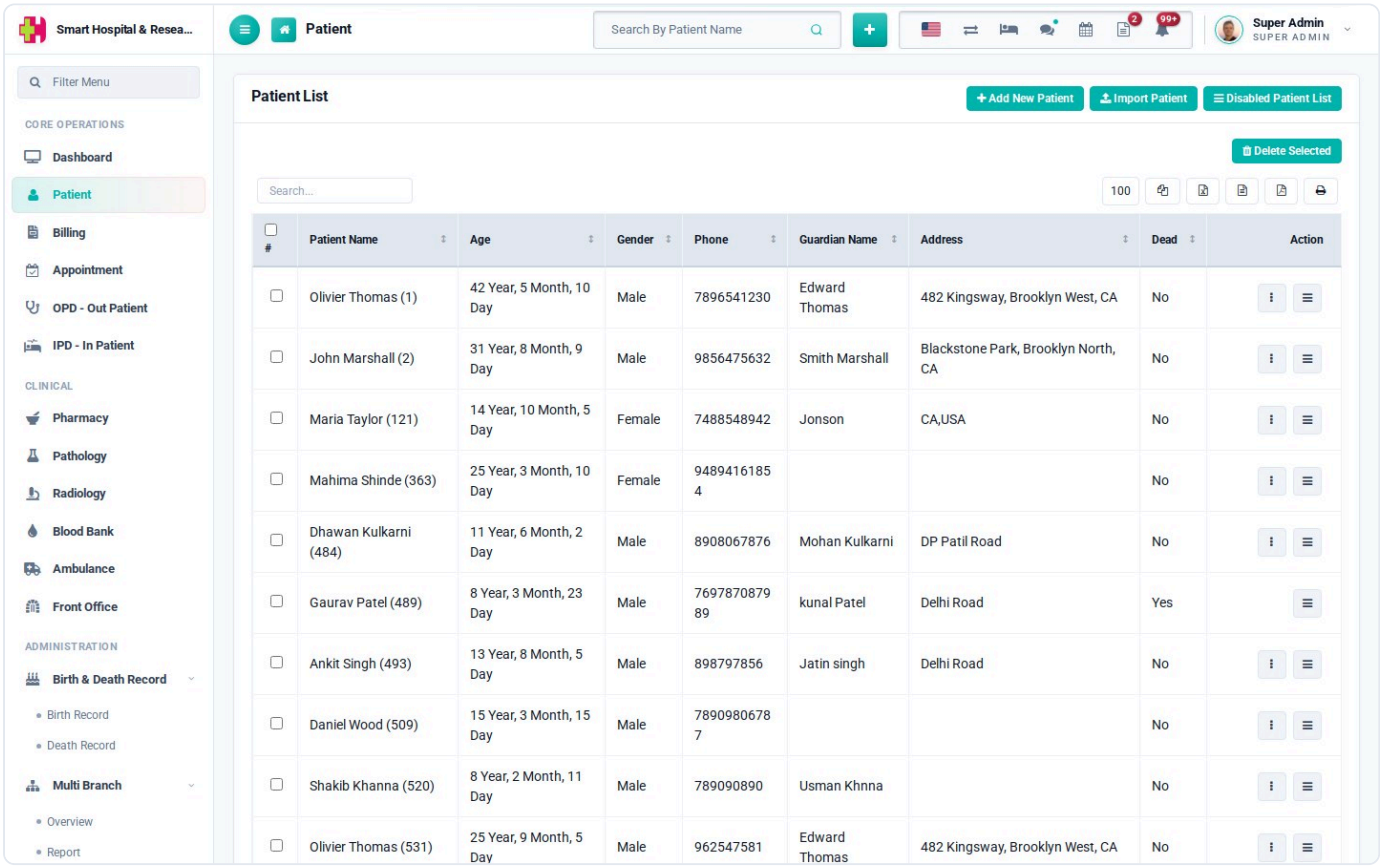
Screen 1.1 — Dashboard

- **Menu path:** Core Operations → Dashboard · **URL:** `/admin/admin/dashboard`
- **Purpose:** Role-aware landing page: KPI tiles (revenue MTD, bed occupancy, appointments, outstanding bills, medicine stock, blood-bank stock), a 12-month income-vs-expense trend, a module-wise income donut, the latest activity feed, staff attendance and module income table.
- **Grid (11 rows):** User | Action | Detail | Module | Amount | Time
- **Grid (10 rows):** Role | Total | Present | Attendance
- **Grid (10 rows):** Module | Income | Share | Last Month
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



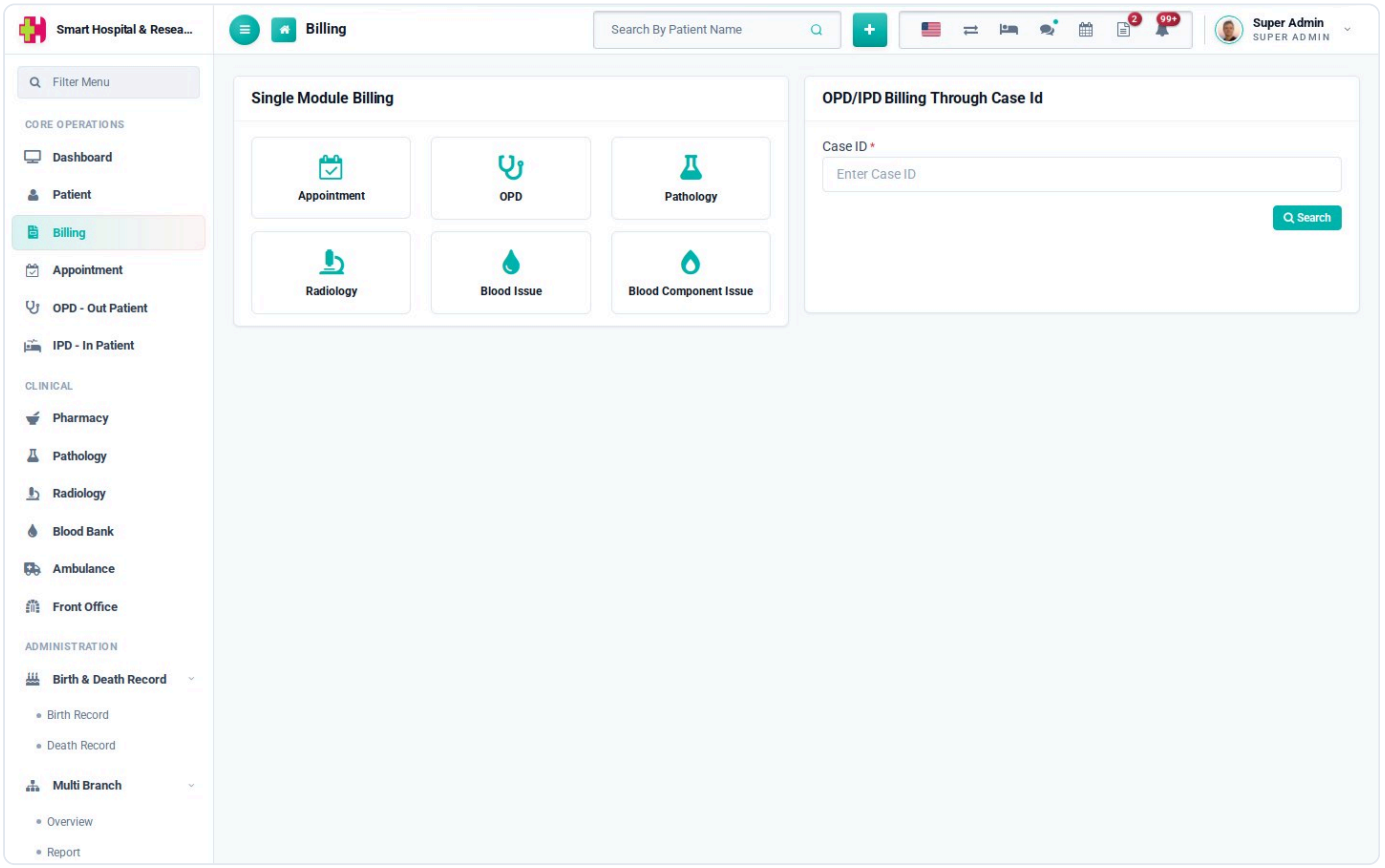
Screen 1.2 — Patient List

- **Menu path:** Core Operations → Patient · **URL:** `/admin/admin/search`
- **Purpose:** Master patient index. Search, add or import patients, view disabled patients, open the full patient profile and jump straight into a bill.
- **Grid (101 rows):** # | Patient Name | Age | Gender | Phone | Guardian Name | Address | Dead | Action
- **Panels on screen:** Patient List Add New Patient Import Patient Disabled Patient List
- **Actions:** 2, Add New Patient, Import Patient, Disabled Patient List, Delete Selected, Save, Update
- **Search / filters:** name, guardian_name, contact, gender, dob, Year, Month, Day, blood_group, marital_status
- **Form 1**: `Name *` (text); `Guardian Name` (text); `Phone` (text); `Gender` (select) — Male, Female; `Date Of Birth` (text); `Year` (text); `Month` (text); `Day` (text); `Blood Group` (select) — B+, A+, AB-, AB+, O-, A-; `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `Email` (text); `Address` (input); `National Identification Number` (input); `file` (file); `Remarks` (textarea); `Any Known Allergies` (textarea); `TPA` (select) — Medi life2, Medicare TPA Services (India), Family Health Plan (FHPL), Raksha Health Insurance, Paramount Health Services, LIFE MEDICAL INSURANCE; `TPA ID` (input); `TPA Validity` (input)
- **Form 2**: `Name *` (text); `Guardian Name` (text); `Phone` (text); `Gender` (select) — Male, Female; `Date Of Birth` (text); `Year` (text); `Month` (text); `Day` (text); `Blood Group` (select) — B+, A+, AB-, AB+, O-, A-; `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `Email` (text); `Address` (input); `National Identification Number` (input); `file` (file); `Remarks` (textarea); `Any Known Allergies` (textarea); `TPA` (select) — Medi life2, Medicare TPA Services (India), Family Health Plan (FHPL), Raksha Health Insurance, Paramount Health Services, LIFE MEDICAL INSURANCE; `TPA ID` (input); `TPA Validity` (input); `Alternate Number` (text)



Screen 1.3 — Single Module Billing

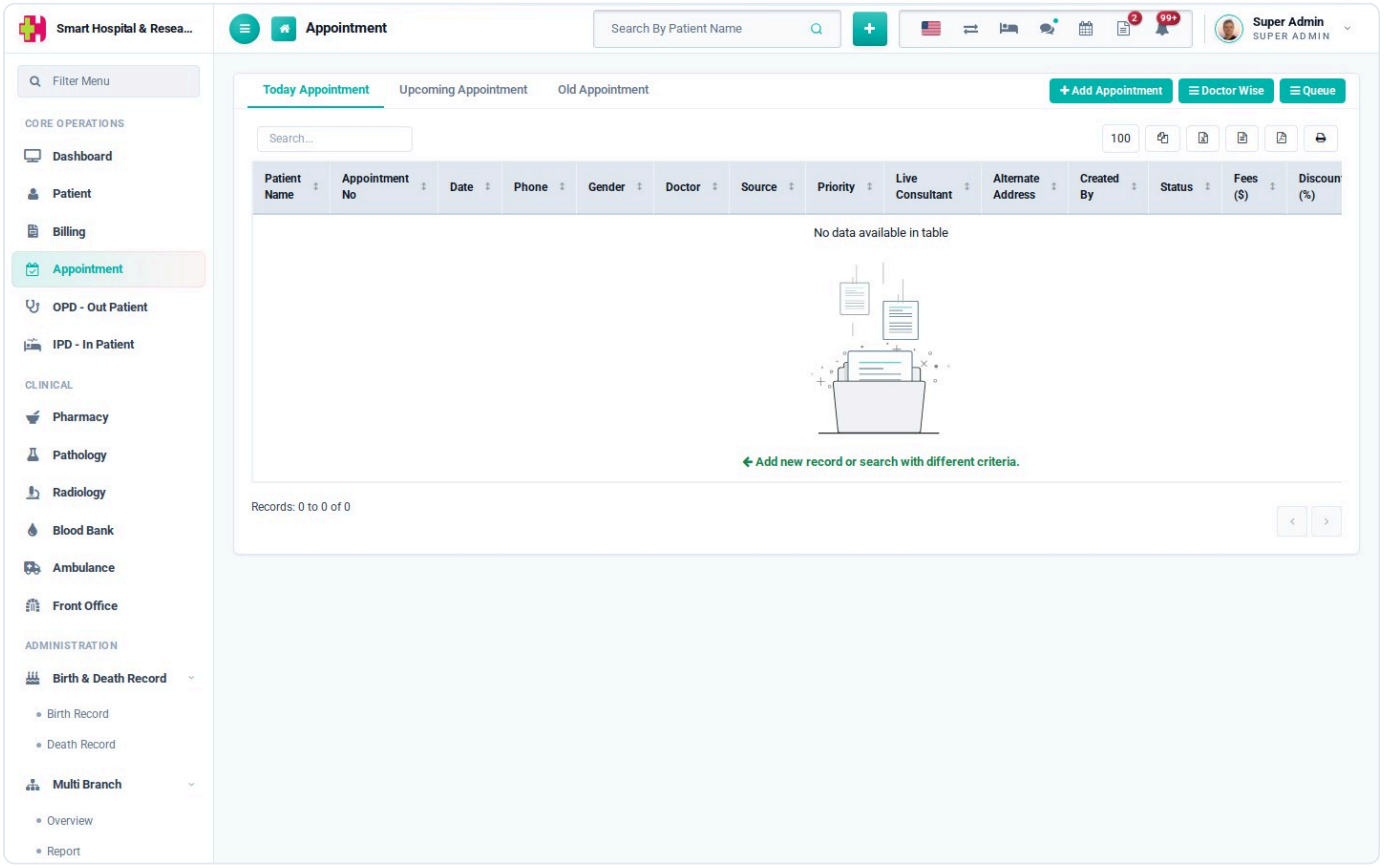
- **Menu path:** Core Operations → Billing · **URL:** `/admin/bill/dashboard`
- **Purpose:** Billing workbench: single-module billing and OPD/IPD billing through a case ID, part payments, payment modes, discounting and printable receipts.
- **Panels on screen:** Single Module Billing · OPD/IPD Billing Through Case Id
- **Actions:** 2, Search, Save, Update
- **Search / filters:** Enter Case ID, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/bill/dashboard`): `Case ID` (text)



Screen 1.4 — Appointment

- **Menu path:** Core Operations → Appointment · **URL:** `/admin/appointment/index`
- **Purpose:** Appointment desk with Today / Upcoming / Old tabs, doctor-wise and queue views, slot validation and online-appointment handling.
- **Tabs:** Today Appointment · Upcoming Appointment · Old Appointment
- **Grid (2 rows):** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address | Created By | Status
- **Grid (25 rows):** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address | Created By | Status
- **Grid (101 rows):** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address | Created By | Status
- **Panels on screen:** Today Appointment Upcoming Appointment Old Appointment Add Appointment Doctor Wise Queue
- **Actions:** 2, Today Appointment, Upcoming Appointment, Old Appointment, Add Appointment, Doctor Wise, Queue, New Patient, Save & Print, Save, Update
- **Search / filters:** patient_id, doctorid, amount, global_shift, date, slot, priority, appointment_status, discount_percentage, live_consult
- **Form 1**: `patient_id` (select); `Doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Doctor Fees ($)` (text); `Shift` (select); `Appointment Date` (text); `Slot` (select); `Appointment Priority` (select) — Normal, Urgent, Very Urgent, Low; `Status *` (select) — Pending, Approved, Cancel; `Discount Percentage` (text); `Live Consultant (On Video Conference)` (select) — No, Yes; `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; `Message` (textarea); `Cheque No` (text); `Cheque Date` (text); `document` (file); `Alternate Address` (textarea)

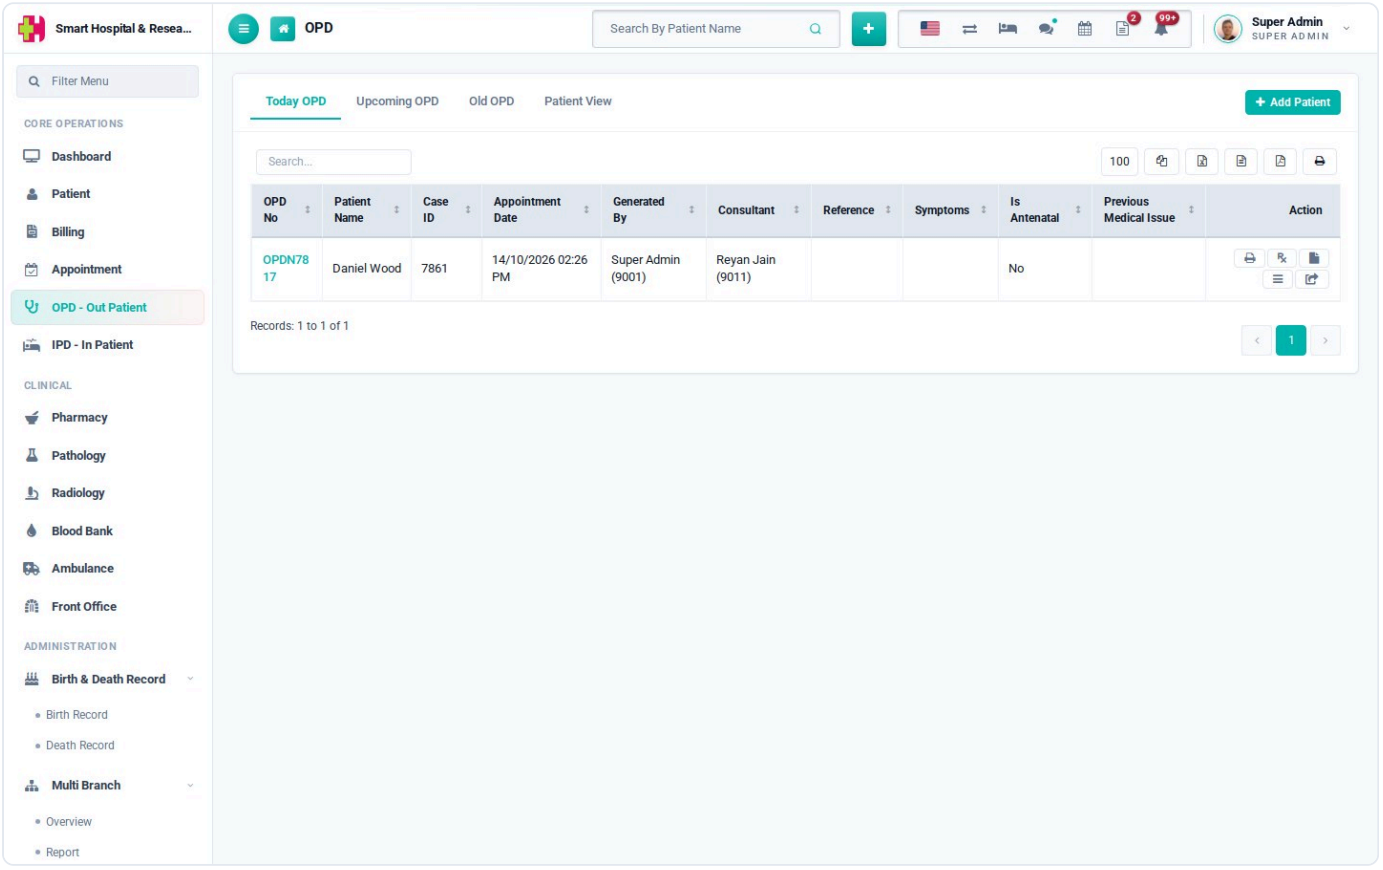
- **Form 2**: `Doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Doctor Fees ($)` (text); `Shift` (select); `Appointment Date` (text); `Slot` (select); `Appointment Priority` (select) — Normal, Urgent, Very Urgent, Low; `Discount Percentage` (text); `Status *` (select) — Pending, Approved, Cancel; `Live Consultant (On Video Conference)` (select) — No, Yes; `Message` (textarea)
- **Form 3**: `Name *` (text); `Guardian Name` (text); `Phone` (text); `Gender` (select) — Male, Female; `Date Of Birth` (text); `Year` (text); `Month` (text); `Day` (text); `Blood Group` (select) — B+, A+, AB-, AB+, O-, A-; `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `Email` (text); `Address` (input); `National Identification Number` (input); `file` (file); `Remarks` (textarea); `Any Known Allergies` (textarea); `TPA` (select) — Medi life2, Medicare TPA Services (India), Family Health Plan (FHPL), Raksha Health Insurance, Paramount Health Services, LIFE MEDICAL INSURANCE; `TPA ID` (input); `TPA Validity` (input); `Alternate Number` (text)



Screen 1.5 — OPD - Out Patient

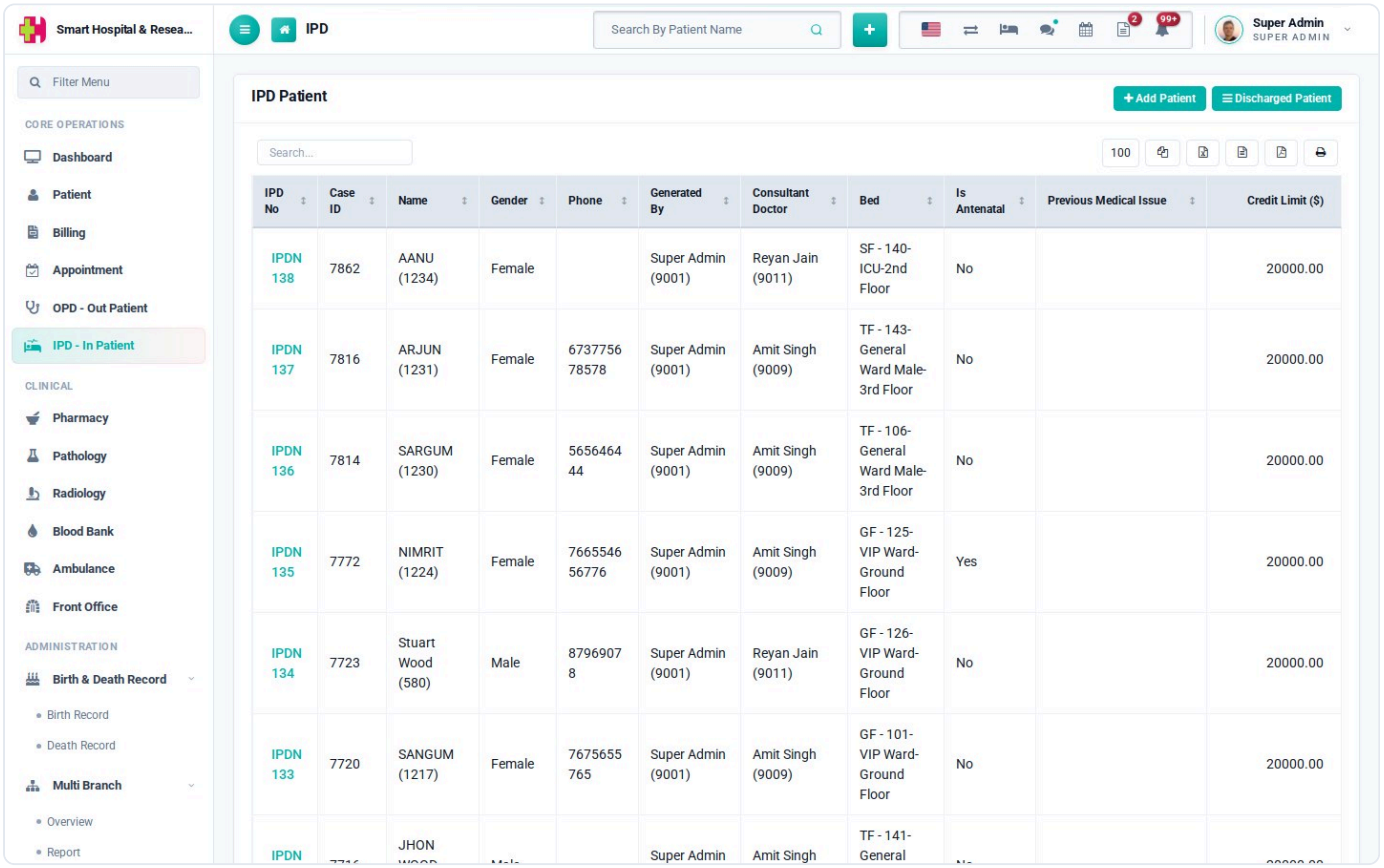
- **Menu path:** Core Operations → OPD - Out Patient · **URL:** `/admin/patient/search`
- **Purpose:** OPD desk: Today / Upcoming / Old visit lists plus the "New Visit" workflow (symptoms, ICD-10, prescription, investigations, charges) and the patient view.
- **Tabs:** Today OPD · Upcoming OPD · Old OPD · Patient View
- **Grid (96 rows):** Name | Patient Id | Guardian Name | Gender | Phone | Generated By | Consultant | Last Visit | Is Antenatal | Total Recheckup
- **Grid (2 rows):** OPD No | Patient Name | Case ID | Appointment Date | Generated By | Consultant | Reference | Symptoms | Is Antenatal | Previous Medical Issue | Action
- **Panels on screen:** Today OPD Upcoming OPD Old OPD Patient View Add Patient
- **Actions:** 2, Today OPD, Upcoming OPD, Old OPD, Patient View, Add Patient, New Patient, Save & Print, Save, Move, Update

- **Search / filters:** symptoms_type, icd_code_ids[], appointment_date, case, casualty, old_patient, refference, consultant_doctor, charge_category, charge_id
- **Form 1** (posts to `/admin/patient`): `field` (select); `symptoms_type` (select) — Eating or weight problems, Emotional problems, Muscle or joint problems, Skin problems, Bladder problems, Stomach problems; `field` (text); `Symptoms Description` (textarea); `ICD Group` (select) — Select Group, Infectious & Parasitic Diseases, Infectious Diseases, Mental & Behavioural Disorders, Neoplasms, Viral Diseases; `ICD-10 Diagnosis` (select) — [A09] Infectious Gastroenteritis, [A15.0] Pulmonary Tuberculosis, [B34.9] Viral Infection, Unspecified, [C50.9] Malignant Neoplasm of Breast, [F41.1] Generalized Anxiety Disorder; `Note` (textarea); `Any Known Allergies` (textarea); `Previous Medical Issue` (textarea); `Appointment Date *` (text); `case` (text); `casualty` (select) — No, Yes; `old_patient` (select) — No, Yes; `refference` (text); `Apply TPA` (checkbox); `consultant_doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Charge Category` (select) — OPD Consultation Fees, OPD Service, OPD Insurance, Blood pressure check, Eye check, Cholesterol level check; `Charge *` (select); `Standard Charge ($)` (text); `Applied Charge ($) *` (text); `discount_percentage` (text); `percentage` (text); … +8 more
- **Form 2**: `Name` (text); `Guardian Name` (text); `Gender` (select) — Male, Female; `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `file` (file); `Any Known Allergies` (text); `Phone` (text); `Blood Group` (select) — B+, A+, AB-, AB+, O-, A-; `Age` (text); `Month` (text)
- **Form 3**: `Symptoms Type` (select) — Eating or weight problems, Emotional problems, Muscle or joint problems, Skin problems, Bladder problems, Stomach problems; `field` (text); `Symptoms Description` (textarea); `Note` (textarea); `Any Known Allergies` (textarea); `Appointment Date` (text); `Case` (text); `Casualty` (select) — No, Yes; `Old Patient` (select) — No, Yes; `Reference` (text); `Consultant Doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Payment Date` (text); `Amount ($)` (text); `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; `Payment Note` (text); `Cheque No` (text); `Cheque Date` (text); `document` (file); `is_for_antenatal` (checkbox)



Screen 1.6 — IPD Patient

- **Menu path:** Core Operations → IPD - In Patient · **URL:** `/admin/patient/ipdsearch`
- **Purpose:** IPD desk: admission, bed/ward allocation, consultant assignment, daily notes, medication, investigations, charges and discharge.
- **Grid (40 rows):** IPD No | Case ID | Name | Gender | Phone | Generated By | Consultant Doctor | Bed | Is Antenatal | Previous Medical Issue | Credit Limit ($)
- **Panels on screen:** IPD Patient Add Patient Discharged Patient
- **Actions:** 2, Add Patient, Discharged Patient, New Patient, Save, Update
- **Search / filters:** symptoms_type, icd_code_ids[], custom_fields[ipd][6], appointment_date, case, showorganisation_name, casualty, old_patient, credit_limit, refference
- **Form 1** (posts to `/admin/patient/add_inpatient`): `field` (select); `Symptoms Type` (select) — Eating or weight problems, Emotional problems, Muscle or joint problems, Skin problems, Bladder problems, Stomach problems; `Select` (text); `Symptoms Description` (textarea); `ICD-10 Groups` (select) — Select Group, Infectious & Parasitic Diseases, Infectious Diseases, Mental & Behavioural Disorders, Neoplasms, Viral Diseases; `ICD-10 Diagnosis` (select) — [A09] Infectious Gastroenteritis, [A15.0] Pulmonary Tuberculosis, [B34.9] Viral Infection, Unspecified, [C50.9] Malignant Neoplasm of Breast, [F41.1] Generalized Anxiety Disorder; `Note` (textarea); `Previous Medical Issue` (text); `Admission Date *` (text); `Case` (text); `TPA` (text); `Casualty` (select) — Yes, No; `Old Patient` (select) — Yes, No; `Credit Limit ($) *` (text); `Reference` (text); `Consultant Doctor *` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Bed Group` (select) — VIP Ward - Ground Floor, Private Ward - 3rd Floor, General Ward Male - 3rd Floor, ICU - 2nd Floor, NICU - 2nd Floor, AC (Normal) - 1st Floor; `Bed Number *` (select); `Live Consultation` (select) — No, Yes; `Is For Antenatal` (checkbox)
- **Form 2**: `Patient ID` (text); `Name` (text); `Phone` (text); `Appointment Date` (text); `revisit_case` (text); `casualty` (select) — Yes, No; `old_patient` (select) — Yes, No; `Symptoms` (textarea); `Any Known Allergies` (textarea); `Address` (textarea); `Note` (textarea); `refference` (text); `consultant_doctor` (select) — Amit Singh, Reyan Jain, Sansa Gomez, Sonia Bush; `Amount` (text); `Tax` (text); `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other
- **Form 3**: `Name` (text); `Guardian Name` (text); `Gender` (select) — Male, Female; `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `Phone` (text); `file` (file); `Symptoms` (text); `Blood Group` (select) — B+, A+, AB-, AB+, O-, A-; `Year` (text); `Month` (text); `Height` (text); `Weight` (text); `organisation` (select) — Medi life2, Medicare TPA Services (India), Family Health Plan (FHPL), Raksha Health Insurance, Paramount Health Services, LIFE MEDICAL INSURANCE; `credit_limit` (text)



Module 1 — data-entry dialogs captured

2.2 Clinical & Ancillary Services

The departments that raise bills and reports against a patient: pharmacy, laboratory, imaging, blood bank, ambulance and front office.

Key capabilities

- Pharmacy store and sale workflow with batch, expiry, GST, discount and stock movement.
- Pathology and radiology: order → sample/procedure → result entry → report generation → print/PDF, single or in batch.
- Blood-bank stock by component and group, donor registry and issue to patient.
- Ambulance call register with vehicle/driver assignment and trip charges.
- Front office covers visitors, phone call logs, postal dispatch and complaints.

#	Screen	What it covers	Path
1	**Pharmacy Bill**	Pharmacy point of sale: batch-wise issue, GST, discounts, stock deduction and printable bill.	`/admin/pharmacy/bill`
2	**Pathology Bill**	Laboratory worklist: order intake, sample collection, result entry/approval and single or batch report generation.	`/admin/pathology/gettestreportbatch`
3	**Radiology Bill**	Imaging worklist: order intake, scheduling, findings entry and batch report generation.	`/admin/radio/gettestreportbatch`
4	**Blood Bank**	Blood bank: component stock by group, donor registry, issue to patient and status board.	`/admin/bloodbankstatus/`
5	**Ambulance Call List**	Ambulance call register with vehicle/driver, trip details and charges.	`/admin/vehicle/getcallambulance`
6	**Visitor List**	Reception toolkit: visitor pass, phone call log, postal register and complaints.	`/admin/visitors`

Screen 2.1 — Pharmacy Bill

- **Menu path:** Clinical → Pharmacy · **URL:** `/admin/pharmacy/bill`
- **Purpose:** Pharmacy point of sale: batch-wise issue, GST, discounts, stock deduction and printable bill.
- **Grid (101 rows):** Bill No | Case ID | Date | Patient Name | Generated By | Doctor Name | Amount ($) | Discount ($) | Tax ($) | Net Amount ($) | Paid Amount ($) | Refund Amount ($)
- **Panels on screen:** Pharmacy Bill Generate Bill Sale Return Sale Return Bills Medicines
- **Actions:** 2, Generate Bill, Sale Return, Sale Return Bills, Medicines, New Patient, Save & Print, Save, Update

2.3 Administration & HR

Back office: legal registers, multi-branch operation, staff HR, attendance, rosters, referrals, insurance/TPA and the finance ledger.

Key capabilities

- Birth and death registers with the fields needed for statutory certificates.
- Multi-branch console: consolidated overview, branch comparison report and branch master with header switching.
- HR: staff directory, roles, payroll, leaves, QR-code attendance and duty roster report.
- Referral commission ledger and TPA/insurance register.
- Income and expense ledgers that feed the finance reports and the dashboard.

#	Screen	What it covers	Path
1	**Birth Record**	Birth & Death Record › Birth Record	`/admin/birthordeath`
2	**Death Record**	Birth & Death Record › Death Record	`/admin/birthordeath/death`

2.4 Communication, Content & Certificates

Everything that talks to people or produces a document: surveys, notice board, downloads, inventory, ID cards, certificates, the public website CMS and telemedicine.

Key capabilities

- Survey/questionnaire builder with per-role assignment and response collection.
- Notice board / messaging with audience targeting and attachments.
- Download center for sharing documents with staff, patients and the public site.
- Certificate generator plus patient and staff ID cards driven by templates.
- Front CMS that drives the public hospital website (pages, banners, news, gallery, contact).
- Zoom-based live consultation and internal live meetings.

#	Screen	What it covers	Path
1	**Survey Forms**	Survey builder: create questionnaires, assign them to roles/departments and read responses.	`/admin/survey`
2	**Survey Forms › My Survey Forms**	The signed-in staff member's own survey forms.	`/admin/survey/staff_forms`
3	**Notice Board**	Notice board for staff/patients with audience targeting and attachments.	`/admin/notification`
4	**Item Stock List**	Item stock control: categories, suppliers, issue and return, stock ledger and reorder levels.	`/admin/itemstock`
5	**Upload /Share Content**	Upload/share documents with staff, patients or the public site, with content type and audience.	`/admin/content/upload`
6	**Content Share List**	Everything shared so far, with filters and download counters.	`/admin/content/list`
7	**Content Type**	Content type master used when uploading shared content.	`/admin/contenttype/`
8	**Generate Certificate**	Certificate generator: pick module and discharged patients, choose a template and generate single or bulk certificates.	`/admin/generatecertificate`
9	**Generate Patient ID Card**	Patient ID-card generation from templates with photo and MR number.	`/admin/generatepatientidcard/`
10	**Generate Staff ID Card**	Staff ID-card generation from templates.	`/admin/generatestaffidcard/`
11	**Page List**	Website content management: pages, banners, news, gallery, contact and SEO for the public site.	`/admin/front/page`

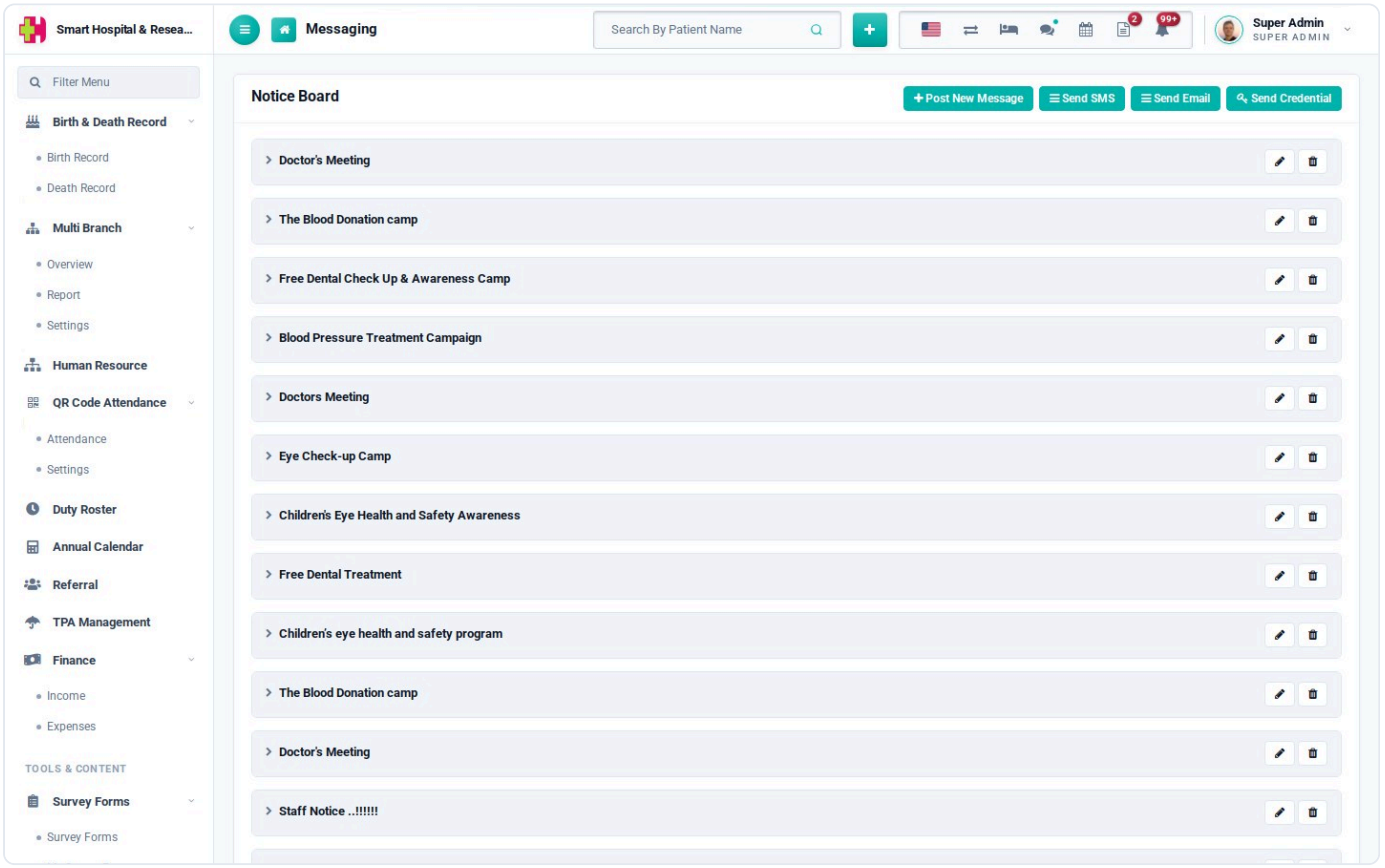
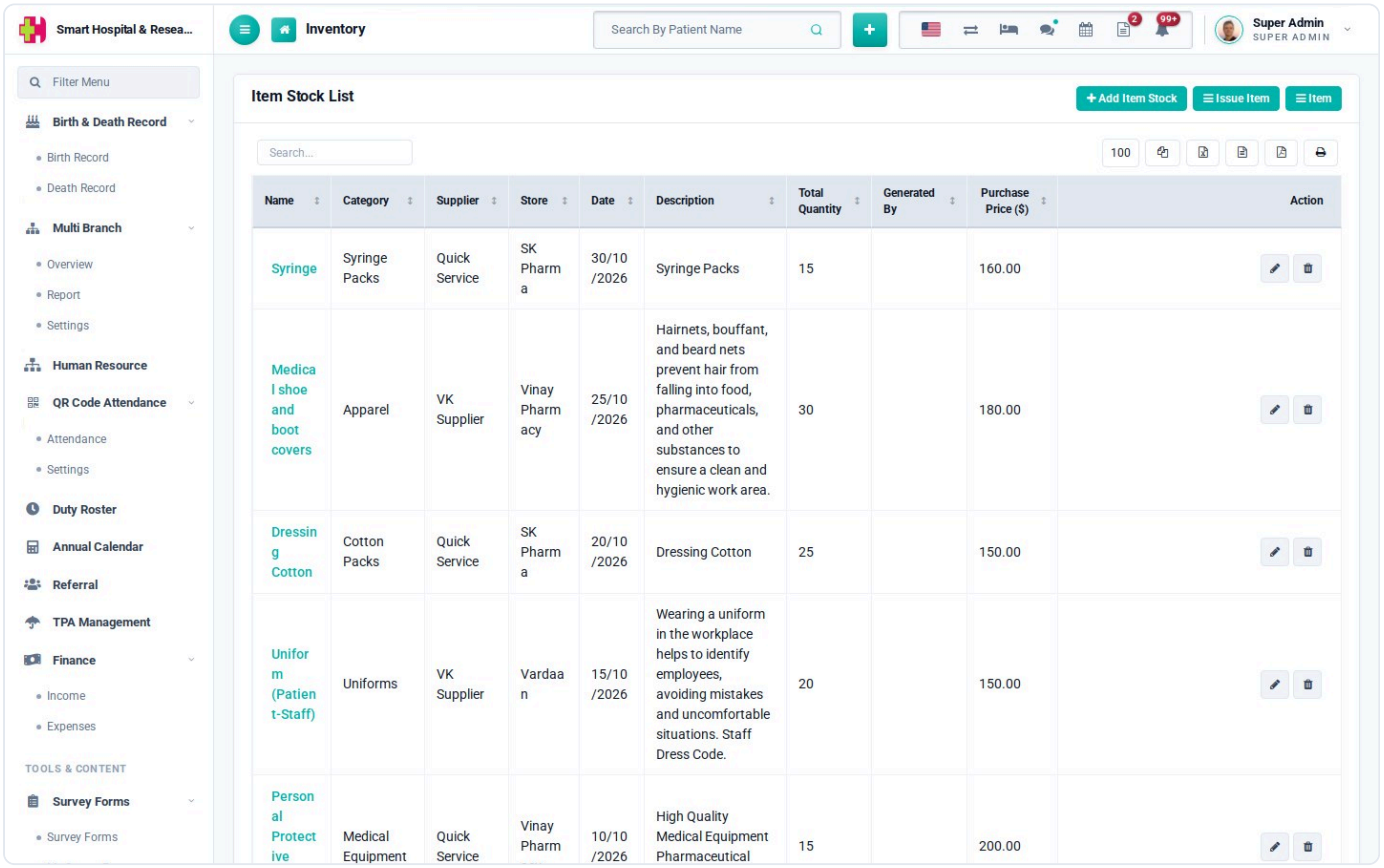
- **Panels on screen:** Notice Board Post New Message Send SMS Send Email Send Credential
- **Actions:** 2, Post New Message, Send SMS, Send Email, Send Credential, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



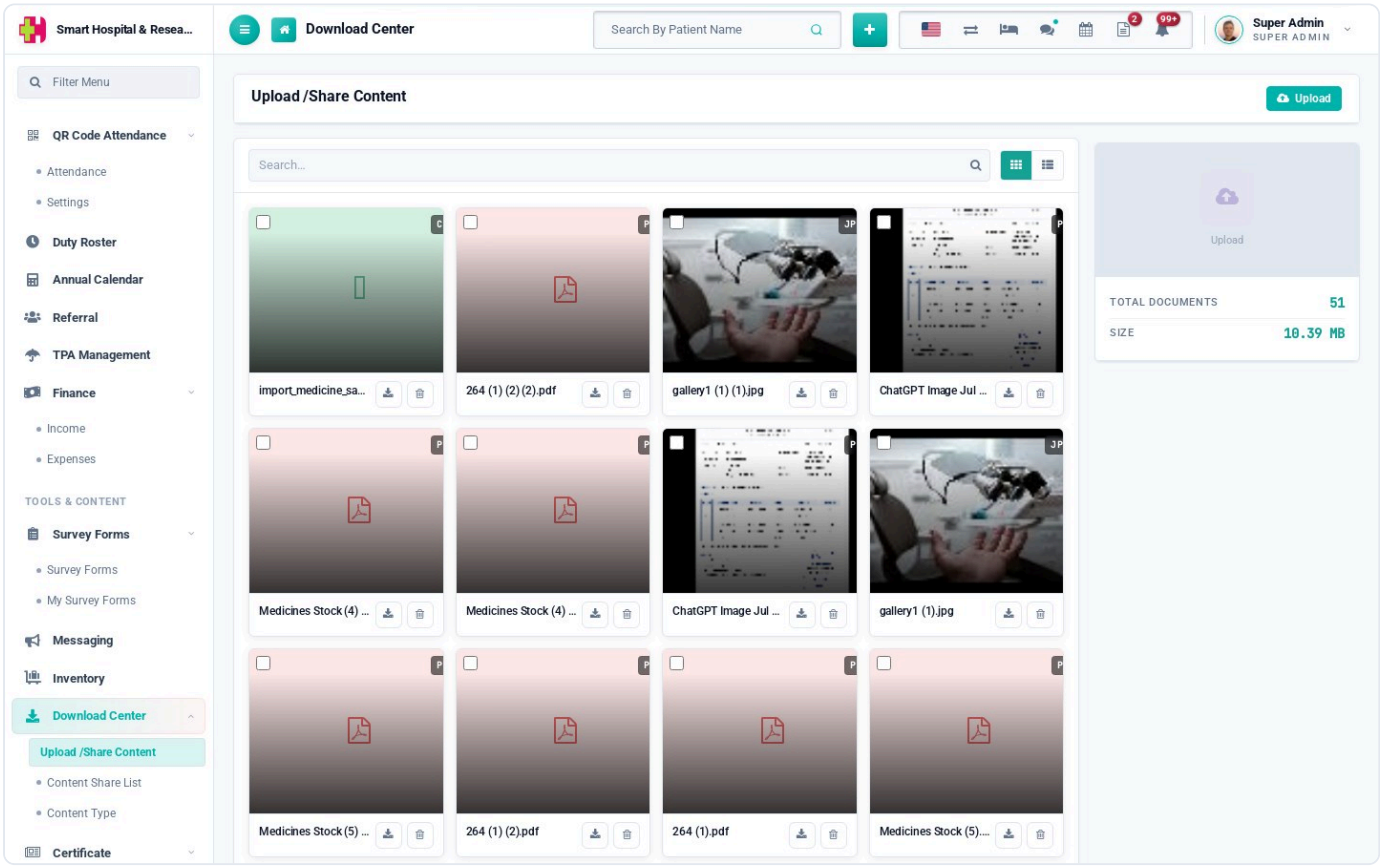
Screen 4.4 — Item Stock List

- **Menu path:** Tools & Content → Inventory · **URL:** `/admin/itemstock`
- **Purpose:** Item stock control: categories, suppliers, issue and return, stock ledger and reorder levels.
- **Grid (74 rows):** Name | Category | Supplier | Store | Date | Description | Total Quantity | Generated By | Purchase Price ($) | Action
- **Panels on screen:** Item Stock List Add Item Stock Issue Item Item
- **Actions:** 2, Add Item Stock, Issue Item, Item, +, Save, Update
- **Search / filters:** item_category_id, item_id, supplier_id, store_id, quantity, purchase_price, date, item_category_id, item_id, supplier_id
- **Form 1** (posts to `/admin/itemstock/add`): `Item Category *` (select) — Syringe Packs, Cotton Packs, Medical Equipment, Bed Sheets, Uniforms, Surgical blades; `Item *` (select); `Supplier *` (select) — VK Supplier, Quick Service; `Store` (select) — SK Pharma, Vinay Pharmacy, Vardaan; `quantity` (text); `Purchase Price *` (text); `Date` (text); `Description` (textarea); `item_photo` (file)



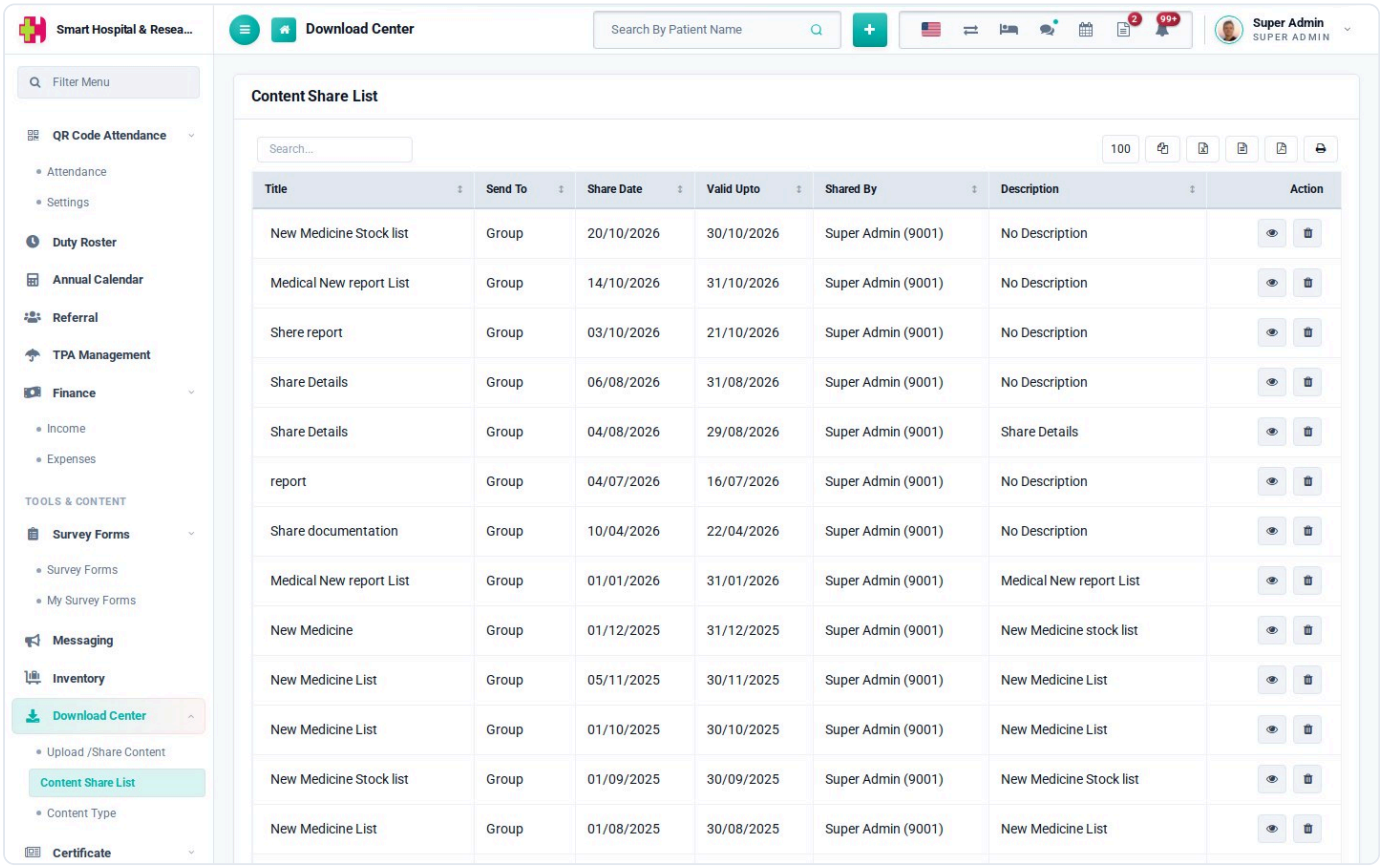
Screen 4.5 — Upload /Share Content

- **Menu path:** Tools & Content → Download Center › Upload /Share Content · **URL:** `/admin/content/upload`
- **Purpose:** Upload/share documents with staff, patients or the public site, with content type and audience.
- **Grid (13 rows):** # | Document | Content Type | Size | Upload By | Created On | Action
- **Panels on screen:** Upload /Share Content Upload
- **Actions:** 2, Upload, Share, Save, Generate Url, Select, Add, Send, Delete, Update
- **Search / filters:** Search..., name, content_type, content_type, https://youtube.com/..., title, share_date, valid_upto, title, share_date
- **Form 1** (posts to `/#`): `Search…` (text)
- **Form 2** (posts to `/admin/content/ajaxupdate`): `File Name *` (text); `Content Type *` (select) — Medical Report, medical Equipment, Medicine Stock List, Hospital Service
- **Form 3** (posts to `/admin/content/ajaxupload`): `Content Type *` (select) — Medical Report, medical Equipment, Medicine Stock List, Hospital Service; `upload[]` (file); `Upload Youtube Video Link` (text)



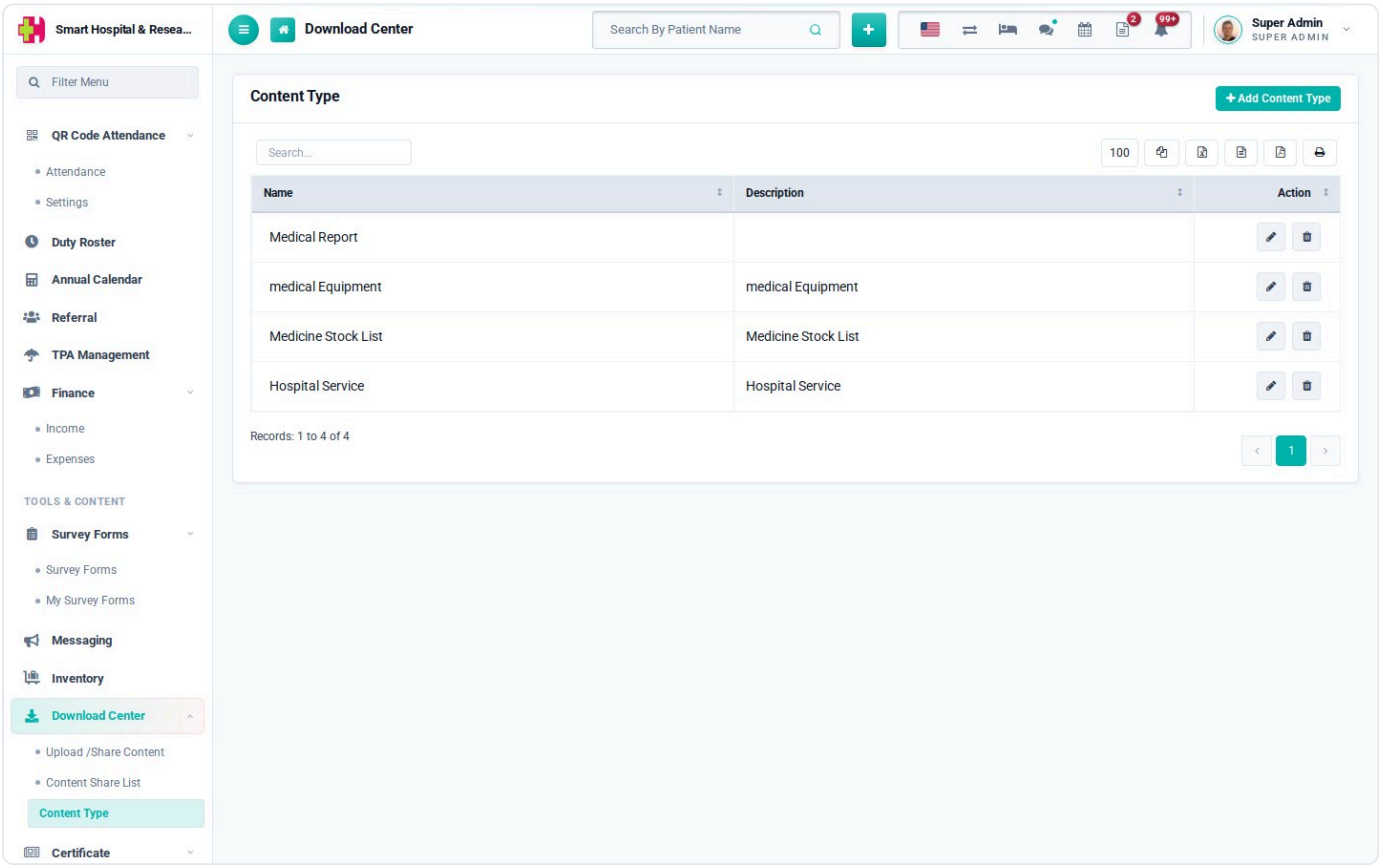
Screen 4.6 — Content Share List

- **Menu path:** Tools & Content → Download Center › Content Share List · **URL:** `/admin/content/list`
- **Purpose:** Everything shared so far, with filters and download counters.
- **Grid (21 rows):** Title | Send To | Share Date | Valid Upto | Shared By | Description | Action
- **Panels on screen:** Content Share List
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



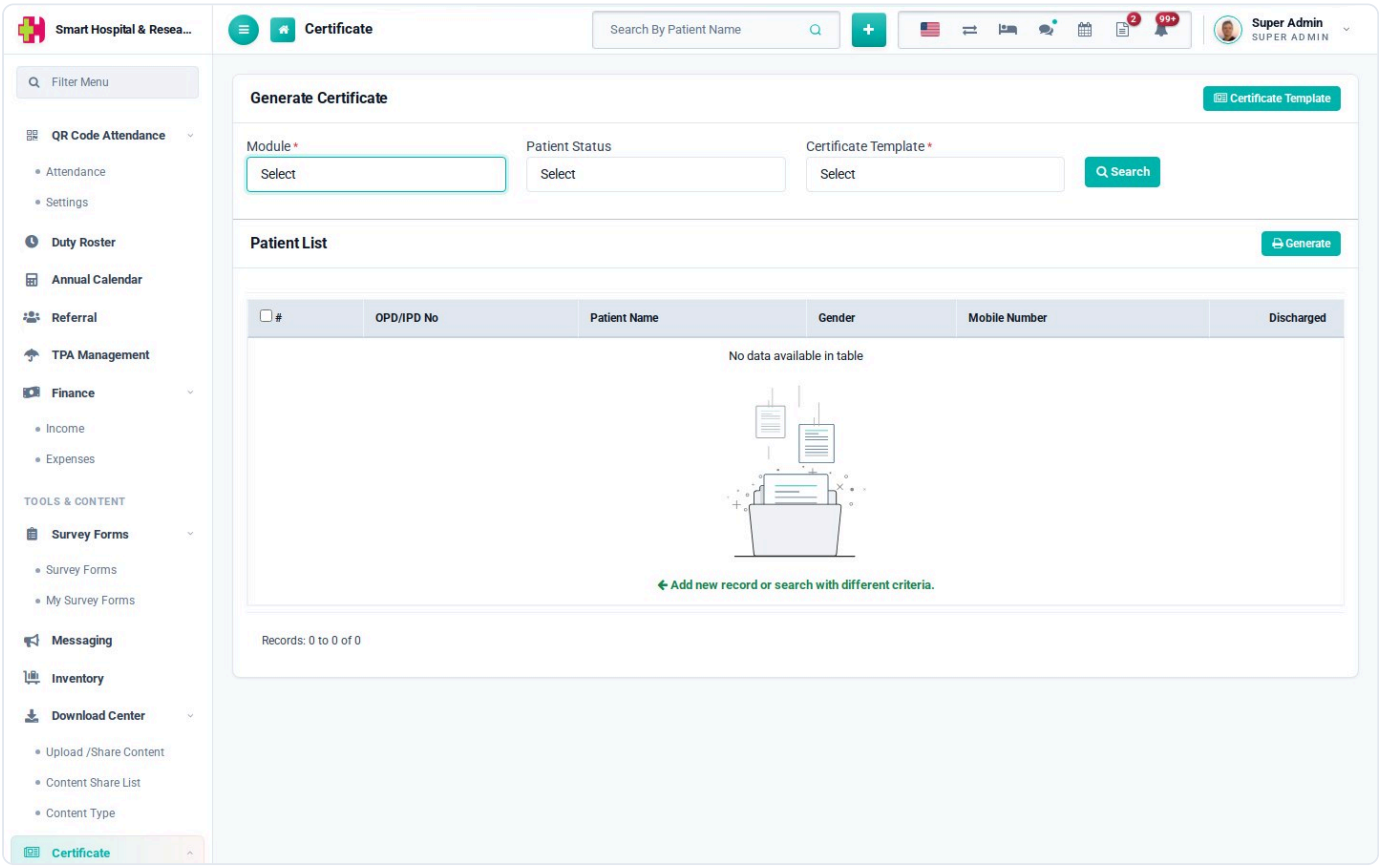
Screen 4.7 — Content Type

- **Menu path:** Tools & Content → Download Center › Content Type · **URL:** `/admin/contenttype/`
- **Purpose:** Content type master used when uploading shared content.
- **Grid (5 rows):** Name | Description | Action
- **Panels on screen:** Content Type Add Content Type
- **Actions:** 2, Add Content Type, Save, Update
- **Search / filters:** name, name, description, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/contenttype/add`): `Name` (text); `Description` (textarea)



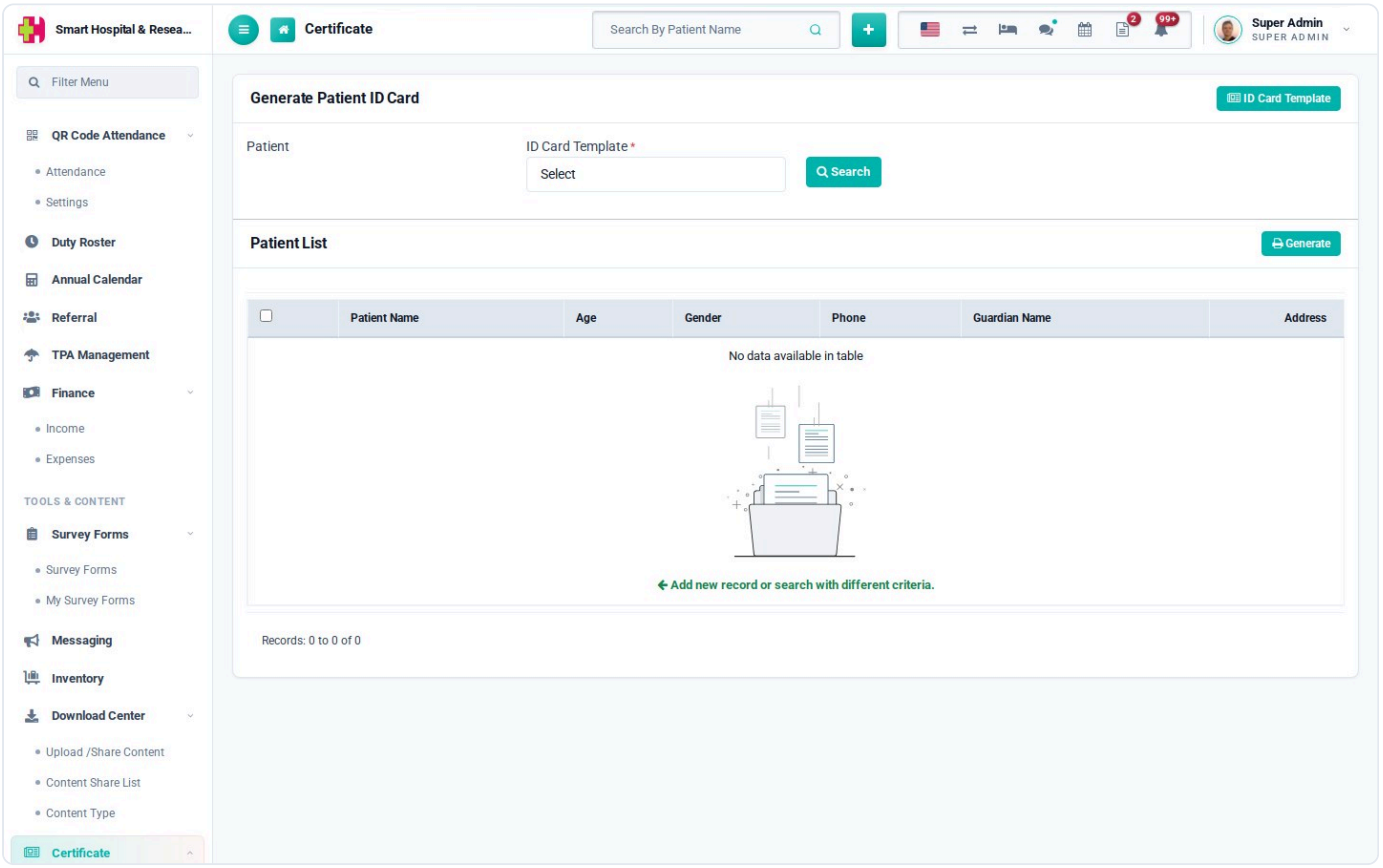
Screen 4.8 — Generate Certificate

- **Menu path:** Tools & Content → Certificate › Certificate · **URL:** `/admin/generatecertificate`
- **Purpose:** Certificate generator: pick module and discharged patients, choose a template and generate single or bulk certificates.
- **Grid (2 rows):** # | OPD/IPD No | Patient Name | Gender | Mobile Number | Discharged
- **Panels on screen:** Generate Certificate Certificate Template · Patient List Generate
- **Actions:** 2, Certificate Template, Search, Generate, Save, Update
- **Search / filters:** module, patient_status, certificate_id, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/generatecertificate/search`): `Module` (select) — OPD, IPD; `Patient Status` (select) — Not Discharged, Discharged; `Certificate Template` (select) — Sample Patient File Cover, Certificate Template
- **Form 2** (posts to `/admin/generatecertificate/generatemultiple`): `field` (checkbox)



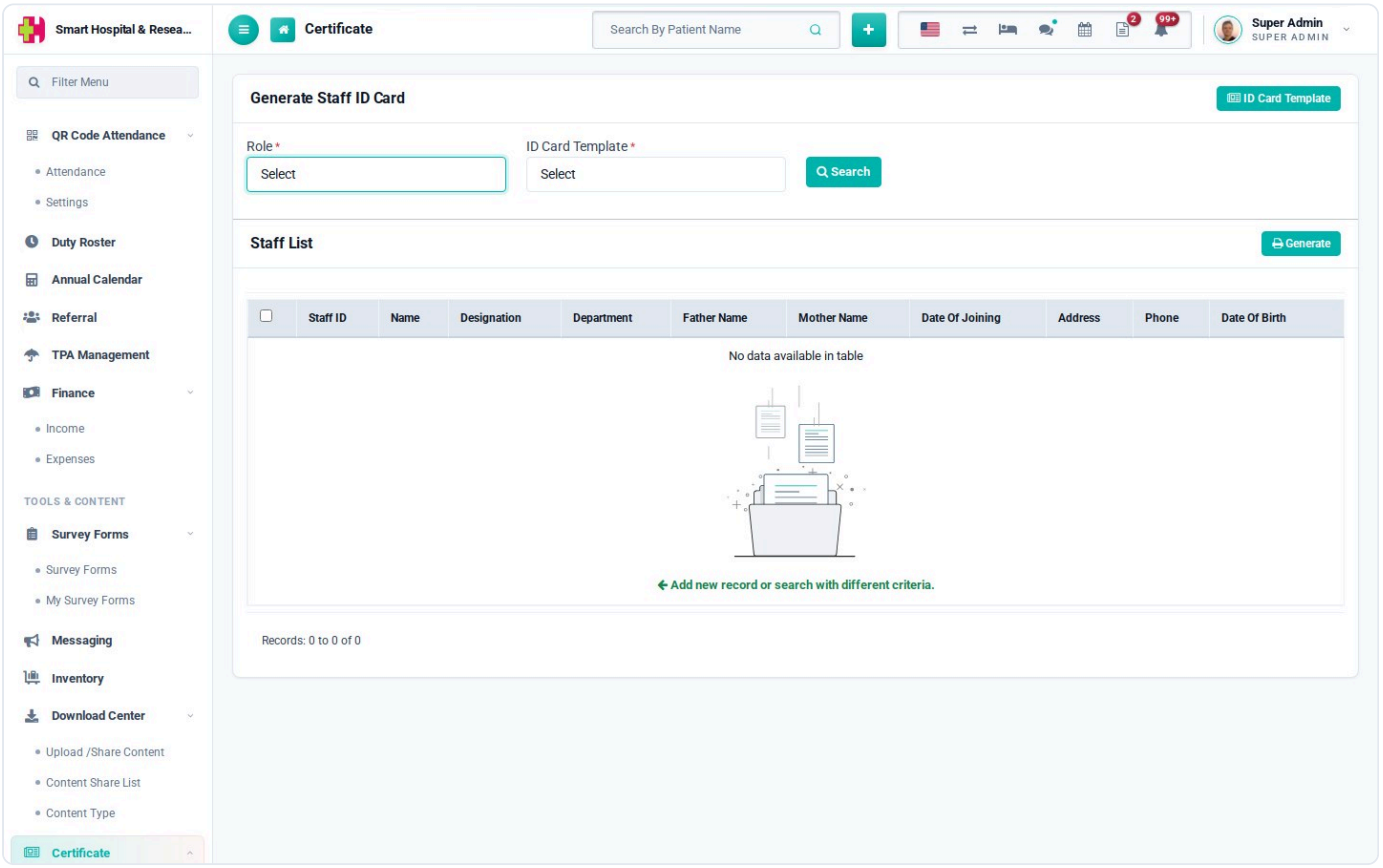
Screen 4.9 — Generate Patient ID Card

- **Menu path:** Tools & Content → Certificate › Patient ID Card · **URL:** `/admin/generatepatientidcard/`
- **Purpose:** Patient ID-card generation from templates with photo and MR number.
- **Grid (2 rows):** Patient Name | Age | Gender | Phone | Guardian Name | Address
- **Panels on screen:** Generate Patient ID Card ID Card Template · Patient List Generate
- **Actions:** 2, ID Card Template, Search, Generate, Save, Update
- **Search / filters:** patient_id, patient_id_card, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1**: `Patient` (select) — All, AADI(1171), Aadi jain(1179), Aadish Mody(1072), AANU(1233), AANU(1234); `ID Card Template` (select) — Sample Patient Id Card, Patient Id Card
- **Form 2** (posts to `/admin/Generatepatientidcard/generatemultiple`): `field` (checkbox)



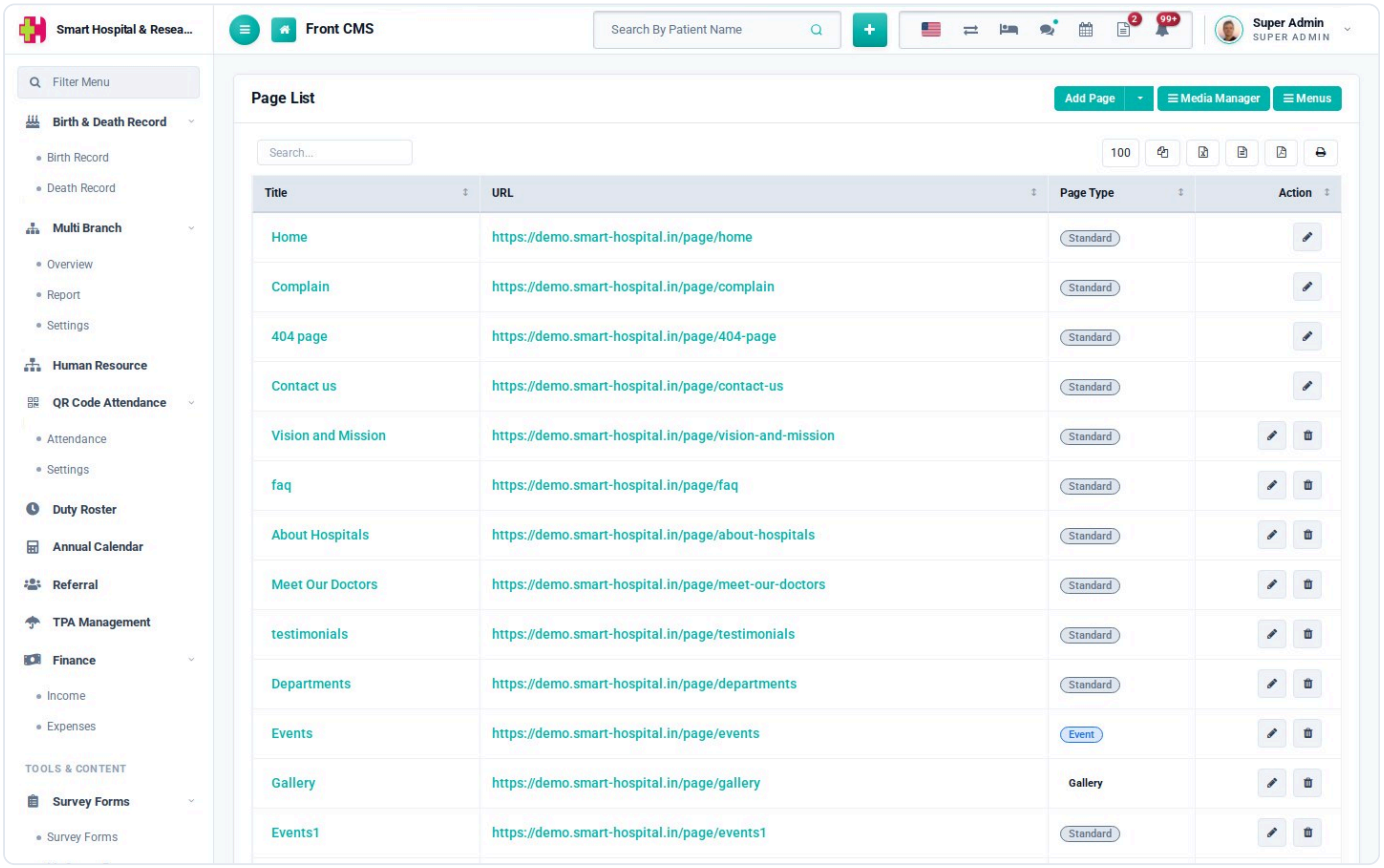
Screen 4.10 — Generate Staff ID Card

- **Menu path:** Tools & Content → Certificate › Staff ID Card · **URL:** `/admin/generatestaffidcard/`
- **Purpose:** Staff ID-card generation from templates.
- **Grid (2 rows):** Staff ID | Name | Designation | Department | Father Name | Mother Name | Date Of Joining | Address | Phone | Date Of Birth
- **Panels on screen:** Generate Staff ID Card ID Card Template · Staff List Generate
- **Actions:** 2, ID Card Template, Search, Generate, Save, Update
- **Search / filters:** role_id, id_card, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1**: `Role` (select) — Admin, Accountant, Doctor, Pharmacist, Pathologist, Radiologist; `ID Card Template` (select) — Sample Staff Id Card, Staff Id Card
- **Form 2** (posts to `/admin/generatestaffidcard/generatemultiple`): `field` (checkbox)



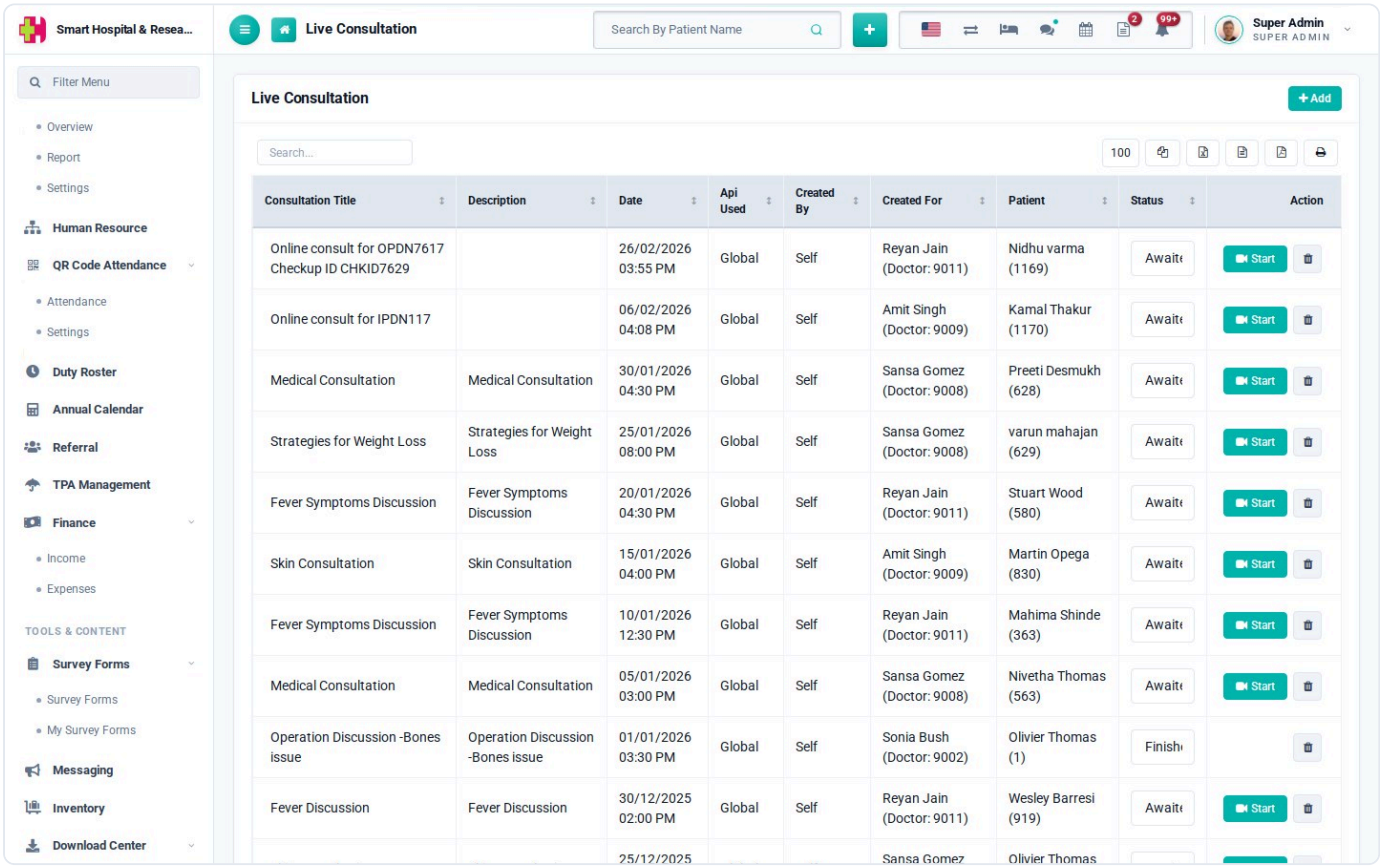
Screen 4.11 — Page List

- **Menu path:** Tools & Content → Front CMS · **URL:** `/admin/front/page`
- **Purpose:** Website content management: pages, banners, news, gallery, contact and SEO for the public site.
- **Grid (16 rows):** Title | URL | Page Type | Action
- **Panels on screen:** Page List Add Page Media Manager Menus
- **Actions:** 2, Add Page, Media Manager, Menus, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



Screen 4.12 — Live Consultation

- **Menu path:** Tools & Content → Live Consultation › Live Consultation · **URL:** `/admin/zoom_conference/consult`
- **Purpose:** Zoom teleconsultation: schedule a session for a patient, share the link, start/end and log the call.
- **Grid (26 rows):** Consultation Title | Description | Date | Api Used | Created By | Created For | Patient | Status | Action
- **Panels on screen:** Live Consultation Add
- **Actions:** 2, Add, Start, Reset, Save, New Patient, Update
- **Search / filters:** chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status
- **Form 1** (posts to `/admin/zoom_conference/chgstatus`): `chg_status` (select) — Awaited, Cancelled, Finished
- **Form 2** (posts to `/admin/zoom_conference/addcredential`): `Zoom Api Key *` (text); `Zoom Api Secret *` (text)
- **Form 3** (posts to `/admin/zoom_conference/addByOther`): `Consultation Title` (text); `Consultation Date *` (text); `Consultation Duration Minutes *` (number); `OPD/IPD` (select) — None, OPD, IPD; `OPD/IPD No` (select); `OPD Checkup ID *` (select); `Consultant Doctor *` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Enabled` (radio); `Enabled` (radio); `Enabled` (radio); `Enabled` (radio); `Description` (textarea)



Screen 4.13 — Live Meeting

- **Menu path:** Tools & Content → Live Consultation › Live Meeting · **URL:** `/admin/zoom_conference/meeting`
- **Purpose:** Internal staff video meetings with scheduling and participants.
- **Grid (32 rows):** Meeting Title | Description | Date | Meeting Duration Minutes | Api Used | Created By | Status | Action
- **Panels on screen:** Live Meeting Add
- **Actions:** 2, Add, Start, Join, Save, Update
- **Search / filters:** chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status, chg_status
- **Form 1** (posts to `/admin/zoom_conference/chgstatusmeeting`): `chg_status` (select) — Awaited, Cancelled, Finished
- **Form 2** (posts to `/admin/zoom_conference/addMeeting`): `Meeting Title *` (text); `date` (text); `Meeting Duration Minutes *` (number); `Enabled` (radio); `Enabled` (radio); `Enabled` (radio); `Enabled` (radio); `Description` (textarea); `Sonia Bush (Doctor : 9002)` (checkbox); `Sansa Gomez (Doctor : 9008)` (checkbox); `Belina Turner (Pathologist : 9005)` (checkbox); `John Hook (Radiologist : 9006)` (checkbox); `Brad Frost (Accountant : 9003)` (checkbox); `Natasha Romanoff (Nurse : 9010)` (checkbox); `Amit Singh (Doctor : 9009)` (checkbox); `Reyan Jain (Doctor : 9011)` (checkbox); `Harry Grant (Pharmacist : 9012)` (checkbox); `Jason Abbot (Admin : 9017)` (checkbox); `Maria Ford (Receptionist : 9018)` (checkbox); `April Clinton (Nurse : 9020)` (checkbox)

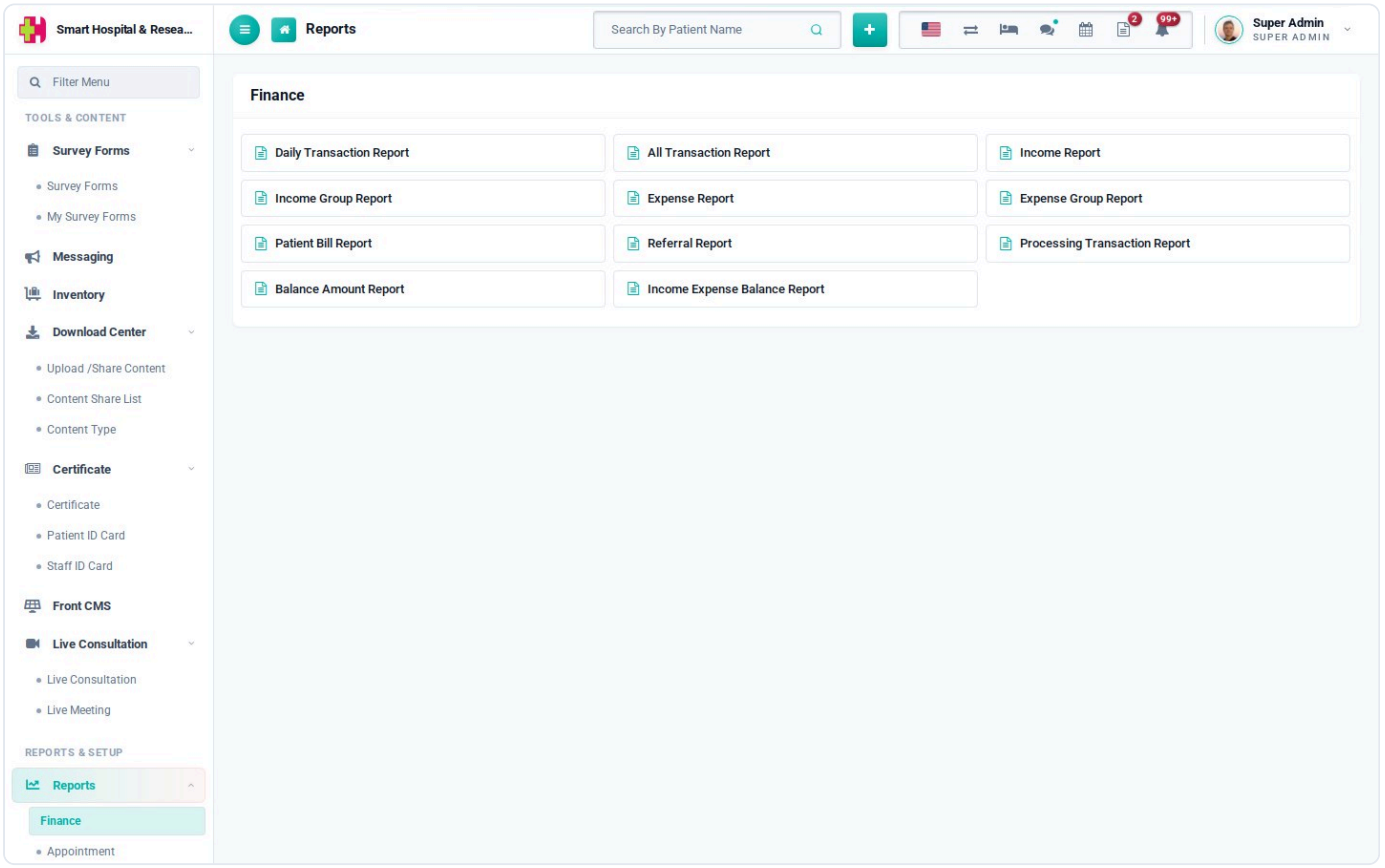
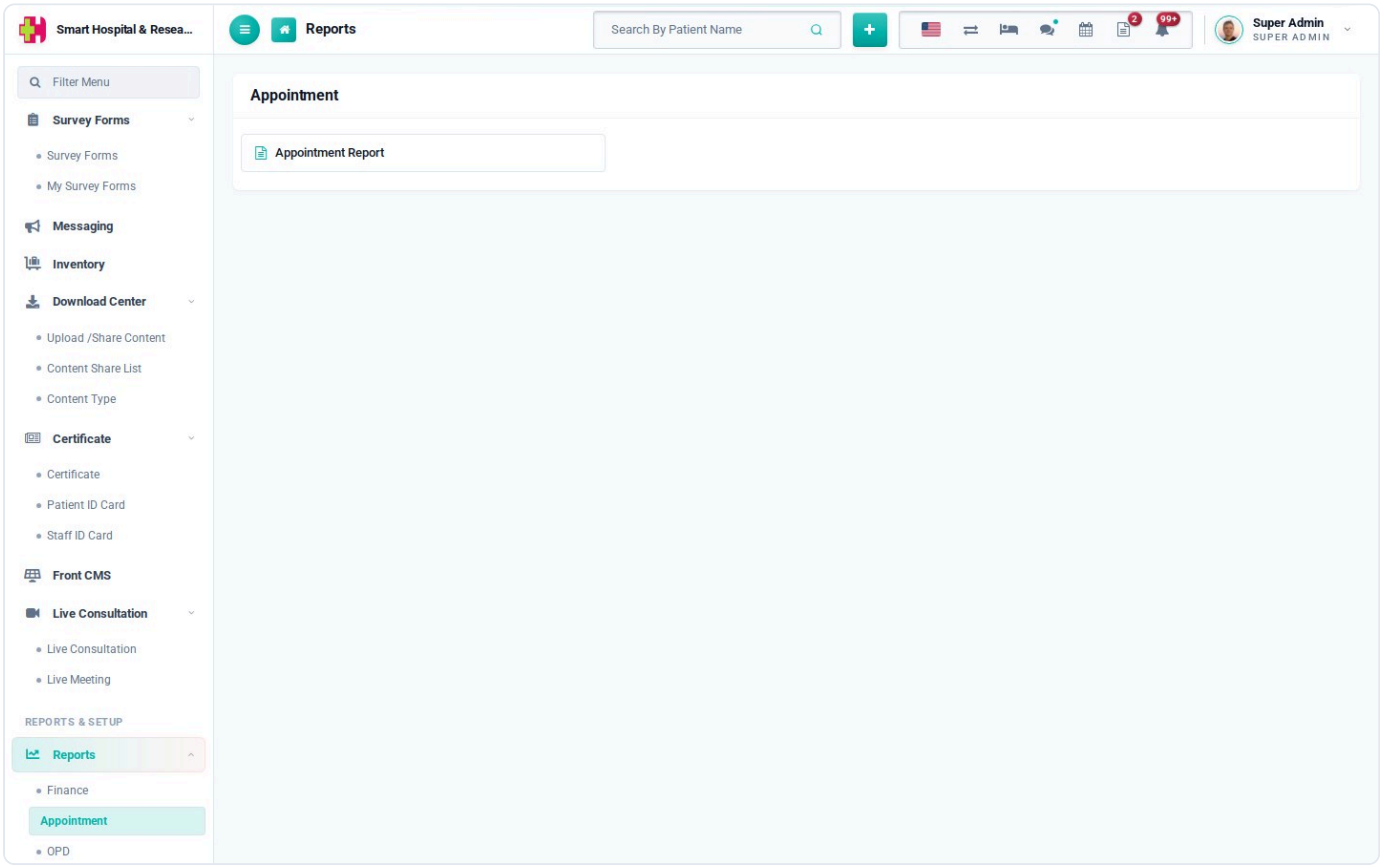
Screen 5.1 — Finance

- **Menu path:** Reports & Setup → Reports › Finance · **URL:** `/admin/report/finance`
- **Purpose:** Reports › Finance
- **Panels on screen:** Finance
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



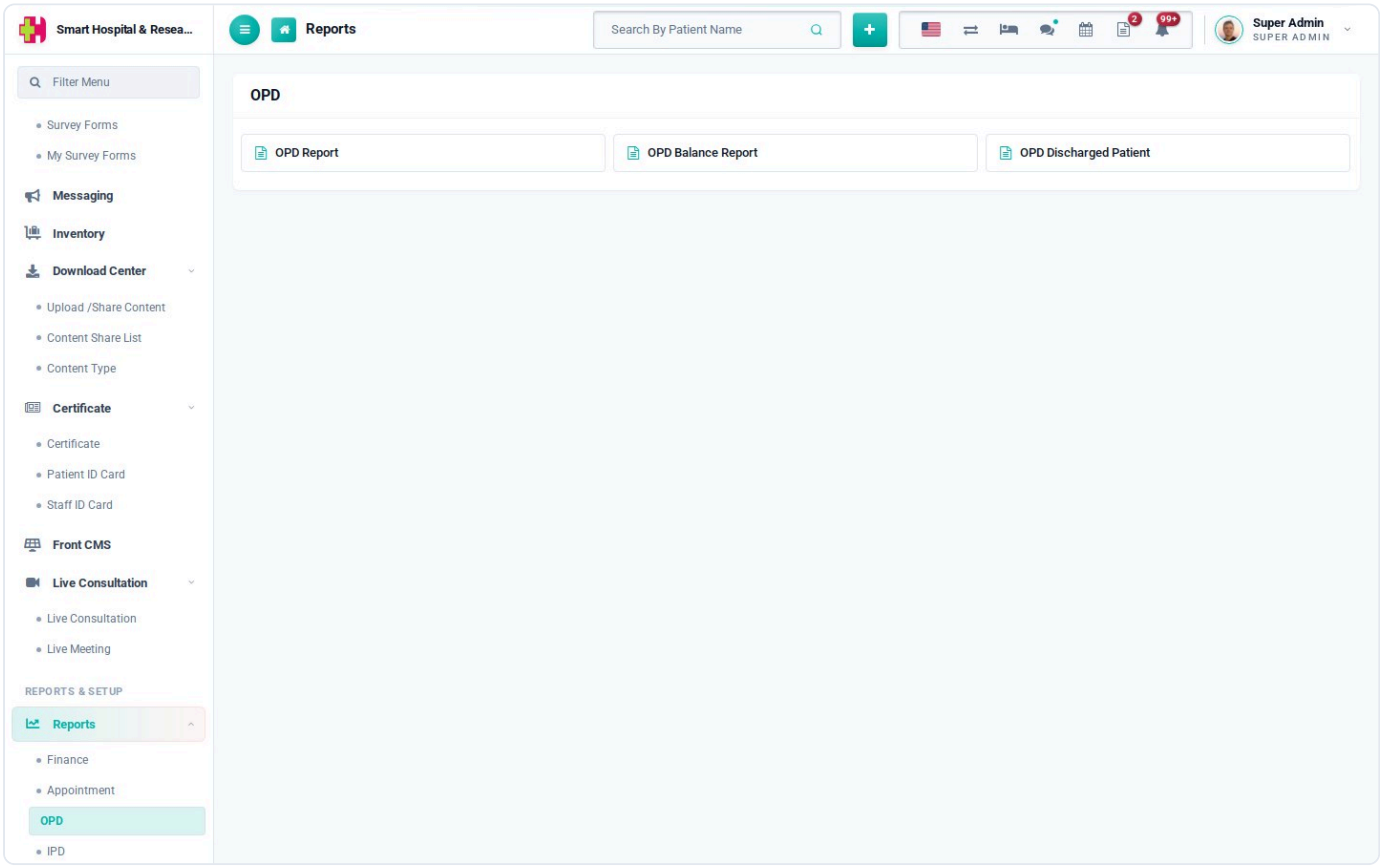
Screen 5.2 — Appointment

- **Menu path:** Reports & Setup → Reports › Appointment · **URL:** `/admin/report/appointment`
- **Purpose:** Reports › Appointment
- **Panels on screen:** Appointment
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



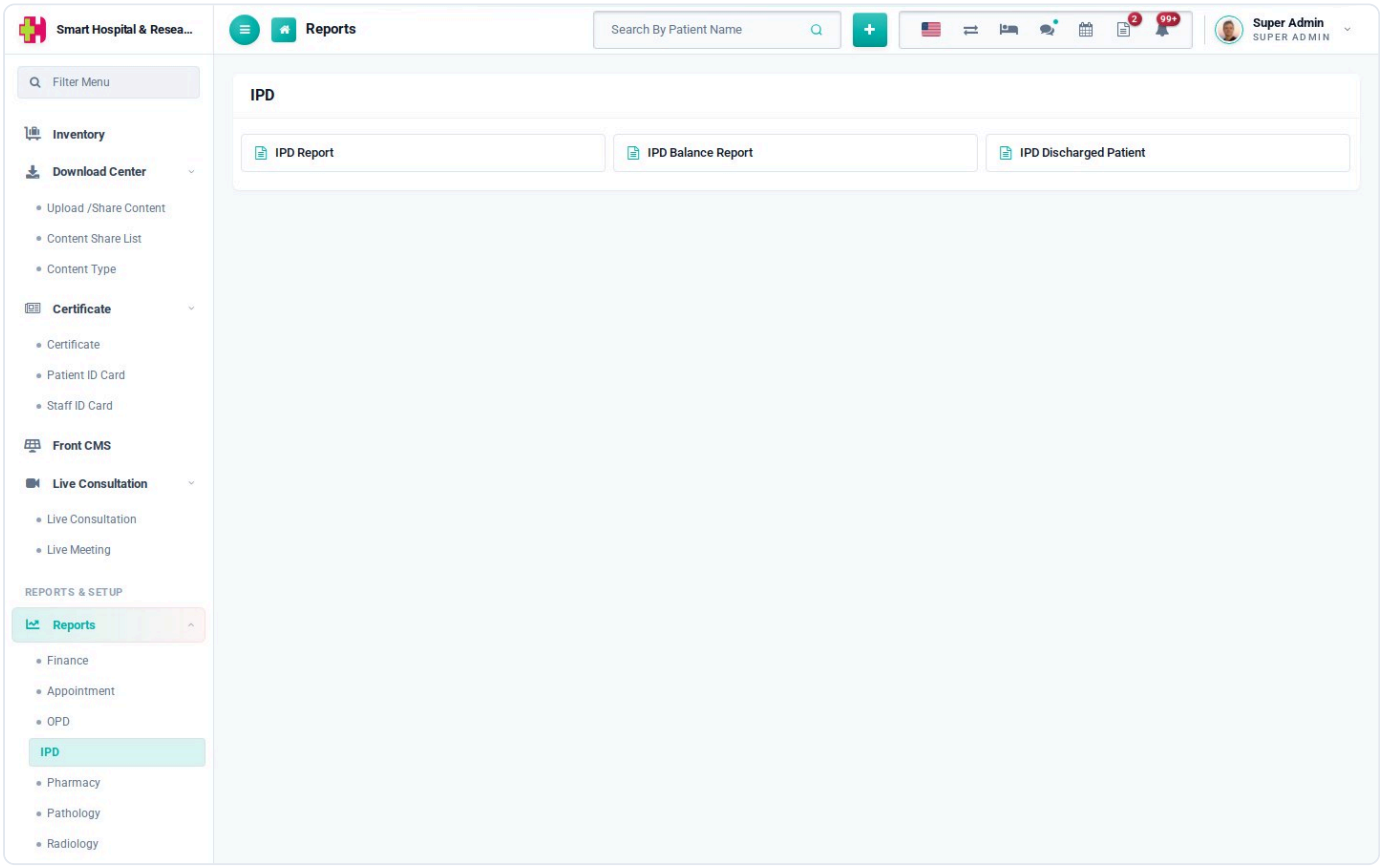
Screen 5.3 — OPD

- **Menu path:** Reports & Setup → Reports › OPD · **URL:** `/admin/report/opd`
- **Purpose:** Reports › OPD
- **Panels on screen:** OPD
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



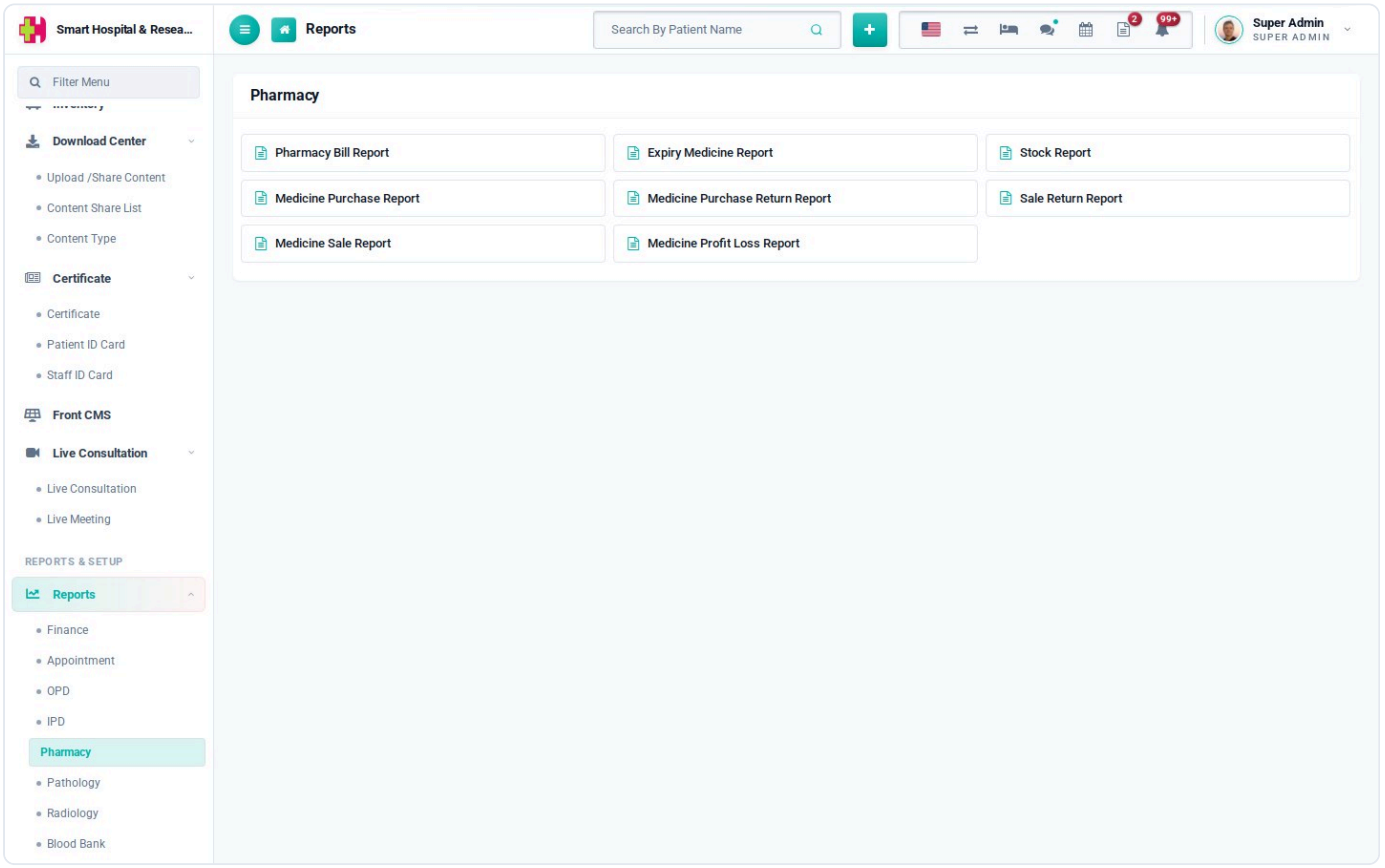
Screen 5.4 — IPD

- **Menu path:** Reports & Setup → Reports › IPD · **URL:** `/admin/report/ipd`
- **Purpose:** Reports › IPD
- **Panels on screen:** IPD
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



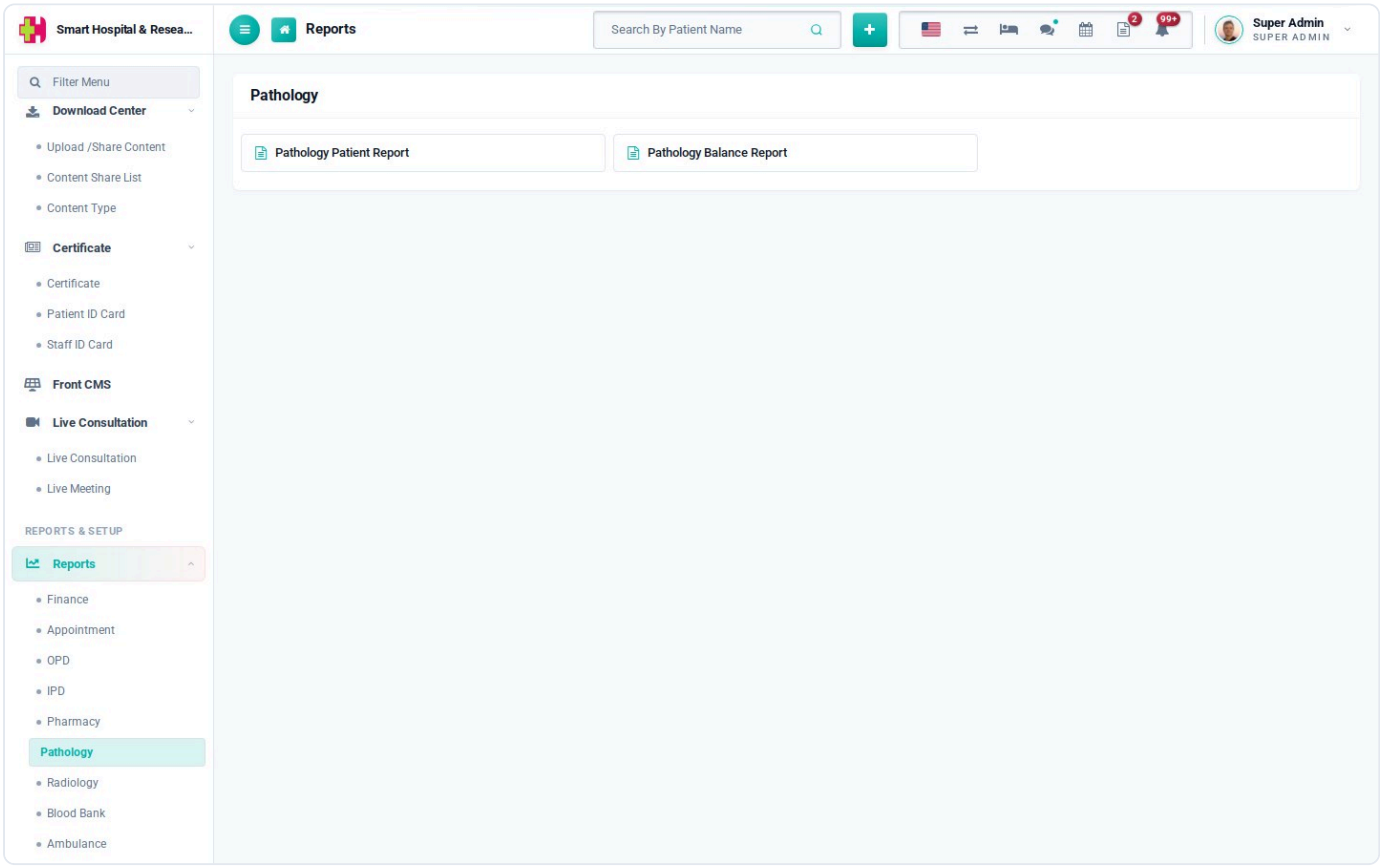
Screen 5.5 — Pharmacy

- **Menu path:** Reports & Setup → Reports › Pharmacy · **URL:** `/admin/report/pharmacy`
- **Purpose:** Reports › Pharmacy
- **Panels on screen:** Pharmacy
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



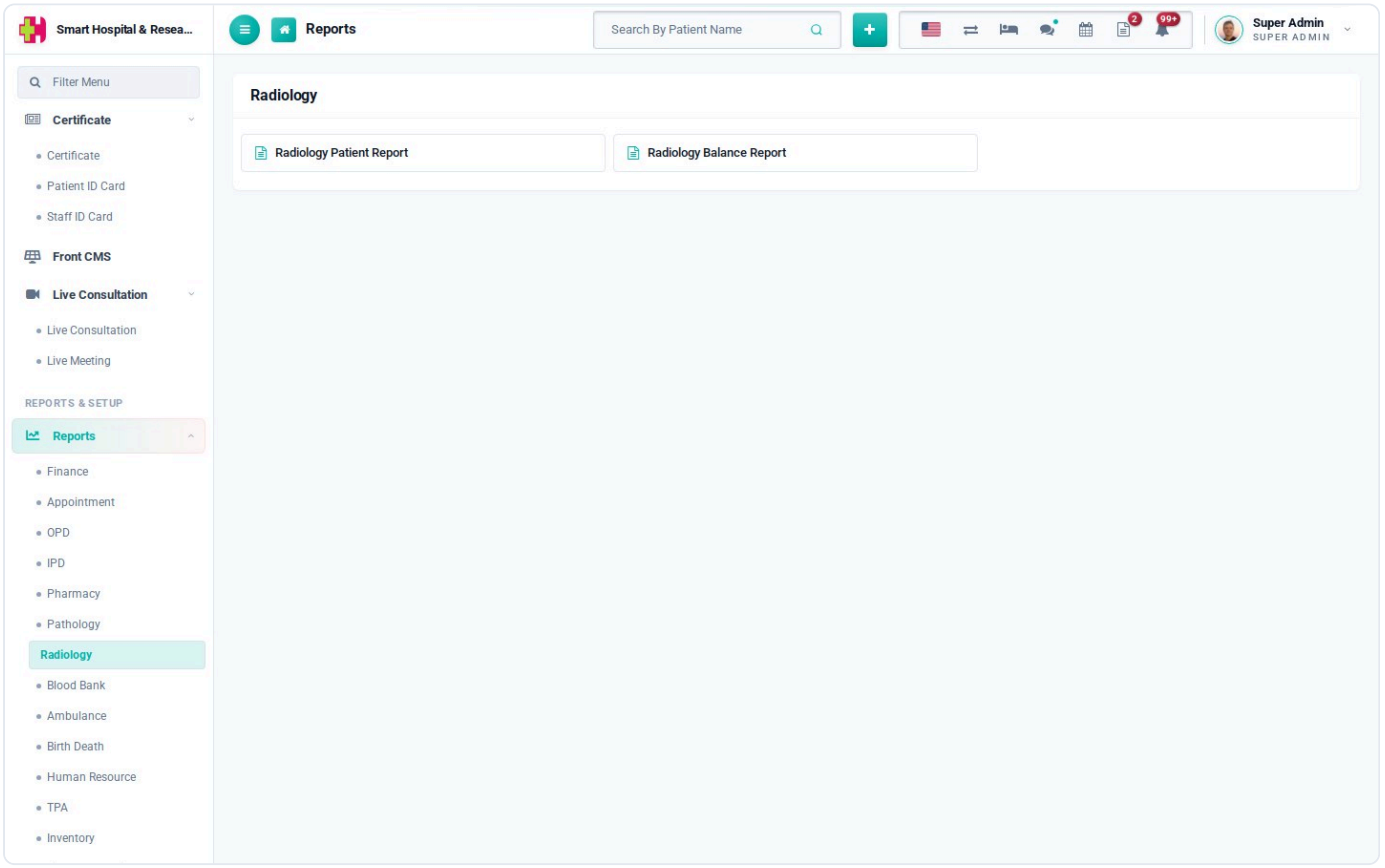
Screen 5.6 — Pathology

- **Menu path:** Reports & Setup → Reports › Pathology · **URL:** `/admin/report/pathology`
- **Purpose:** Reports › Pathology
- **Panels on screen:** Pathology
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



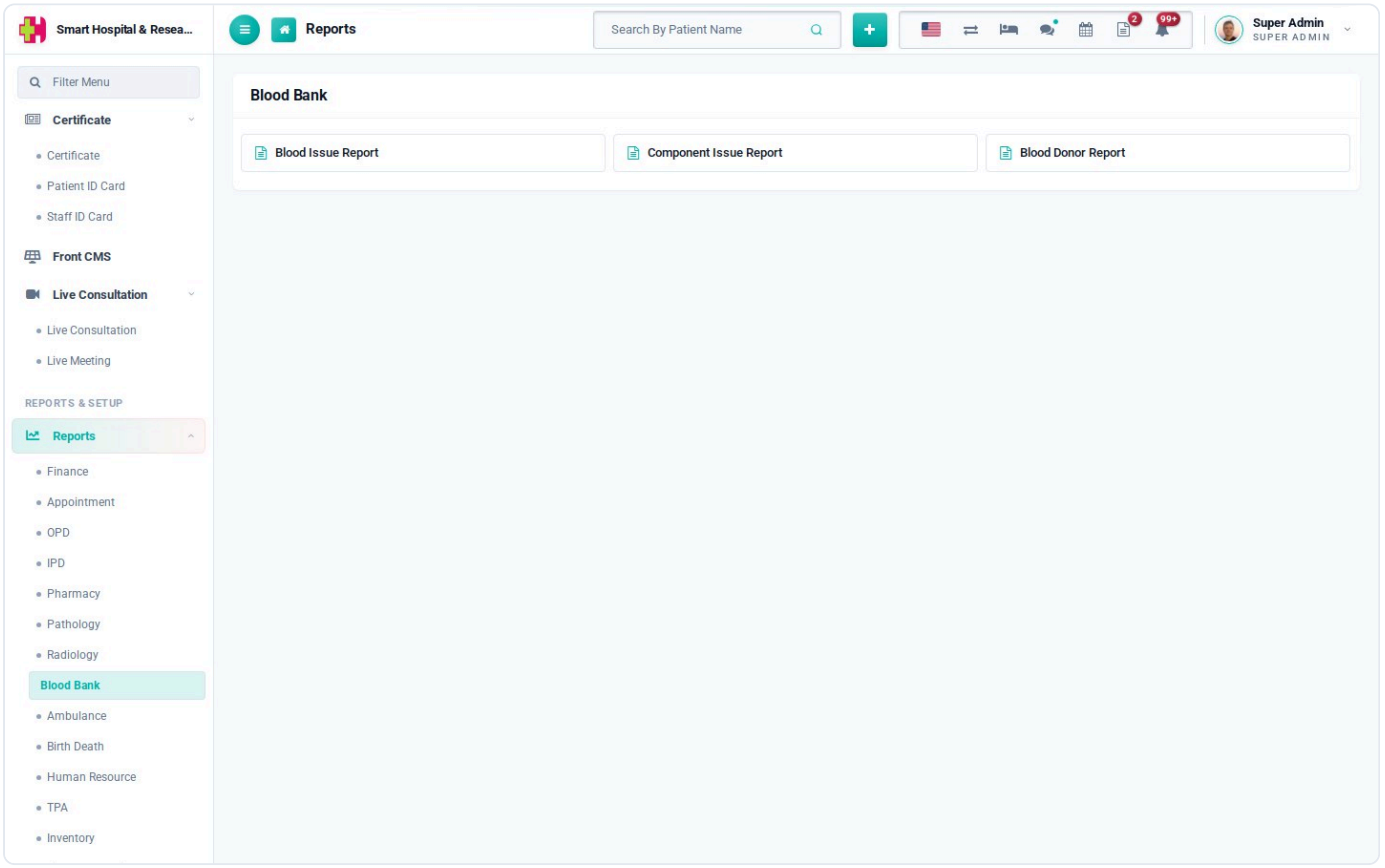
Screen 5.7 — Radiology

- **Menu path:** Reports & Setup → Reports › Radiology · **URL:** `/admin/report/radiology`
- **Purpose:** Reports › Radiology
- **Panels on screen:** Radiology
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



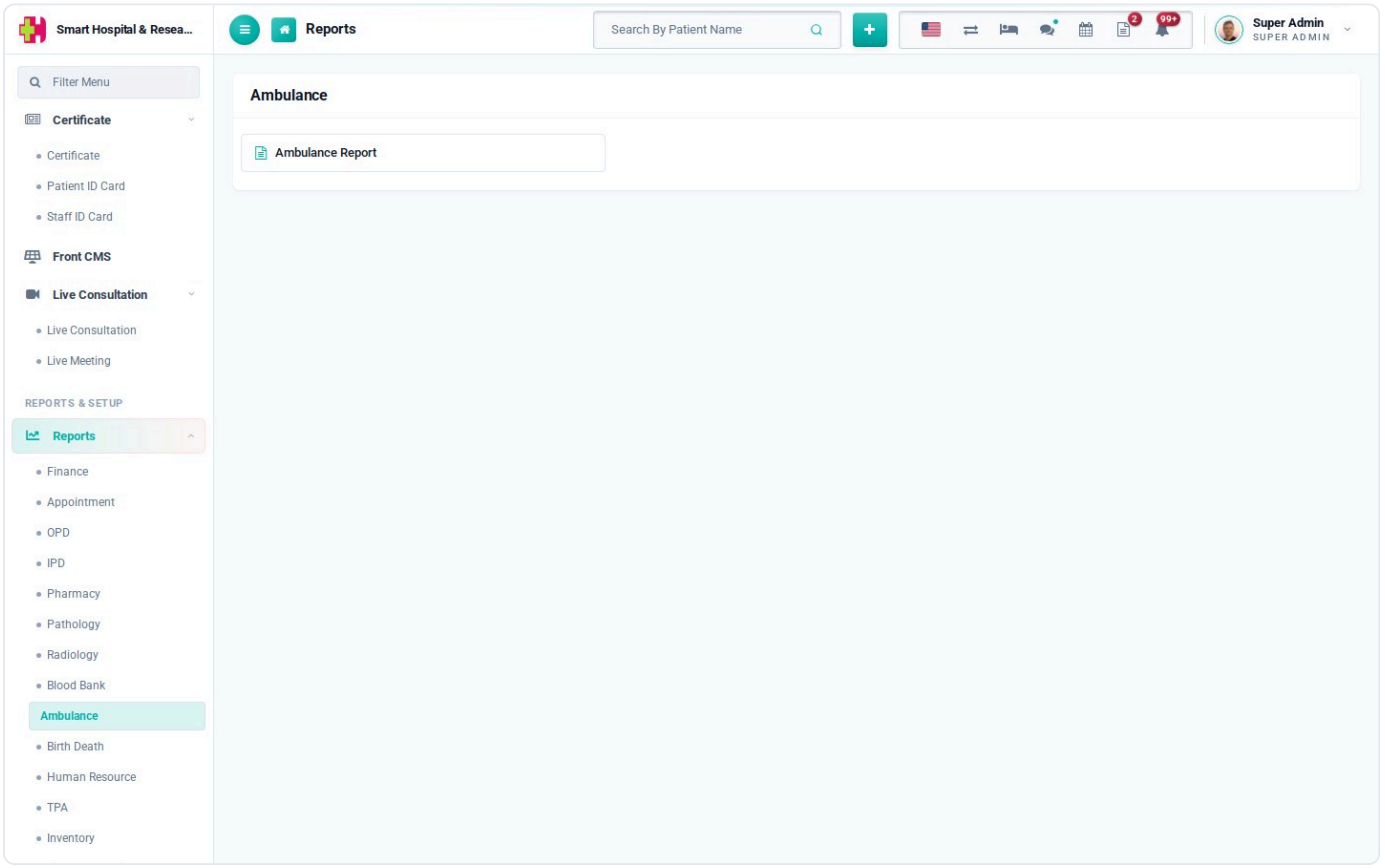
Screen 5.8 — Blood Bank

- **Menu path:** Reports & Setup → Reports › Blood Bank · **URL:** `/admin/report/blood_bank`
- **Purpose:** Reports › Blood Bank
- **Panels on screen:** Blood Bank
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



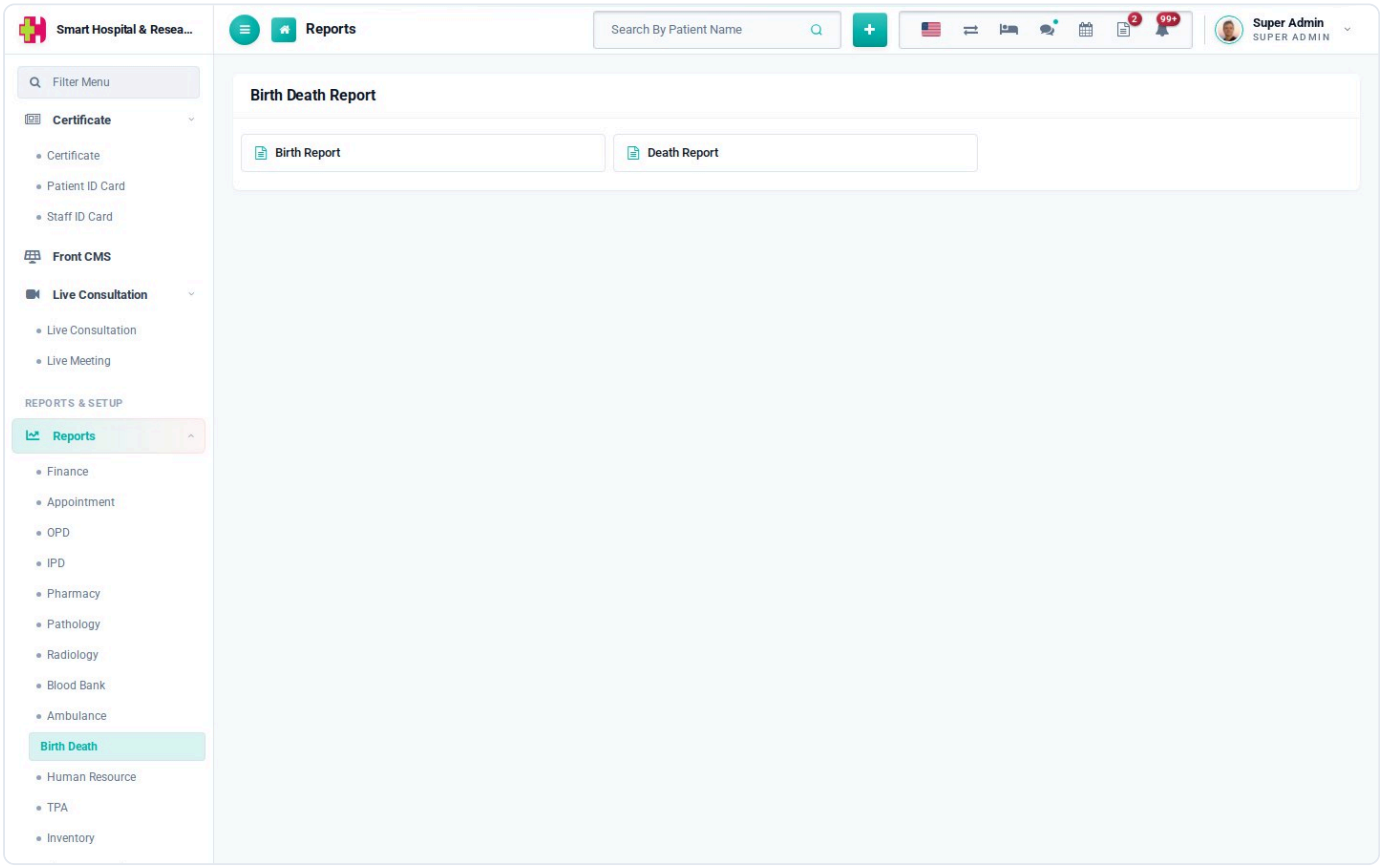
Screen 5.9 — Ambulance

- **Menu path:** Reports & Setup → Reports › Ambulance · **URL:** `/admin/report/ambulance`
- **Purpose:** Reports › Ambulance
- **Panels on screen:** Ambulance
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



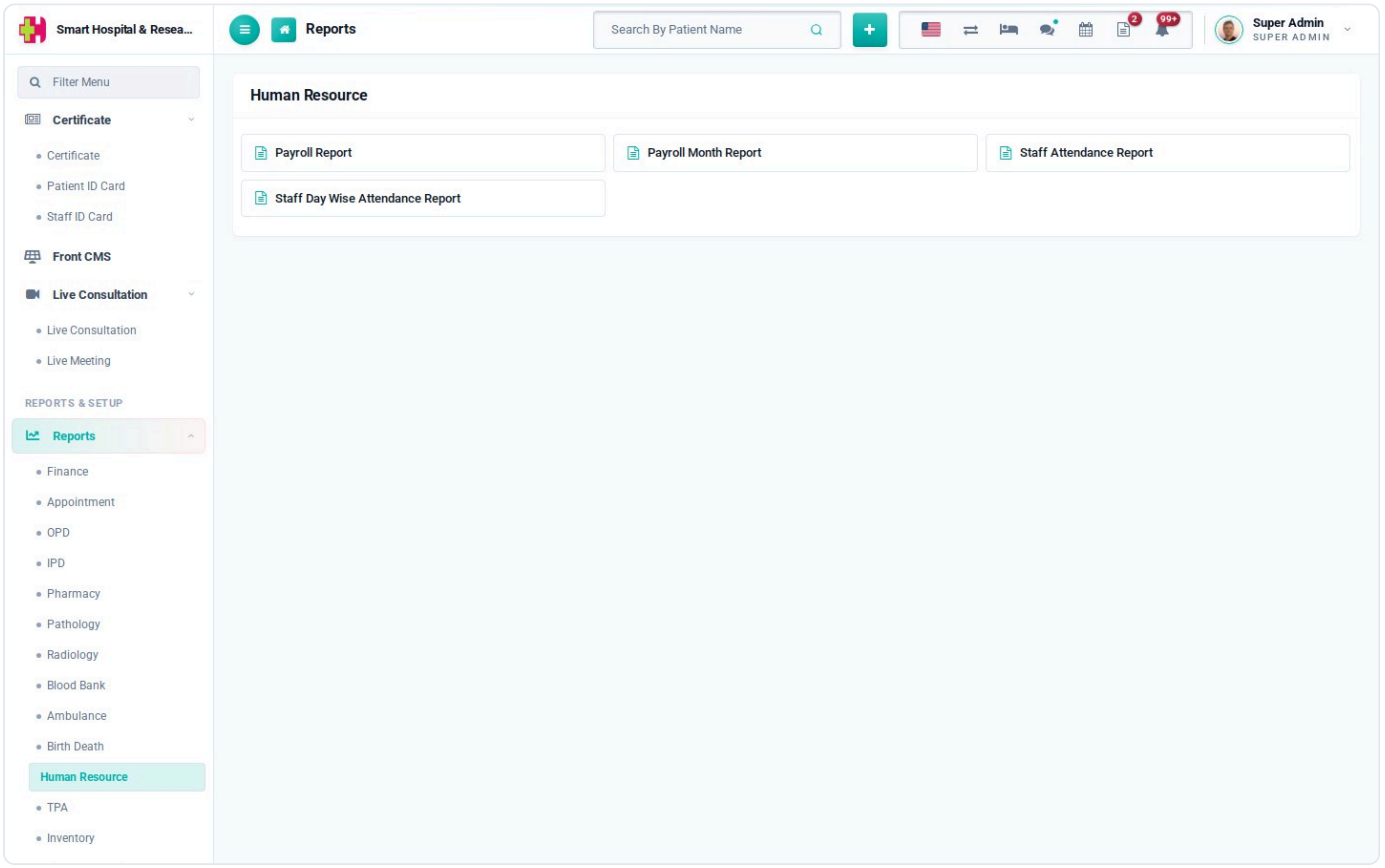
Screen 5.10 — Birth Death Report

- **Menu path:** Reports & Setup → Reports › Birth Death · **URL:** `/admin/report/birth_death`
- **Purpose:** Reports › Birth Death
- **Panels on screen:** Birth Death Report
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



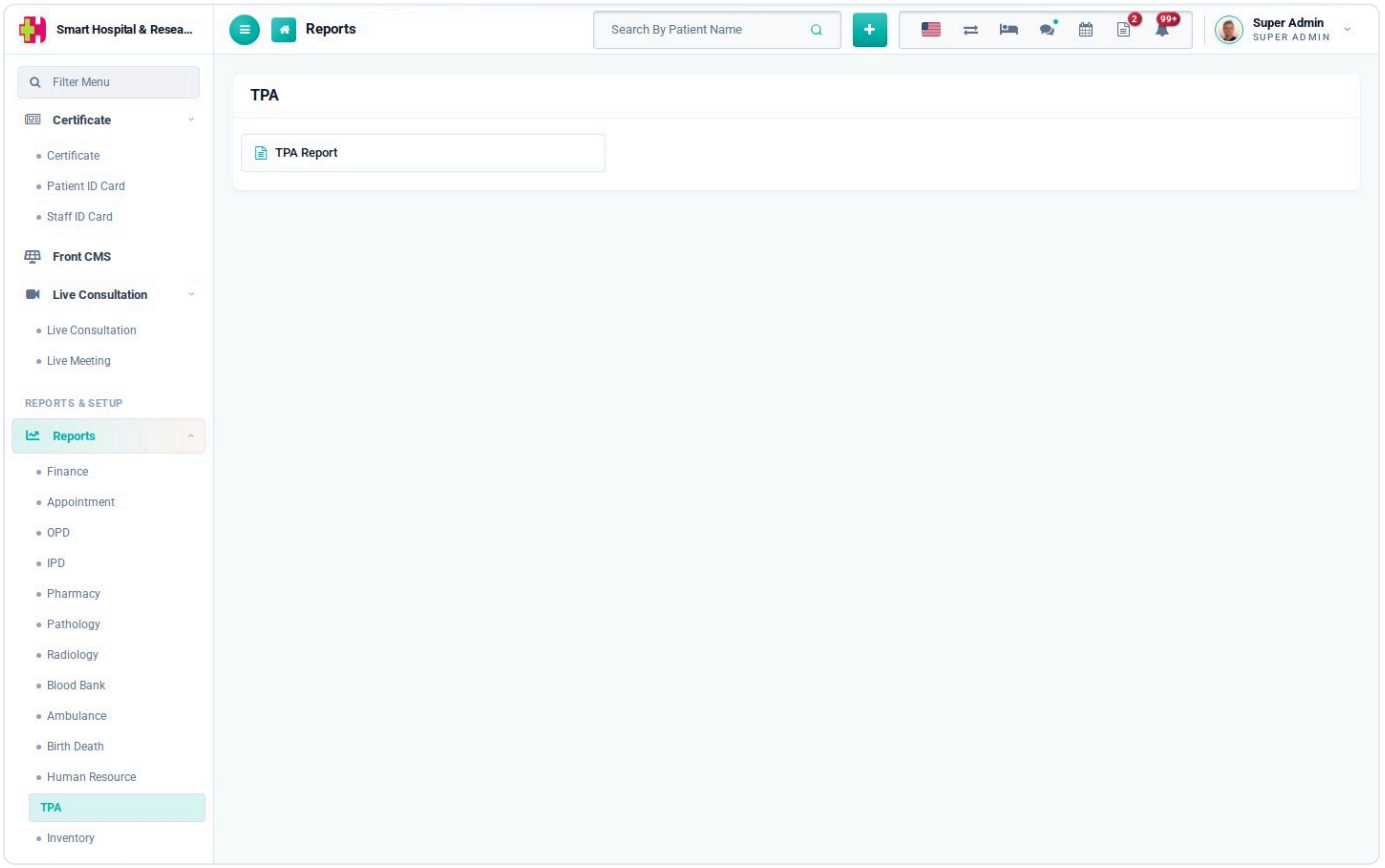
Screen 5.11 — Human Resource

- **Menu path:** Reports & Setup → Reports › Human Resource · **URL:** `/admin/report/human_resource`
- **Purpose:** Reports › Human Resource
- **Panels on screen:** Human Resource
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



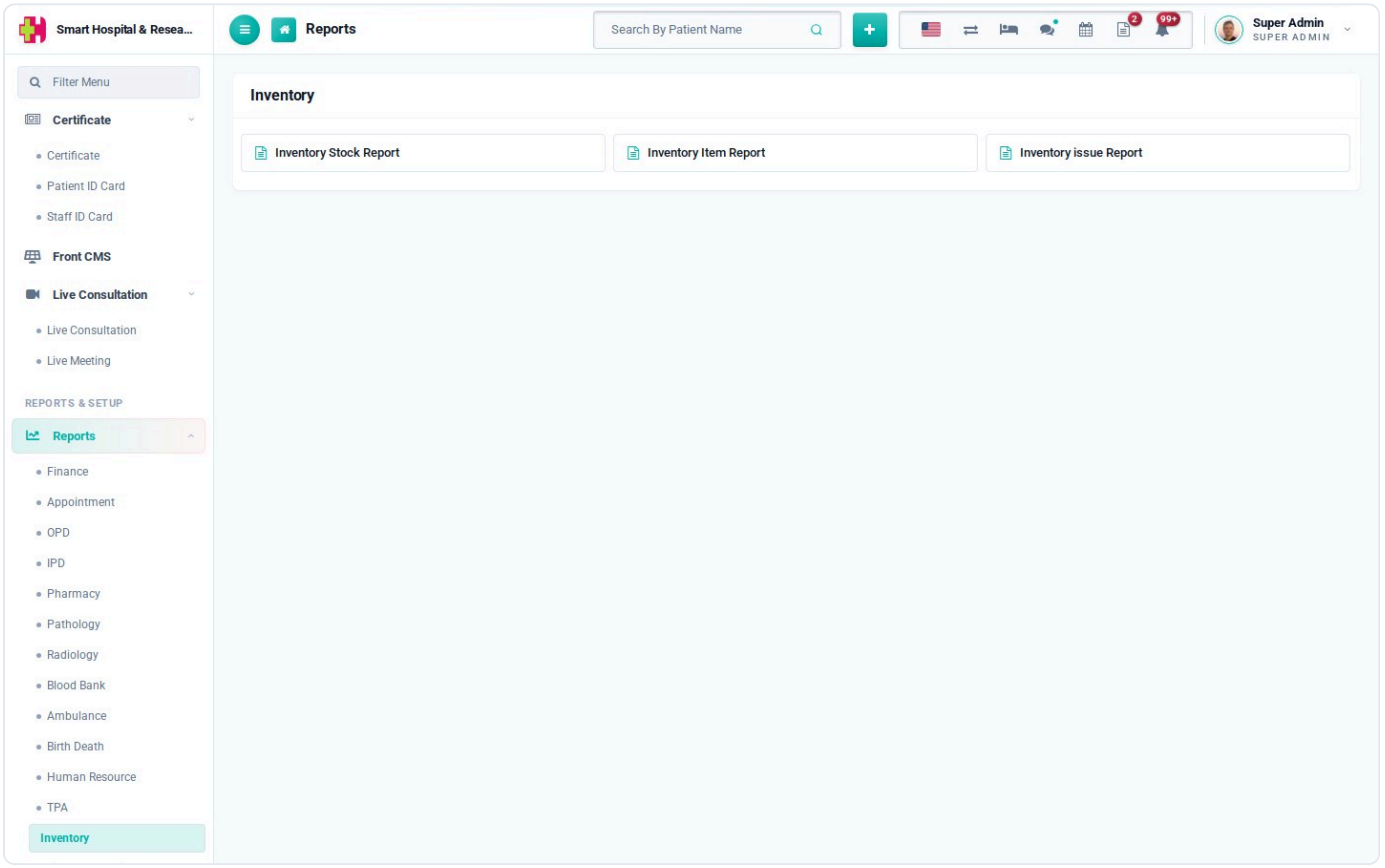
Screen 5.12 — TPA

- **Menu path:** Reports & Setup → Reports › TPA · **URL:** `/admin/report/tpa`
- **Purpose:** Reports › TPA
- **Panels on screen:** TPA
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



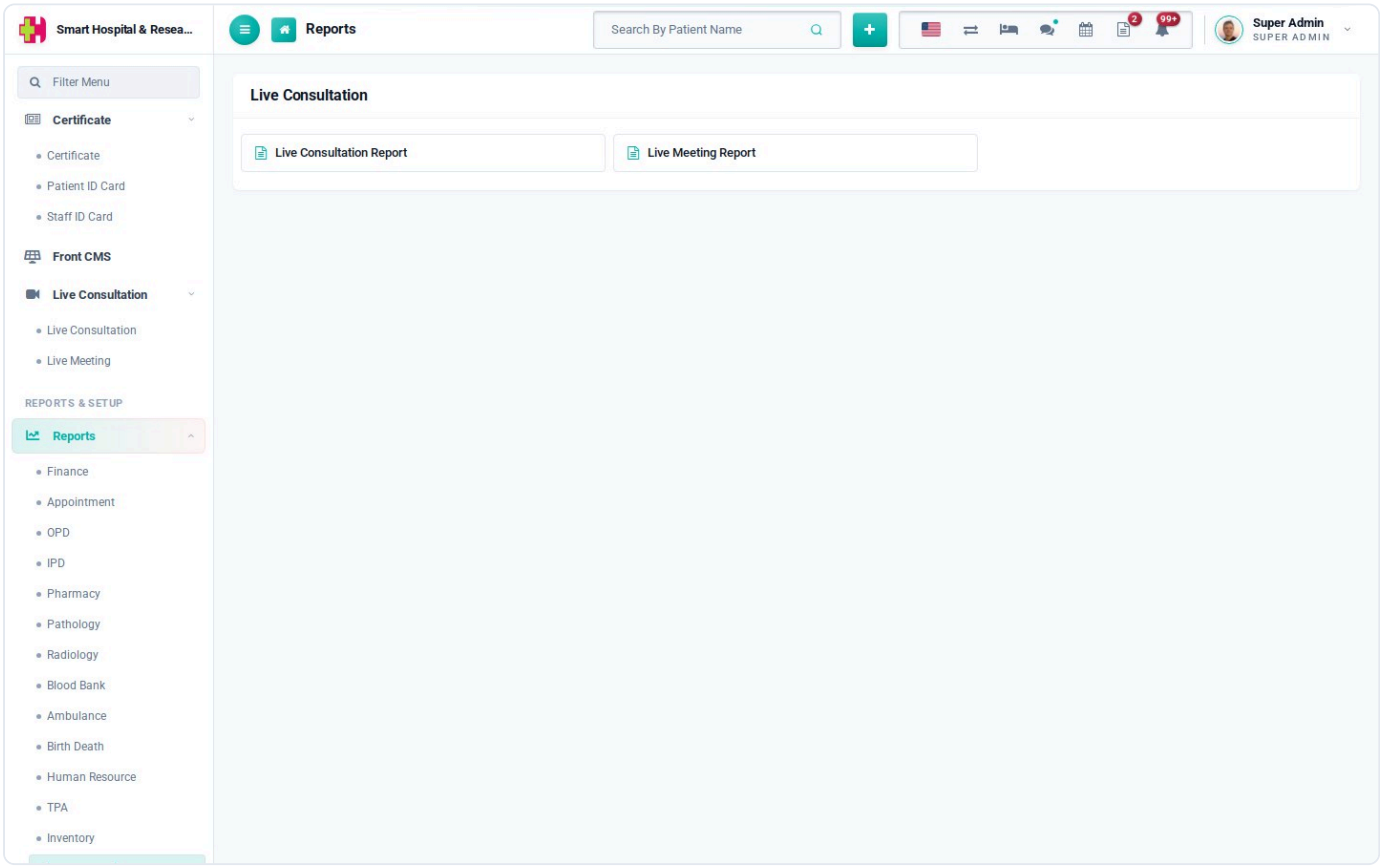
Screen 5.13 — Inventory

- **Menu path:** Reports & Setup → Reports › Inventory · **URL:** `/admin/report/inventory`
- **Purpose:** Reports › Inventory
- **Panels on screen:** Inventory
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



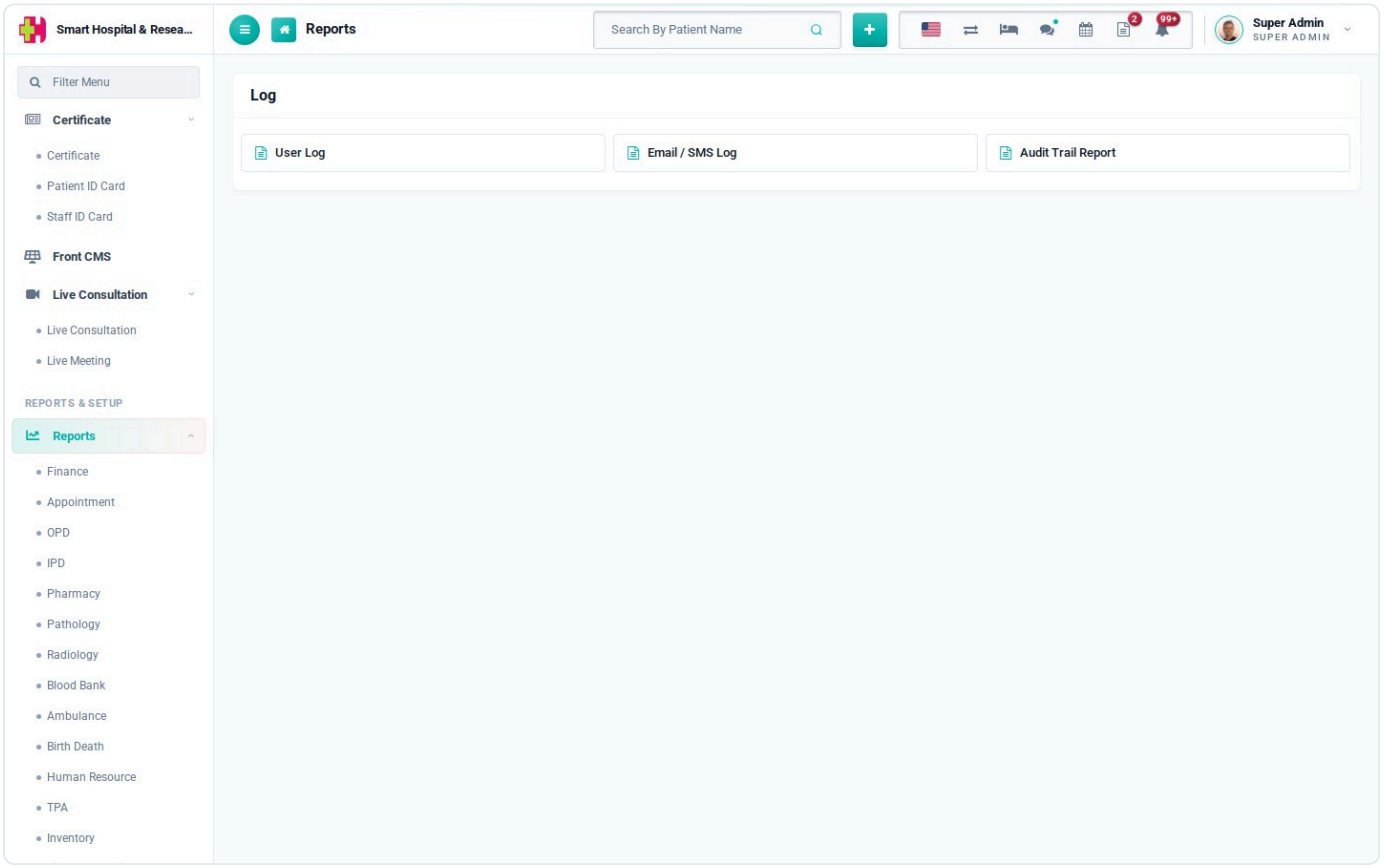
Screen 5.14 — Live Consultation

- **Menu path:** Reports & Setup → Reports › Live Consultation · **URL:** `/admin/report/live_consultation`
- **Purpose:** Reports › Live Consultation
- **Panels on screen:** Live Consultation
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



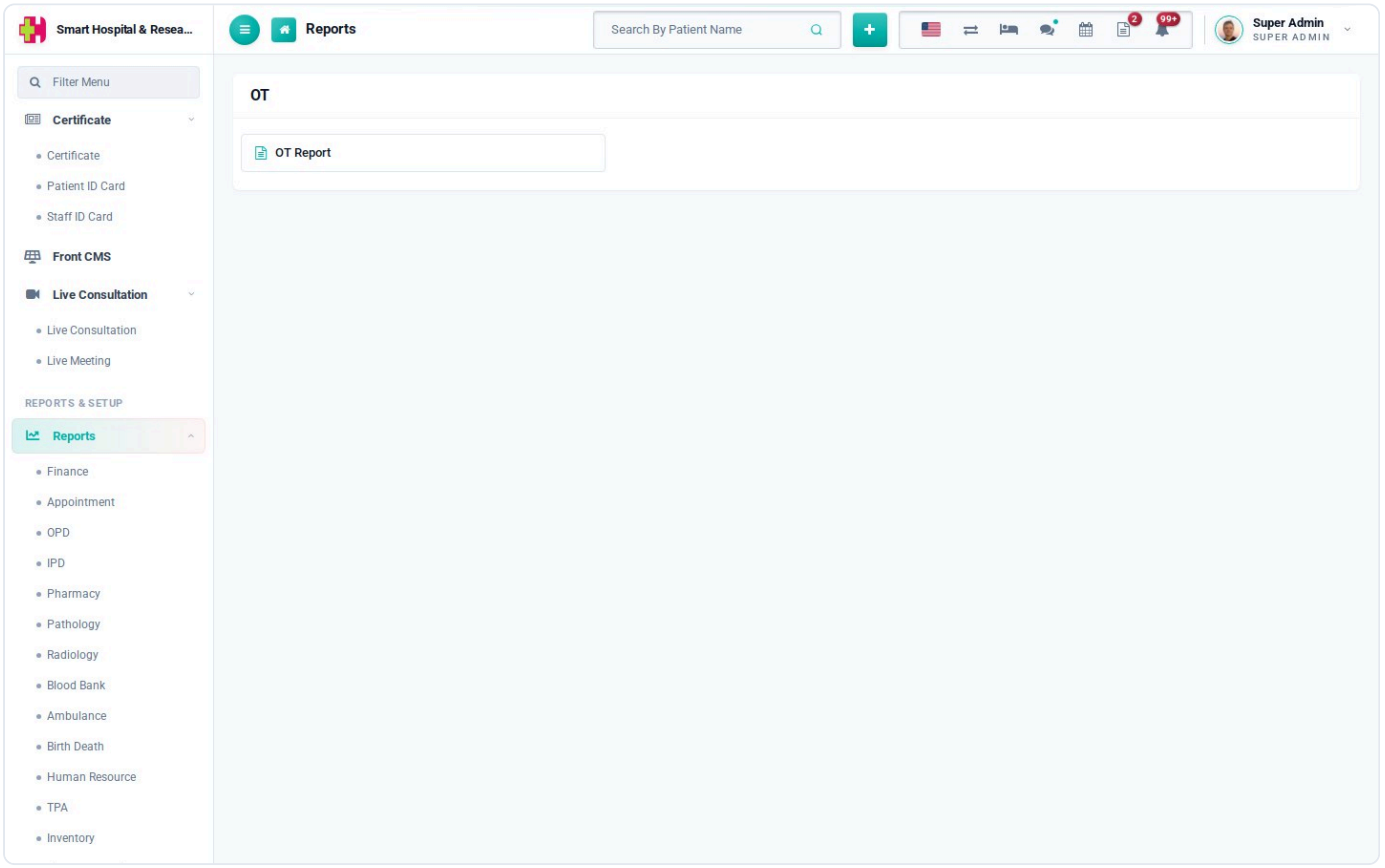
Screen 5.15 — Log

- **Menu path:** Reports & Setup → Reports › Log · **URL:** `/admin/report/log`
- **Purpose:** Reports › Log
- **Panels on screen:** Log
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



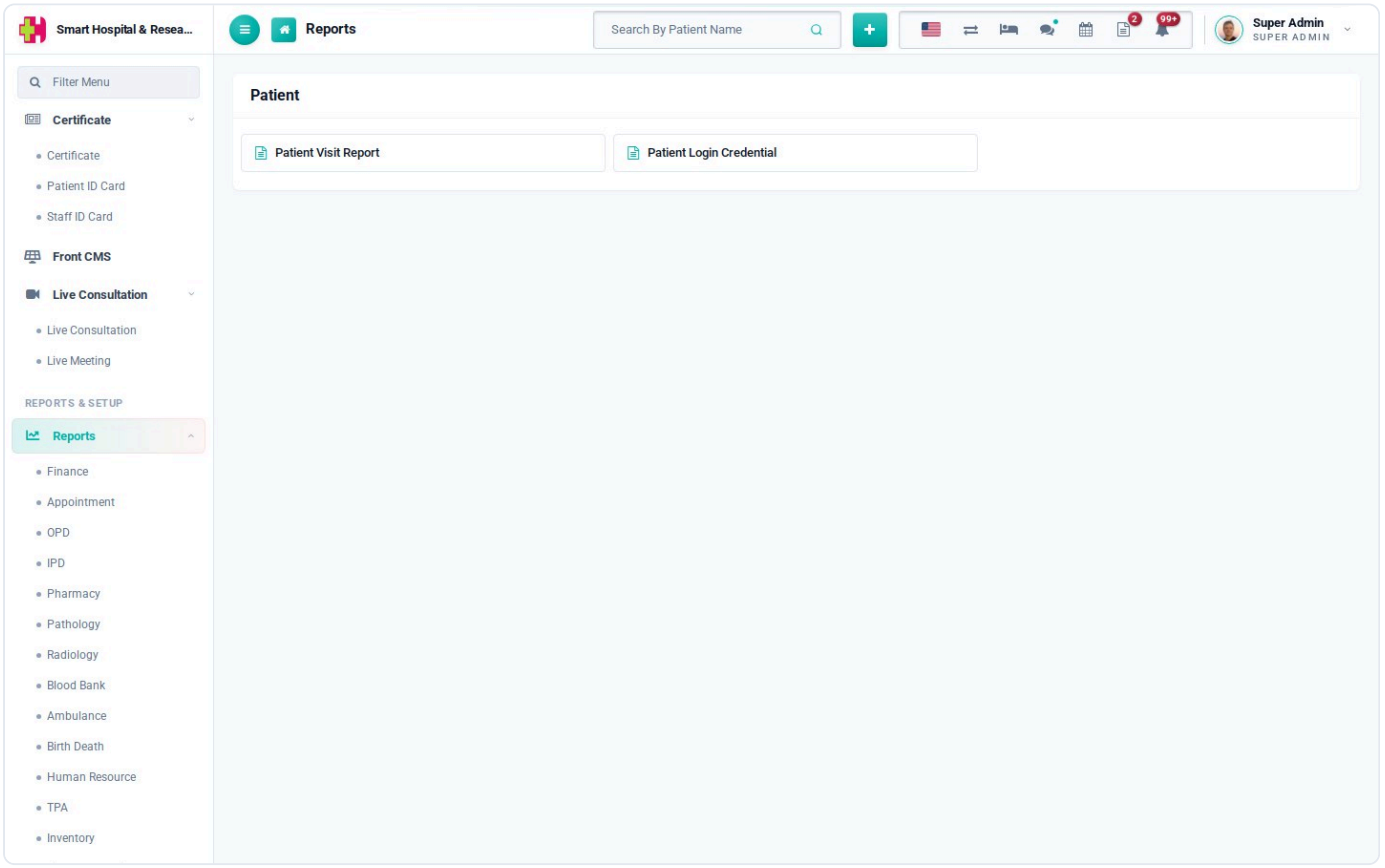
Screen 5.16 — OT

- **Menu path:** Reports & Setup → Reports › OT · **URL:** `/admin/report/ot`
- **Purpose:** Reports › OT
- **Panels on screen:** OT
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



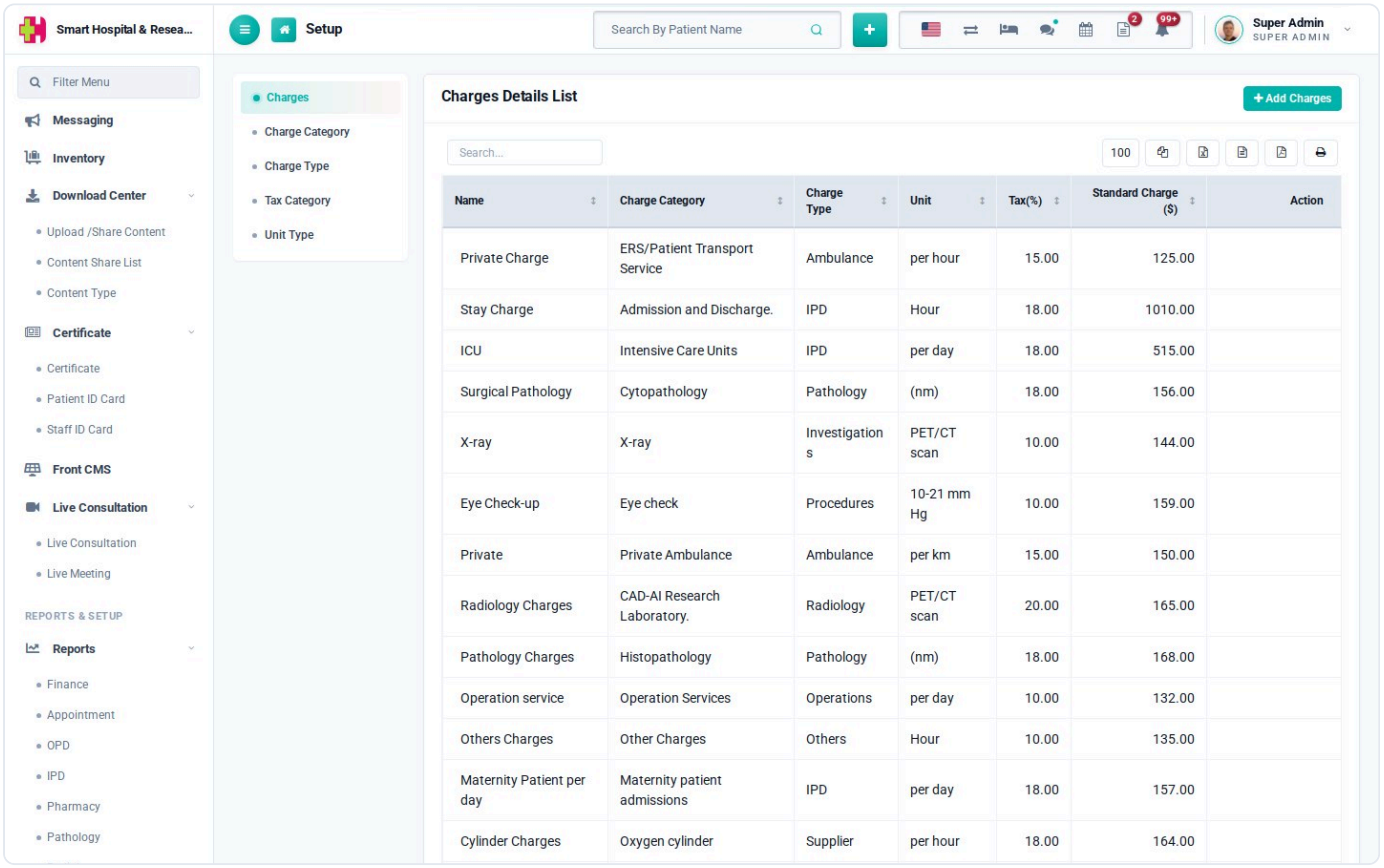
Screen 5.17 — Reports › Patient

- **Menu path:** Reports & Setup → Reports › Patient · **URL:** `/admin/report/patient`
- **Purpose:** Reports › Patient
- **Panels on screen:** Patient
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



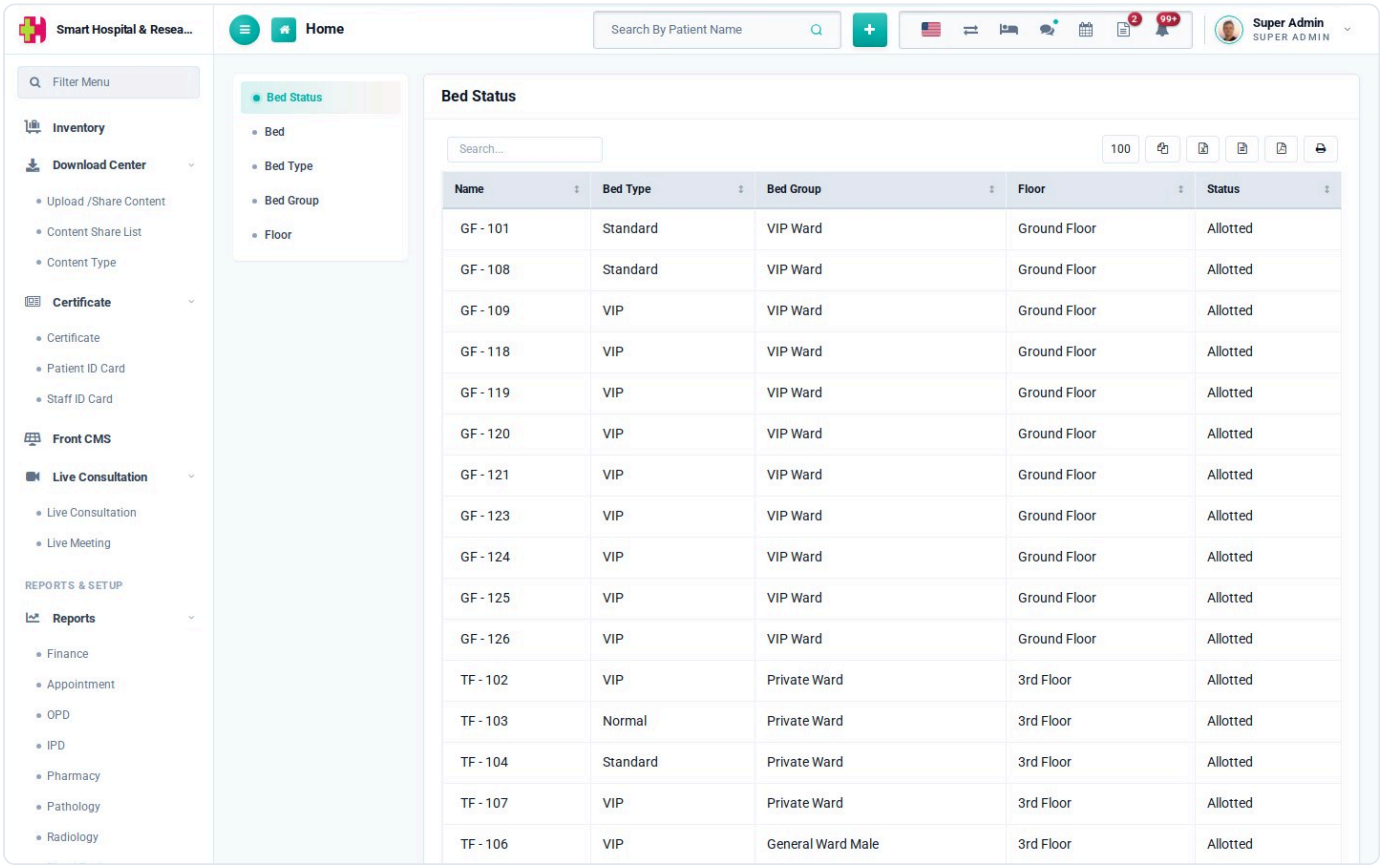
Screen 5.18 — Charges Details List

- **Menu path:** Reports & Setup → Setup › Hospital Charges · **URL:** `/admin/charges`
- **Purpose:** The charge catalogue (consultation, procedures, room, investigations, services) reused by billing, OPD and IPD.
- **Grid (22 rows):** Name | Charge Category | Charge Type | Unit | Tax(%) | Standard Charge ($) | Action
- **Panels on screen:** Charges Details List Add Charges
- **Actions:** 2, Add Charges, Apply To All, Save, Update
- **Search / filters:** charge_name, charge_type, charge_category, unit_type, taxcategory, tax_percentage, standard_charge, schedule_charge_14, schedule_charge_13, schedule_charge_12
- **Form 1**: `Charge Name` (text); `Charge Type` (select) — Appointment, OPD, IPD, Pathology, Radiology, Blood Bank; `Charge Category` (select); `Unit Type` (select) — (ML), Litter, (nm), per day, Hour, Insurance; `Tax Category` (select) — Blood Module, OPD Tax, IPD Tax, Operation Charges, Pathology Tax, Radiology Tax; `tax_percentage` (text); `Standard Charge ($)` (text); `Description` (textarea); `schedule_charge_14` (text); `schedule_charge_13` (text); `schedule_charge_12` (text); `schedule_charge_8` (text); `schedule_charge_7` (text); `schedule_charge_6` (text); `schedule_charge_5` (text); `schedule_charge_4` (text); `schedule_charge_3` (text); `schedule_charge_2` (text); `schedule_charge_1` (text)



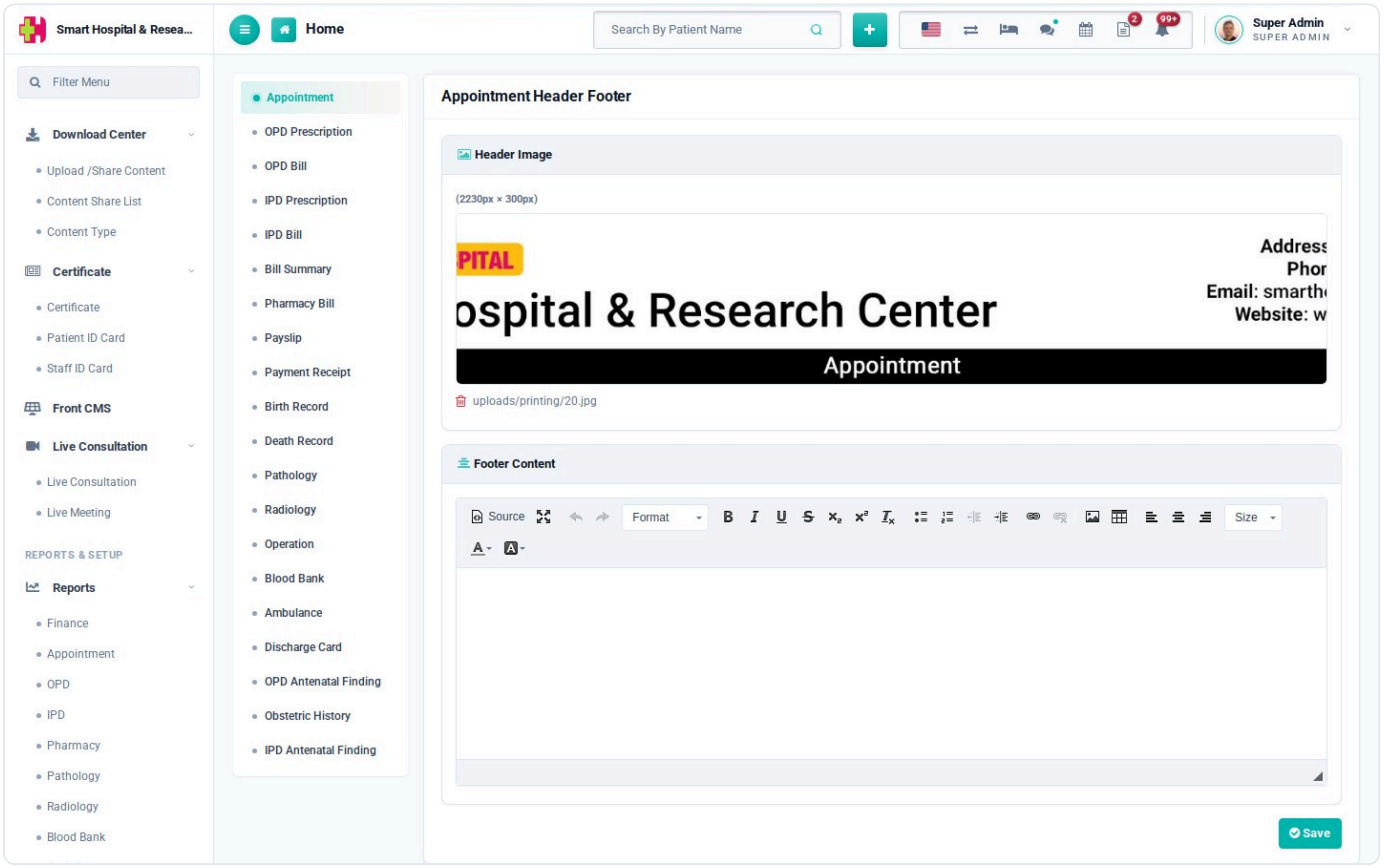
Screen 5.19 — Bed Status

- **Menu path:** Reports & Setup → Setup › Bed · **URL:** `/admin/setup/bed/status`
- **Purpose:** Bed/ward master with live occupancy status board.
- **Grid (55 rows):** Name | Bed Type | Bed Group | Floor | Status
- **Panels on screen:** Bed Status
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email



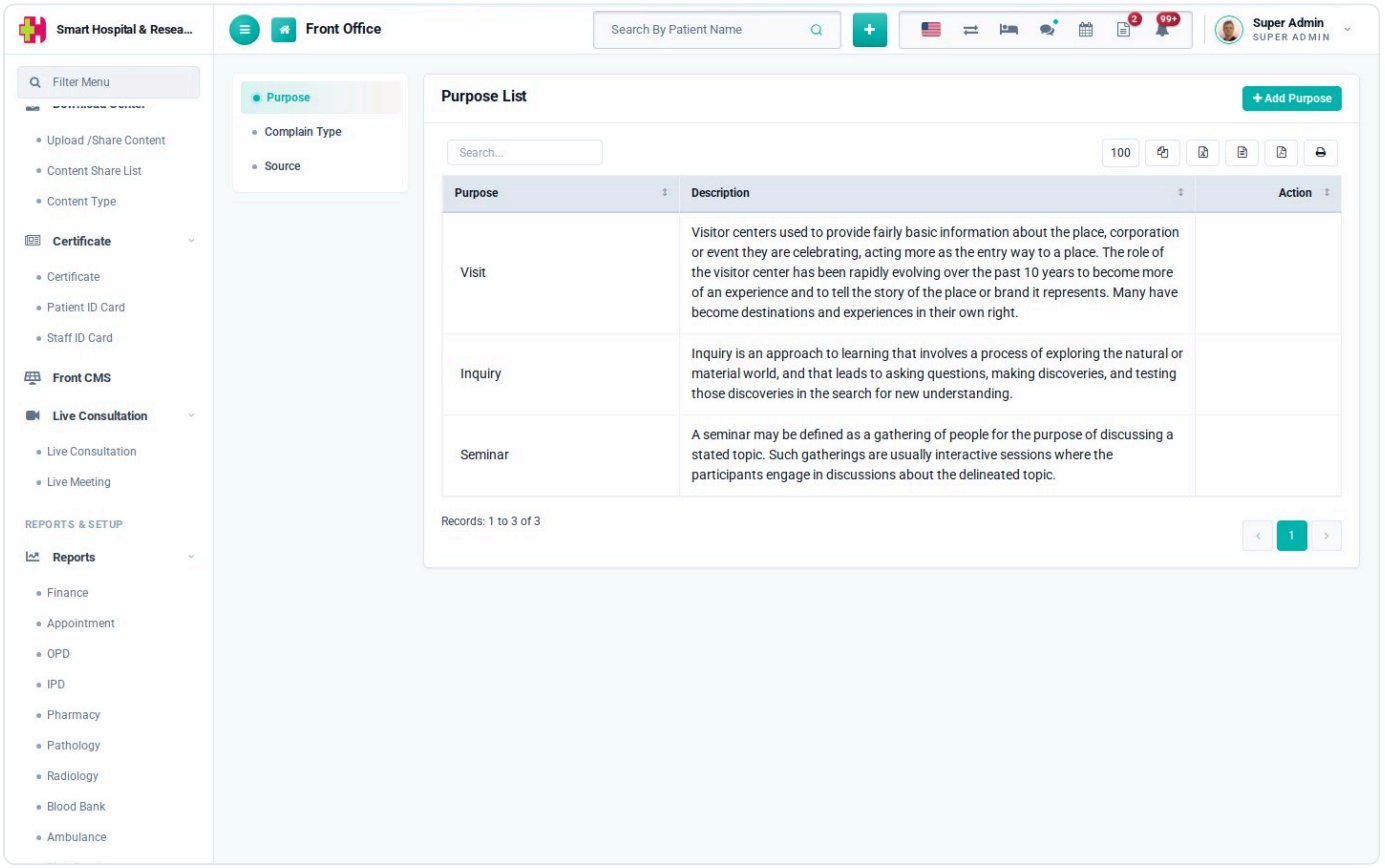
Screen 5.20 — Appointment Header Footer

- **Menu path:** Reports & Setup → Setup › Print Header Footer · **URL:** `/admin/printing`
- **Purpose:** Per-module print header/footer designer used by every printed bill, report, prescription, certificate and ID card.
- **Panels on screen:** Appointment Header Footer
- **Actions:** 2, Save, Update
- **Search / filters:** envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/printing/update`): `(2230px × 300px)` (file); `footer_content` (textarea)



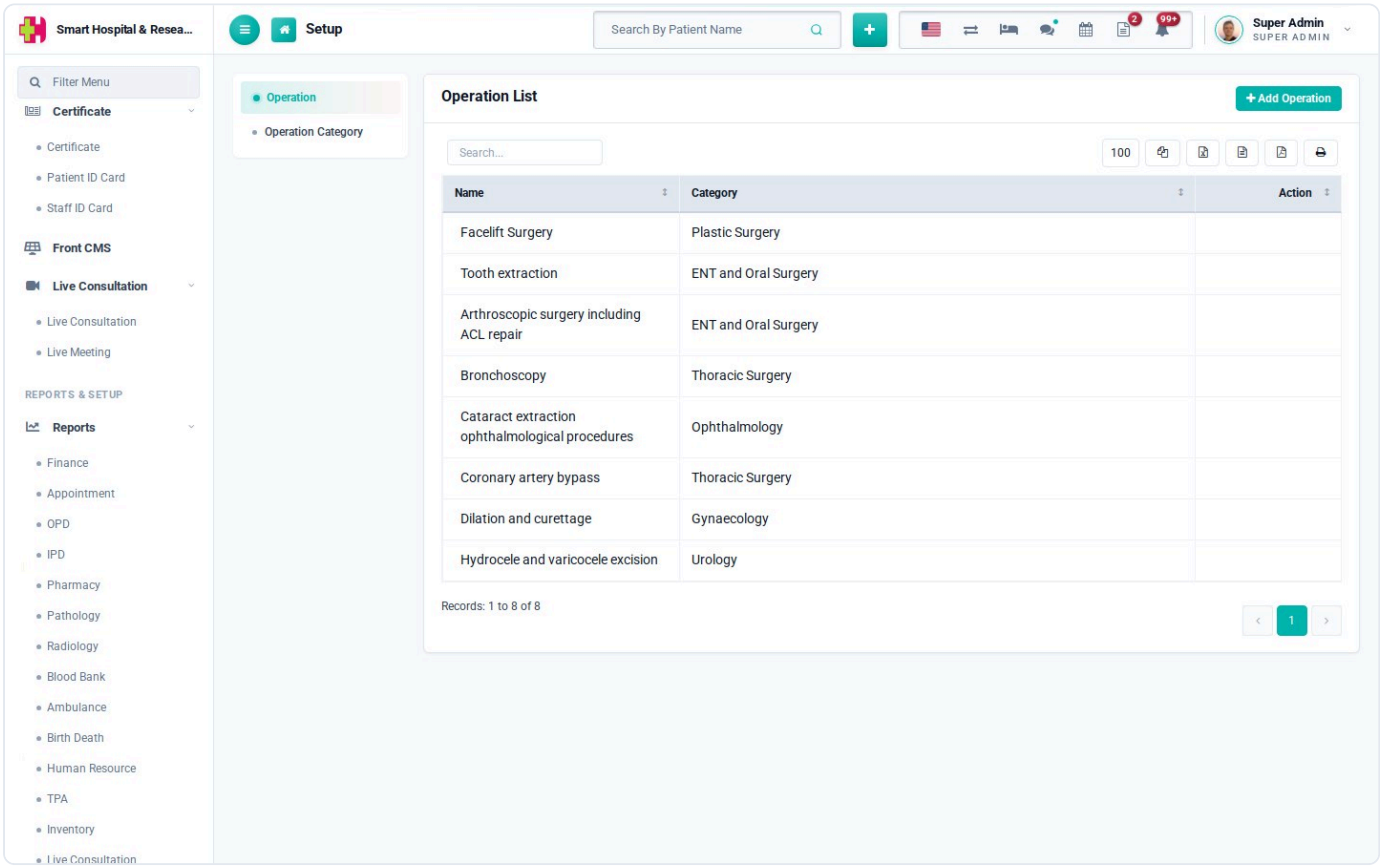
Screen 5.21 — Purpose List

- **Menu path:** Reports & Setup → Setup › Front Office · **URL:** `/admin/visitorspurpose`
- **Purpose:** Setup › Front Office
- **Grid (4 rows):** Purpose | Description | Action
- **Grid (2 rows):** Purpose * | Description
- **Panels on screen:** Purpose List Add Purpose
- **Actions:** 2, Add Purpose, Add, Save, Update
- **Search / filters:** visitors_purpose_1, description_1, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/visitorspurpose/add_multiple_purpose`): `visitors_purpose_1` (text); `description_1` (text)
- **Form 2** (posts to `/admin/visitorspurpose/edit`): `Purpose` (input); `Description` (textarea)



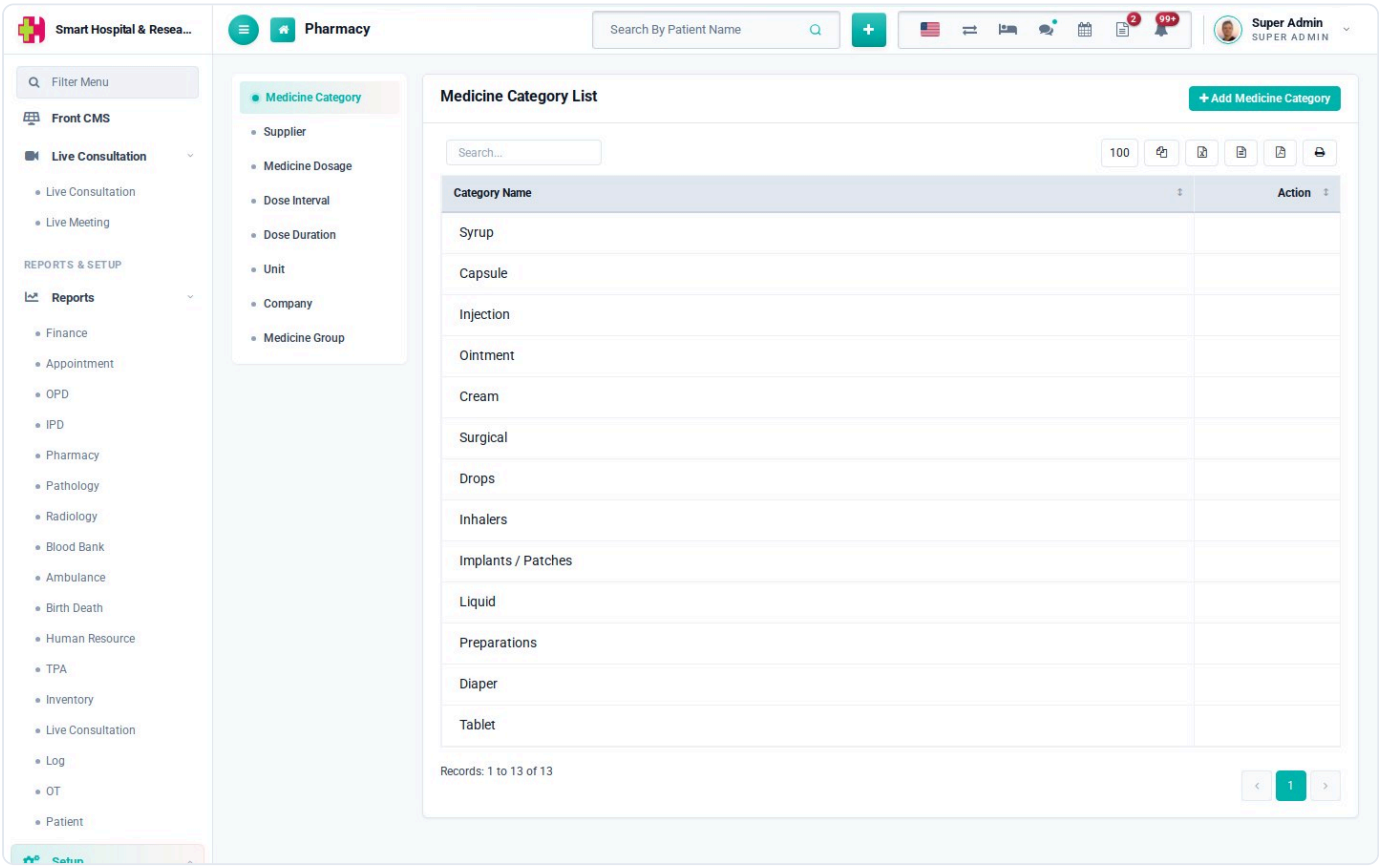
Screen 5.22 — Operation List

- **Menu path:** Reports & Setup → Setup › Operations · **URL:** `/admin/operationtheatre/index`
- **Purpose:** Setup › Operations
- **Grid (9 rows):** Name | Category | Action
- **Grid (2 rows):** Operation Name * | Category *
- **Panels on screen:** Operation List Add Operation
- **Actions:** 2, Add Operation, Add, Save, Update
- **Search / filters:** Operation Name, category_1, edit_category, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/operationtheatre/add_multiple_addoperation`): `Operation Name` (text); `category_1` (select) — ENT and Oral Surgery, Gynaecology, Ophthalmology, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery
- **Form 2** (posts to `/admin/operationtheatre/edit`): `Operation Name` (input); `Category` (select) — ENT and Oral Surgery, Gynaecology, Ophthalmology, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery



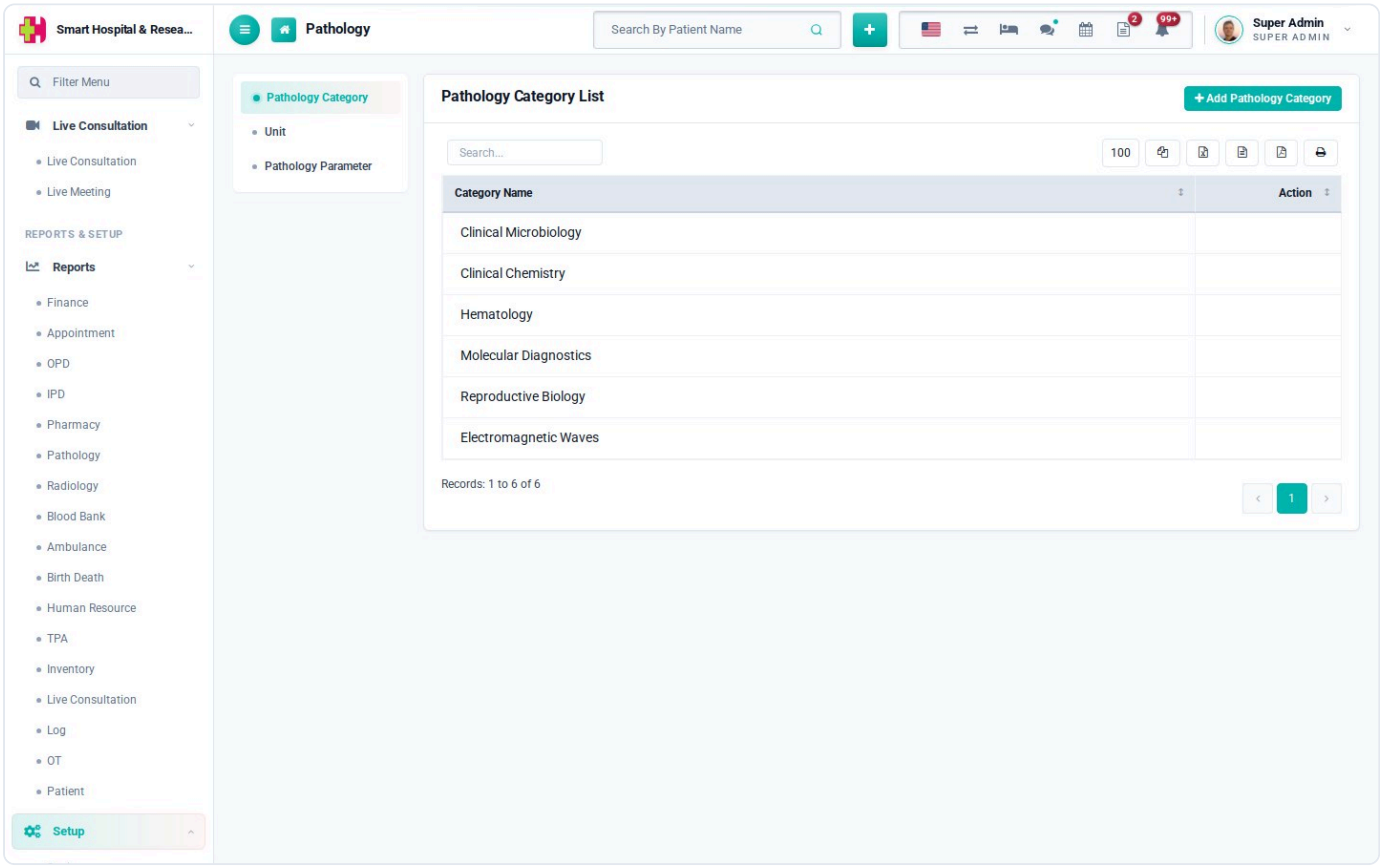
Screen 5.23 — Medicine Category List

- **Menu path:** Reports & Setup → Setup › Pharmacy · **URL:** `/admin/medicinecategory/medicine`
- **Purpose:** Medicine categories, units, suppliers and the medicine master (batch, MRP, sale price, GST, reorder level).
- **Grid (14 rows):** Category Name | Action
- **Panels on screen:** Medicine Category List Add Medicine Category
- **Actions:** 2, Add Medicine Category, Save, Update
- **Search / filters:** medicine_category, medicine_category, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/medicinecategory/add`): `Category Name` (text)



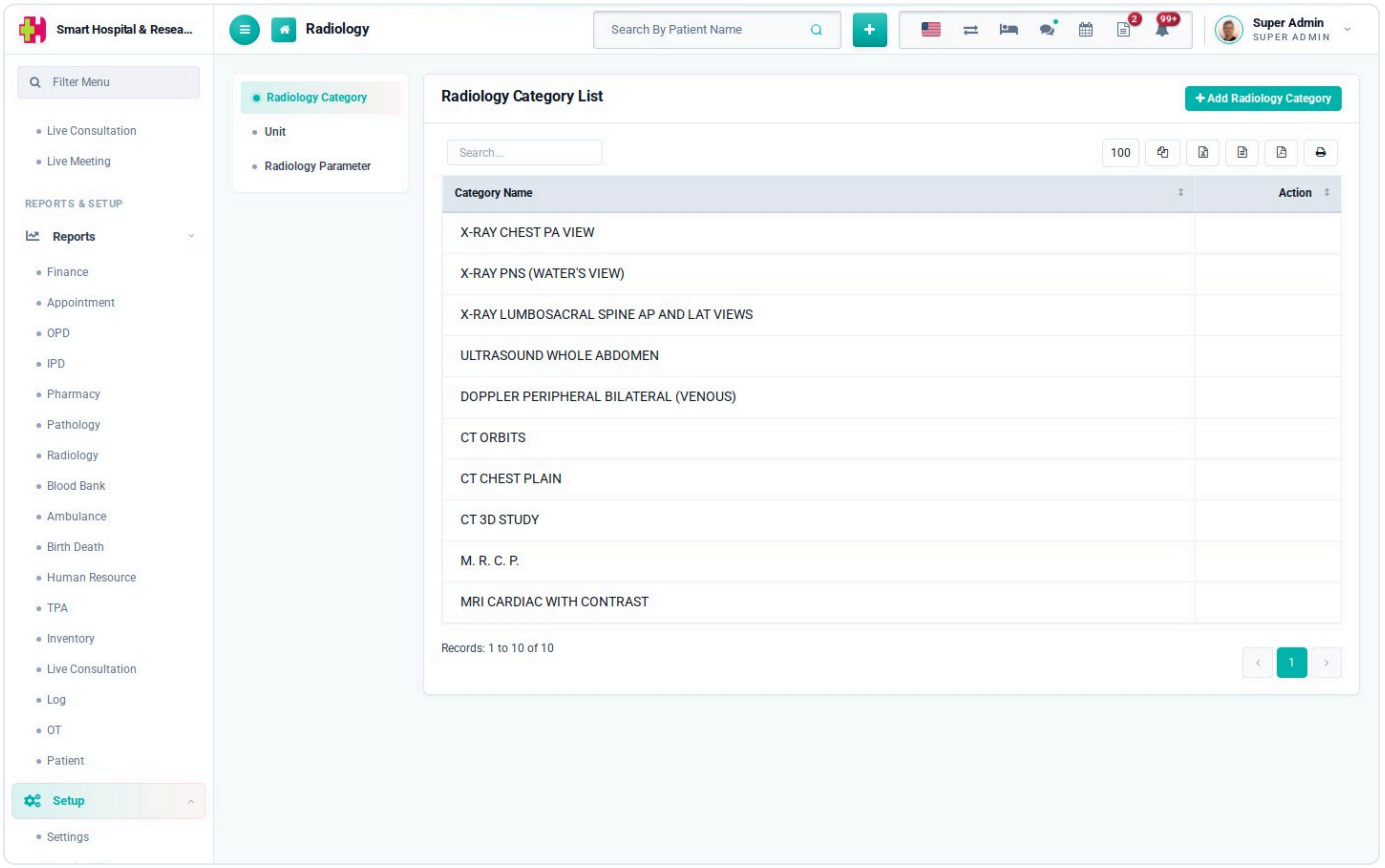
Screen 5.24 — Pathology Category List

- **Menu path:** Reports & Setup → Setup › Pathology · **URL:** `/admin/pathologycategory/addcategory`
- **Purpose:** Pathology categories and tests with parameters, units and normal ranges.
- **Grid (7 rows):** Category Name | Action
- **Panels on screen:** Pathology Category List Add Pathology Category
- **Actions:** 2, Add Pathology Category, Save, Update
- **Search / filters:** category_name, category_name, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/pathologycategory/add`): `Category Name` (text)



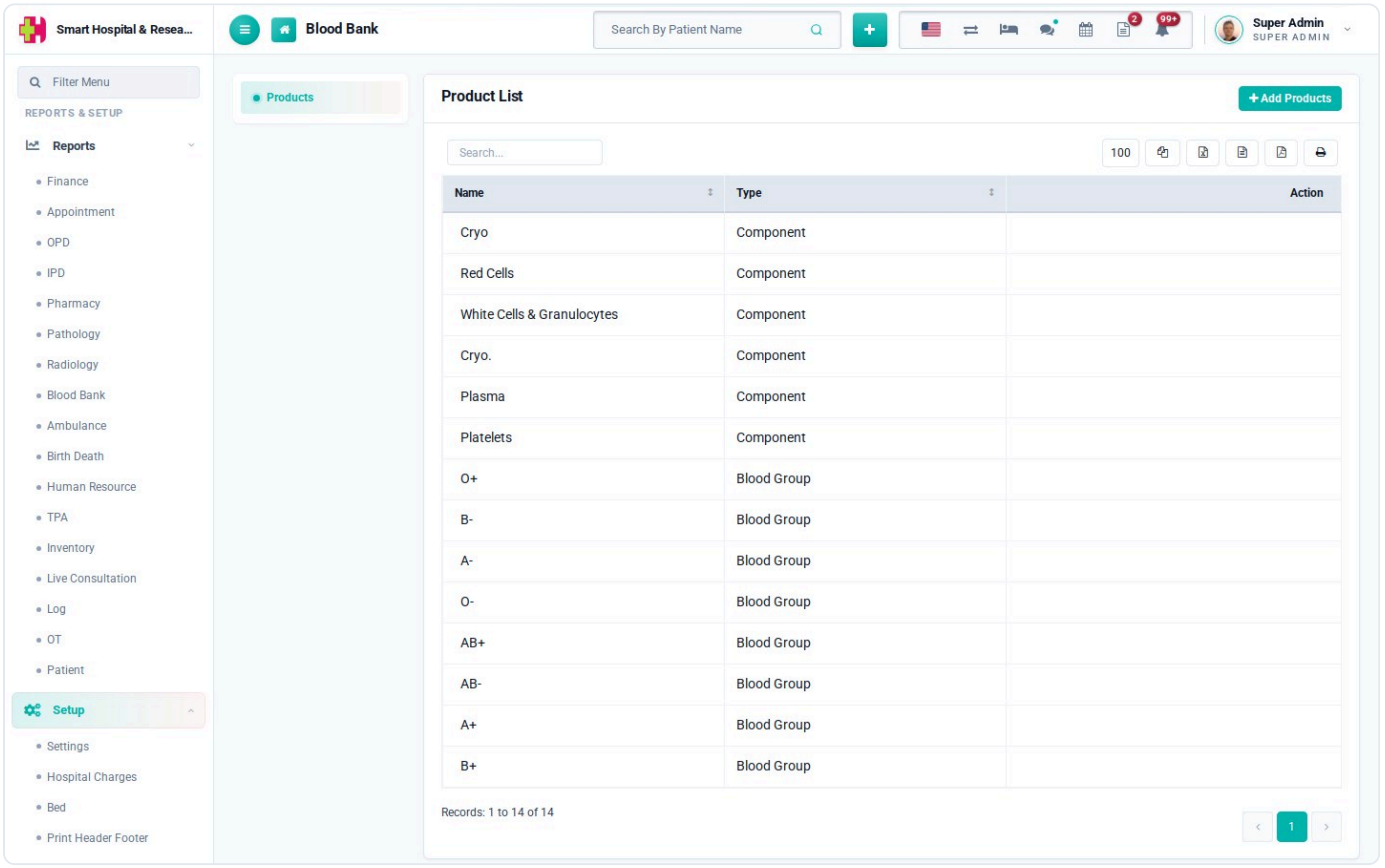
Screen 5.25 — Radiology Category List

- **Menu path:** Reports & Setup → Setup › Radiology · **URL:** `/admin/lab/addlab`
- **Purpose:** Radiology categories and studies.
- **Grid (11 rows):** Category Name | Action
- **Panels on screen:** Radiology Category List Add Radiology Category
- **Actions:** 2, Add Radiology Category, Save, Update
- **Search / filters:** lab_name, lab_name, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/lab/add`): `Category Name` (text)



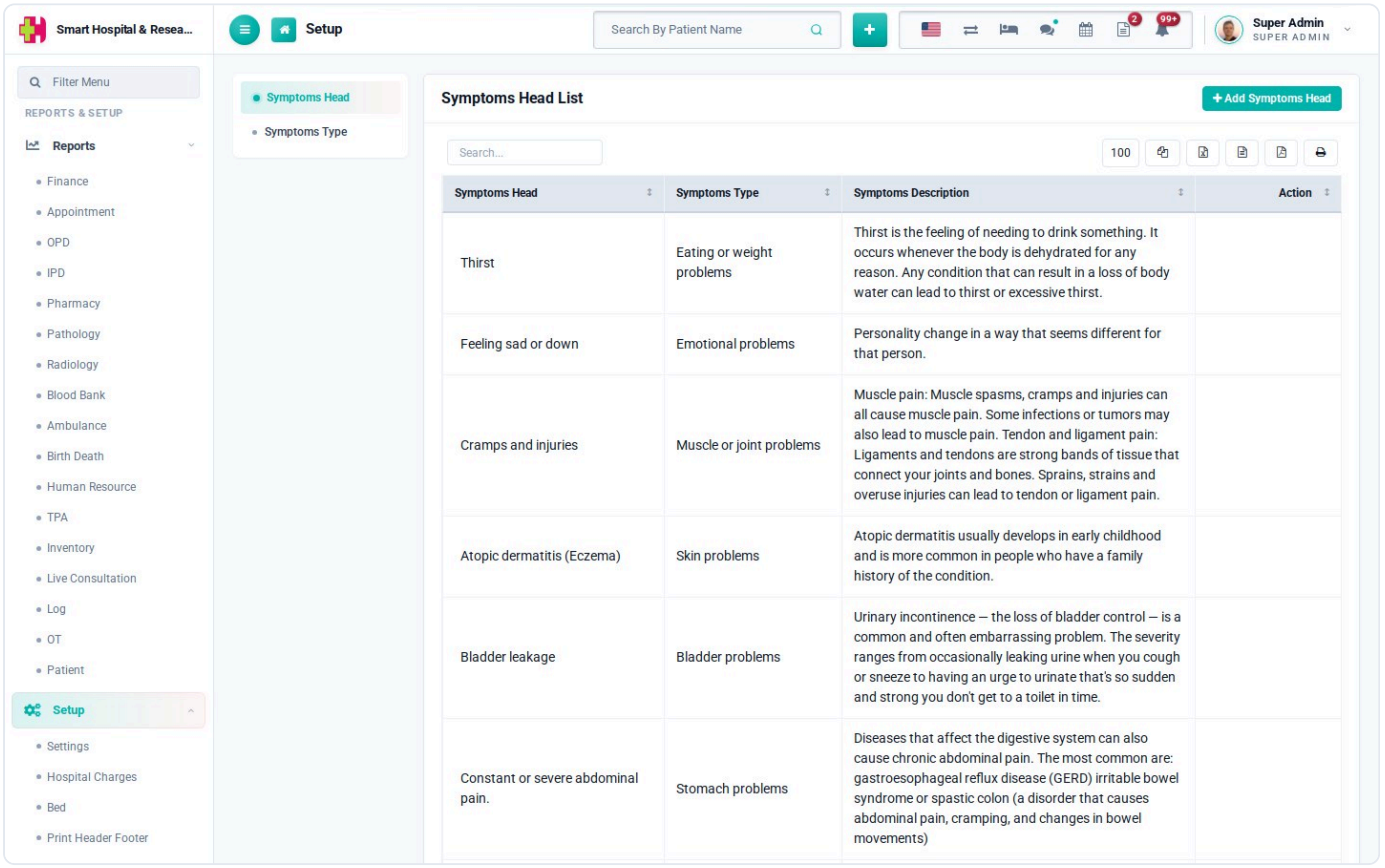
Screen 5.26 — Product List

- **Menu path:** Reports & Setup → Setup › Blood Bank · **URL:** `/admin/bloodbank/products`
- **Purpose:** Blood-bank components, bag types and product stock.
- **Grid (15 rows):** Name | Type | Action
- **Panels on screen:** Product List Add Products
- **Actions:** 2, Add Products, Save, Update
- **Search / filters:** type, name, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/bloodbank/add_product`): `Type` (select) — Blood Group, Component; `Name` (text)



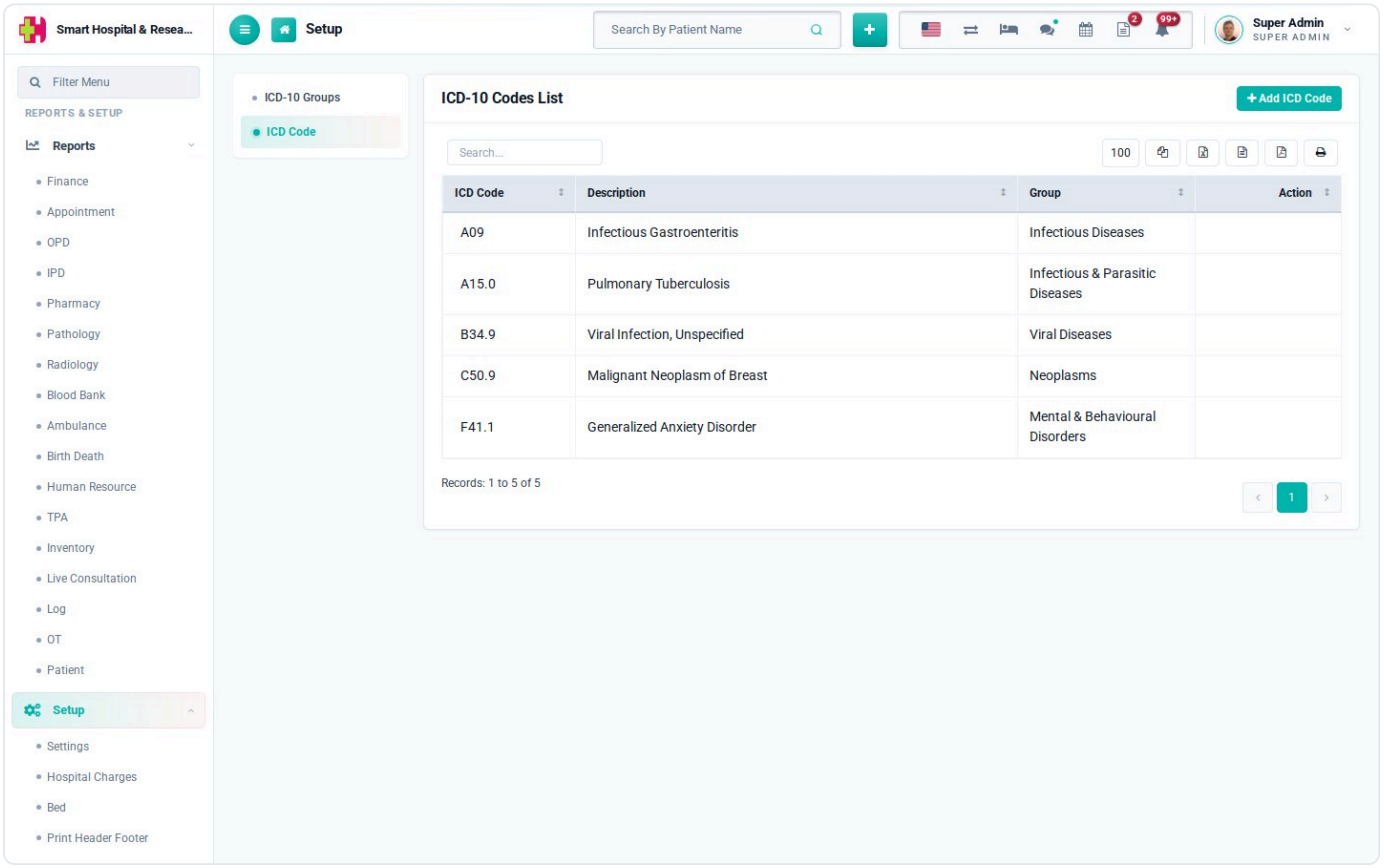
Screen 5.27 — Symptoms Head List

- **Menu path:** Reports & Setup → Setup › Symptoms · **URL:** `/admin/symptoms`
- **Purpose:** Symptom library used by OPD/IPD clinical entry.
- **Grid (8 rows):** Symptoms Head | Symptoms Type | Symptoms Description | Action
- **Panels on screen:** Symptoms Head List Add Symptoms Head
- **Actions:** 2, Add Symptoms Head, Save, Update
- **Search / filters:** symptoms_title, type, symptoms_title, type, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/symptoms/add`): `Symptoms Head *` (text); `Symptoms Type *` (select) — Eating or weight problems, Emotional problems, Muscle or joint problems, Skin problems, Bladder problems, Stomach problems; `Description` (textarea)



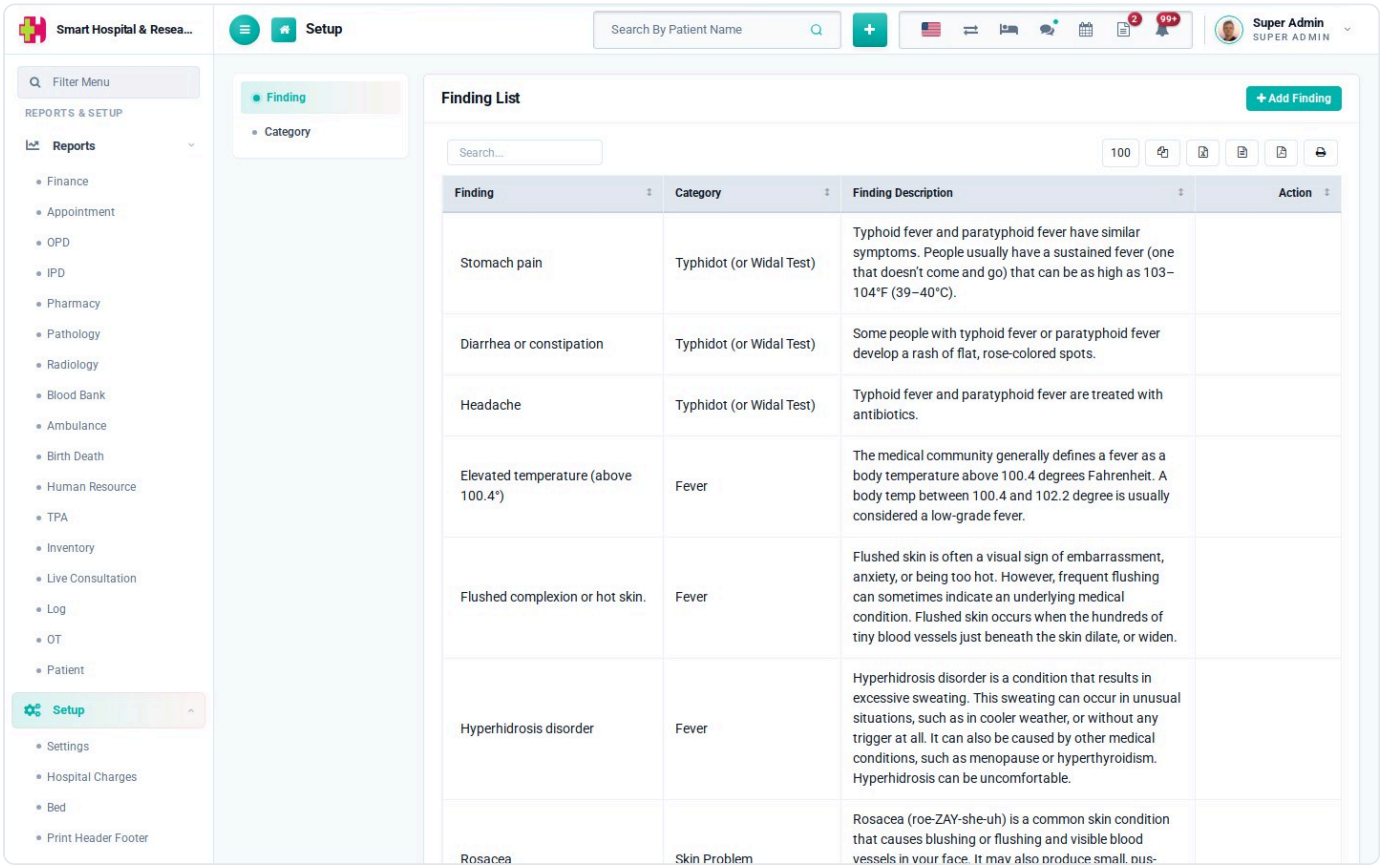
Screen 5.28 — ICD-10 Codes List

- **Menu path:** Reports & Setup → Setup › ICD-10 · **URL:** `/admin/icd10`
- **Purpose:** ICD-10 code library used for diagnosis entry.
- **Grid (6 rows):** ICD Code | Description | Group | Action
- **Panels on screen:** ICD-10 Codes List Add ICD Code
- **Actions:** 2, Add ICD Code, Save, Update
- **Search / filters:** group_id, icd_code, icd_description, group_id, icd_code, icd_description, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/icd10/add`): `Group *` (select) — Select Group, Infectious & Parasitic Diseases, Infectious Diseases, Mental & Behavioural Disorders, Neoplasms, Viral Diseases; `ICD Code *` (text); `Description *` (text)



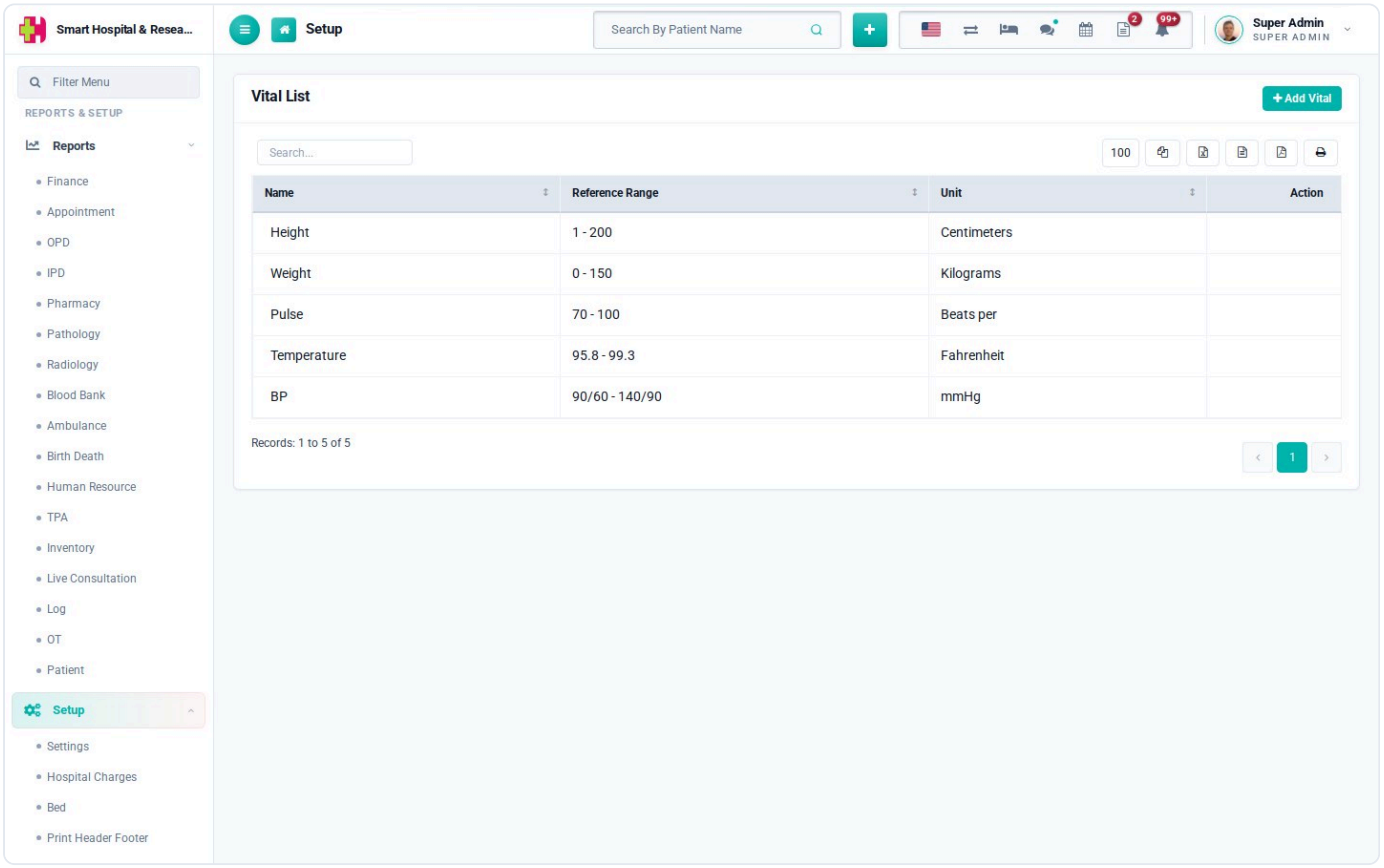
Screen 5.29 — Finding List

- **Menu path:** Reports & Setup → Setup › Findings · **URL:** `/admin/finding`
- **Purpose:** Finding library used by clinical encounters.
- **Grid (13 rows):** Finding | Category | Finding Description | Action
- **Panels on screen:** Finding List Add Finding
- **Actions:** 2, Add Finding, Save, Update
- **Search / filters:** name, type, name, type, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/finding/add`): `Finding` (text); `Category` (select) — Fever, Typhidot (or Widal Test), Skin Problem, Bone Density Problems, Hair Problems, Eye Diseases; `Description` (textarea)



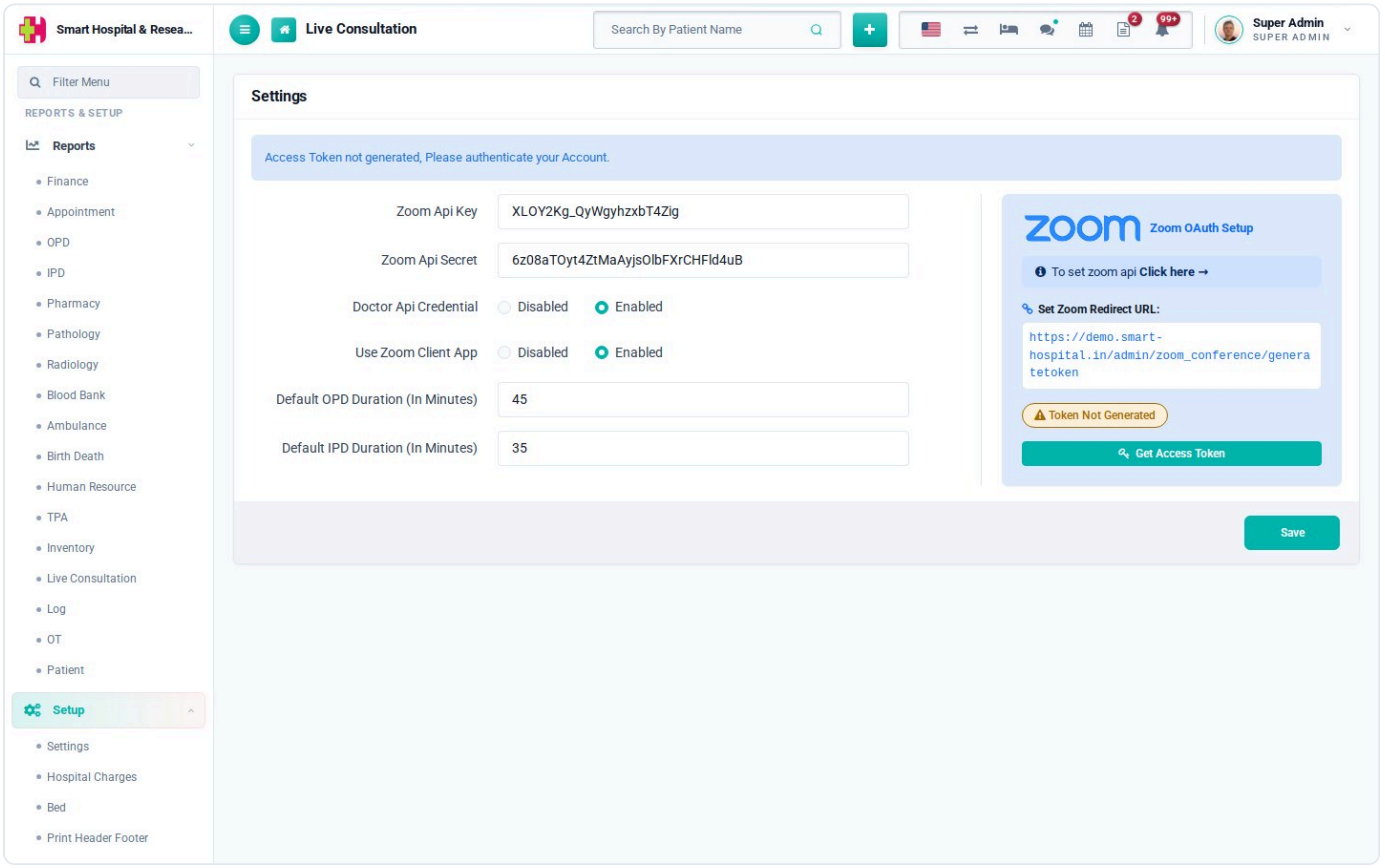
Screen 5.30 — Vital List

- **Menu path:** Reports & Setup → Setup › Vitals · **URL:** `/admin/vital`
- **Purpose:** Vital-sign master (temperature, pulse, BP, respiration, SpO2, BMI) for IPD/OPD charts.
- **Grid (6 rows):** Name | Reference Range | Unit | Action
- **Panels on screen:** Vital List Add Vital
- **Actions:** 2, Add Vital, Save, Update
- **Search / filters:** vital_name, From, To, unit, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1**: `Vital Name` (text); `From` (text); `To` (text); `Unit` (text)



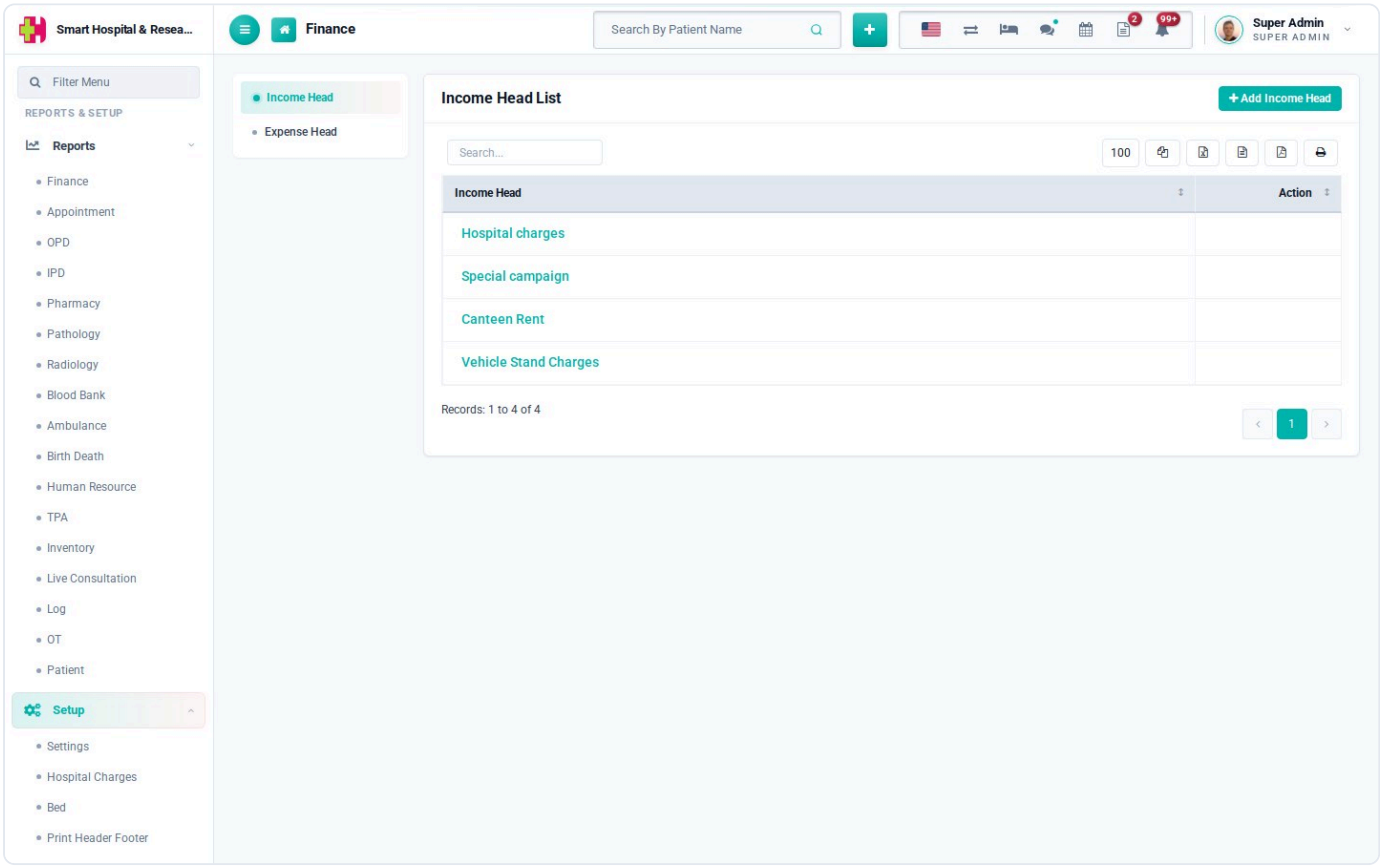
Screen 5.31 — Settings

- **Menu path:** Reports & Setup → Setup › Zoom Setting · **URL:** `/admin/zoom_conference`
- **Purpose:** Zoom API keys/secret so live consultation and live meeting work.
- **Panels on screen:** Settings
- **Actions:** 2, Get Access Token, Save, Update
- **Search / filters:** zoom_api_key, zoom_api_secret, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/zoom_conference`): `Zoom Api Key` (text); `Zoom Api Secret` (text); `Disabled` (radio); `Disabled` (radio); `Disabled` (radio); `Disabled` (radio); `Default OPD Duration (In Minutes)` (number); `Default IPD Duration (In Minutes)` (number)



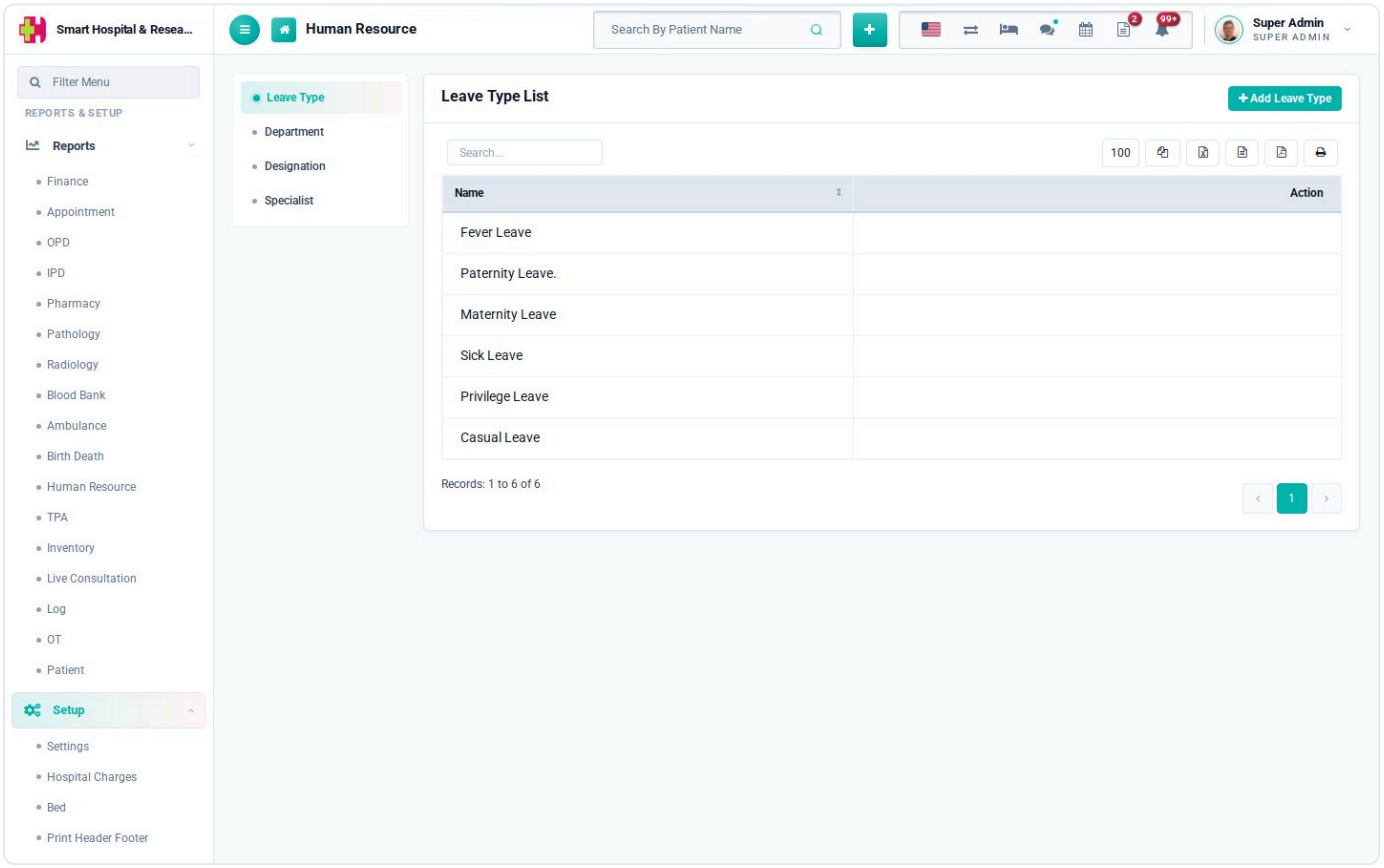
Screen 5.32 — Income Head List

- **Menu path:** Reports & Setup → Setup › Finance · **URL:** `/admin/incomehead`
- **Purpose:** Income and expense heads used by the finance ledger and reports.
- **Grid (5 rows):** Income Head | Action
- **Grid (2 rows):** Income Head * | Description
- **Panels on screen:** Income Head List Add Income Head
- **Actions:** 2, Add Income Head, Add, Save, Update
- **Search / filters:** incomehead_1, description_1, incomehead, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/incomehead/add_multiple_income_head`): `incomehead_1` (text); `description_1` (text)
- **Form 2** (posts to `/admin/incomehead/edit`): `Income Head` (text); `Description` (textarea)



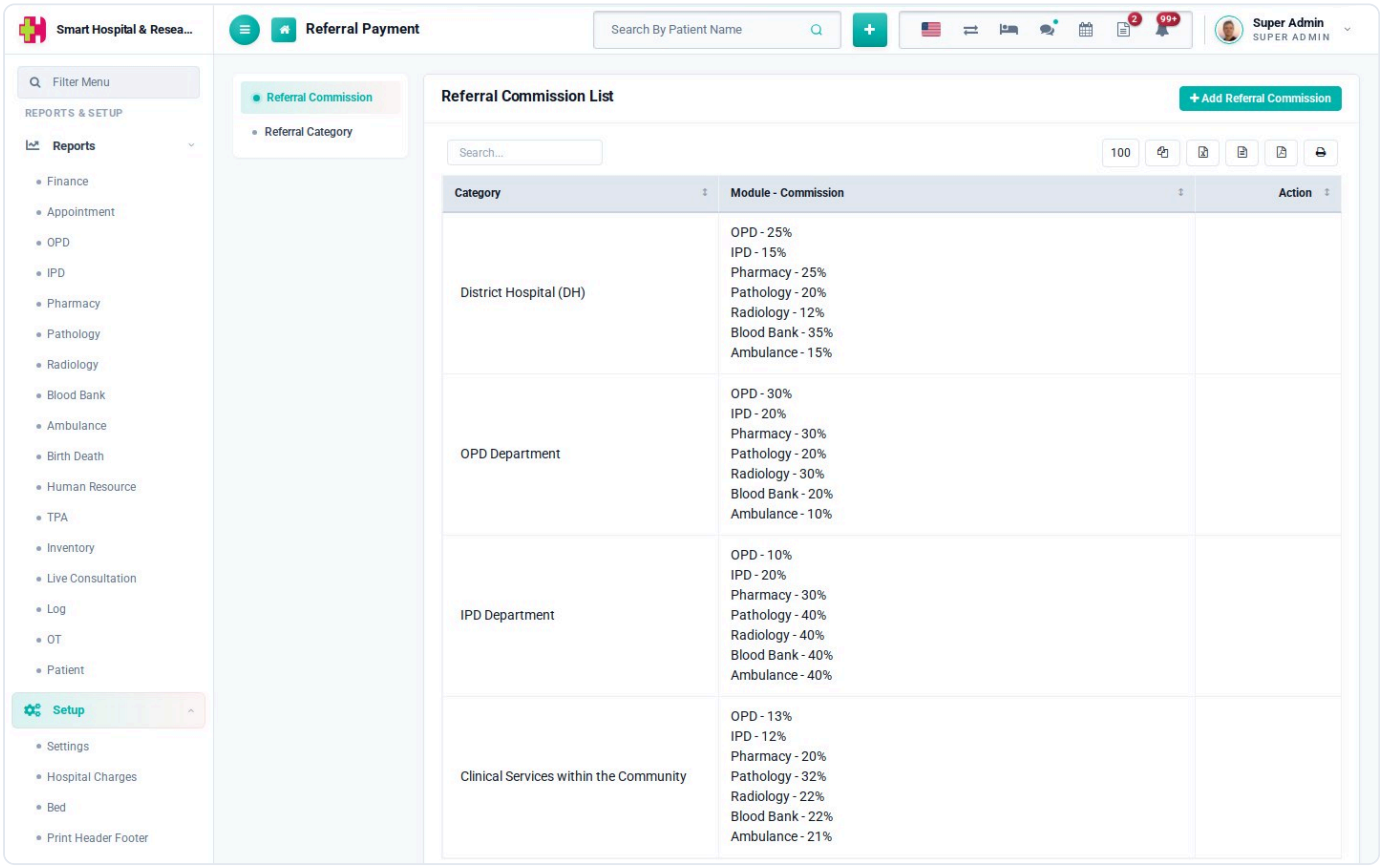
Screen 5.33 — Leave Type List

- **Menu path:** Reports & Setup → Setup › Human Resource · **URL:** `/admin/leavetypes`
- **Purpose:** Leave types and standing HR configuration.
- **Grid (7 rows):** Name | Action
- **Panels on screen:** Leave Type List Add Leave Type
- **Actions:** 2, Add Leave Type, Save, Update
- **Search / filters:** type, type, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/leavetypes/createLeaveType`): `Name` (text)



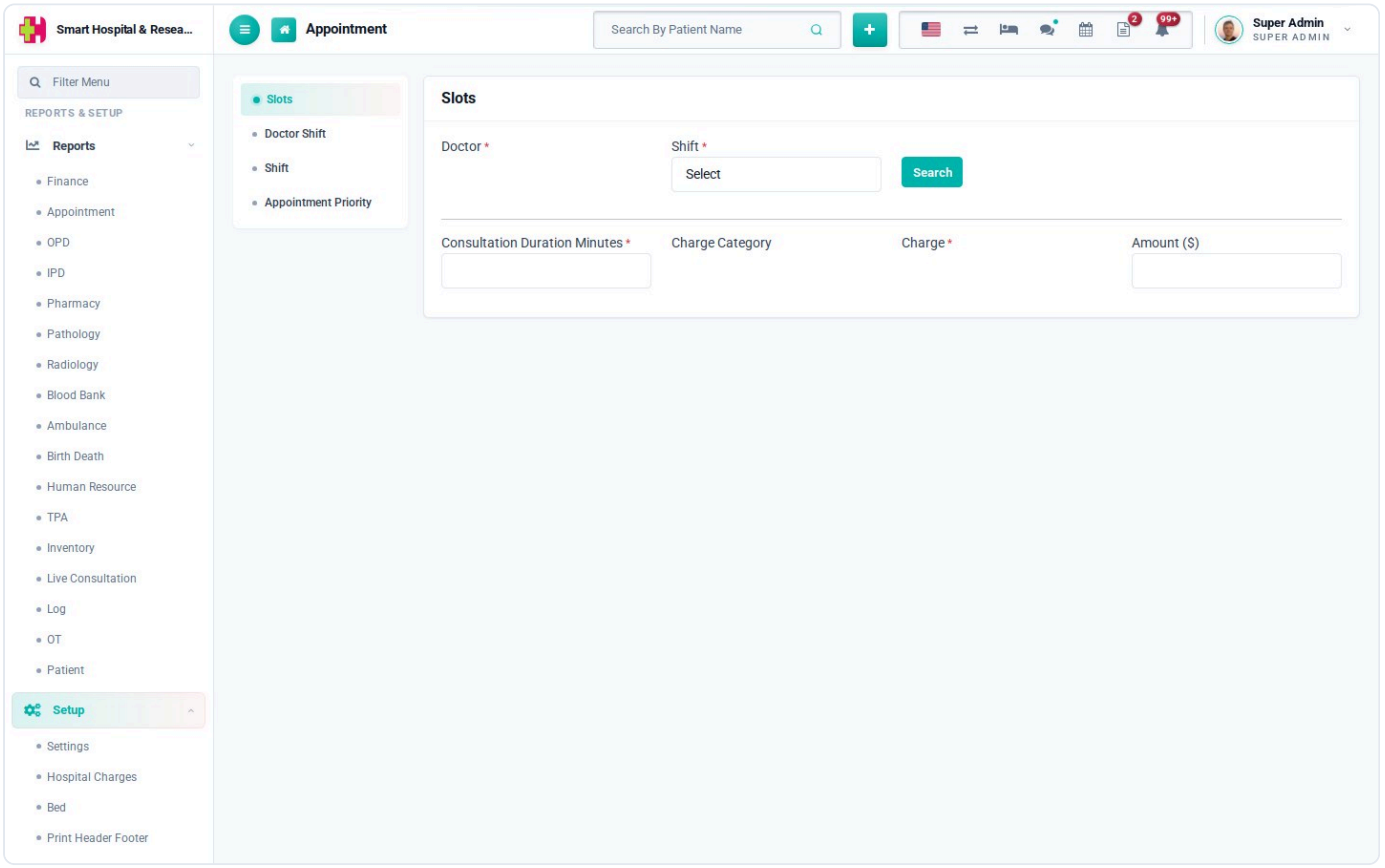
Screen 5.34 — Referral Commission List

- **Menu path:** Reports & Setup → Setup › Referral · **URL:** `/admin/referral/commission`
- **Purpose:** Referral commission percentages per referral person/service.
- **Grid (5 rows):** Category | Module - Commission | Action
- **Panels on screen:** Referral Commission List Add Referral Commission
- **Actions:** 2, Add Referral Commission, Apply To All, Save, Update
- **Search / filters:** category, commission, module_commission[], module_commission[], module_commission[], module_commission[], module_commission[], module_commission[], module_commission[], commission
- **Form 1**: `Category` (select) — Select Category, District Hospital (DH), OPD Department, IPD Department, Clinical Services within the Community, Valuing the Benefit of Clinical Services; `Standard Commission (%)` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text)
- **Form 2**: `Category` (select) — District Hospital (DH), OPD Department, IPD Department, Clinical Services within the Community, Valuing the Benefit of Clinical Services; `Standard Commission (%)` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text); `module_commission[]` (text)



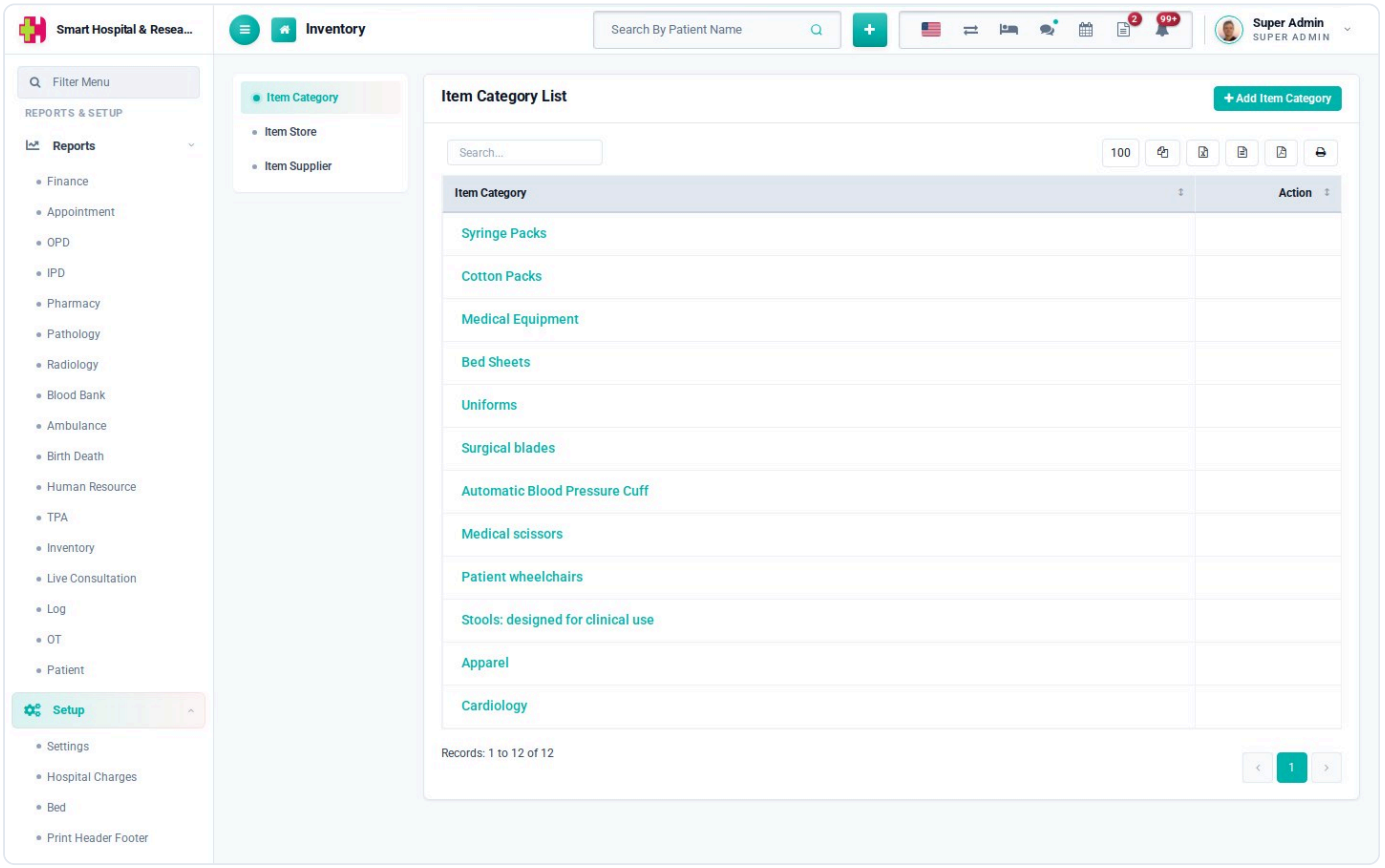
Screen 5.35 — Slots

- **Menu path:** Reports & Setup → Setup › Appointment · **URL:** `/admin/onlineappointment/index`
- **Purpose:** Appointment slots and the online-appointment intake queue.
- **Panels on screen:** Slots
- **Actions:** 2, Search, Save, Update
- **Search / filters:** doctor, shift, charge_category, charge_id, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/onlineappointment/`): `Doctor *` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Shift *` (select); `Consultation Duration Minutes *` (number); `Charge Category` (select) — Appointment Charges, Other Charges, OPD Consultation Fees, OPD Service, OPD Insurance, Intensive Care Units; `Charge` (select); `Amount ($)` (text)



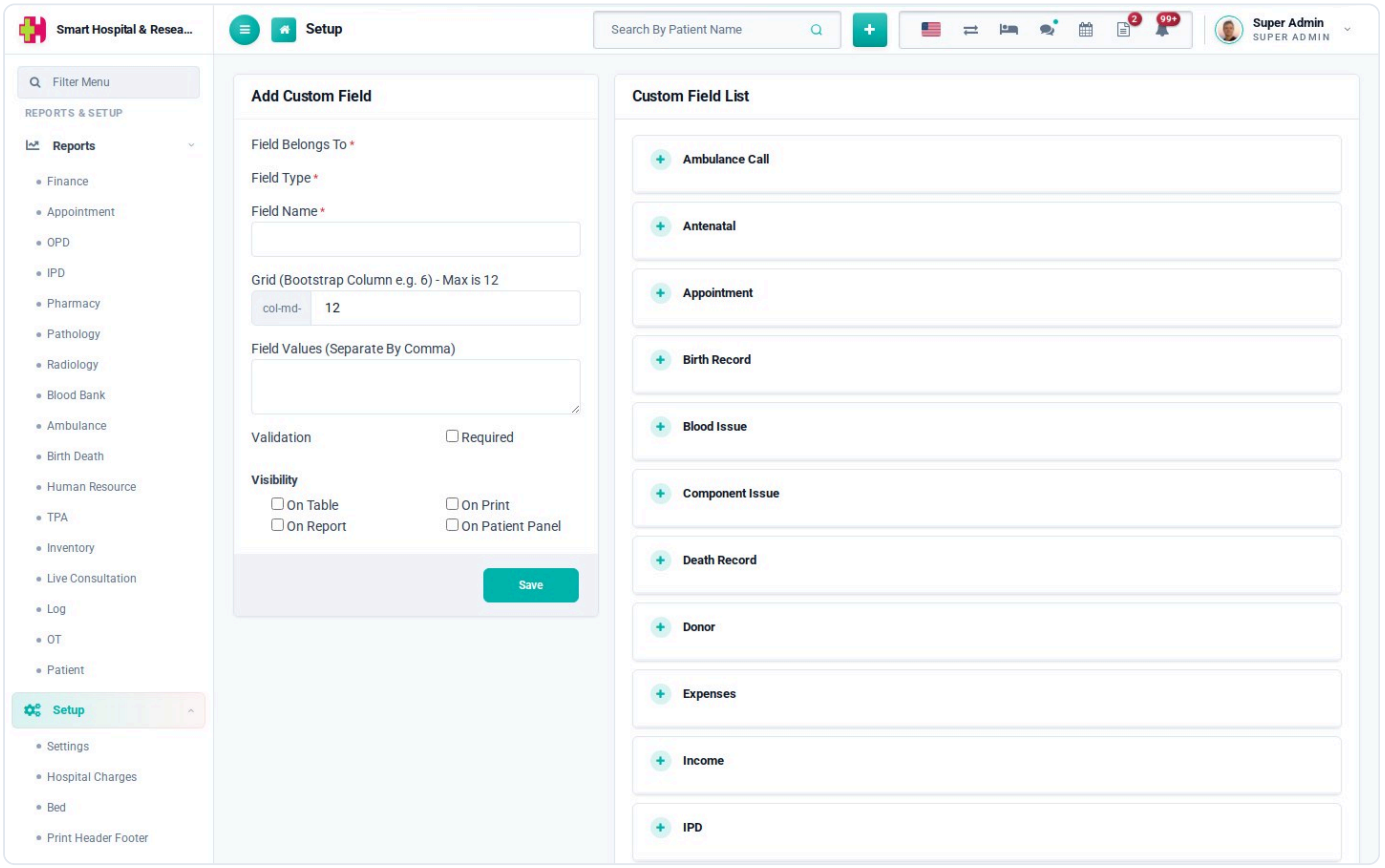
Screen 5.36 — Item Category List

- **Menu path:** Reports & Setup → Setup › Inventory · **URL:** `/admin/itemcategory`
- **Purpose:** Item categories and the item master for inventory.
- **Grid (13 rows):** Item Category | Action
- **Grid (2 rows):** Item Category * | Description
- **Panels on screen:** Item Category List Add Item Category
- **Actions:** 2, Add Item Category, Add, Save, Update
- **Search / filters:** itemcategory_1, description_1, itemcategory, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/itemcategory/add_multiple_itemcategory`): `itemcategory_1` (text); `description_1` (text)
- **Form 2** (posts to `/admin/itemcategory/edit`): `Item Category *` (text); `Description` (textarea)



Screen 5.37 — Add Custom Field

- **Menu path:** Reports & Setup → Setup › Custom Fields · **URL:** `/admin/customfield`
- **Purpose:** Add hospital-specific fields to core entities without changing the schema.
- **Panels on screen:** Add Custom Field · Custom Field List · Ambulance Call · Antenatal · Appointment · Birth Record · Blood Issue · Component Issue
- **Actions:** 2, Save, Update
- **Search / filters:** belong_to, type, name, envato_market_purchase_code, email, app-envato_market_purchase_code, app-email
- **Form 1** (posts to `/admin/customfield`): `Field Belongs To` (select) — Ambulance Call, Antenatal, Appointment, Birth Record, Blood Issue, Component Issue; `Field Type` (select) — Checkbox, Color Picker, Date Picker, Datetime Picker, Input, Hyperlink; `Field Name` (text); `column` (number); `Field Values (Separate By Comma)` (textarea); `Required` (checkbox); `On Table` (checkbox); `On Print` (checkbox); `On Report` (checkbox); `On Patient Panel` (checkbox)

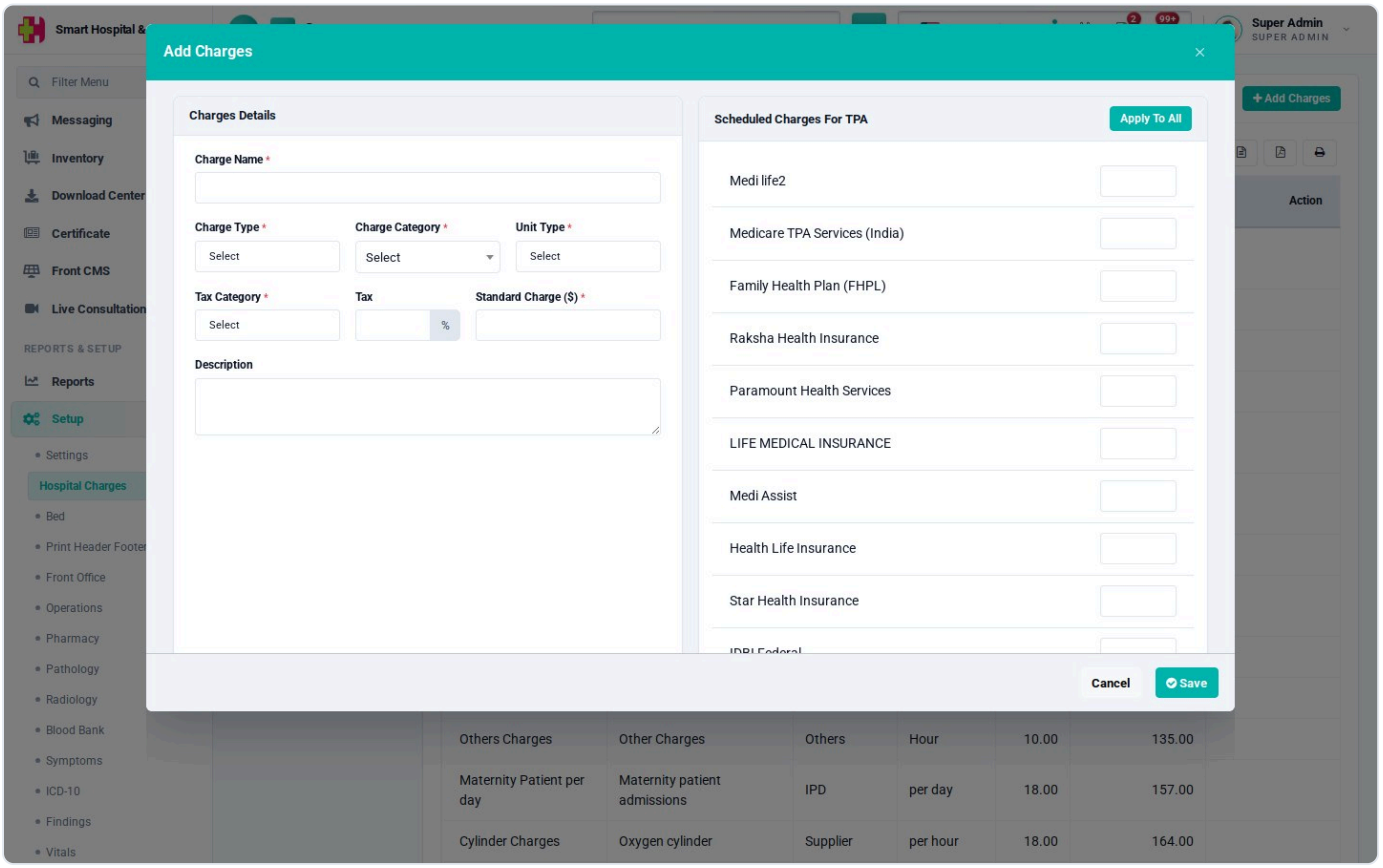


Module 5 — data-entry dialogs captured

Screen	Dialog	Fields	Screenshot
Charges Details List	**Add Charges**	19	`057-setup-hospital-charges__add-charges.jpg`
Symptoms Head List	**Add Symptoms Head**	3	`066-setup-symptoms__add-symptoms-head.jpg`
ICD-10 Codes List	**Add ICD Code**	3	`067-setup-icd-10__add-icd-code.jpg`
Finding List	**Add Finding**	3	`068-setup-findings__add-finding.jpg`

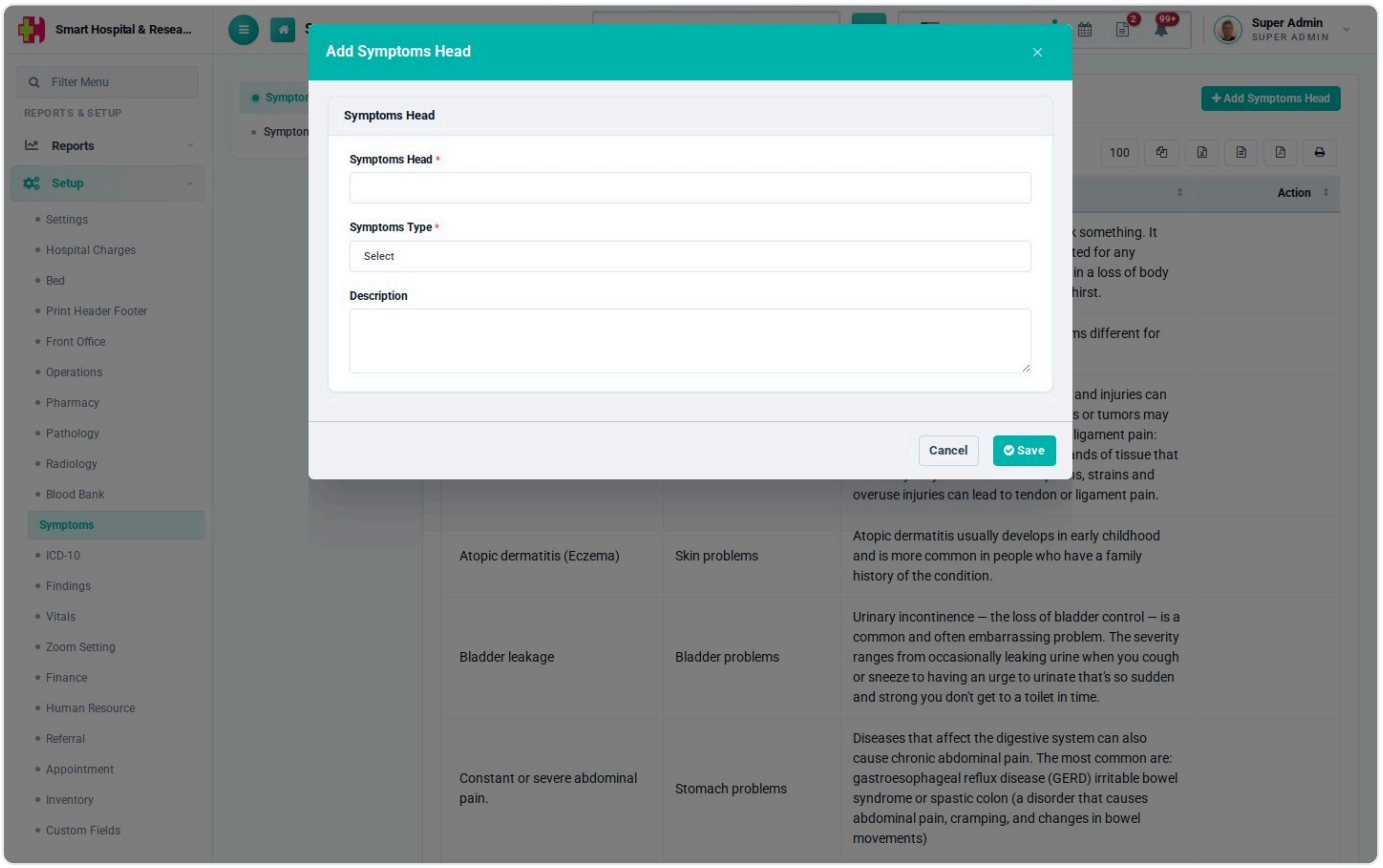
Add Charges — opened from *Charges Details List*

- **Form**: `Charge Name` (text); `Charge Type` (select) — Appointment, OPD, IPD, Pathology, Radiology, Blood Bank; `Charge Category` (select); `Unit Type` (select) — (ML), Litter, (nm), per day, Hour, Insurance; `Tax Category` (select) — Blood Module, OPD Tax, IPD Tax, Operation Charges, Pathology Tax, Radiology Tax; `tax_percentage` (text); `Standard Charge ($)` (text); `Description` (textarea); `schedule_charge_14` (text); `schedule_charge_13` (text); `schedule_charge_12` (text); `schedule_charge_8` (text); `schedule_charge_7` (text); `schedule_charge_6` (text); `schedule_charge_5` (text); `schedule_charge_4` (text); `schedule_charge_3` (text); `schedule_charge_2` (text); `schedule_charge_1` (text)



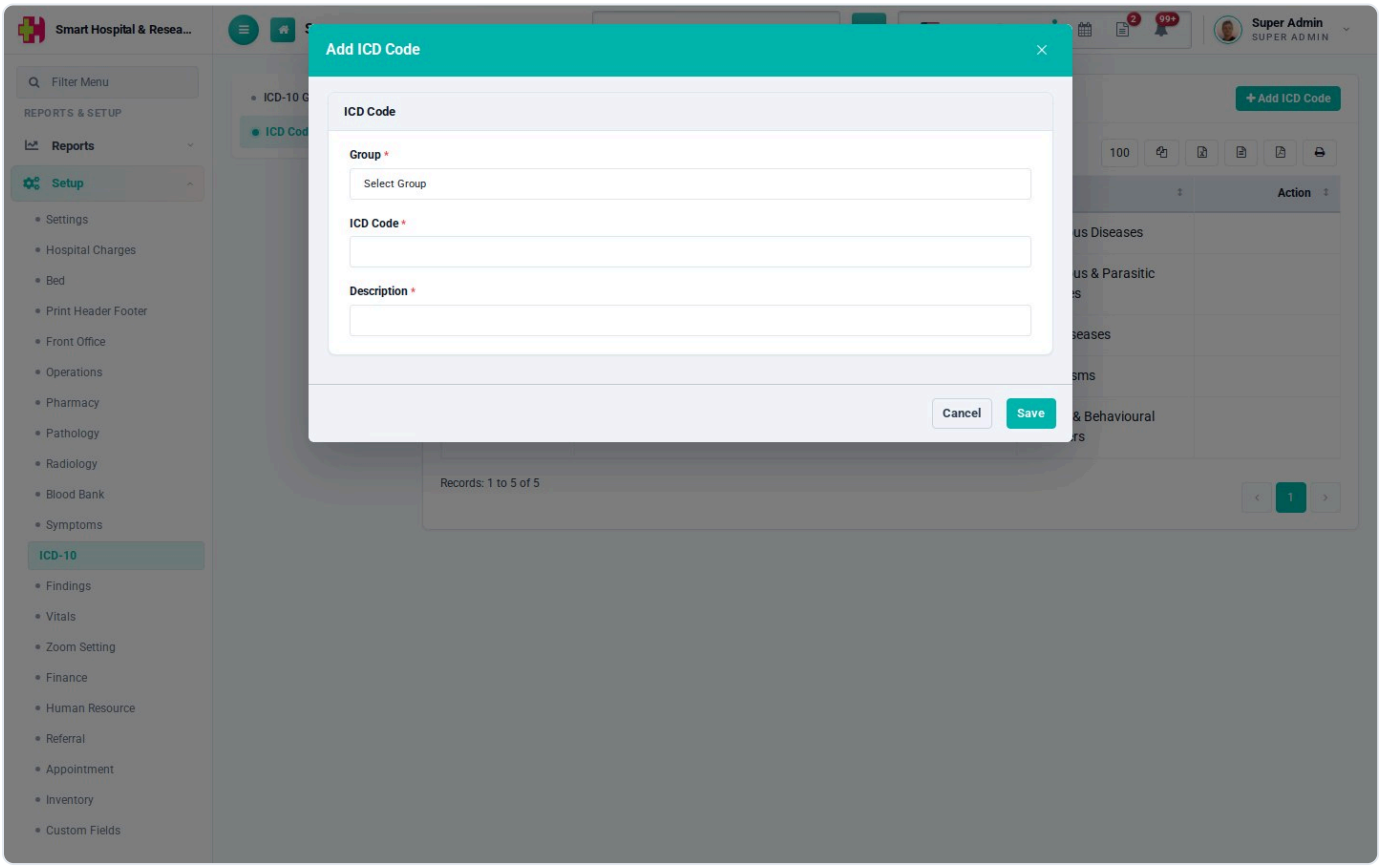
Add Symptoms Head — opened from *Symptoms Head List*

- **Form** (posts to `/admin/symptoms/add`): `Symptoms Head *` (text); `Symptoms Type *` (select) — Eating or weight problems, Emotional problems, Muscle or joint problems, Skin problems, Bladder problems, Stomach problems; `Description` (textarea)



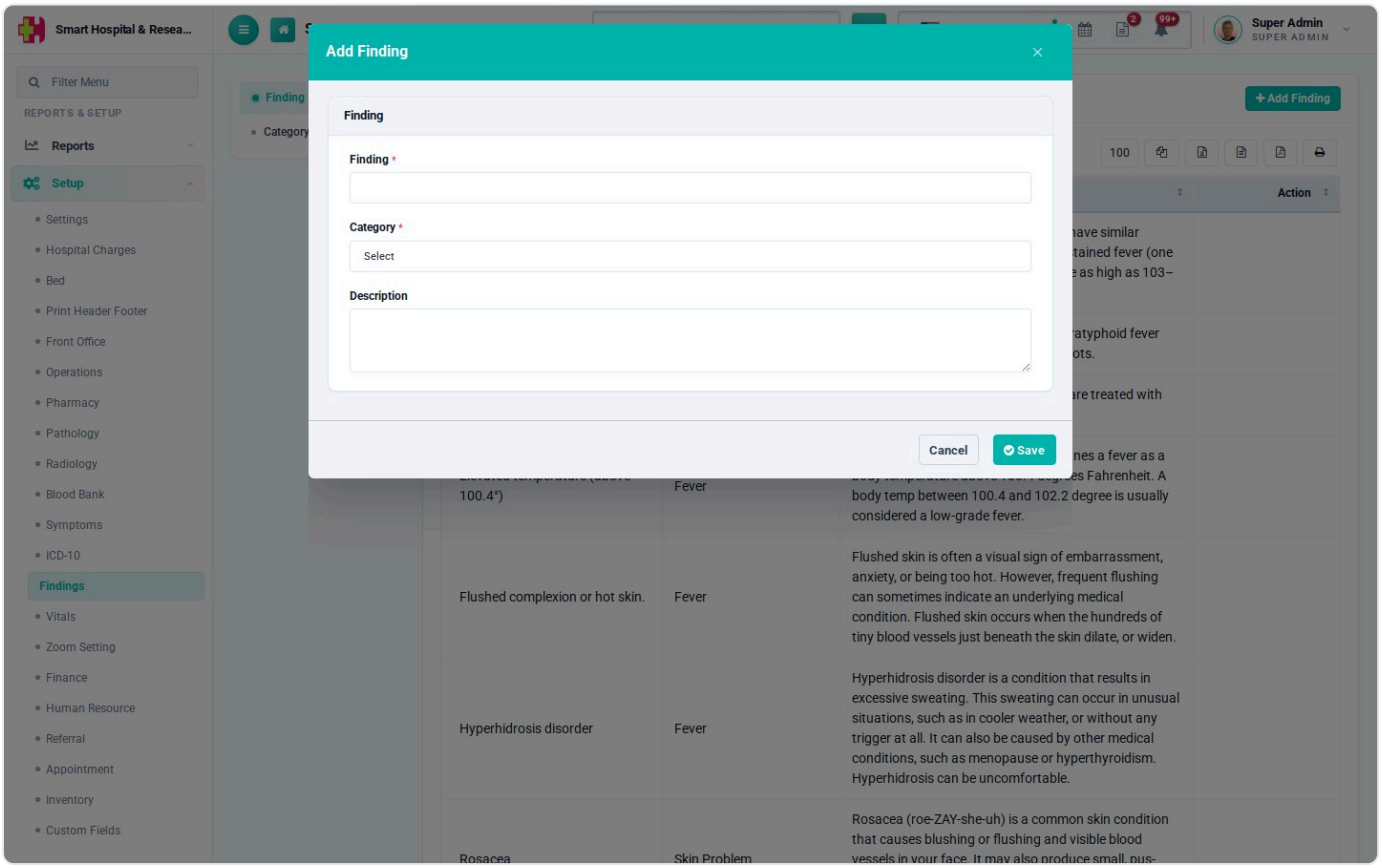
Add ICD Code — opened from *ICD-10 Codes List*

- **Form** (posts to `/admin/icd10/add`): `Group *` (select) — Select Group, Infectious & Parasitic Diseases, Infectious Diseases, Mental & Behavioural Disorders, Neoplasms, Viral Diseases; `ICD Code *` (text); `Description *` (text)



Add Finding — opened from *Finding List*

- **Form** (posts to `/admin/finding/add`): `Finding` (text); `Category` (select) — Fever, Typhidot (or Widal Test), Skin Problem, Bone Density Problems, Hair Problems, Eye Diseases; `Description` (textarea)



3. Record-level screens (opened from real data)

These screens were reached by opening an actual record from a list, so they show the real clinical and financial layout, including every tab of the record.

3.1 Single-module billing screens (OPD / appointment)

- **Opened from:** `//admin/bill/dashboard` → `/admin/bill/appointment`
- **Screenshot:** `docs/assets/screens/detail-billing-screen.jpg`
- **Record tabs:** Today Appointment · Upcoming Appointment · Old Appointment
- **Table:** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address
- **Table:** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address
- **Table:** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address
- **Form** *(dialog)*: `Doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Doctor Fees ($)` (text); `Shift` (select); `Appointment Date` (text); `Slot` (select); `Appointment Priority` (select) — Normal, Urgent, Very Urgent, Low; `Status *` (select) — Pending, Approved, Cancel; `Discount Percentage` (text); `Live Consultant (On Video Conference)` (select) — No, Yes; `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; `Message` (textarea); `Cheque No` (text); `Cheque Date` (text); `document` (file); `Alternate Address` (textarea)
- **Form** *(dialog)*: `Doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Doctor Fees ($)` (text); `Shift` (select); `Appointment Date` (text); `Slot` (select);

`Appointment Priority` (select) — Normal, Urgent, Very Urgent, Low; `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; `Discount Percentage` (text); `Status *` (select) — Pending, Approved, Cancel; `Live Consultant (On Video Conference)` (select) — No, Yes; `Message` (textarea)

Cramps and injuries
Muscle pain: Muscle spasms, cramps and injuries can all cause muscle pain. Some infections or tumors may also lead to muscle pain. Tendon and ligament pain: Ligaments and tendons are strong bands of tissue that connect your joints and bones. Sprains, strains and overuse injuries can lead to tendon or ligament pain.

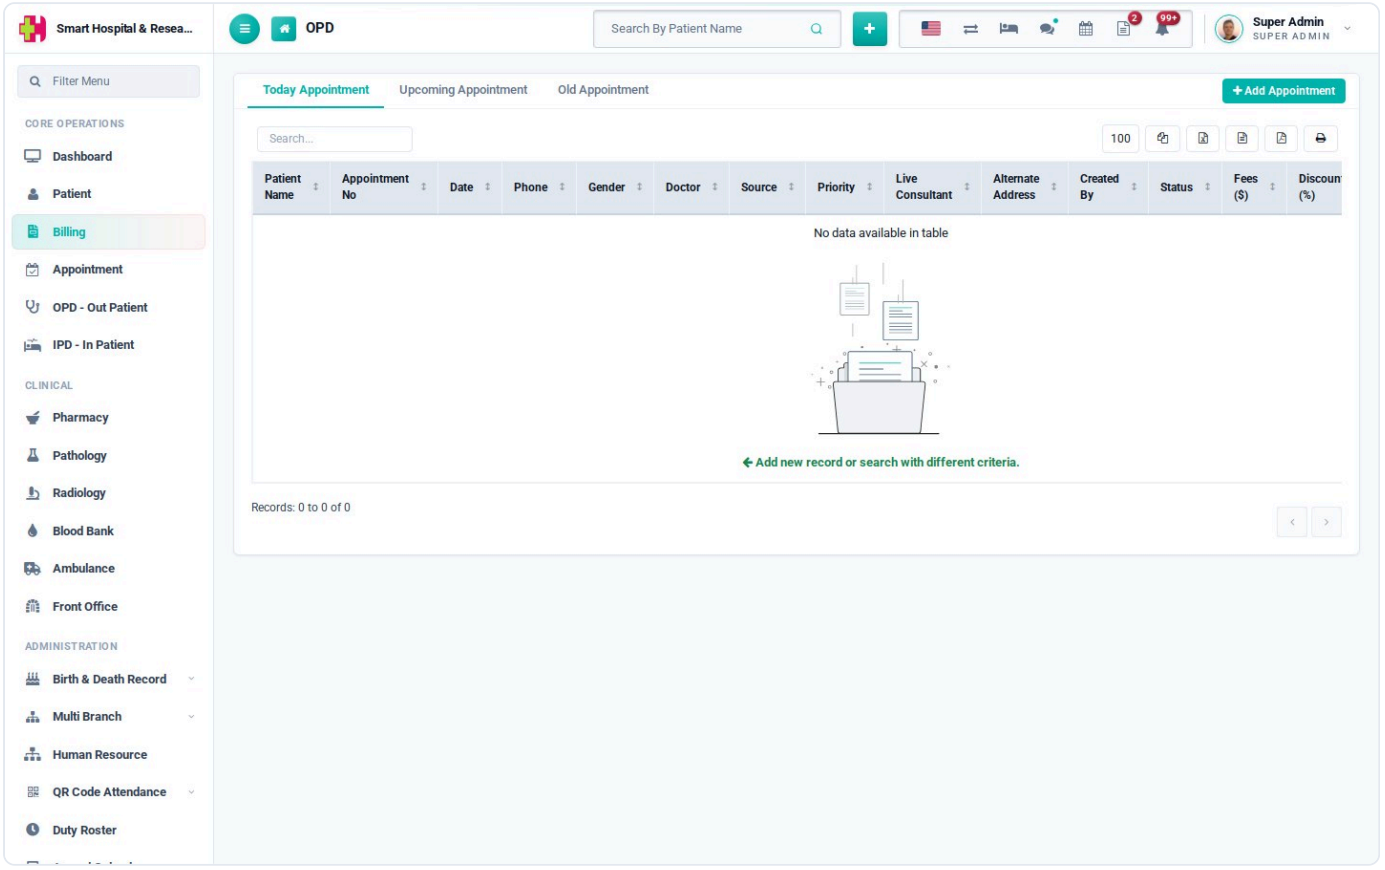
- **Grid (2 rows):** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address | Created By | Status

- **Grid (25 rows):** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address | Created By | Status
- **Grid (101 rows):** Patient Name | Appointment No | Date | Phone | Gender | Doctor | Source | Priority | Live Consultant | Alternate Address | Created By | Status
- **Form** *(dialog)*: `Doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Doctor Fees ($)` (text); `Shift` (select); `Appointment Date` (text); `Slot` (select); `Appointment Priority` (select) — Normal, Urgent, Very Urgent, Low; `Status *` (select) — Pending, Approved, Cancel; `Discount Percentage` (text); `Live Consultant (On Video Conference)` (select) — No, Yes; `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; `Message` (textarea); `Cheque No` (text); `Cheque Date` (text); `document` (file); `Alternate Address` (textarea)
- **Form** *(dialog)*: `Doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Doctor Fees ($)` (text); `Shift` (select); `Appointment Date` (text); `Slot` (select); `Appointment Priority` (select) — Normal, Urgent, Very Urgent, Low; `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; `Discount Percentage` (text); `Status *` (select) — Pending, Approved, Cancel; `Live Consultant (On Video Conference)` (select) — No, Yes; `Message` (textarea)

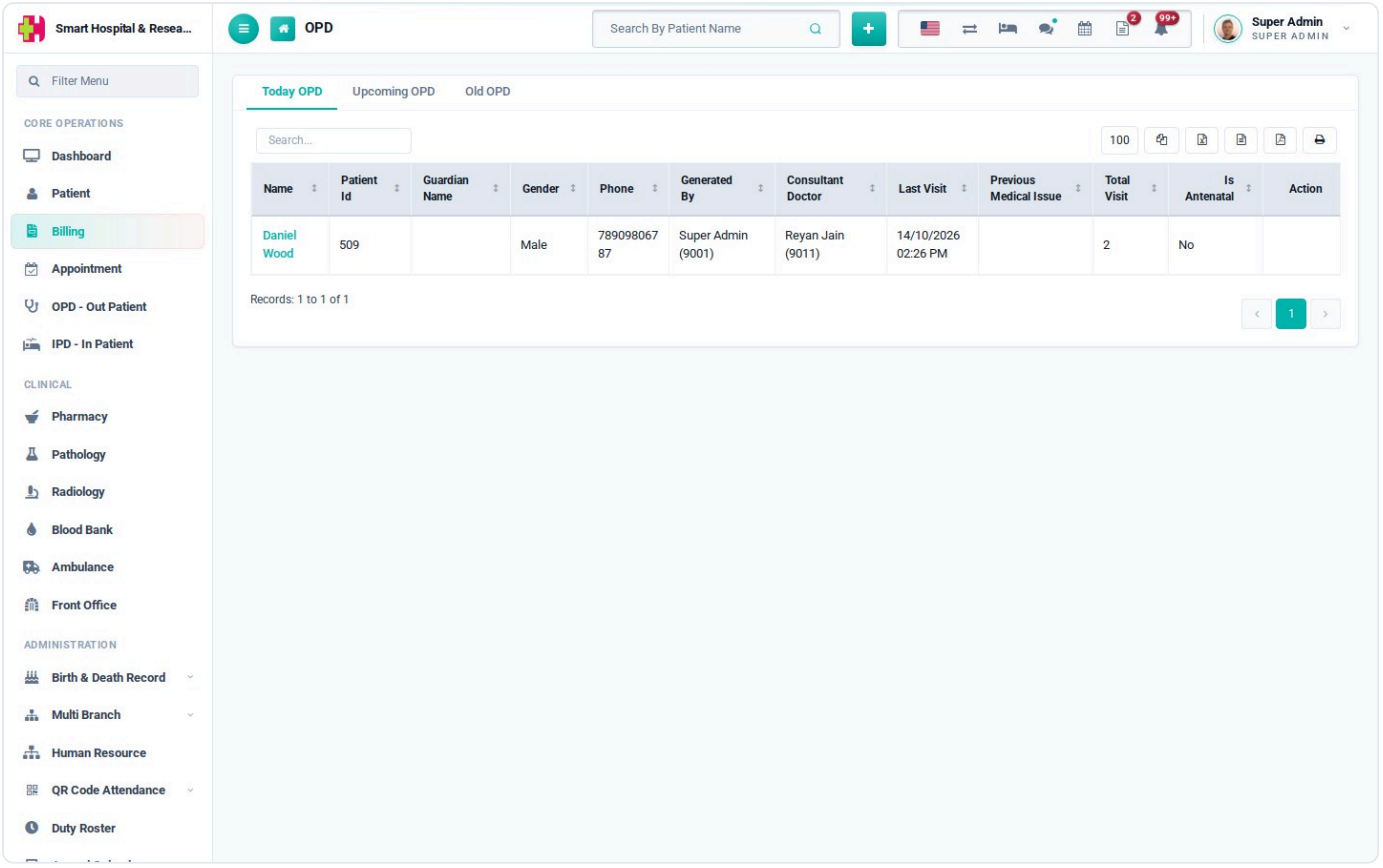


4.2 Billing - OPD module — `/admin/bill/opd`

- **Tabs:** Today OPD · Upcoming OPD · Old OPD
- **Grid (2 rows):** Name | Patient Id | Guardian Name | Gender | Phone | Generated By | Consultant Doctor | Last Visit | Previous Medical Issue | Total Visit | Is Antenatal | Action
- **Form** (posts to `/admin/patient`) *(dialog)*: `symptoms_type` (select) — Eating or weight problems, Emotional problems, Muscle or joint problems, Skin problems, Bladder problems, Stomach problems; `field` (search); `Select` (text); `Symptoms Description` (textarea); `Note` (textarea); `Any`

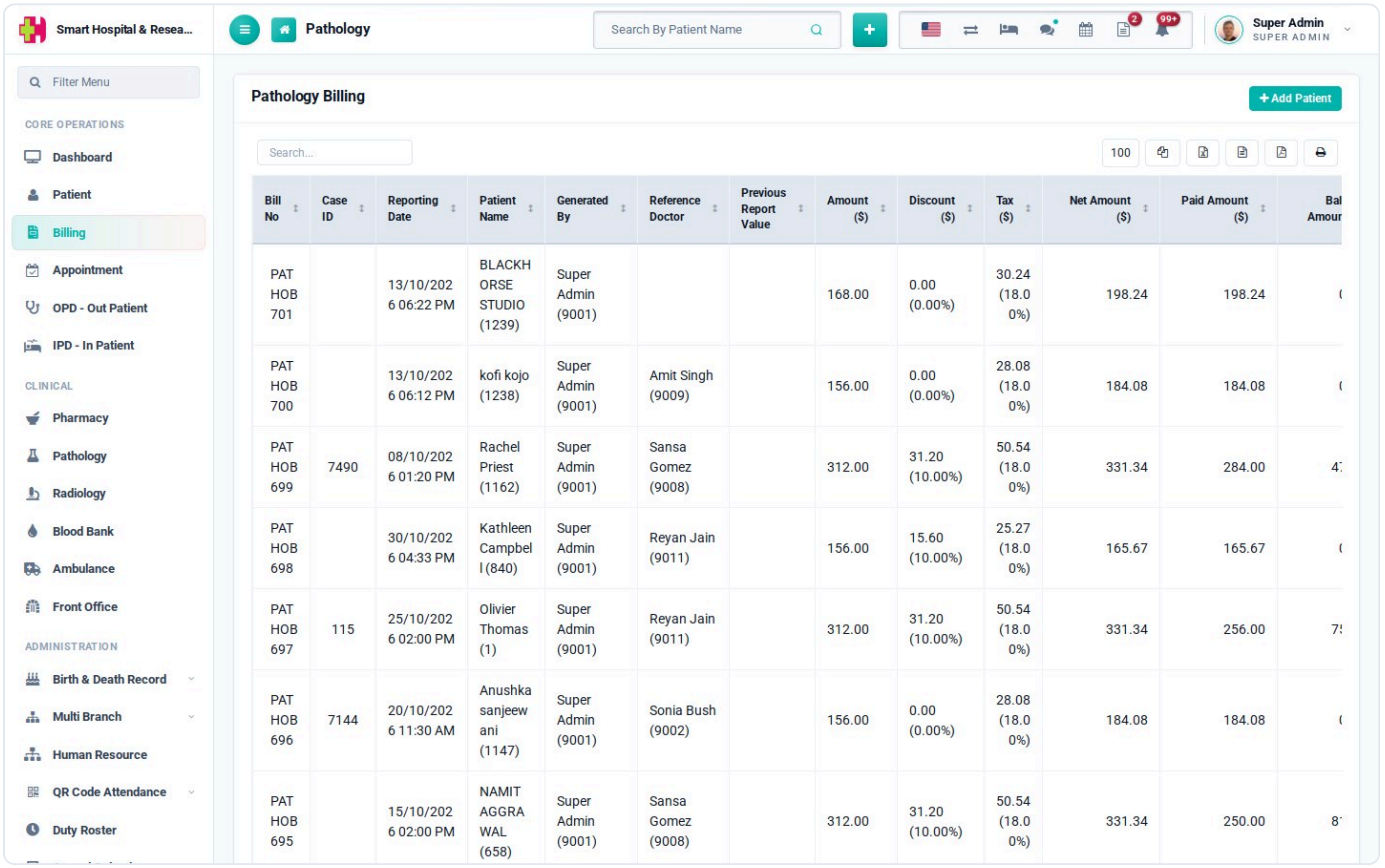
`Known Allergies` (textarea); `Previous Medical Issue` (textarea); `Appointment Date` (text); `case` (text); `casualty` (select) — No, Yes; `old_patient` (select) — No, Yes; `refference` (text); `consultant_doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Apply TPA` (checkbox); `Charge Category` (select) — OPD Consultation Fees, OPD Service, OPD Insurance, Blood pressure check, Eye check, Cholesterol level check; `Charge` (select); `Standard Charge ($)` (text); `Applied Charge ($)` (text); `discount_percentage` (text); `percentage` (text); `Amount ($)` (text); `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; … +6 more

- **Form** *(dialog)*: `Name` (text); `Guardian Name` (text); `Gender` (select); `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `file` (file); `Any Known Allergies` (text); `Phone` (text); `Blood Group` (select) — B+, A+, AB-, AB+, O-, A-; `Age` (text); `Month` (text)



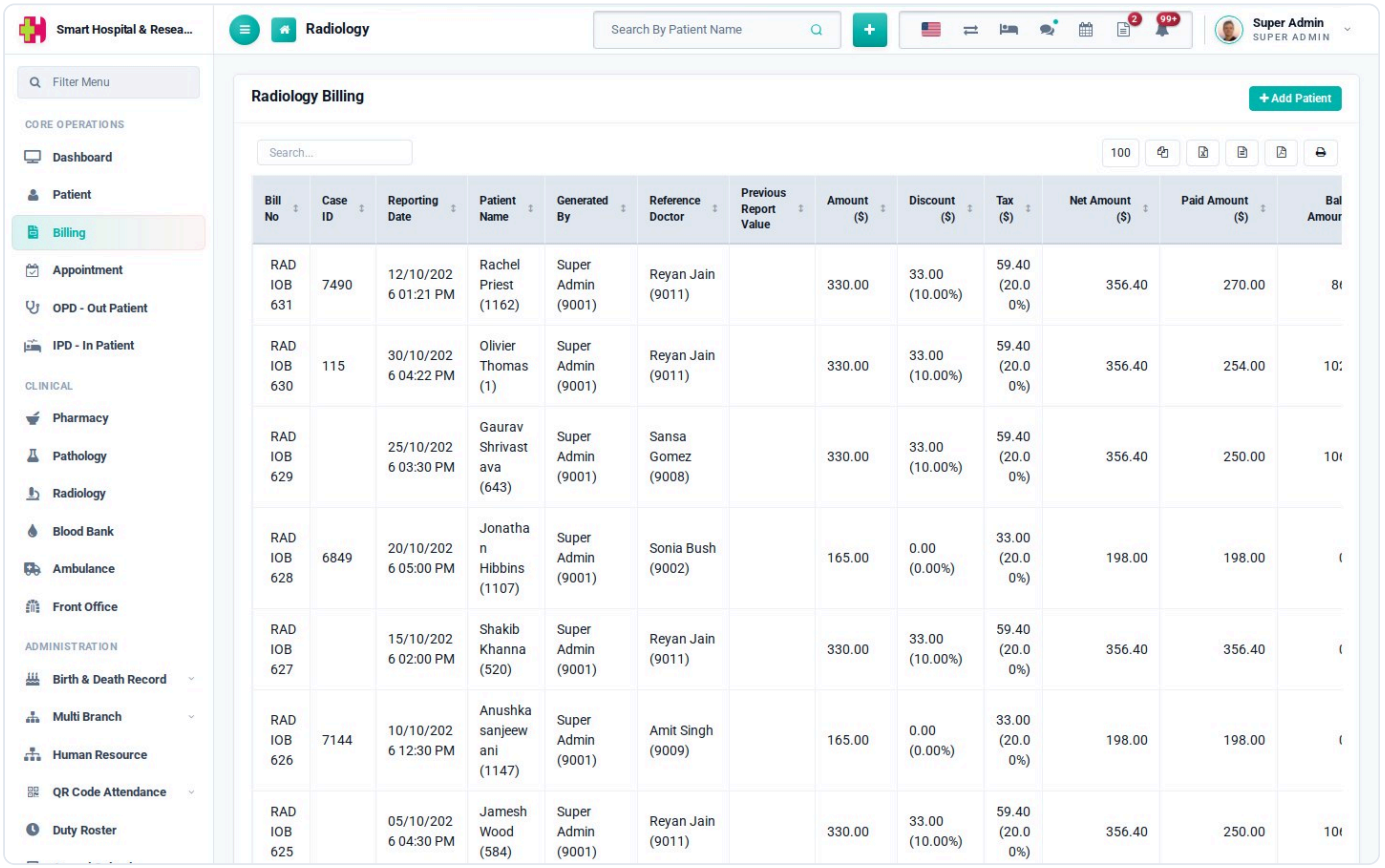
4.3 Pathology Billing — `/admin/bill/pathology`

- **Grid (101 rows):** Bill No | Case ID | Reporting Date | Patient Name | Generated By | Reference Doctor | Previous Report Value | Amount ($) | Discount ($) | Tax ($) | Net Amount ($) | Paid Amount ($)
- **Form** *(dialog)*: `Apply TPA` (select); `Prescription No` (text); `Apply TPA` (checkbox); `Bill No` (text); `Case ID` (text); `Date` (text)
- **Form** (posts to `/admin/pathology/updatecollection`) *(dialog)*: `Sample Collected Person Name` (select) — Belina Turner (9005); `Collected Date` (text); `Pathology Center` (text)



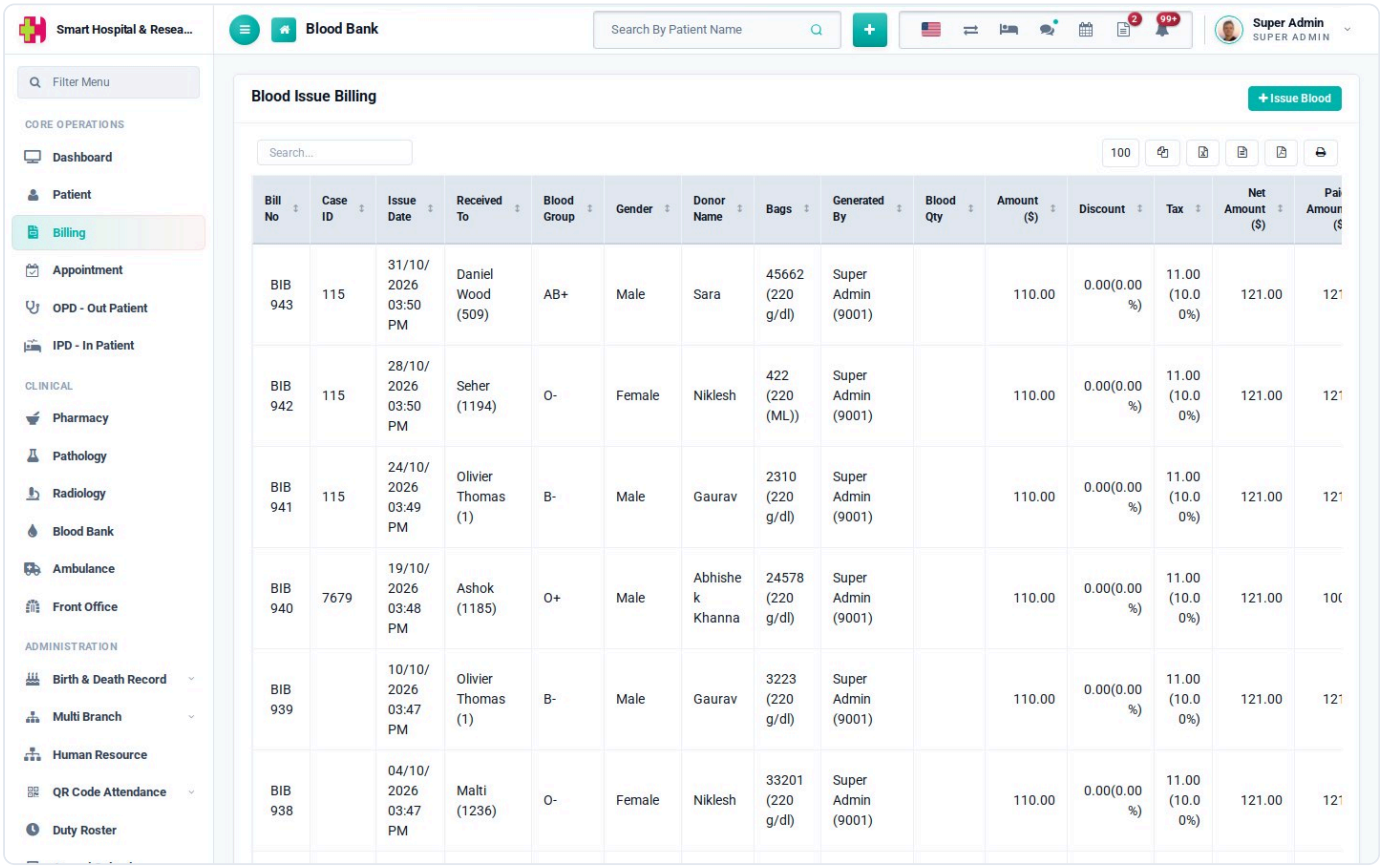
4.4 Radiology Billing — `/admin/bill/radiology`

- **Grid (100 rows):** Bill No | Case ID | Reporting Date | Patient Name | Generated By | Reference Doctor | Previous Report Value | Amount ($) | Discount ($) | Tax ($) | Net Amount ($) | Paid Amount ($)
- **Form** *(dialog)*: `Apply TPA` (select); `Prescription No` (text); `Apply TPA` (checkbox); `Bill No` (text); `Case ID` (text); `Date` (text)
- **Form** *(dialog)*: `Sample Collected Person Name` (select) — John Hook (9006); `Collected Date` (text); `Radiology Center` (text)



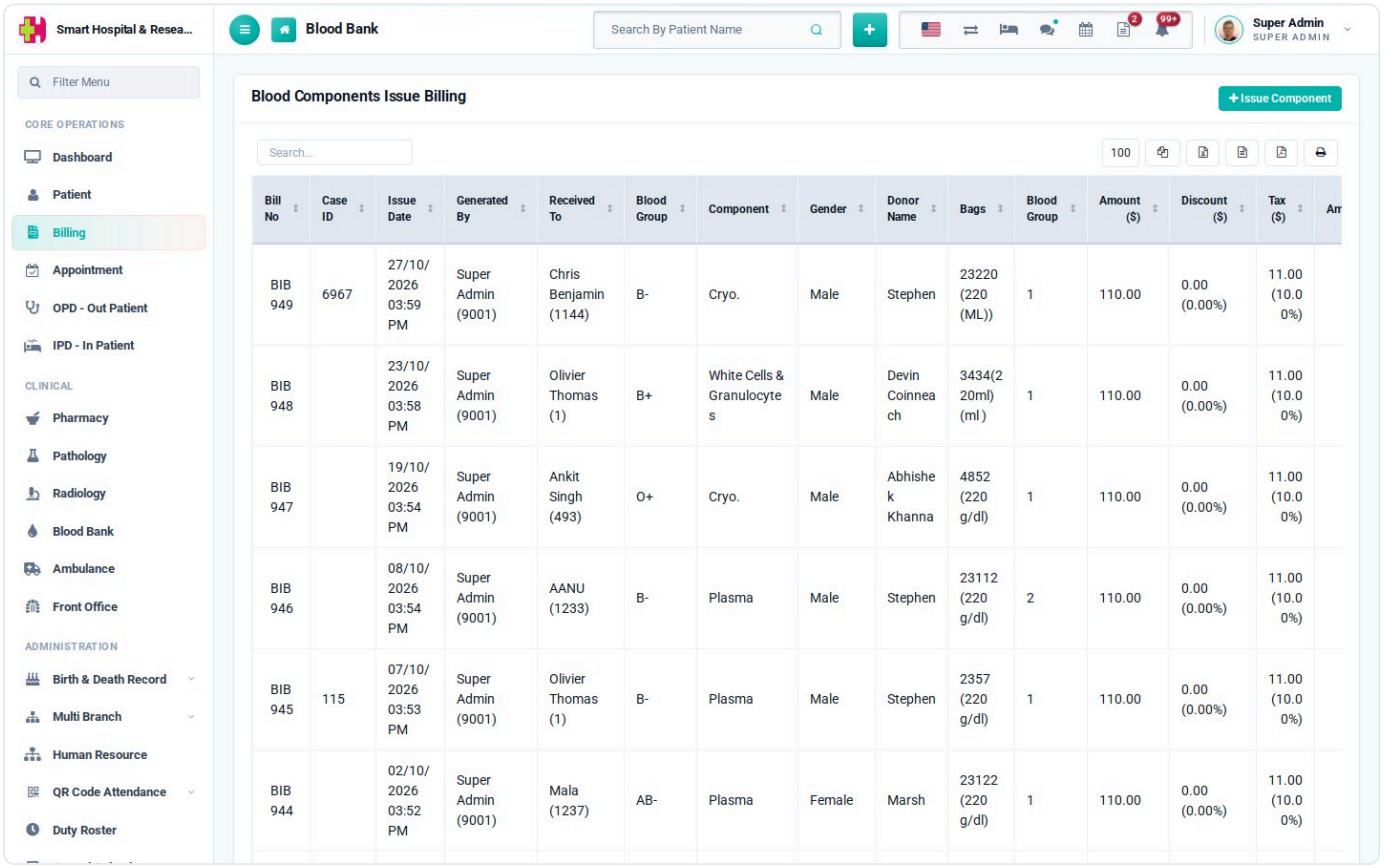
4.5 Blood Issue Billing — `/admin/bill/issueblood`

- **Grid (74 rows):** Bill No | Case ID | Issue Date | Received To | Blood Group | Gender | Donor Name | Bags | Generated By | Blood Qty | Amount ($) | Discount
- **Form** *(dialog)*: `Apply TPA` (select); `Case ID` (text); `Apply TPA` (checkbox)
- **Form** *(dialog)*: `patient_id` (select) — Select Patient, AADI ( ), Aadi jain ( ), Aadish Mody ( ), AANU ( ), AANU ( ); `Issue Date *` (text); `Hospital Doctor` (select) — Amit Singh, Reyan Jain, Sansa Gomez, Sonia Bush; `Doctor Name *` (text); `Technician` (text); `Donor Name *` (select) — Select Donor; `Blood Group` (text); `Lot` (text); `Bag` (text); `Amount ($) *` (text); `Remarks` (textarea)



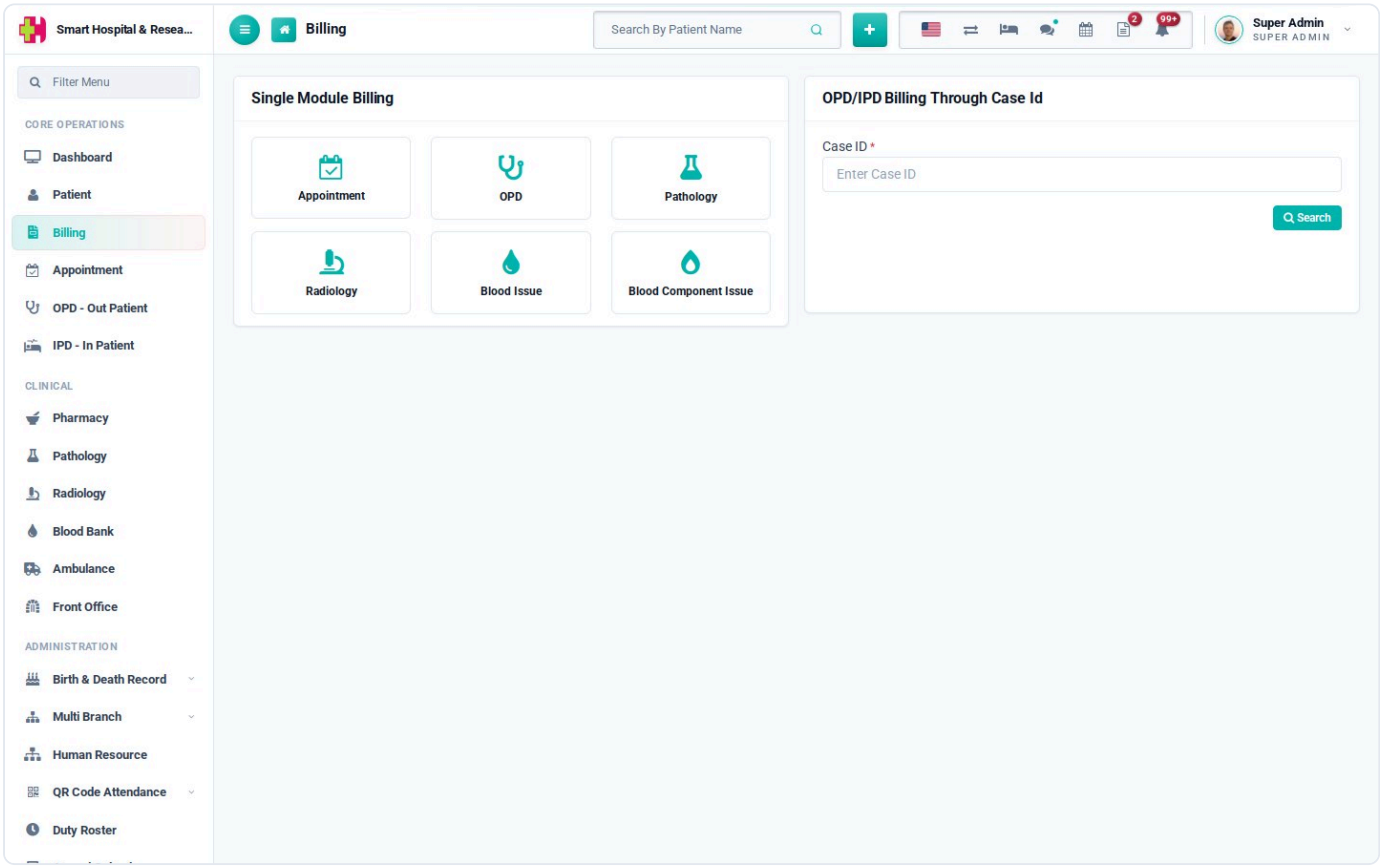
4.6 Blood Components Issue Billing — `/admin/bill/issuecomponent`

- **Grid (68 rows):** Bill No | Case ID | Issue Date | Generated By | Received To | Blood Group | Component | Gender | Donor Name | Bags | Blood Group | Amount ($)
- **Form** *(dialog)*: `Apply TPA` (select); `Case ID` (text); `Apply TPA` (checkbox)
- **Form** *(dialog)*: `patient_id` (select) — Select Patient, AADI ( ), Aadi jain ( ), Aadish Mody ( ), AANU ( ), AANU ( ); `Issue Date *` (text); `Hospital Doctor` (select) — Amit Singh, Reyan Jain, Sansa Gomez, Sonia Bush; `Doctor Name *` (text); `Technician` (text); `Donor Name *` (select) — Select Donor; `Blood Group` (text); `Lot` (text); `Bag` (text); `Amount ($) *` (text); `Remarks` (textarea)



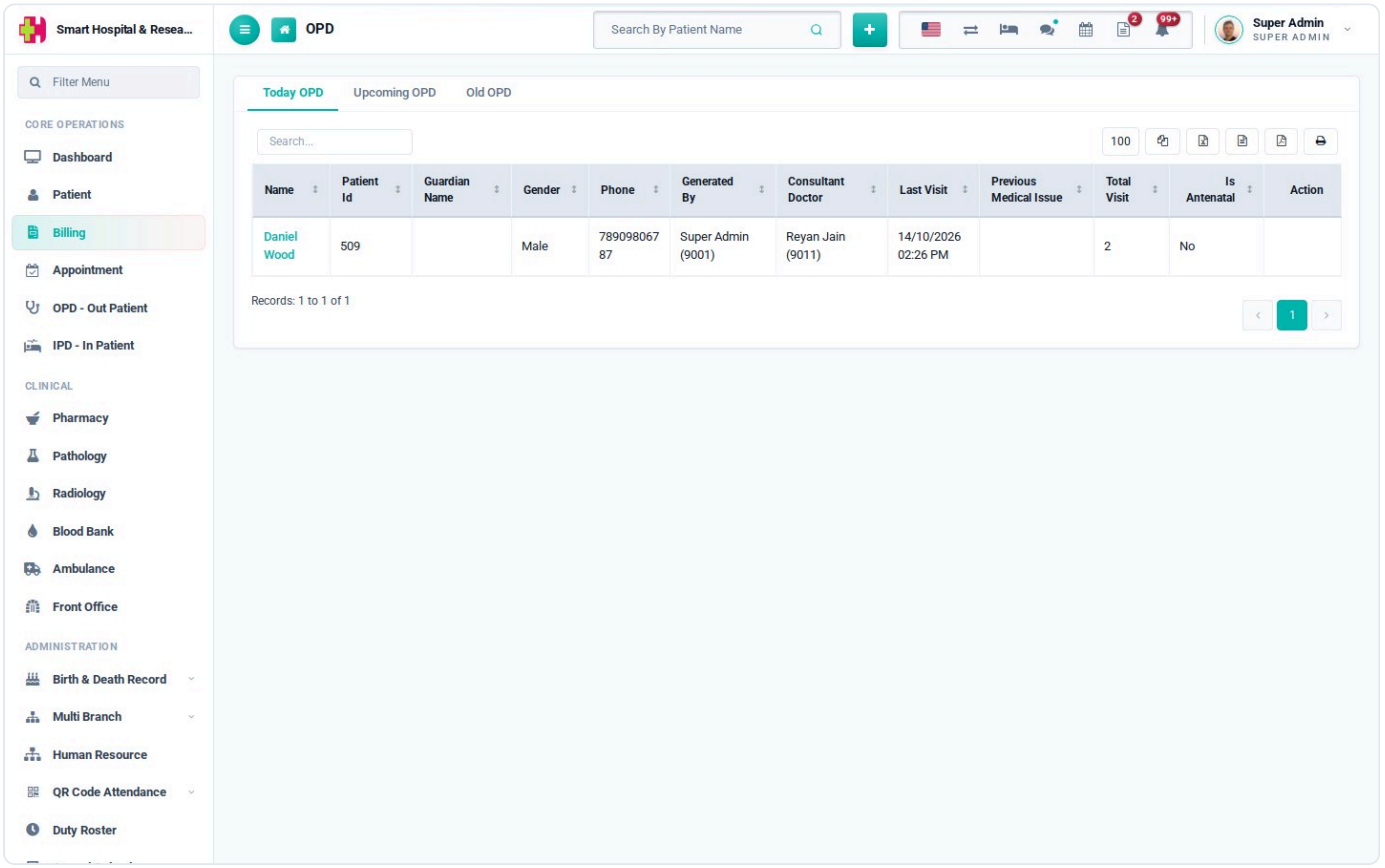
4.7 Single Module Billing — `/admin/bill/dashboard`

- **Form** (posts to `/admin/bill/dashboard`): `Case ID` (text)



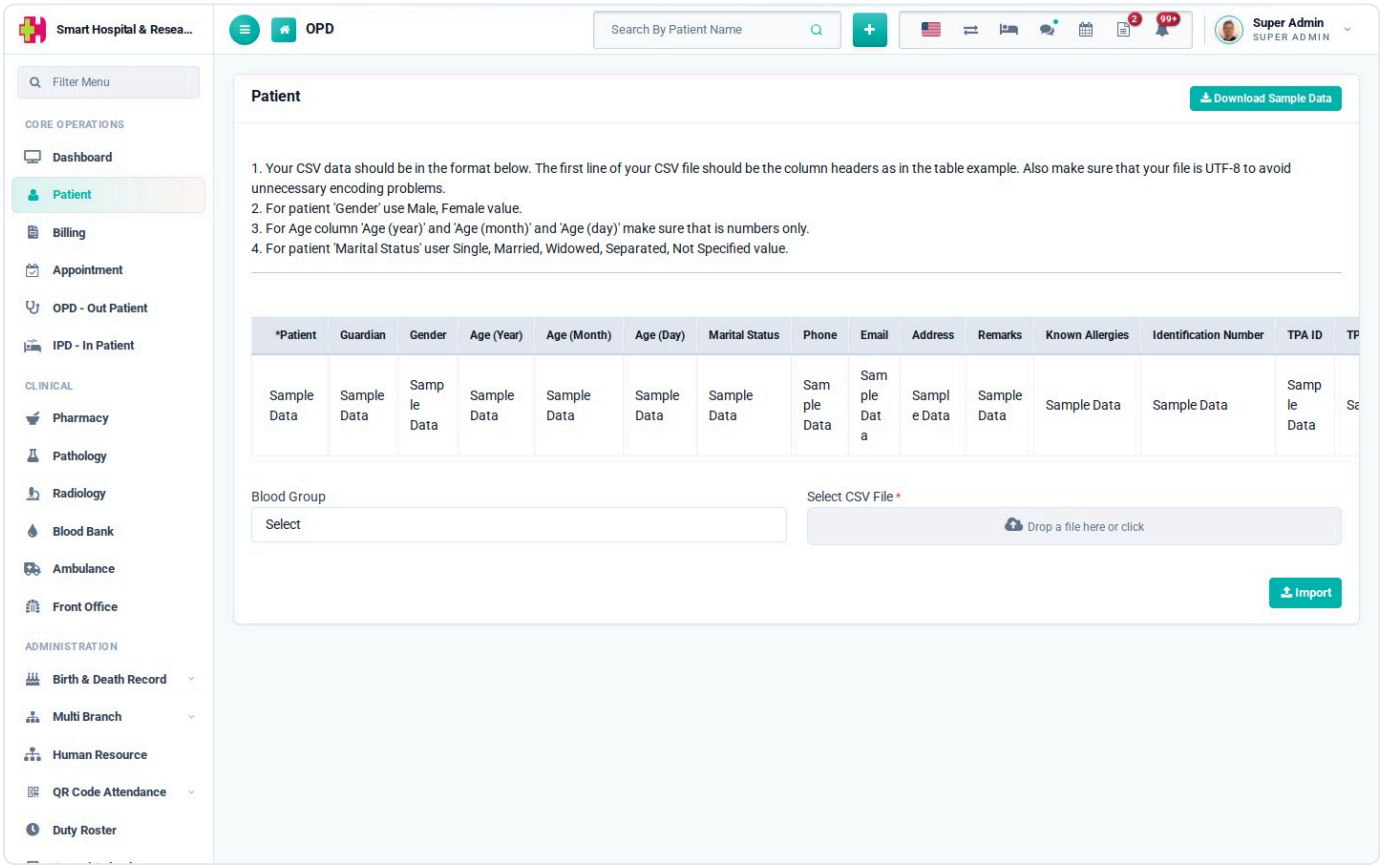
4.8 Billing - OPD bill screen — `/admin/bill/opd`

- **Tabs:** Today OPD · Upcoming OPD · Old OPD
- **Grid (2 rows):** Name | Patient Id | Guardian Name | Gender | Phone | Generated By | Consultant Doctor | Last Visit | Previous Medical Issue | Total Visit | Is Antenatal | Action
- **Form** (posts to `/admin/patient`) *(dialog)*: `symptoms_type` (select) — Eating or weight problems, Emotional problems, Muscle or joint problems, Skin problems, Bladder problems, Stomach problems; `field` (search); `Select` (text); `Symptoms Description` (textarea); `Note` (textarea); `Any Known Allergies` (textarea); `Previous Medical Issue` (textarea); `Appointment Date` (text); `case` (text); `casualty` (select) — No, Yes; `old_patient` (select) — No, Yes; `refference` (text); `consultant_doctor` (select) — Amit Singh (9009), Reyan Jain (9011), Sansa Gomez (9008), Sonia Bush (9002); `Apply TPA` (checkbox); `Charge Category` (select) — OPD Consultation Fees, OPD Service, OPD Insurance, Blood pressure check, Eye check, Cholesterol level check; `Charge` (select); `Standard Charge ($)` (text); `Applied Charge ($)` (text); `discount_percentage` (text); `percentage` (text); `Amount ($)` (text); `Payment Mode` (select) — Cash, Cheque, Transfer to Bank Account, UPI, Online, Other; … +6 more
- **Form** *(dialog)*: `Name` (text); `Guardian Name` (text); `Gender` (select); `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `file` (file); `Any Known Allergies` (text); `Phone` (text); `Blood Group` (select) — B+, A+, AB-, AB+, O-, A-; `Age` (text); `Month` (text)



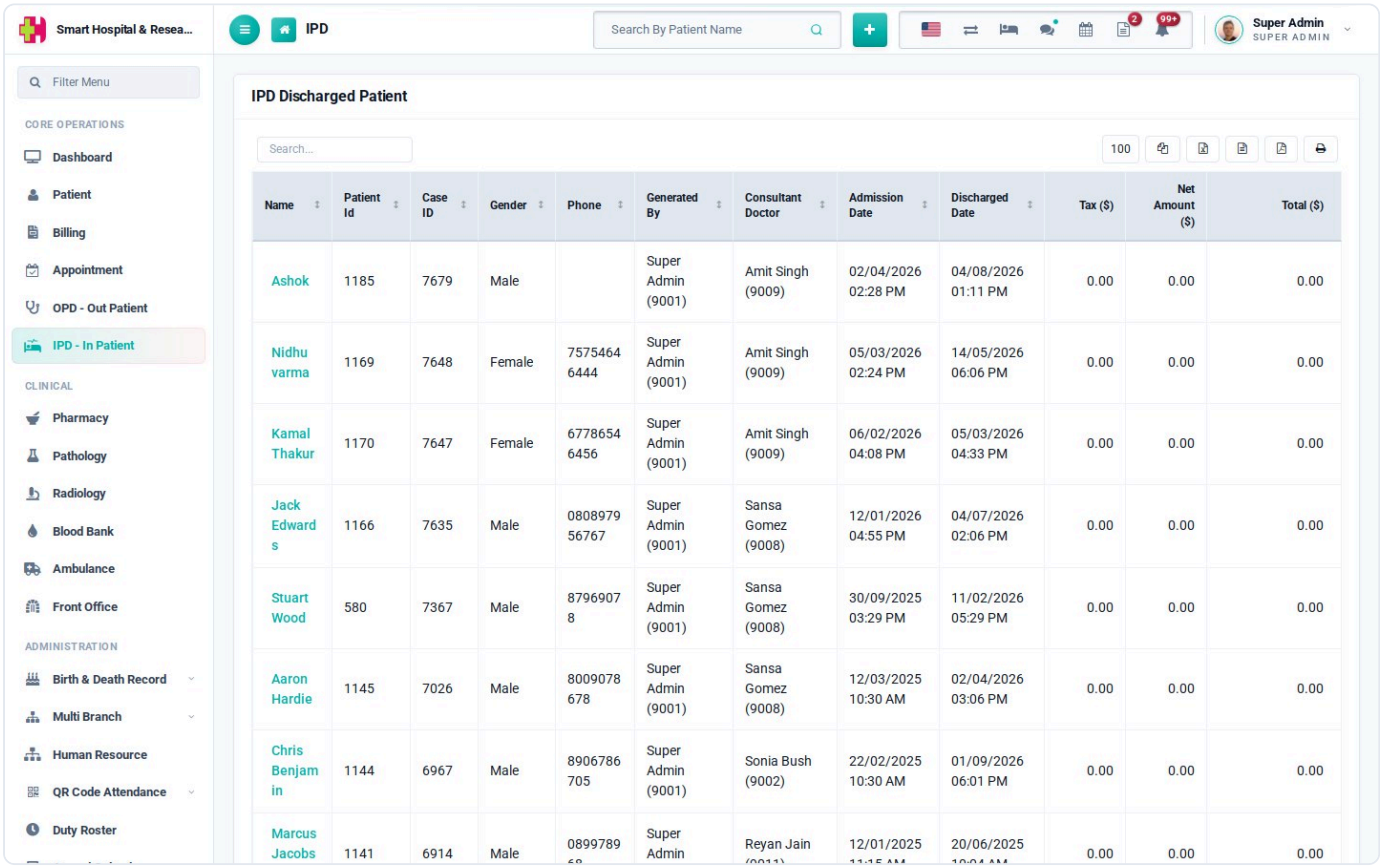
4.9 Patient import — `/admin/patient/import`

- **Grid (2 rows):** *Patient | Guardian | Gender | Age (Year) | Age (Month) | Age (Day) | Marital Status | Phone | Email | Address | Remarks | Known Allergies
- **Form** (posts to `/admin/patient/import`): `blood_group` (select) — B+, A+, AB-, AB+, O-, A-; `file` (file)



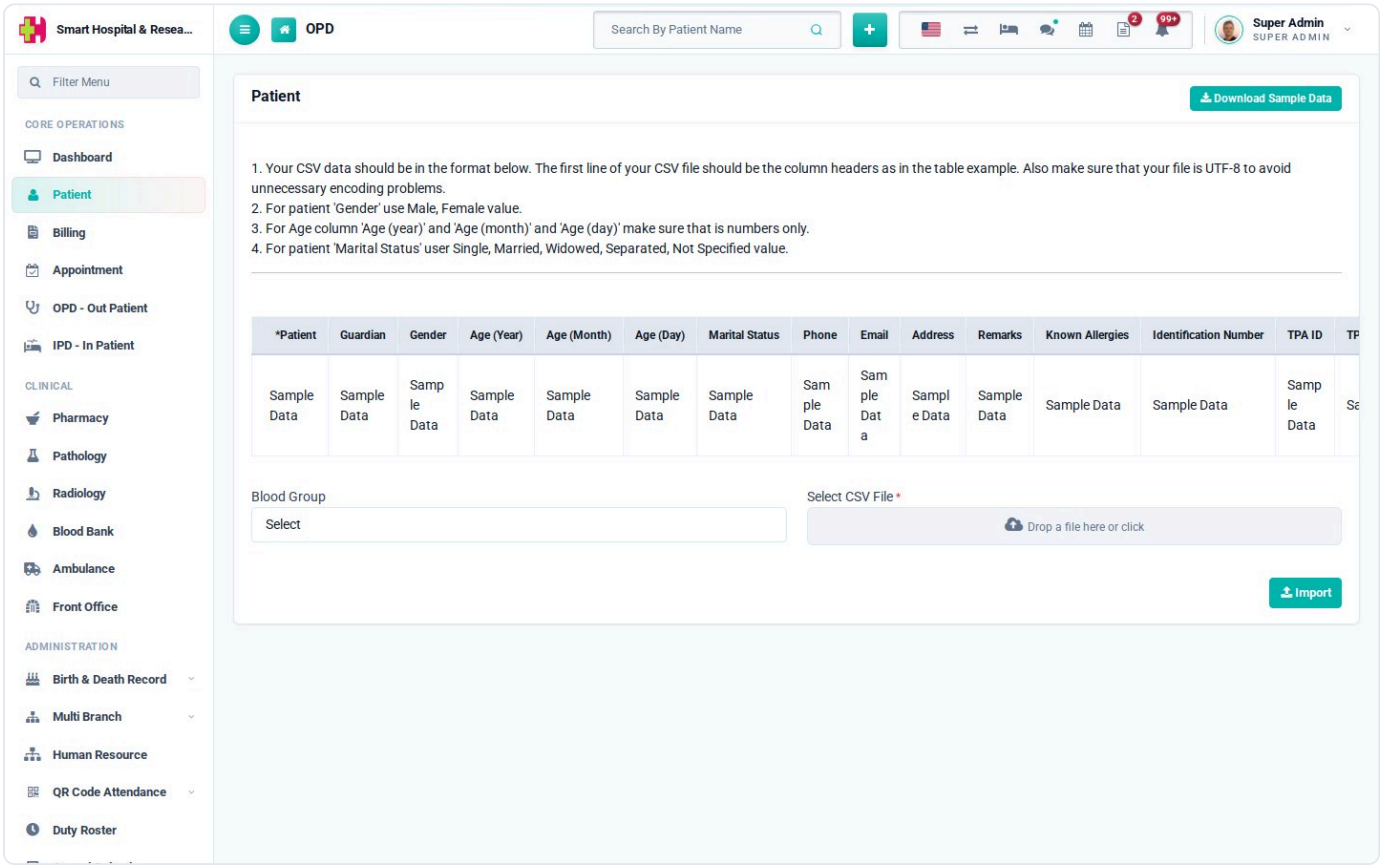
4.10 IPD Discharged Patient — `/admin/patient/discharged_patients`

- **Grid (21 rows):** Name | Patient Id | Case ID | Gender | Phone | Generated By | Consultant Doctor | Admission Date | Discharged Date | Tax ($) | Net Amount ($) | Total ($)



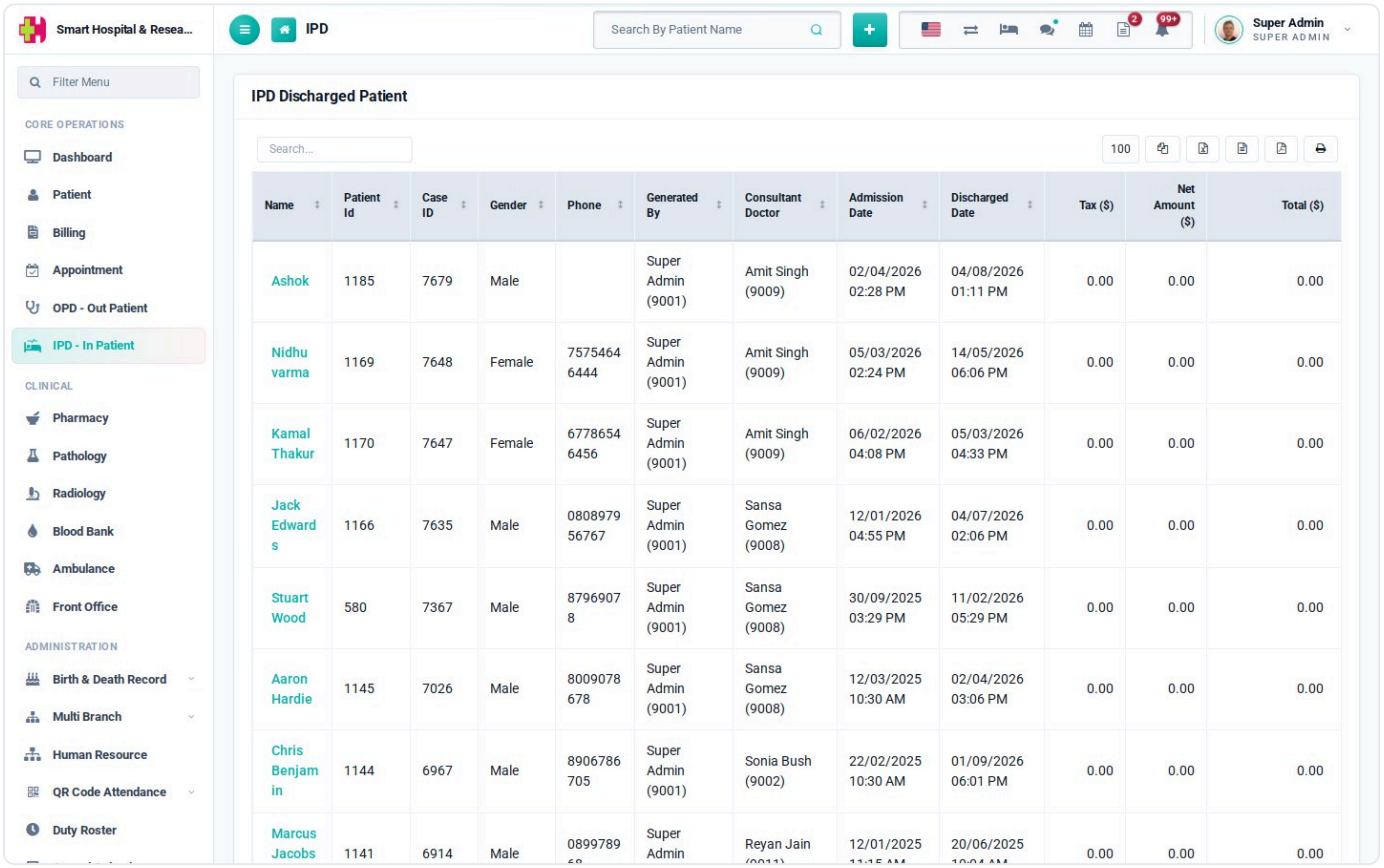
4.11 Patient import — `/admin/patient/import`

- **Grid (2 rows):** *Patient | Guardian | Gender | Age (Year) | Age (Month) | Age (Day) | Marital Status | Phone | Email | Address | Remarks | Known Allergies
- **Form** (posts to `/admin/patient/import`): `blood_group` (select) — B+, A+, AB-, AB+, O-, A-; `file` (file)



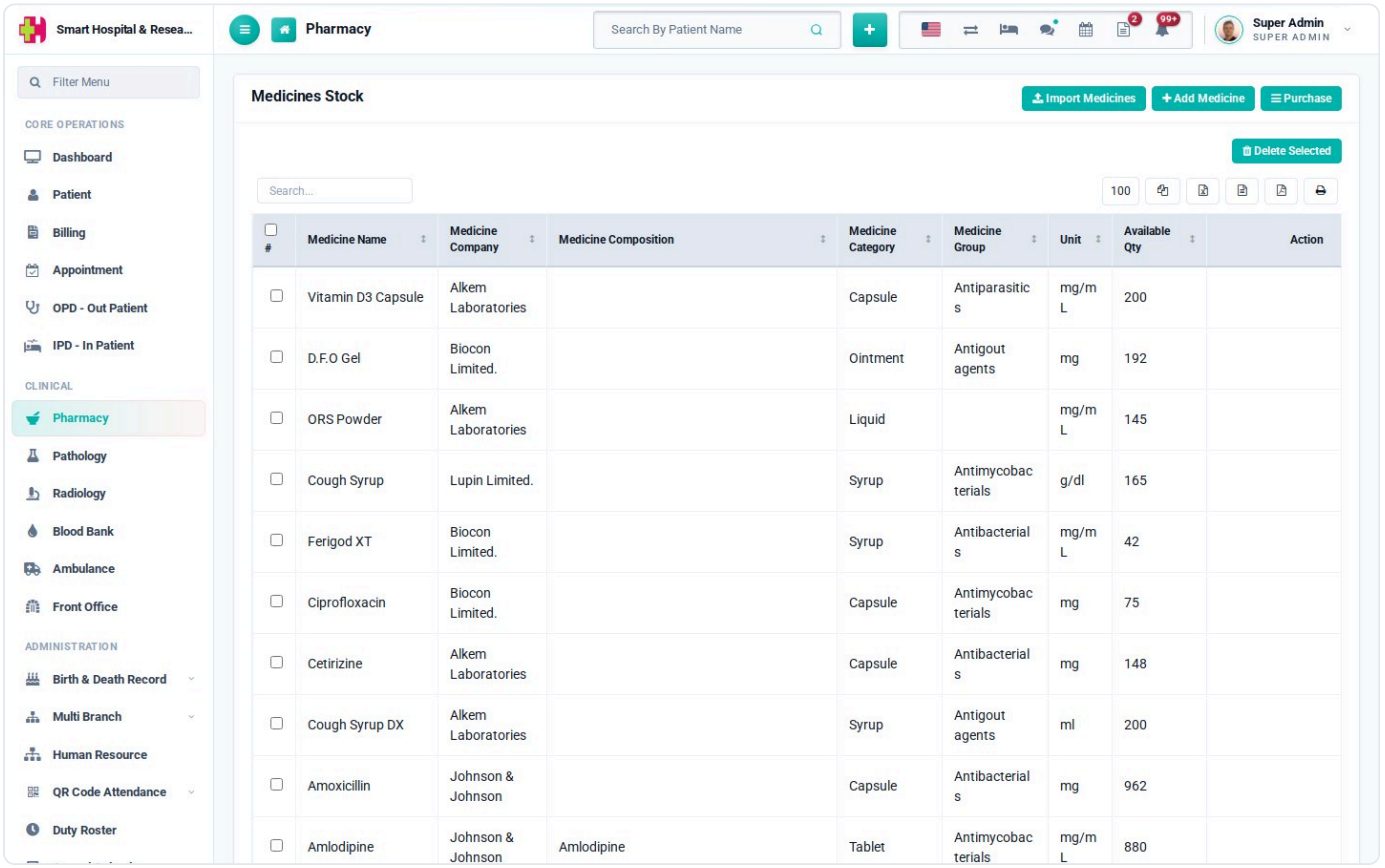
4.12 IPD Discharged Patient — `/admin/patient/discharged_patients`

- **Grid (21 rows):** Name | Patient Id | Case ID | Gender | Phone | Generated By | Consultant Doctor | Admission Date | Discharged Date | Tax ($) | Net Amount ($) | Total ($)



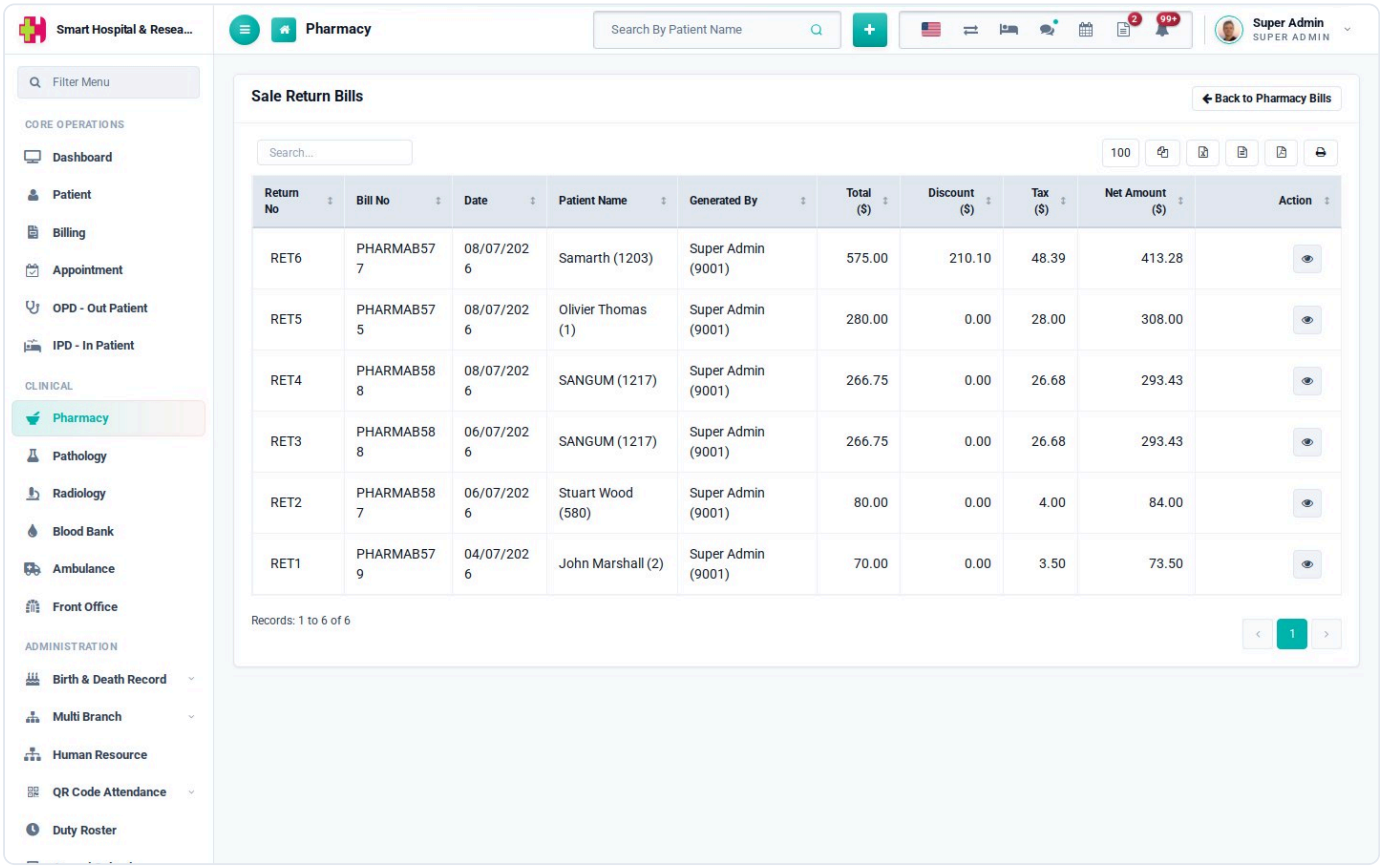
4.13 Medicines Stock — `/admin/pharmacy/search`

- **Grid (99 rows):** # | Medicine Name | Medicine Company | Medicine Composition | Medicine Category | Medicine Group | Unit | Available Qty | Action
- **Form** *(dialog)*: `Medicine Name *` (text); `Medicine Category *` (select) — Syrup, Capsule, Injection, Ointment, Cream, Surgical; `Medicine Company` (select) — Johnson & Johnson, Alkem Laboratories, Biocon Limited., Lupin Limited., medimax; `Medicine Composition` (text); `Medicine Group` (select) — Antibacterials, Antimycobacterials, Antiparasitics, Antigout agents, HIPERIN; `Unit *` (select) — mg/mL, mm, ml, mg, g/dl; `Min Level` (text); `Re-Order Level` (text); `vat` (text); `Box/Packing *` (text); `VAT A/C` (text); `Rack Number` (text); `Note` (textarea); `file` (file)
- **Form** *(dialog)*: `Medicine Category` (select) — Syrup, Capsule, Injection, Ointment, Cream, Surgical; `medicine_image` (file)



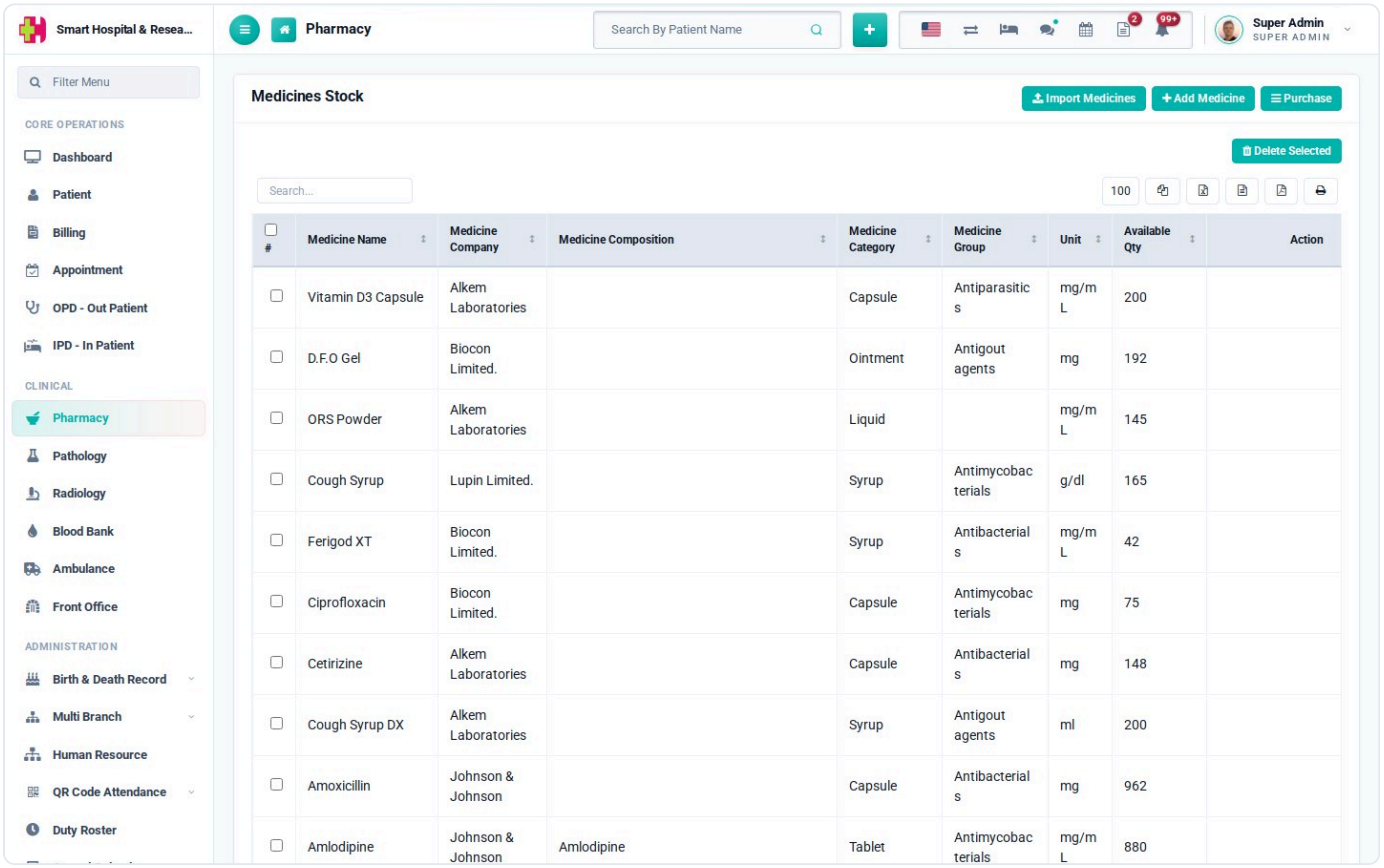
4.14 Sale Return Bills — `/admin/pharmacy/salereturnbills`

- **Grid (7 rows):** Return No | Bill No | Date | Patient Name | Generated By | Total ($) | Discount ($) | Tax ($) | Net Amount ($) | Action



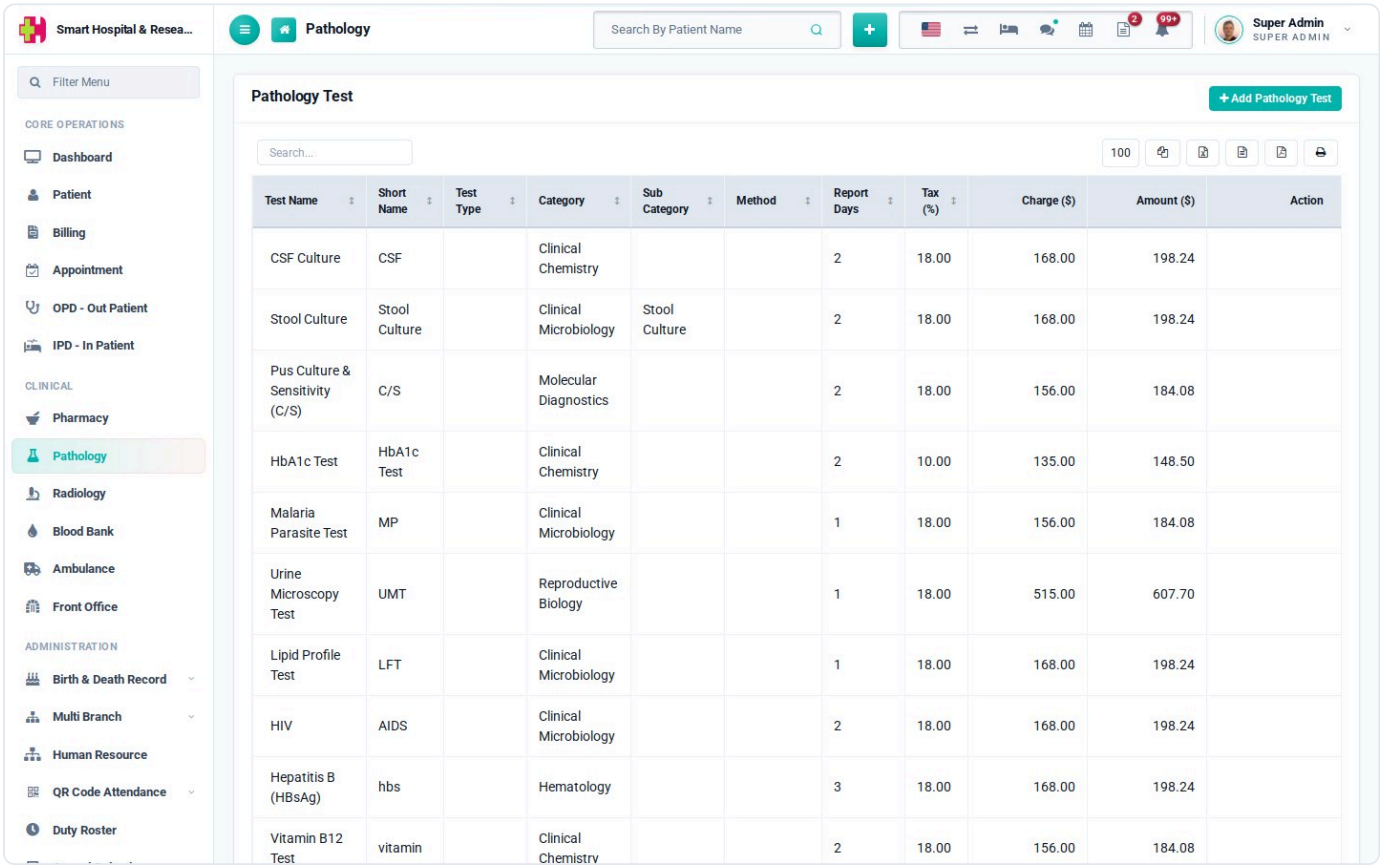
4.15 Medicines Stock — `/admin/pharmacy/search`

- **Grid (99 rows):** # | Medicine Name | Medicine Company | Medicine Composition | Medicine Category | Medicine Group | Unit | Available Qty | Action
- **Form** *(dialog)*: `Medicine Name *` (text); `Medicine Category *` (select) — Syrup, Capsule, Injection, Ointment, Cream, Surgical; `Medicine Company` (select) — Johnson & Johnson, Alkem Laboratories, Biocon Limited., Lupin Limited., medimax; `Medicine Composition` (text); `Medicine Group` (select) — Antibacterials, Antimycobacterials, Antiparasitics, Antigout agents, HIPERIN; `Unit *` (select) — mg/mL, mm, ml, mg, g/dl; `Min Level` (text); `Re-Order Level` (text); `vat` (text); `Box/Packing *` (text); `VAT A/C` (text); `Rack Number` (text); `Note` (textarea); `file` (file)
- **Form** *(dialog)*: `Medicine Category` (select) — Syrup, Capsule, Injection, Ointment, Cream, Surgical; `medicine_image` (file)



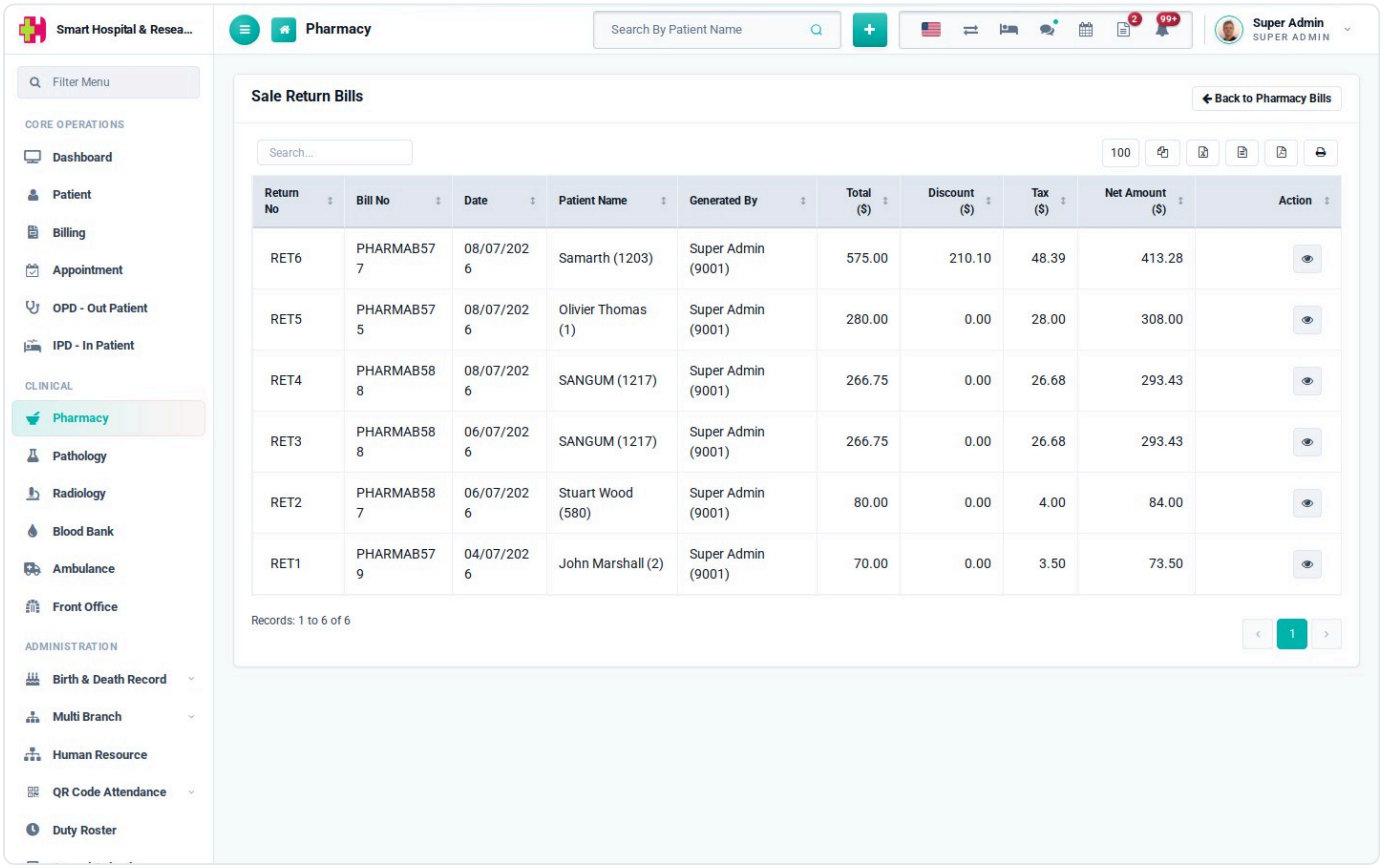
4.16 Pathology Test — `/admin/pathology/search`

- **Grid (20 rows):** Test Name | Short Name | Test Type | Category | Sub Category | Method | Report Days | Tax (%) | Charge ($) | Amount ($) | Action
- **Form** *(dialog)*: `Name *` (text); `Guardian Name` (text); `Phone` (text); `Gender` (select) — Male, Female; `Date Of Birth` (text); `Year` (text); `Month` (text); `Day` (text); `Blood Group` (select); `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `Email` (text); `Address` (input); `National Identification Number` (input); `file` (file); `Remarks` (textarea); `Any Known Allergies` (textarea); `TPA` (select); `TPA ID` (input); `TPA Validity` (input); `Alternate Number` (text)



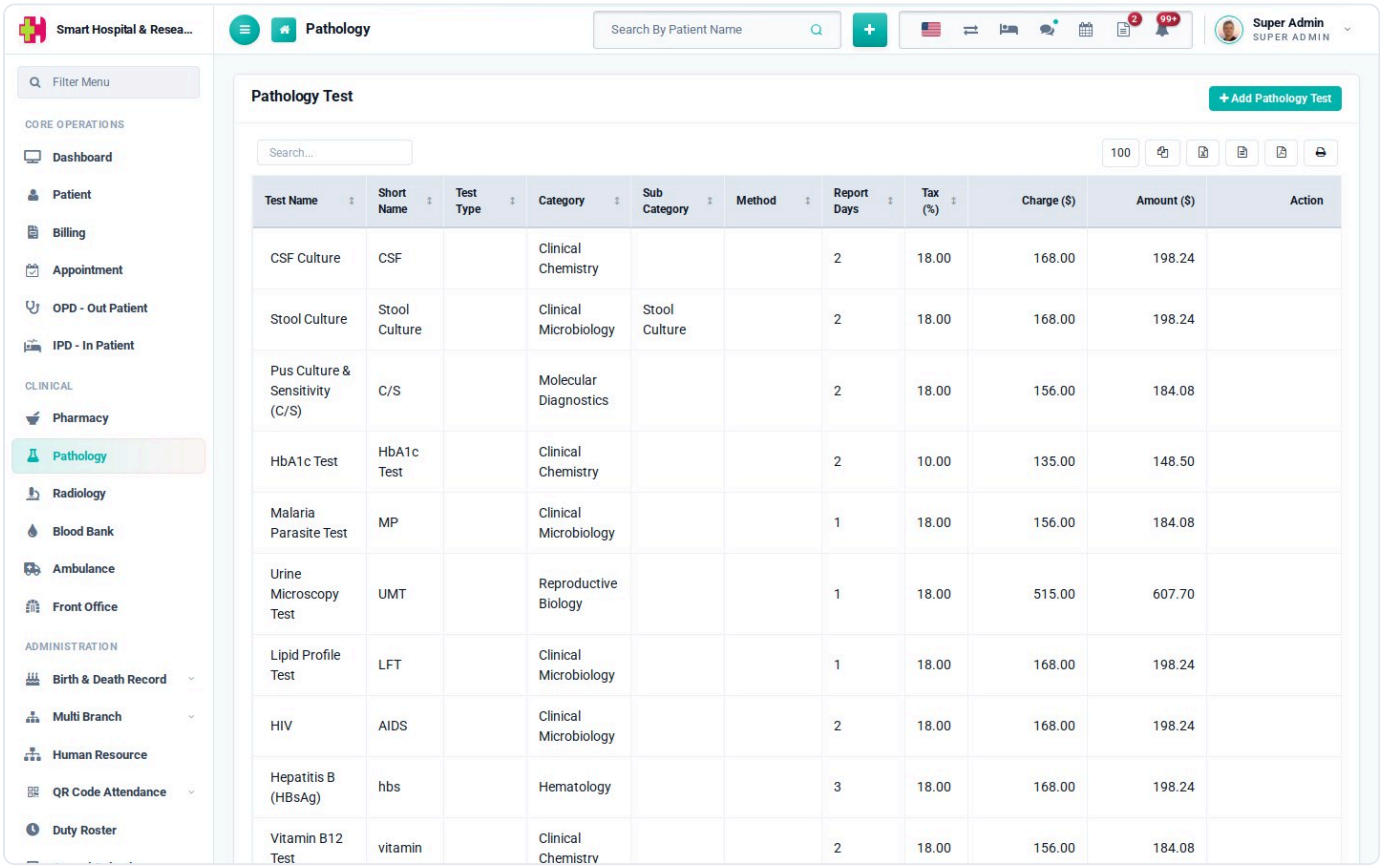
4.17 Sale Return Bills — `/admin/pharmacy/salereturnbills`

- **Grid (7 rows):** Return No | Bill No | Date | Patient Name | Generated By | Total ($) | Discount ($) | Tax ($) | Net Amount ($) | Action



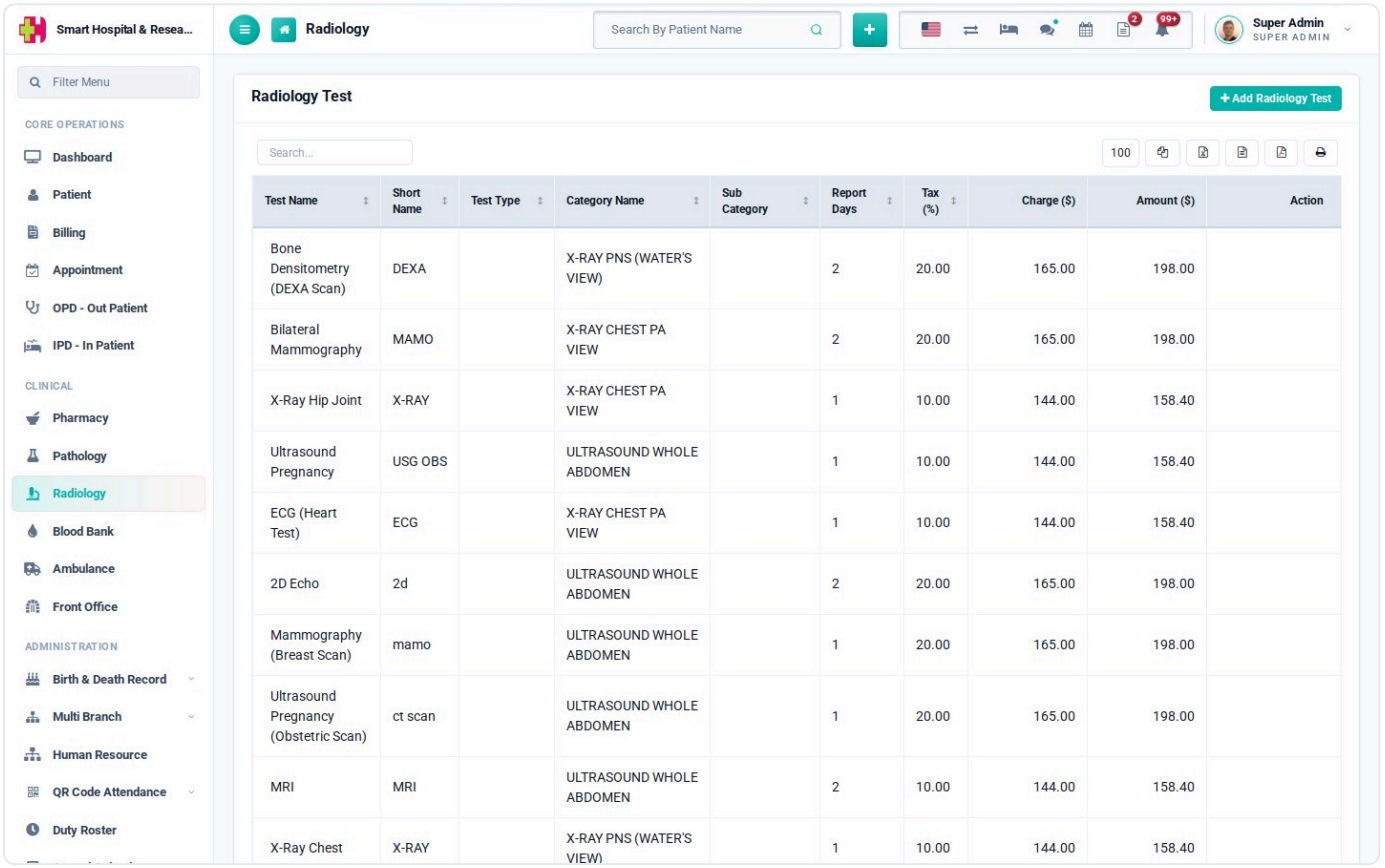
4.18 Pathology Test — `/admin/pathology/search`

- **Grid (20 rows):** Test Name | Short Name | Test Type | Category | Sub Category | Method | Report Days | Tax (%) | Charge ($) | Amount ($) | Action
- **Form** *(dialog)*: `Name *` (text); `Guardian Name` (text); `Phone` (text); `Gender` (select) — Male, Female; `Date Of Birth` (text); `Year` (text); `Month` (text); `Day` (text); `Blood Group` (select); `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `Email` (text); `Address` (input); `National Identification Number` (input); `file` (file); `Remarks` (textarea); `Any Known Allergies` (textarea); `TPA` (select); `TPA ID` (input); `TPA Validity` (input); `Alternate Number` (text)



4.19 Radiology Test — `/admin/radio/search`

- **Grid (15 rows):** Test Name | Short Name | Test Type | Category Name | Sub Category | Report Days | Tax (%) | Charge ($) | Amount ($) | Action
- **Form** *(dialog)*: `Name *` (text); `Guardian Name` (text); `Phone` (text); `Gender` (select) — Male, Female; `Date Of Birth` (text); `Year` (text); `Month` (text); `Day` (text); `Blood Group` (select); `Marital Status` (select) — Single, Married, Widowed, Separated, Not Specified; `Email` (text); `Address` (input); `National Identification Number` (input); `file` (file); `Remarks` (textarea); `Any Known Allergies` (textarea); `TPA` (select); `TPA ID` (input); `TPA Validity` (input); `Alternate Number` (text)



4.20 Blood bank status board — `/admin/bloodbankstatus`

- **Grid (2 rows):** BAGS | LOT | INSTITUTION | ACTION
- **Grid (10 rows):** BAGS | LOT | COMPONENTS | ACTION
- **Grid (7 rows):** Components Name * | Bag * | Volume | Unit | Lot * | Institution
- **Form** (posts to `/admin/bloodbankstatus/status`) *(dialog)*: `Blood Group` (text); `status (in bags) *` (text)

5. Roles and access model

Nine staff roles plus the patient portal. Each role gets its own dashboard and its own slice of the menu; the table below was produced by logging in as each role and reading the rendered sidebar.

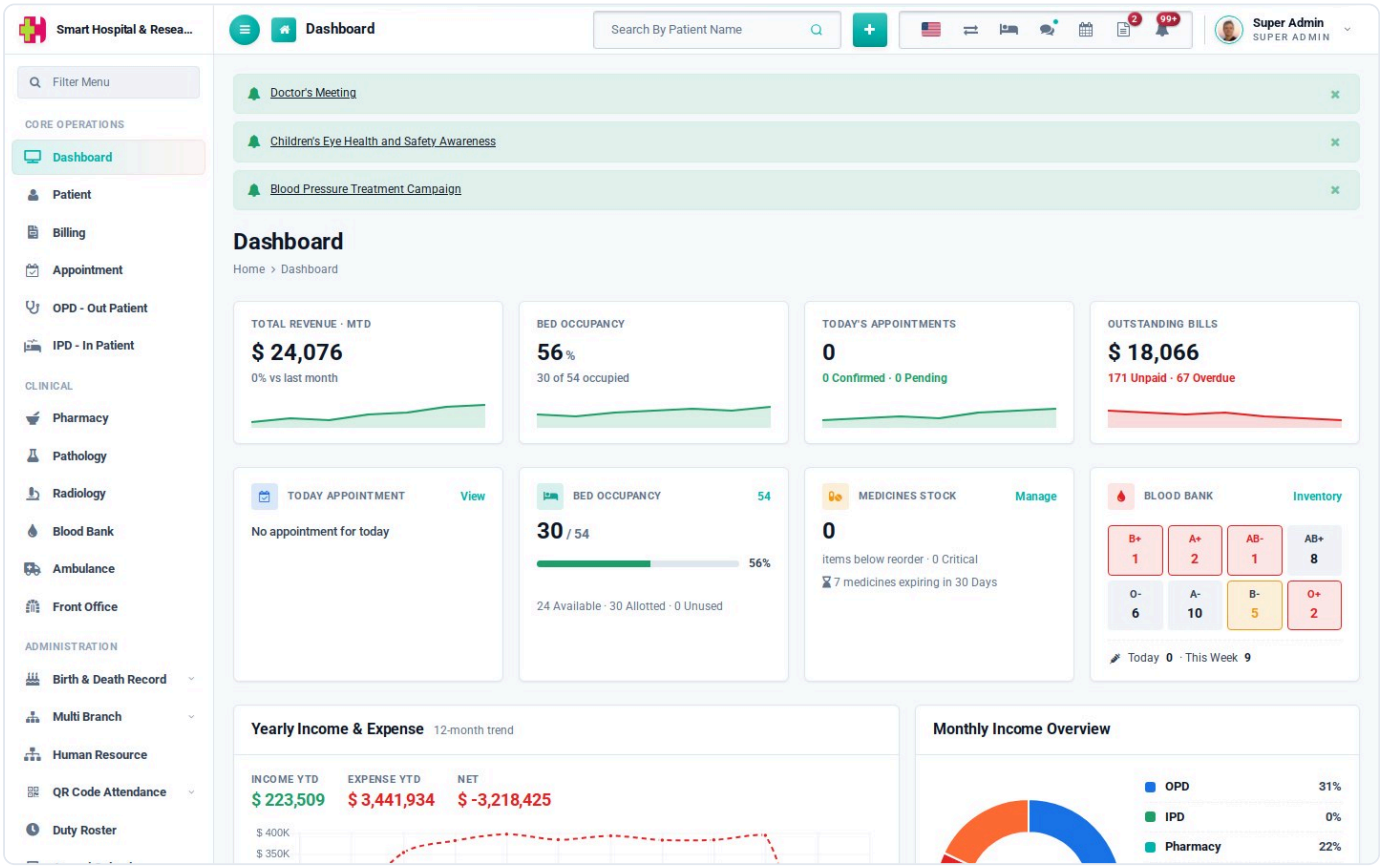
Role	Demo user	Sections visible	Screens reachable	Landing page
Super Admin	`superadmin@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	76	`/admin/admin/dashboard`
Admin	`jason@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	74	`/admin/admin/dashboard`
Doctor	`sonia@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	42	`/admin/admin/dashboard`
Pharmacist	`harry@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	18	`/admin/admin/dashboard`
Pathologist	`belinat@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	20	`/admin/admin/dashboard`
Radiologist	`johnhook@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	17	`/admin/admin/dashboard`
Accountant	`bradf@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	45	`/admin/admin/dashboard`
Receptionist	`maria@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	40	`/admin/admin/dashboard`
Nurse	`april@gmail.com`	Core Operations, Clinical, Administration, Tools & Content, Reports & Setup	16	`/admin/admin/dashboard`

5.1 Super Admin

Unrestricted access to every module, master and setting, plus the multi-branch console and vendor licence screens.

- **Core Operations:** Dashboard, Patient, Billing, Appointment, OPD - Out Patient, IPD - In Patient
- **Clinical:** Pharmacy, Pathology, Radiology, Blood Bank, Ambulance, Front Office
- **Administration:** Birth & Death Record, Multi Branch, Human Resource, QR Code Attendance, Duty Roster, Annual Calendar, Referral, TPA Management, Finance
- **Tools & Content:** Survey Forms, Messaging, Inventory, Download Center, Certificate, Front CMS, Live Consultation
- **Reports & Setup:** Reports, Setup

Screens captured for this role: Dashboard (`/admin/admin/dashboard`), Patient (`/admin/admin/search`), Billing (`/admin/bill/dashboard`), Appointment (`/admin/appointment/index`), OPD - Out Patient (`/admin/patient/search`), IPD - In Patient (`/admin/patient/ipdsearch`)

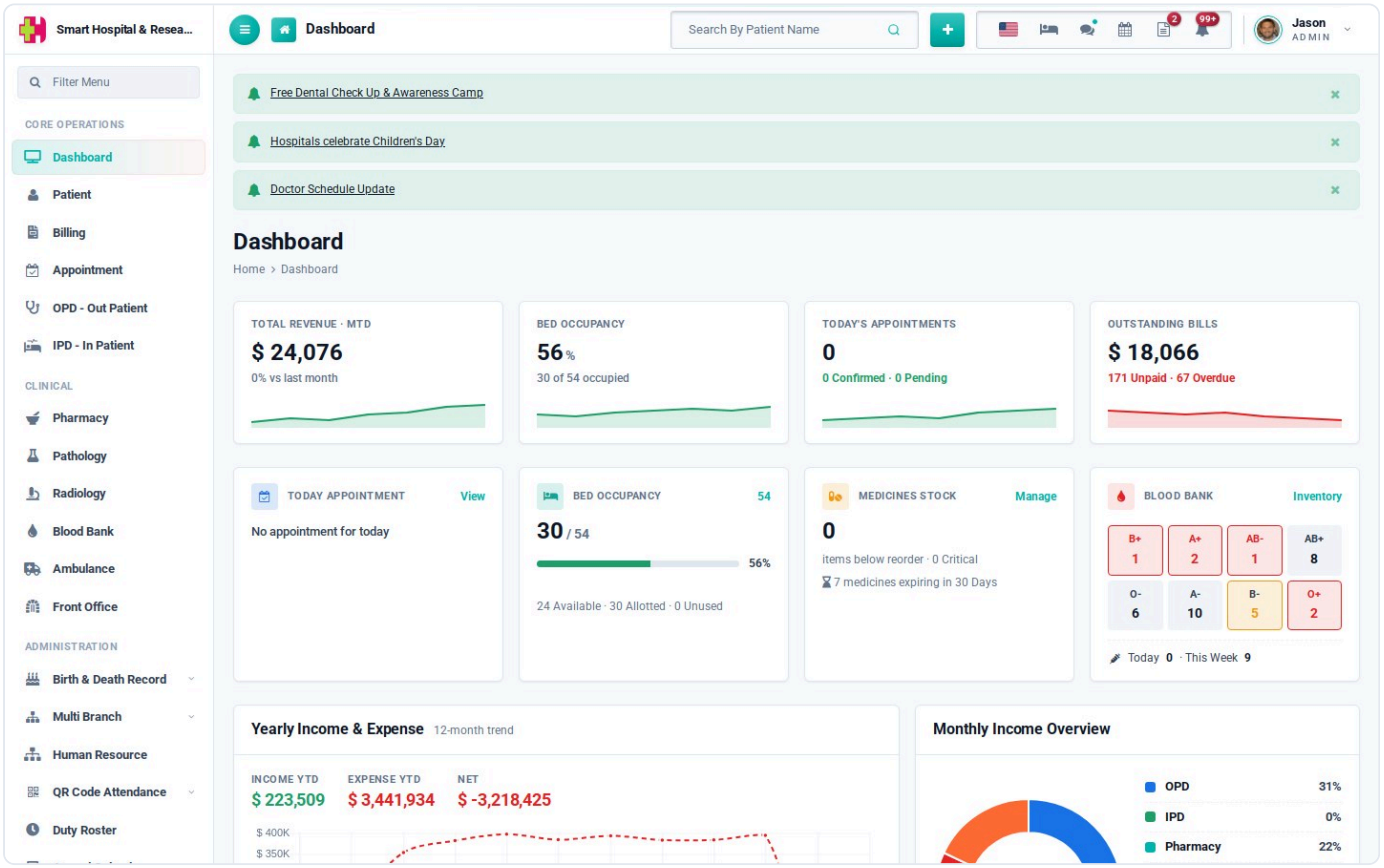


5.2 Admin

Hospital administrator: clinical, billing, hr, finance and reporting without the vendor/licence screens.

- **Core Operations:** Dashboard, Patient, Billing, Appointment, OPD - Out Patient, IPD - In Patient
- **Clinical:** Pharmacy, Pathology, Radiology, Blood Bank, Ambulance, Front Office
- **Administration:** Birth & Death Record, Multi Branch, Human Resource, QR Code Attendance, Duty Roster, Annual Calendar, Referral, TPA Management, Finance
- **Tools & Content:** Survey Forms, Messaging, Inventory, Download Center, Certificate, Front CMS, Live Consultation
- **Reports & Setup:** Reports, Setup

Screens captured for this role: Dashboard (`/admin/admin/dashboard`), Patient (`/admin/admin/search`), Billing (`/admin/bill/dashboard`), Appointment (`/admin/appointment/index`), OPD - Out Patient (`/admin/patient/search`), IPD - In Patient (`/admin/patient/ipdsearch`)



5.3 Doctor

Clinical workspace: appointments, opd/ipd patients, prescriptions, investigations and own-patient reports.

- **Core Operations:** Dashboard, Patient, Billing, Appointment, OPD - Out Patient, IPD - In Patient

Three steps. No paperwork.

1

Pick a slot

Choose your doctor, day and time. No signup required, no payment to book — just confirm and we will hold the slot.

2

Meet the specialist

In-person at the hospital or a video consult from home. Past reports, history and family profiles — all on one screen.

3

Get reports & care

Lab reports on WhatsApp same-day. Follow-ups, refills and billing — all from your patient portal, no chasing.

— BY THE NUMBERS

Trusted care, measurable results

Three steps. No paperwork.

1

Pick a slot

Choose your doctor, day and time. No signup required, no payment to book — just confirm and we will hold the slot.

2

Meet the specialist

In-person at the hospital or a video consult from home. Past reports, history and family profiles — all on one screen.

3

Get reports & care

Lab reports on WhatsApp same-day. Follow-ups, refills and billing — all from your patient portal, no chasing.

— BY THE NUMBERS

Trusted care, measurable results

500+
Hospital Beds

What Patients Say

★★★★★

The doctors took great care of my mother during her stay…

Ramesh Kumar

★★★★★

Booking the appointment online was simple and the consultation was very thorough…

Priya Sharma

★★★★★

Best hospital experience my family has had. Nursing staff is attentive…

Anil Verma

★★★★★

I was nervous before my surgery, but the team made me feel safe…

Meera Iyer

CASHLESS COVER

Cashless on 38 insurers & all major TPAs.

Bring the card. We handle the paperwork. Pre-authorisation in under 90 minutes, on average — including weekends.

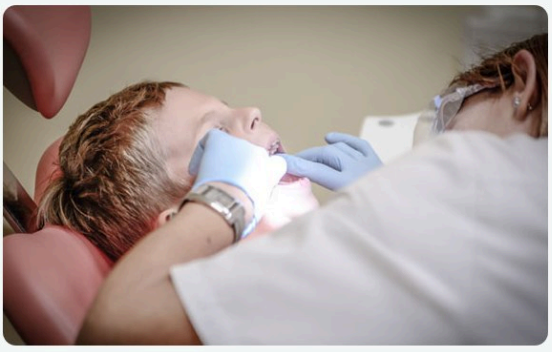
About Hospitals



Some Words About Us

Medic Medical will teach physicians and nurses from around the world the principles of blood management, as well as how to manage their own blood conservation programs. The hospital was chosen based on the reputation its bloodless program has established in the medical community and because of its nationally recognized results.

Medic Medical will teach physicians and znurses from around the world the principles of blood management, as well as how to manage their own blood conservation programs. The hospital was chosen based on the reputation its bloodless program has established in the medical community and because of its nationally recognized results.

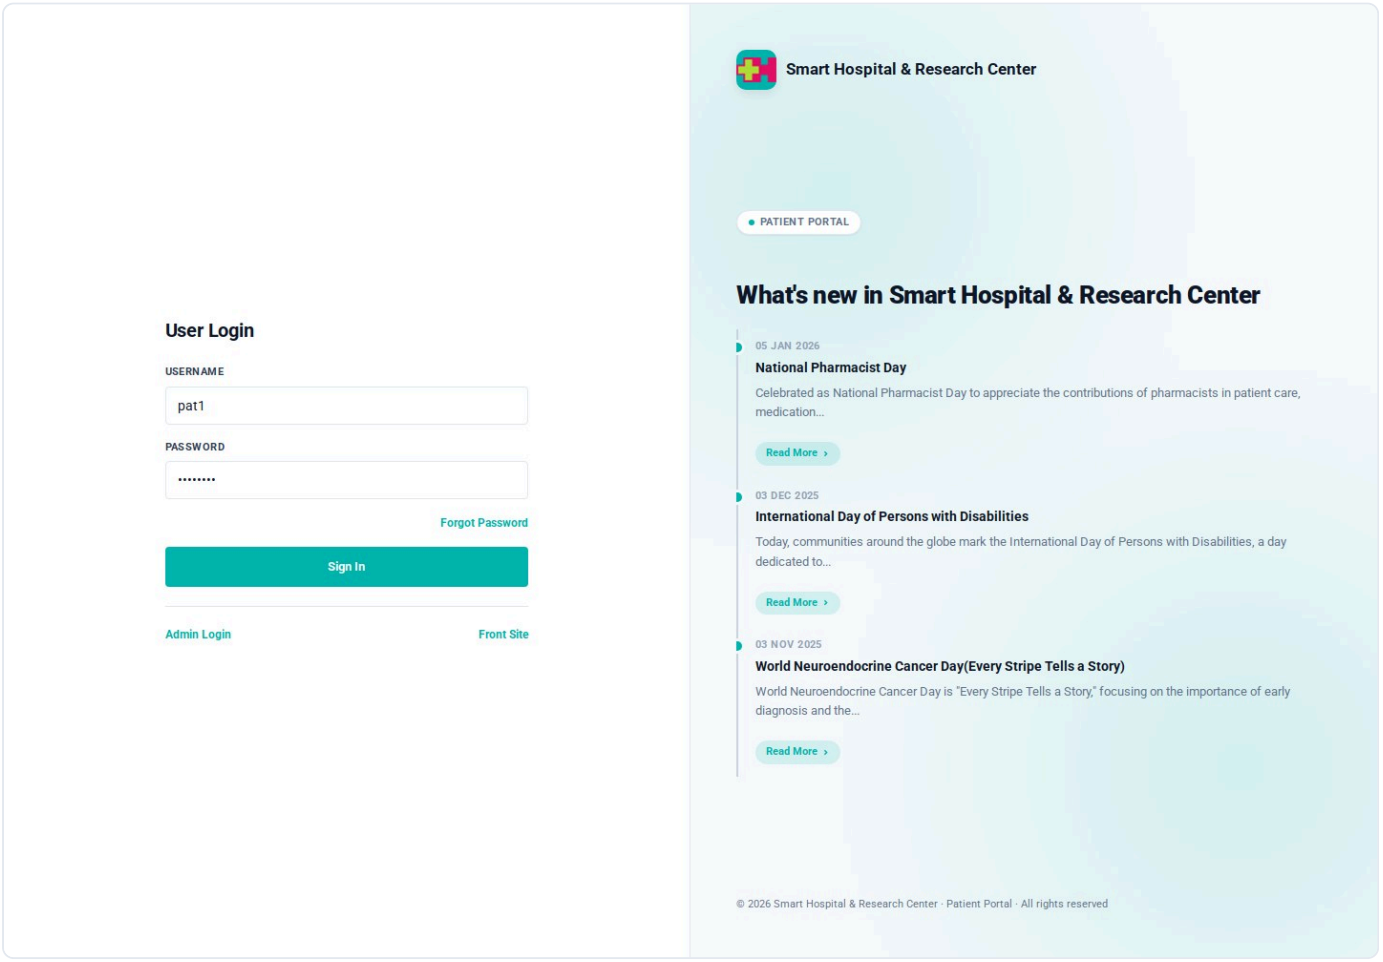
Patient portal sign-in (`/site/userlogin`) — patients use the e-mail captured at registration to see appointments, prescriptions, investigations and bills.



7. Cross-cutting platform features

Capability	What it does
Authentication	Separate admin and patient sign-in endpoints (`/site/login` , `/site/userlogin`), CSRF token on every form, forgot-password for both portals, password hashing.
Role-based access control	Nine staff roles controlling sidebar, screens and reports; role is set on the staff record.
Multi-branch	Branch master, branch switching from the header, consolidated overview and cross-branch reporting.
Global patient search	Persistent header search over the patient index, available from every screen.
Quick Add launcher	Floating launcher for the five most used create actions from anywhere in the app.
Bed status board	Live occupancy modal in the header, plus the bed master screen.
Notifications	Bell menu with module alerts (OPD/IPD/pathology/radiology/pharmacy/appointment), notice board and chat.
Printing & PDF	Bills, receipts, prescriptions, lab/radiology reports, certificates and ID cards, each with a configurable per-module header/footer.
Data grids	DataTables on every list: search, sort, pagination, page length and CSV/print/copy export.
Dashboards & analytics	KPI tiles, line and donut charts, module income share, staff attendance and activity feed.
Charge master	Central catalogue of billable items reused by billing, OPD and IPD.
Clinical libraries	Symptoms, findings, vitals, ICD-10 codes and prescription sets shared across clinical screens.
Custom fields	Extend core entities with hospital-specific fields from Setup → Custom Fields.
Localisation	Language switcher and phrase files (multi-language per vendor documentation).
Communication	Notice board, messaging, survey forms, download centre and e-mail/SMS notification settings.
Telemedicine	Zoom integration for live consultations and internal meetings.
QR attendance	QR-code based staff check-in with roster and holiday calendar.
Audit trail	System log report plus the dashboard activity feed (who did what, in which module, when).
Two-factor authentication	Optional Google Authenticator (TOTP) 2FA for superadmin and staff: enrol, reset and manual key configuration.
Notification engine	Event-driven notifications with per-event channel toggles across in-app, e-mail, SMS, WhatsApp and mobile push.
WhatsApp messaging	Patient/staff notifications over WhatsApp via Meta (Cloud API) or Twilio — one provider active at a time, reusing the event template.
Mobile app	Vendor Android app for staff and patients with push notifications (documented in the vendor help library, not part of this screen capture).
Patient panel	Patient self-service portal: personal dashboard with charts, appointment booking, OPD/IPD history, pharmacy/pathology/radiology/blood-bank/ambulance bills and Zoom live consultation.

Generated automatically from the capture pipeline in `tools/` on 2026-10-13. Re-run with `python3 tools/docs/build_docs.py` after a new capture.

Part 3 — Improvement backlog

Improvement Backlog — DiziHospital / Smart Hospital

Findings from the full application exploration (76 screens, all forms, all roles, public site) and a prioritised plan for the next phase. Every item references evidence: the screenshot id is the file name in `docs/assets/screens/`.

Priority key — `P0` blocking/risky, `P1` high value, `P2` valuable, `P3` nice to have. **Size** — `S` ≤ 1 day, `M` 2–5 days, `L` 1–3 weeks, `XL` > 3 weeks.

1. What the product already does well (protect these)

Strength	Evidence
Complete hospital ERP surface — registration, OPD, IPD, pharmacy, lab, imaging, blood bank, ambulance, HR, finance, reports, CMS, telemedicine	`001` … `076` catalogued screens
Genuine clinical depth (vitals, obstetric history, ICD-10, findings libraries, batch prescriptions)	`005-opd-out-patient`, `006-ipd-in-patient`
Nine granular staff roles driven by real menu/screen permissions	role dashboards captured in `docs/FEATURE-CATALOG.md` §4
Analytics on the landing page (KPIs, 12-month trend, module income donut, live activity)	`001-dashboard`
Legal + statutory coverage (birth/death registers, certificates, ID cards, print header/footer per module)	`013`, `014`, `034`, `035`, `036`, `059`
Multi-branch operation with consolidated overview and comparative reporting	`015`, `016`, `017`
Modern public website + patient portal served by the same installation	front-site capture

2. Findings & backlog

2.1 Correctness, trust and data integrity

#	Finding (evidence)	Why it matters	Fix	Pri	Size
A1	Dashboard tile arithmetic is inconsistent: *Bed occupancy 56%* vs *30 / 54*, and the same card says *24 Available · 30 Allotted · 0 Unused* (`001-dashboard`)	Numeric contradictions destroy trust in every other number	Centralise KPI computation in one service; add server-side tests for each KPI; show "as of" timestamp	**P0**	M
A2	Mixed currency presentation — the demo shows `$` on all money columns (`001` , `003` , `025` , `026`) while the product is used mostly in INR markets	Wrong invoices/reports for the payer	Make currency symbol/locale a single setting; format through one helper; add thousand/lakh formatting option	**P0**	S
A3	Outstanding-bills tile shows *171 Unpaid · 67 Overdue* but *Today's appointments 0* with an empty grid (`001` , `004`) — empty-state vs zero-state are conflated	Users cannot tell "no data" from "not loaded"	Distinguish empty states with explicit messaging + "why is this empty" hint	P1	S
A4	Terminology drift in navigation: "Complain" (should be *Complaint*), "Overview" vs "Overview ", inconsistent Title Case, "Birth & Death Record" group holding a "Birth Record" duplicate (`012` , `015` , nav.json)	Professionalism + searchability	Ship a terminology pass + i18n key review	P1	S
A5	Duplicated destructive actions: *Delete Selected* on list screens with no confirmation summary of what will be deleted (`002-patient`)	Accidental loss of clinical records	Two-step delete with count preview + soft-delete default + restore view	**P0**	M
A6	Character-encoding defects in the IPD patient header — `Â·` mojibake and a raw `—` entity are printed where separators belong (`detail-ipd-profile.jpg`)	Looks unprofessional on the screen a clinician opens most; same class of bug can corrupt names/addresses	Force UTF-8 end to end (PHP output, DB connection charset, HTML meta), escape once only, add a smoke test asserting no raw entities in rendered pages	**P0**	S
A7	A stray literal **"2"** is rendered as a button/link on almost every list screen (visible in every captured profile, e.g. `002-patient` , `018-human-resource`) — a badge/count leaking into the DOM as an action label	Confusing affordance; screen-reader noise	Trace the label (likely a notification count template), give it a proper accessible name or render an icon with `aria-label`	P1	S
A8	Field/column naming typos reach the UI: `refference` in the OPD/IPD form field names, "Complain" instead of "Complaint" (`005` , `012`)	Data exports and integrations inherit the typos	Terminology + field-name cleanup pass with a migration-safe alias map	P2	S

2.2 Clinical & operational workflow gaps

#	Gap	Impact	Proposal	Pri	Size
B1	No visible patient queue/token display for waiting rooms; *Queue* exists inside Appointment only (`004`)	Reception crowding, no patient self-visibility	Add a queue/token board screen (TV mode) with live status per doctor/counter	P1	M
B2	No bed-transfer / bed-board interaction in the captured UI (`058` is a status list)	Nurses phone the desk to move patients	Drag-and-drop bed board with transfer history and housekeeping status (clean/dirty/blocked)	P1	L
B3	Lab workflow has no barcode/specimen tracking or instrument interface (`008`)	Sample mix-ups, manual transcription	Specimen barcode + analyzer (HL7/ASTM) interface + critical-value alerting with acknowledgement	P1	XL
B4	Discharge summary / OT notes templates are not visible as structured documents (`006` , `061` , `055`)	Doctors retype; medico-legal risk	Template engine with specialty packs, versioning, e-sign and print/PDF	P1	L
B5	No consent forms, no patient allergy/interaction checking in pharmacy (`007`)	Patient safety	Allergy/intolerance register + interaction warnings at prescription and dispense time	**P0**	L
B6	No appointment reminders or no-show handling visible (`004` , `029` , `004` online queue)	Revenue leakage (no-shows ~15–25%)	SMS/WhatsApp/e-mail reminder ladder, confirm/decline links, waitlist auto-fill	P1	M
B7	Blood bank has stock and issue but no cross-match/antibody record screens captured (`010`)	Transfusion safety	Cross-match worksheet, reaction reporting, donor deferral register	P1	L
B8	No ambulance dispatch tracking (driver app/GPS) — only a call register (`011`)	Emergency response visibility	Live dispatch board + ETA + vehicle status, optional driver mobile link	P2	L
B9	No structured referral/transfer-out letter between branches or hospitals (`023` , `015`)	Continuity of care	Referral document with clinical summary attached to the case	P2	M

2.3 Money and billing

#	Gap	Impact	Proposal	Pri	Size
C1	No online payment capture in the admin billing screens captured (`003`)	Patients must pay at the counter	Payment-gateway integration (UPI/card/netbanking) with reconciliation report	P1	L
C2	Outstanding/overdue bills have no dunning workflow (`001` tile only)	Slow collections	Ageing buckets, statement generation, reminder schedule, write-off approval flow	P1	M
C3	Insurance/TPA is a register, not a claim pipeline (`024` , `051`)	Claims delayed/rejected	Claim status workflow, document checklist, shortfall tracking, submission log	P1	L
C4	No GST/e-invoice compliance artefacts visible on bills (`003` , `059`)	Statutory risk in India	GST fields per charge head, HSN/SAC, tax invoice format, e-invoice export	P2	L
C5	No financial close/period locking or expense approval chain (`025` , `026`)	Books can be edited after closing	Period close + approval workflow + immutable audit of edits	P1	M

2.4 Experience, design and accessibility

#	Finding (evidence)	Impact	Fix	Pri	Size
D1	76 screens, many list screens with 8–15 near-identical forms in the DOM (all modals pre-rendered: `002` shows 5 forms, `038` / `039` show 31/34 forms)	Slow pages, fragile DOM, hard to maintain	Lazy-render modals; split screens; introduce a component library with consistent patterns	P1	L
D2	Global patient search matches name only (`002` , header)	Staff cannot find patients by ID/phone (the most reliable identifiers)	Extend to MR number, phone, guardian name, with fuzzy match and recent results	**P0**	S
D3	Filter/search controls reset when you return from a record (typical DataTables client-side state)	Repetitive work per patient	Persist filters in URL/session; remember last view per user	P1	M
D4	Accessibility: icon-only controls without accessible names, low-contrast badges/status pills, inconsistent focus outlines, table headers not scoped (observed across all screens)	WCAG failure, poor for low-vision staff	Accessibility pass: names/roles, contrast tokens, focus rings, `scope` on headers, modal focus trap	P1	M
D5	No keyboard shortcuts or command palette; power users click through menus (`sh-sidenav`)	Slow for heavy users (billing/lab)	Command palette (Ctrl-K) + screen shortcuts + barcode/scan-to-search	P2	M
D6	No dark mode / high-contrast theme for night shifts (a `--sh-theme-vars` token block exists but no toggle)	Eye strain on night duty	Ship theme toggle wired to the existing token layer, honour `prefers-color-scheme`	P2	S
D7	Print/PDF output uses per-module headers; no unified preview (`059`)	Surprise formatting on real paper	WYSIWYG print preview + template validation before saving	P2	M
D8	Mobile: admin screens are desktop-first (fixed 1440 layout, wide tables)	Doctors/nurses work on phones/tablets	Responsive table pattern (card mode), touch targets, PWA shell	P1	L

2.5 Platform, integration and scale

#	Gap	Impact	Proposal	Pri	Size
E1	No API layer found for the admin app (server-rendered CodeIgniter views + jQuery)	Blocks mobile apps, kiosks, partner integrations	Versioned REST/JSON API with token auth, OpenAPI spec, rate limits	P1	XL
E2	No webhook/event bus for external systems (`029` is a notice board)	Cannot integrate with HIS/LIS/PACS/ERP	Event outbox (patient.created, bill.paid, report.ready) + webhooks	P2	L
E3	Legacy stack (PHP/CodeIgniter + jQuery, vendor-maintained)	Hiring and security updates	Decide: harden current stack vs. strangler-pattern re-platform; document decision record	P1	XL
E4	Security hardening gaps: two-factor authentication **exists** (Google Authenticator, see `docs/help-library/two-factor-authentication/`) but is optional and per-user, and there is no password-policy UI, no session/IP register, no login throttling and no forced enrolment for privileged roles (`/site/login`)	Breach and compliance risk	Enforce 2FA for Super Admin/Admin and for any role that can see billing or clinical records, add recovery codes, password policy, login throttling, session register and admin action audit	**P0**	L
E11	Notification delivery (e-mail/SMS/WhatsApp/mobile push) is configured per event, but there is no delivery log, retry or failure alerting surfaced in the product (`docs/help-library/system-settings/` , `whatsapp-messaging/`)	Reminders and credentials silently fail to send	Delivery log with status/error per message, automatic retry with backoff, provider failover and a daily failure digest	P1	M
E12	WhatsApp is one-way (template notifications); patient replies are not captured into the app	Patients reply "CONFIRM"/"cancel" and nothing happens	Two-way WhatsApp/webhook inbox linked to the appointment and case, with opt-in/opt-out handling	P2	L
E13	The Android app and its push channel are documented by the vendor but not covered by our screen-level catalogue or by any in-repo test	Mobile regressions invisible; parity unknown	Add the Android app to the coverage map: capture its screens, document feature parity with the web app and add smoke tests	P2	L
E5	Vendor licence validation screen in the super-admin shell (`001` footer modals: *Register your purchase code*, *Register your Addon*)	SaaS/productisation blocker; runtime dependency on vendor licence server	Replace with first-party licensing/feature flags; make it non-blocking for self-hosted builds	P1	M
E6	No observability: no health endpoint, structured logs, metrics or error tracking observed	Blind during incidents	Health/readiness endpoints, structured audit + app logs, metrics (latency, errors), alerting	P1	M
E7	Backup/restore not exposed in the UI (vendor docs cover manual DB backup only)	Data-loss risk	One-click encrypted backups, retention policy, restore drill, documented RPO/RTO	**P0**	M

#	Gap	Impact	Proposal	Pri	Size
E8	No automated tests / CI in the product	Regressions on every change	Add CI (lint + unit + smoke E2E on the golden-path journeys used for this capture)	P1	L
E9	Large datasets: lists are DataTables client-side with default page length 10 (`002` , `018`)	Degrades at hospital scale (100k+ patients)	Server-side pagination/search, DB indexes, query budgets, caching for dashboards	P1	L
E10	India digital-health interoperability (ABDM/ABHA, FHIR) absent	Regulatory direction and payer requirements	ABHA creation/linking, FHIR R4 facade for key resources, consent artefact handling	P2	XL

2.6 Content, portal and communication

#	Gap	Impact	Proposal	Pri	Size
F1	Patient portal capture shows only login; self-service depth (reports, bills, rebooking) unverified (`patient-portal-login.jpg`)	Adoption of self-service	Confirm/extend: download reports, pay bills, rebook, family accounts, notification preferences	P2	M
F2	Survey forms are admin-defined; no NPS/feedback trigger after discharge (`027` , `028`)	No voice-of-patient loop	Auto-send feedback survey after discharge/payment with KPI dashboard	P2	M
F3	Notice board/messaging has no read receipts or escalation (`029`)	Policy notices unverified	Read tracking, acknowledgement-required notices, escalation	P2	S
F4	Front CMS content is strong but has no SEO/schema analytics surface in the capture (`037`)	Lost patient acquisition	Health-check for SEO meta, structured data for departments/doctors, analytics hookup	P3	S
F5	No patient-facing cost estimate or package pricing on the site/front desk	Price anxiety and disputes	Package/estimate builder (procedure → expected cost) printable for the patient	P2	M

3. Suggested sequence

Phase 1 — Trust & safety (2–3 weeks, P0 items) A1 KPI correctness · A2 currency/locale · A5 safe delete · B5 allergy & interaction checks · D2 smarter patient search · E4 security baseline (MFA, throttle, session register) · E7 backup/restore.

Phase 2 — Front-desk velocity (3–4 weeks, high-value P1) B1 queue board · B6 reminders & no-show recovery · C2 collections ageing + statements · D1 page/modals performance · D3 filter persistence · E9 server-side pagination on the biggest lists (patients, bills, lab).

Phase 3 — Clinical depth (4–6 weeks) B3 lab barcode + analyzer interface · B4 discharge/OT templates · B7 cross-match & reaction reporting · C3 TPA claim pipeline · C1 online payments.

Phase 4 — Platform (ongoing) E1 API layer + E2 webhooks · E10 ABDM/FHIR · E6 observability · E8 CI/test harness · D8 responsive/PWA.

4. Definition of done (shared)

Every item above ships with: acceptance criteria written first, automated test where the layer allows it, documentation updated in this repo (`docs/`), a screenshot of the new state replacing the old one in `docs/assets/screens/`, and an entry in `docs/CHANGELOG.md`.

Part 4 — Vendor help library (mirrored index)

The complete offline mirror of the product knowledge base: 520 articles in 39 categories, stored in `docs/help-library/`.

Category	Articles	What it covers
Ambulance (3)	8	Vehicles, drivers and calls.
Annual Calendar (4)	10	Holidays, activities, vacations and the front-site calendar tab.
Appointment (8)	14	Booking, slot setup and online appointments.
Billing (3)	9	Billing concepts, single-module billing and case-based billing.
Birth & Death Record (2)	8	Statutory birth and death registers.
Blood Bank (6)	11	Components, donors, issue and stock.
bug_report Known Issues	6	Toggle navigation Home Features computer Demo How it Works description Help & Documentation Articles FAQ assignment User
Certificate (7)	13	Certificates, patient and staff ID cards.
Common Issues & Troubleshooting (13)	19	Known problems and fixes (404s, login URLs, SQL modes, SSL, hosting moves).
Download Center (3)	8	Sharing documents and media.
Duty Roster (4)	10	Shifts, rosters and staff assignment.
FAQ (17)	18	Frequently asked questions about deployment, characters, LAN use and multi-hospital operation.
Front CMS (8)	14	Website pages, banners, events, gallery and media manager.
Front Office (7)	12	Visitors, calls, postal dispatch and complaints.
Getting Started (3)	9	Installation, updates, licensing and first-run setup.
Human Resource (13)	19	Departments, designations, leave types, specialists, payroll and leaves.
Installation(7)	13	Toggle navigation Home Features computer Demo How it Works description Help & Documentation Articles FAQ assignment User
Inventory (4)	10	Items, stock, issue and return.
IPD - In Patient (19)	25	Admissions, vitals, obstetric history, BMI, overview and discharge.
Live Consultation (3)	9	Zoom live consultations and live meetings.
Messaging (4)	10	Notice board, SMS, e-mail and patient credentials.
Miscellaneous (6)	12	Calendar, to-dos, chat and other utilities.
Multi Branch (7)	13	Adding, editing, switching and reporting across branches.
OPD - Out Patient (9)	15	Out-patient visits, profiles and discharge.
Pathology (4)	10	Test setup, reports and payment.
Patient Panel (10)	16	The patient self-service portal (dashboard, appointments, OPD/IPD, bills, reports).
Pharmacy (6)	12	Medicines, stock, bad stock, import and sale.
QR Code Attendance (3)	9	QR/barcode attendance with auto-attendance options.
Radiology (4)	10	Study setup, reports and payment.
Referral (3)	9	Referral persons and commission payments.
Reports (44)	50	The report library — how to read and filter each report.

Category	Articles	What it covers
Setup & Configuration (22)	28	Master data: patient fields, charges, beds, print header/footer, front office.
Smart Hospital(10)	14	Toggle navigation Home Features computer Demo How it Works description Help & Documentation Articles FAQ assignment User
Survey Form (6)	12	Building, publishing and filling survey forms.
System Settings (16)	22	Notification, SMS, e-mail, payment-method and general system configuration.
System Update(1)	7	Toggle navigation Home Features computer Demo How it Works description Help & Documentation Articles FAQ assignment User
TPA Management (2)	8	Insurance/TPA handling.
Two Factor Authentication (6)	12	Google Authenticator based 2FA setup for superadmin and staff.
WhatsApp Messaging (4)	6	WhatsApp Cloud API (Meta) and Twilio configuration, per-event enablement.

Ambulance (3) (8)

Vehicles, drivers and calls.

- About WhatsApp Messaging — Sat, 25 Jul, 2026
- How to add Ambulance Call? — Mon, 01 Nov, 2021
- How to add Ambulance? — Mon, 01 Nov, 2021
- How to configure WhatsApp using Meta (Cloud API)? — Sat, 25 Jul, 2026
- How to configure WhatsApp using Twilio? — Sat, 25 Jul, 2026
- How to enable WhatsApp for a Notification Event? — Sat, 25 Jul, 2026
- Version 2.0 — Thu, 30 Jul, 2026
- Version 7.0 — Mon, 27 Jul, 2026

Annual Calendar (4) (10)

Holidays, activities, vacations and the front-site calendar tab.

- About WhatsApp Messaging — Sat, 25 Jul, 2026
- How to add activity in annual calendar? — Thu, 05 Sep, 2024
- How to add holiday in annual calendar on smart hospital? — Thu, 05 Sep, 2024
- How to add vacation in annual calendar? — Tue, 03 Sep, 2024
- How to configure WhatsApp using Meta (Cloud API)? — Sat, 25 Jul, 2026
- How to configure WhatsApp using Twilio? — Sat, 25 Jul, 2026
- How to enable WhatsApp for a Notification Event? — Sat, 25 Jul, 2026
- How to show annual calendar tab on front site of smart hospital? — Mon, 02 Sep, 2024
- Version 2.0 — Thu, 30 Jul, 2026
- Version 7.0 — Mon, 27 Jul, 2026

Appointment (8) (14)

Booking, slot setup and online appointments.

- About Appointment — Tue, 02 Nov, 2021

- About WhatsApp Messaging — Sat, 25 Jul, 2026
- How to add appointment in smart hospital? — Tue, 22 Jul, 2025
- How to book Appointment from front site? — Wed, 29 Dec, 2021
- How to check appointment Queue? — Wed, 29 Dec, 2021

5.1 About Two Factor Authentication

Vendor article · category: Two Factor Authentication (6) · Sat, 16 Aug, 2025 · source: https://smart-hospital.in/article/about-two-factor-authentication

About Two Factor Authentication

Sat, 16 Aug, 2025

ArticlesTwo Factor Authentication

2FA, or **Two-Factor Authentication**, is a security process in which a user is required to provide two different forms of authentication in order to access an account or system. The goal of 2FA is to make it harder for unauthorized individuals to gain access to an account, even if they have obtained the user's password or other credentials.

The two factors of authentication typically used in 2FA are:

1. Something the user knows, such as a password, PIN, or answer to a security question.
2. Something the user has, such as a physical token, a one-time code generated by an authentication app, or an SMS code sent to their phone.

When 2FA is enabled for an account, the user must provide both factors of authentication to gain access. For example, they might enter their password as the first factor, and then enter a one-time code generated by an authentication app as the second factor.

By requiring two different factors of authentication, 2FA makes it much more difficult for attackers to gain access to an account. Even if an attacker manages to obtain the user's password, they will still need the second factor of authentication to gain access. This makes it much less likely that an attacker will be able to successfully compromise the account.

5.2 How to Setup 2FA?

Vendor article · category: Two Factor Authentication (6) · Sat, 16 Aug, 2025 · source: https://smart-hospital.in/article/how-to-setup-2fa

How to Setup 2FA?

Sat, 16 Aug, 2025

ArticlesTwo Factor Authentication

Go to the your **Smart Hospital** to configure 2FA of Two Factor Authentication, two-step verification. For **setup 2FA**, go to the **Two Factor Authentication** module, which is shown in the left side bar. Now click on**Setup 2FA,** the **Setup 2FA** page will open.

Note: For further processing, you need to set up **Google Authenticator** on your mobile device.

5.3 How to Install the Google Authenticator app on a mobile device?

Vendor article · category: Two Factor Authentication (6) · Sat, 16 Aug, 2025 · source: https://smart-hospital.in/article/how-to-install-the-google-authenticator-app-on-a-mobile-device

How to Install the Google Authenticator app on a mobile device?

Sat, 16 Aug, 2025

ArticlesTwo Factor Authentication

1. On your mobile device, go to Play Store / IOS.
2. Download the **Google Authenticator** app.
3. After downloading the app, install in your device.

4. Now open the **Google Authenticator** app and setup your first account.
5. Use the QR code or setup key in your **2FA** settings (by Google or third-party service). If you’re having trouble, go to g.co/2sv
6. Now click on **Scan a QR code** from your mobile.

7. Now, scan the **QR code,** which is available on your Smart Hospital **Two Factor Authentication > Setup 2FA** page**.**

8. You will receive the **six-digit verification code**, which will show up in the **Google Authenticator**
9. Now fill in the six-digit verification code below the QR code and click on "**Verify and Activate."**
10. You have successfully enabled the **2FA method** in your Smart Hospital, and a message will be shown on screen.

5.4 How to delete the 2FA account for superadmin or staff?

Vendor article · category: Two Factor Authentication (6) · Sat, 16 Aug, 2025 · source: https://smart-hospital.in/article/how-to-delete-the-2fa-account-for-superadmin-or-staff

How to delete the 2FA account for superadmin or staff?

Sat, 16 Aug, 2025

ArticlesTwo Factor Authentication

To delete the 2FA account, Super Admin or Staff, go to login in your **Smart Hospital**. After the login, go to the **Two Factor Authentication**module, which is shown in the left side bar. Now click on **Two Factor Authentication> Setup 2FA**. A new page will open, and a message will show, "You have enabled the 2FA method. If you want to remove your 2FA account, please "**click here".

**

After **clicking here,** a delete confirmation message will appear on the screen. Now you can delete the account by clicking on the **Delete** button, which is showing in the right-bottom corner.

5.5 About WhatsApp Messaging

Vendor article · category: WhatsApp Messaging (4) · Sat, 25 Jul, 2026 · source: https://smart-hospital.in/article/about-whatsapp-messaging

About WhatsApp Messaging

Sat, 25 Jul, 2026

ArticlesWhatsApp Messaging

WhatsApp Messaging module is for sending automatic WhatsApp notifications to patients and staff — the same events that already go out over Email, SMS and Mobile App push notifications can also be delivered over WhatsApp, using the exact template message the hospital has configured for that event.

Two WhatsApp providers are supported, configured from two tabs on the same settings page:

- **Twilio WhatsApp** — sends through your Twilio account's WhatsApp sandbox or approved sender number.
- **Meta WhatsApp** — sends through the official WhatsApp Business Platform (Cloud API), directly through Meta/Facebook.

Only **one** provider can be active at a time — enabling one automatically disables the other, since both ultimately send from the same "WhatsApp" channel.

Once a provider is configured and enabled, WhatsApp becomes available as a delivery option next to Email, SMS and Mobile App on the **Notification Setting** page, where it can be switched on per event — for example OPD Patient Registration, IPD Patient Discharge, Appointment Approved, or Login Credentials.

5.6 How to configure WhatsApp using Meta (Cloud API)?

Vendor article · category: WhatsApp Messaging (4) · Sat, 25 Jul, 2026 · source: https://smart-hospital.in/article/how-to-configure-whatsapp-using-meta-cloud-api

How to configure WhatsApp using Meta (Cloud API)?

Sat, 25 Jul, 2026

ArticlesWhatsApp Messaging

Go to **Setup → Settings → WhatsApp Setting** from the sidebar and click on the **Meta WhatsApp** tab.

Enter the following, taken from your Meta for Developers → WhatsApp app:

- **Access Token** — the permanent (or system user) access token for your WhatsApp Business app. Required, masked after saving.
- **Registered Phone Number** — here this is your WhatsApp **Phone Number ID** from the Meta Cloud API (not the phone number itself), required.
- **Language** — the language code your approved message templates were created in, e.g. `en_US`. Required.

Set **Status** to **Enabled** and click **Save**. Enabling Meta here automatically disables the Twilio provider.

Note: Meta WhatsApp only sends **pre-approved message templates** — each notification event's **WhatsApp Template ID** must match a template name that has already been approved in your Meta WhatsApp Business account, in the same language configured here.

5.7 How to configure WhatsApp using Twilio?

Vendor article · category: WhatsApp Messaging (4) · Sat, 25 Jul, 2026 · source: https://smart-hospital.in/article/how-to-configure-whatsapp-using-twilio

How to configure WhatsApp using Twilio?

Sat, 25 Jul, 2026

ArticlesWhatsApp Messaging

Go to **Setup → Settings → WhatsApp Setting** from the sidebar. The **Twilio WhatsApp** tab is selected by default.

Enter the following, taken from your Twilio Console:

- **Twilio Account SID** — required.
- **Authentication Token** — required. Once saved, this is masked and shown only as a hint on later visits.
- **Registered Phone Number** — the WhatsApp-enabled sender number linked to your Twilio account, required.

Set **Status** to **Enabled** and click **Save**. Enabling Twilio here automatically disables the Meta WhatsApp provider, since only one can be active at a time.

Note: the phone number must already be approved for WhatsApp on your Twilio account (either the Twilio Sandbox for testing, or your own approved WhatsApp sender for production) before messages will actually deliver.

5.8 How to enable WhatsApp for a Notification Event?

Vendor article · category: WhatsApp Messaging (4) · Sat, 25 Jul, 2026 · source: https://smart-hospital.in/article/how-to-enable-whatsapp-for-a-notification-event

How to enable WhatsApp for a Notification Event?

Sat, 25 Jul, 2026

ArticlesWhatsApp Messaging

Once a WhatsApp provider is configured and enabled (see the Twilio or Meta setup articles), go to **Setup → Settings → Notification Setting**. Every event the system can notify about — **OPD Patient Registration**, **IPD Patient Registration**, **IPD Patient Discharge**, **Login Credential**, **Appointment Approved**, **Live Meeting**, **Live Consult**, **OPD Patient Discharged**, **Forgot Password**, and more — is listed with a checkbox per delivery channel: **Email**, **SMS**, **Mobile App** and **WhatsApp**.

Tick the **WhatsApp** checkbox next to any event to start sending that event over WhatsApp as well.

Click the small edit icon next to an event's sample message to open its **Template** dialog. Besides the message **Subject** and **Template** text (which can use placeholders such as `{{patient_name}}`, `{{appointment_date}}`, `{{patient_id}}`), this dialog also has a **WhatsApp Template ID** field.

5.9 Notification Setting

Vendor article · category: System Settings (16) · Mon, 01 Nov, 2021 · source: https://smart-hospital.in/article/notification-setting

Notification Setting

Mon, 01 Nov, 2021

ArticlesSystem Settings

To manage notification setting, go to **Setup > Settings > Notification Setting.** There are 9 events OPD Patient Registration, IPD Patient Registration, IPD Patient Discharged, Login Credential, Appointment Approved, Live Meeting, Live Consult, OPD Patient Discharged and Forget Password where automated Email / SMS are sending to concerning person's email / mobile number. To control, when email / sms notifications will be send use Notification Setting.

Check the following at which event, which person receive notification

- OPD Patient Registration: OPD Patient
- IPD Patient Registration: IPD Patient
- IPD Patient Discharged: IPD Patient
- Login Credential: Patient, Staff
- Appointment Approved: Patient
- Live Meeting: Staff
- Live Consultation: Patient
- OPD Patient Discharged: Patient
- Forgot Password: Patient, Staff

To edit sample message click on **Edit** icon present in the sample message column, at click of this icon a modal will be open. Here enter **Subject**, **Template ID**(here Template ID is your DLT template registration ID which is used only in Indian SMS gateway), **Template** and then click on **Save** button.

Note**-**If you are using any Indian SMS gateway then your template content must be match with your DLT registered template content.

5.10 System Notification Setting

Vendor article · category: System Settings (16) · Mon, 01 Nov, 2021 · source: https://smart-hospital.in/article/system-notification-setting

System Notification Setting

Mon, 01 Nov, 2021

ArticlesSystem Settings

To manage system notification setting, go to **Setup > Settings > System Notification Setting**. There are 56 events where system notification are sending to concerning user (staff or patient or both) Smart Hospital account. With the help of event option setting you can manage which notifications to send in which event to which person (staff or patient) and select the check box and then click on **Save** button.

To edit sample message click on **Edit** icon present in the sample message column, at click of this icon a modal will be open. Here enter **Subject**, **Staff message and Patient message** and then click on **Save** button.

5.11 SMS Setting

Vendor article · category: System Settings (16) · Sat, 30 Oct, 2021 · source: https://smart-hospital.in/article/sms-setting

SMS Setting

Sat, 30 Oct, 2021

ArticlesSystem Settings

To manage SMS setting, go to **Setup > Settings > SMS Setting** then select any SMS gateway from top of the page which you want to enable on your Smart Hospital then enter **Auth Key, Sender Id** and select **Status** and then click on **Save** button.

Here we are providing 8 SMS Gateway namely **Clickatell SMS Gateway**, **Twilio SMS Gateway**, **MSG91**, **Text Local**, **SMS Country**, **Bulk SMS**, **Mobi Reach**, **Nexmo**, **AfricasTalking Custom SMS Gateway** in our Smart Hospital.

Custom SMS Gateway-

In Smart Hospital you can integrate any http based SMS Gateway using our **Custom SMS library**. Please contact to support to get **Custom SMS Gateway** integration guide. Here enter **Gateway Name,** select **Status** (Enabled/Disabled) and then click on **Save** button.

Follow same procedure to SMS gateway for **Clickatell SMS Gateway, Twilio SMS Gateway, Text Local** and **SMS Country**.

5.12 Email Setting

Vendor article · category: System Settings (16) · Tue, 09 Nov, 2021 · source: https://smart-hospital.in/article/email-setting

Email Setting

Tue, 09 Nov, 2021

ArticlesSystem Settings

After adding student or staff if you found there is no email is sending by system then there may be email configuration issue on your server / Smart Hospital.

In Smart Hospital we have used phpmailer **https://github.com/PHPMailer/PHPMailer**library which is used by many popular php application like WordPress, Drupal, SugarCRM, Yii, Joomla etc.

By default **SendMail** is set as **Email Engine** in **Setup > Settings > Email Setting**. SendMail can only work and send emails if you cpanel hosting supports it. If SendMail not sending email then contact to your hosting provider. Since SendMail is easiest but less reliable so check email recipient account **Spam** folder because sometimes SendMail sent emails detected as spams (if using SendMail). Another and best option is to use **SMTP** as email engine. You can use **Gmail** or any other free SMTP service provider to use SMTP email engine.

u200b
If you are using your hosting smtp or any other provider smtp service then check their documentation for smtp settings.

Gmail SMTP configuration -

To configure gmail account first you have to create app password for SMTP service, Please check following steps to generate app password-

1. Go to your Google Account.
2. On the left navigation panel, choose Security.
3. On the 'Signing in to Google' panel, choose App passwords. If you don’t see this option:

- 2-Step Verification is not set up for your account
- 2-Step Verification is set up for security keys only
- Your account is through work, hospital or other organization
- You’ve turned on Advanced Protection for your account

4. At the bottom, choose Select app and choose the app that you’re using.
5. Choose Select device and choose the device that you're using.
6. Choose Generate.
7. Follow the instructions to enter the app password. The app password is the 16-character code in the yellow bar on your device.
8. Choose Done.

After generating gmail app password for SMTP service enter credentials in Smart Hospital SMTP email configuration-

Email Engine = SendMail/SMTP
SMTP Username = your gmail email id
SMTP Password = Generated App Password
SMTP Server = smtp.gmail.com
SMTP Port = 587
SMTP Security = TLS
SMTP Auth = ON

Note: After configuring email setting please check you have enabled email notification settings from Setup > Settings > Notification Setting.

5.13 How Notice Board works?

Vendor article · category: Messaging (4) · Mon, 01 Nov, 2021 · source: https://smart-hospital.in/article/how-notice-board-works

How Notice Board works?

Mon, 01 Nov, 2021

ArticlesMessaging

Notice board basically a messaging system for communication to patient and staff.

Notice Board is for sending common messages to all staff members to add new notice board message click on **+Post New Message** button, here enter Message Title, Message Text, Notice Date, Publish On Date and Message To different types of staff users.

You can check this added Notice at Notice list page.

From here you can edit or delete created Notice.

5.14 How send patient credential in Smart Hospital?

Vendor article · category: Messaging (4) · Fri, 30 Aug, 2024 · source: https://smart-hospital.in/article/how-send-patient-credential-in-smart-hospital

How send patient credential in Smart Hospital?

Fri, 30 Aug, 2024

ArticlesMessaging

To send the patient credential, simply go to the **Messaging** > **Send Credentials

After click on Send Credential button, **Send Patient Credential page will be open, here in this page multple patient with their login credentials are available

To send the credentials to the patient, simply select the checkbox next to the patient's id . You can select multiple checkboxes to send credentials to multiple patients. Then click on the **Save** button, located at the bottom right corner

You can also send a '**Forgot Password**' to the patient by following the same process. Just click on the '**Credential Type**' dropdown and select '**Forgot Password**'

And if you want to send both Credentials and Forgot Password, simply select **both** from the '**Credential Type**' dropdown and follow the same process as sending the credentials

5.15 Patient Dashboard

Vendor article · category: Patient Panel (10) · Fri, 01 Aug, 2025 · source: https://smart-hospital.in/article/patient-dashboard

Patient Dashboard

Fri, 01 Aug, 2025

ArticlesPatient Panel

At patient panel you will see **Dashboard**, here patient can see all their treatment details in summarized form.

At the top you will see tabs like **OPD, IPD, Pharmacy, Pathology, Radiology, Blood Bank** and **Ambulance**, here you can see total count for patient treatment under these tabs.

In below you will see graphic representation of quantitative information for Medical History, Findings and Symptoms through Pie Chart, Bar Chart etc.

5.16 How to add appointment from Patient panel?

Vendor article · category: Patient Panel (10) · Sat, 02 Aug, 2025 · source: https://smart-hospital.in/article/how-to-add-appointment-from-patient-panel

How to add appointment from Patient panel?

Sat, 02 Aug, 2025

ArticlesPatient Panel

To add an appointment from the patient account, go to **My Appointment**. Here you can see the patient profile along with all details.

Now, click on the **+Add Appointment** button, then fill in the required details: **Date, Specialist, Doctor, Shift, Slot, Appointment Priority, Message, Live Consultation (Video Conference)**, and select a

slot from the available options. Finally, click the **Save** button to complete the process.

You can view added Appointment record at **Appointment List**. This Appointment record will how to patient as Pending until patient doesn't pay for it.

To make online payment for appointment click on Pay button present at Action column.

Note:- Here after click on Pay button page will be redirect to your selected payment method. Click here to understand how to enable payment method.

After make online payment your appointment patient will see their appointment status as **Approved**.

To view appointment details click on show button icon and for delete appointment click on delete button icon present at **Action** column at Appointment list.

5.17 OPD

Vendor article · category: Patient Panel (10) · Thu, 18 Nov, 2021 · source: https://smart-hospital.in/article/opd

OPD

Thu, 18 Nov, 2021

ArticlesPatient Panel

At patient account in OPD module, there are 4 tabs available **Visits, Lab Investigations, Treatment History and Timeline**.

At Visit tab patient can find their all visits and OPD records.

To check patient details click on show button icon present at Action column.

To check treatments under particular OPD click on OPD No, here you will find multiple tabs of Overview, Visits, Charges, Payment, Lab Investigation, Timeline, Medication, Operation Theatre, Live Consultation.

Overview

This section describes patients all details like patient's Allergies, Findings Symptoms, Consultant Doctors, Timeline Medical History, Lab Investigation etc. of particular visit.

opd overview

Visits

Under visit section, patient can see all their Recheckups.

Charges

All the added charge of patient can be check from Charges tab. Patient can also print charges from print button icon present at **Action** column.

Payment

Patient can check all the payment details done from patient side. Patient can also print Payment from print button icon present at **Action** column.

To make online payment click on **+ Make Payment** button. Here add Payment Amount and click on **Add** button.

This will redirect to the payment page where patient can make online payment through selected payment method.

Lab Investigation

At this tab patient can check their reports of Pathology and Radiology tests.

Timeline

In Timeline section patient can see notes or quick access notes created from admin or staff panel.

Medication

Medication is for comparing a patient's medication orders to all of the medications that the patient has been taking.

Under Medication patient can check all their medication routine which was given to the patient.

Operation Theatre

Under Operation Theatre tab patient can check details of their all operation done under OPD.

Live Consultation

Using Live Consultation Patients can consult to doctor through zoom video call. From Live Consultation tab patient can check all their upcoming and previous Live Consultation.

5.18 IPD

Vendor article · category: Patient Panel (10) · Thu, 18 Nov, 2021 · source: https://smart-hospital.in/article/ipd

IPD

Thu, 18 Nov, 2021

ArticlesPatient Panel

At patient account in IPD module patient can check following details like **Overview, Nurse Notes, Consultant Register, Lab Investigation, Timeline, Prescription, Charges, Payment, Treatment History, Medication, Operation Theatre, Live Consultation and Bed History.**

Overview-

This section describes patients all details like patients Allergies, Findings Symptoms, Consultant Doctors, Timeline Medical History, Lab investigation, module wise payment billing details etc.

Nurse Notes

A nursing note is a medical note into a medical or health record made by a nurse that **can provide an accurate reflection of nursing assessments, changes in patient conditions, care provided and**

relevant information to support the clinical team to deliver excellent care.

Patient can check Nurse notes from **Nurse Notes** tab.

Consultant Register

Consultant Register tab has all details about instructions given by doctors day to day for this patient's treatment. Patient can check these details from **Consultant Register** tab.

5.25 About Billing

Vendor article · category: Billing (3) · Mon, 01 Nov, 2021 · source: https://smart-hospital.in/article/about-billing

About Billing

Mon, 01 Nov, 2021

ArticlesBilling

In Smart Hospital there is a feature of centralized billing so hospital staff not need to go to each module to generate patient bill individually for individual modules.

In centralized Billing module there are two ways to generate patient bill -

- One is for single module (like Appointment, OPD, Pathology, Radiology etc) which purpose where patient comes for a particular treatment like patient had came for only blood test so in this case staff need to only generate their blood test bill which it can generate from Pathology tab.
- Second one is for a billing of multiple treatments of patients under OPD / IPD which can be generate through a Case ID of patient.

We will understand through an example, suppose a patient come to hospital for their treatment and referred to OPD. Here doctors do checkups and give prescription to patient in which doctor prescribed some medicine and pathology and radiology tests for patient. Now patient go through some radiology and pathology tests and purchased some medicine. Now after test reports doctor suggest patient to admit in the hospital for further treatments so here patient IPD record will be create and doctor will do further treatments which may include some more pathology, radiology tests, operations and medications. So for billing of all these treatments in one go OPD/IPD Billing Through Case Id feature is very useful, here staff only need a Patient Case ID so patient all treatments will reflect.

5.26 Single Module Billing

Vendor article · category: Billing (3) · Mon, 27 May, 2024 · source: https://smart-hospital.in/article/single-module-billing

Single Module Billing

Mon, 27 May, 2024

ArticlesBilling

In a single module billing we have included total 6 module which are **Appointment, OPD, Pathology, Radiology, Blood issue and Blood Component Issue**.

Appointment

To generate patient Appointment bill go to **Billing > Appointment**. Here click on **+ Add Appointment** so pop up window will be open here you should select patient from search patient field or you can add new patient from **+ New Patient** button then select **Doctor, Doctor Fees, Shift, Appointment Date, Slot, Appointment Priority, Payment Mode, Status, Message, Live Consultant, Full Details and Appointment Details** then click on **Save & Print** or **Save** button. You can share this bill receipt with patient after received bill amount.

You can also print bill for patient previously created Appointment which are listed at Appointment Billing list page. To print it click on **Show** button present at last column on mouse hover then click on print bill button.

To edit billing click on edit and for delete click on delete present at bill details.

OPD

To generate patient OPD bill go to **Billing > OPD**. Here you can see all OPD patient visits

To generate or print OPD bill for previously created OPD patient click on Show button available at last column on while you mouse hover

then click on print bill icon located at **Action** column.

OPD Patient Visits

Tue, 22 Jul, 2025

ArticlesOPD - Out Patient

In OPD, when you click on a patient's name or the **Show** icon, the **Overview** page will open. The **Overview** tab contains all the details of the patient's visit.

To view complete OPD patient information, click on the **Show** icon. You will see five tabs: **Overview**, **Visits**, **Lab Investigation**, **Treatment History**, **Timeline** and **Vital** — each providing specific details related to the patient’s consultation and treatment history.

Under Visit tab we will get some more tabs which will show other details also for OPD patients those are **Medication, Operations, Charges** and **Payments**. Now let's have a look for these options in more details-

Overview

This section provides complete details of the patient’s visit, including allergies, symptoms and findings, consulting doctor, medical history timeline, lab investigations, and more.

Add New Checkup

To add new OPD Checkups click on **+New Checkup** button. Here enter **Any Known Allergies, Height, Weight, BP, Symptoms, Note, Appointment Date, Case, Casualty, Old Patient, TPA (Third Party Administrator), Reference, Consultant Doctor, Charge Category, Charge, Tax, Standard Charges, Applied Charges, Amount, Payment Mode, Paid Amount**and select**Live Consultation** (if yes than live consultation for the patient will create and it will list on patient profile Live Consultation tab) and click on **Save** button.

Note : While you add **New Checkup** for the Female patient so in this adding form at the bottom **Is Antenatal** option with checkbox will be show

---

Add Prescription

To add prescription for OPD patient, go to OPD- out patient list click on OPD patient details (for this show details button icon will show when you mouse hover at Total Recheck up column) then click on **Visits** tab Now here you will find Add Prescription option at Visits tab.

When you click on Add prescription button it will open add prescription page.

Here in Add Prescription you can add **Header Notes, Findings details (Symptoms finding in patient), Attachment, Medicines, Footer Note**, also in add prescription page you can prescribed **Pathology** and **Radiology** tests to patient and send notification from **Notification** To option to staff members.

Medication

Medication is for comparing a patient's medication orders to all of the medications that the patient has been taking. This reconciliation is done to avoid medication errors such as omissions, duplications, dosing errors, or drug interactions.

To add medication for OPD patient go to **OPD – Out Patient** then click to detail option (show button icon will show for this at last column on mouse hover) then click on OPD no (under which OPD you want to create) here you will get **Medication** tab to add Medication for patient.

To add Medication click on **+ Add Medication** here enter **Date, Time, Medication Category, Medication Name, Dosage** and **Remarks** then **Save** button.

You can view this added record in the **Medication List** under Medication tab.

To edit Medication click on**Edit** icon and to delete Medication click on **Delete** icon present in the Medication list.

Lab Investigation

In OPD patient list you can also check patient all **Pathology** and **Radiology** test under **Lab Investigation** tab.

Here in Lab Investigation List you can check all listed lab reports of. You can check lab test report details from show option available at **Action** column.

Also you can print Test Report from print icon present at show report details popup.

Operations

You can add operations done for OPD patients under Operation Theatre tab. These can be small operation like dental surgeries.

To add Operation for OPD patient go to **OPD – Out Patient** then click to detail option (show button icon will show for this at last column on mouse hover) then click on OPD no (under which OPD you want to create) here you will get Operation Theatre tab to add Operations for patient.

After create Operation record you can view this added record at Operation Theatre.

To view added operation record click on view button icon present at **Action** column.

To edit Operation record click on**Edit** icon and to delete Operation record click on **Delete** icon present in the Operation Theatre list.

Charges

Please click here to understand how to add Charges in Smart Hospital.

How to add charges in OPD

To add charges in for OPD patient, go to the **OPD – out patient** click on Show button present at **Action** column. After click on Show button here you will get 4 tabs that are **Overview, Visits, Lab Investigation, and Timeline**.

Now click on **Visits** tab and then click on OPD No. (for which you want to add charges) then click on **Charges** tab.

To add charges for OPD patient click on **+Add Charges** button, here you should add **Charge Type, Charge Category, Charge Name** and other details and click on **Save** button.

You can also Print, Edit and Delete the applied charges from options available at **Action** column.

Add Payments in OPD

To add payment for OPD patient go to OPD – Out Patient then click to detail option (show button icon will show for this at last column on mouse hover) then click on OPD no (under which OPD you want to create) here you will get **Payment** tab to add Payment for patient.

5.42 How to add holiday in annual calendar on smart hospital?

Vendor article · category: Annual Calendar (4) · Thu, 05 Sep, 2024 · source: https://smart-hospital.in/article/how-to-add-holiday-in-annual-calendar-on-smart-hospital

How to add holiday in annual calendar on smart hospital?

Thu, 05 Sep, 2024

ArticlesAnnual Calendar

To add a holiday to the annual calendar, go to the **Annual Calendar** module in your Smart Hospital system and click on it. The Annual Calendar page will open on the right side.

Now go to the **Add** button, showing at the top right corner and click on it, Add window will be open In this window, you can see options for Type: **Holiday**, **Activity**, and **Vacation**. Simply select **'Holiday'** by clicking on it, then choose the date when the holiday will occur. Add a description of the holiday, and if you want to display this holiday with details on the front site of your Smart Hospital, click on the **'Front Site'** button.

Finally, click the **'Save'** button to save your holiday details in the holiday list.

To **edit** the holiday details simply go to the pencil icon showing at the right side and click on it, edit holiday window will be open

Now update the details you want to change, then click the **'Save'** button. Your holiday details will be updated successfully.

To **delete** the holiday details, simply click on the delete icon on the right side, then click the **'OK'** button. The holiday details will be deleted successfully

If you want to search specifically for holiday details, go to the top left of the page. Here, you'll see a **'Type'** dropdown menu. Select the **'Holiday'** option from the dropdown

Then click on **Search**, in below list only display the holiday details.

Additionally you can also see the holiday details on the front site of your Smart Hospital, as you enabled this option when adding the holiday. Simply go to the front site of your Smart Hospital and navigate to the annual calendar

Here you can see the holiday details which you recently added from the annual calendar

You can see the holiday details on the **calendar** in both the **superadmin** and **patient** logins.

For Superadmin login, you can see a calendar icon at the top right corner. Click on it to open the calendar, where you can view the holiday details for the specific day you added

For patient login, you can see a calendar icon at the top right corner. Click on it to open the calendar, where you can view the holiday details for the specific day you added

5.43 How to create a Survey Form?

Vendor article · category: Survey Form (6) · Sat, 25 Jul, 2026 · source: https://smart-hospital.in/article/how-to-create-a-survey-form

How to create a Survey Form?

Sat, 25 Jul, 2026

ArticlesSurvey Form

Go to **Survey Forms → Survey Forms** from the sidebar and click on the **+ Create Survey Form** button on the top right of the list page.

On the Create Survey Form page, enter the **Form Title**, an optional **Description** shown above the form fields, and a **Thank You Message** shown to the user after they submit — leave the thank you message blank to show a default message instead.

Under **Schedule**, you can optionally set a **Start Date** and **End Date** so the form is only open for a limited period. Under **Target Audience**, select at least one of **Staff**, **Patient** or **Front Site** — this decides who will see the form once it is published.

Two more settings are available under **Settings**:

- **Allow Edit Response** — lets a user who already submitted the form resubmit it, overwriting their previous answers.
- **Enable CAPTCHA** — adds a security code verification step on public form submissions.

Click **Save as Draft** once you are done. The form is created in **Draft** status and you are taken straight to the Edit page, where the **Survey Builder** unlocks so you can start adding fields.

Note: a form needs at least one Target Audience selected, and at least one field added, before it can be Published.

5.44 How to add Referral Payment?

How to add Referral Payment?

Sun, 31 Oct, 2021

ArticlesReferral

Now to add Referral Payment go to Referral module then click on **+Add Referral Payment** button. Here add **Patient, Patient Type, Bill No/Case Id, Patient Bill Amount, Payee, Commission Percentage (%), Commission Amount** and then click on **Save** button.

This added record will show at Referral List page.

To edit Referral Payment details click on **Edit** button, edit details and save it and for delete Referral Payment click on **Delete** button present at **Action** column.

5.45 TPA Management

Vendor article · category: TPA Management (2) · Wed, 10 Nov, 2021 · source: https://smart-hospital.in/article/tpa-management

TPA Management

Wed, 10 Nov, 2021

ArticlesTPA Management

TPA module is for managing third party administrator or Mediclaim insurance provider companies. A third-party administrator is a company that provides operational services such as claims processing and employee benefits management under contract to another company. Insurance companies and self-insured companies often outsource their claims processing to third parties. With the help of TPA patient can get lots of discount in hospital charges.

To check TPA list associated with the hospital, login from superadmin, admin panel and then click on the TPA Management link present in the the left sidebar, by clicking this link you can check all TPA list.

To add new TPA click on **+ Add TPA** button here enter **TPA Organization Name, Code, Contact Number, Address, Contact Person name, Contact Person Phone** then click on **Save** button.

added record will be show in **TPA Management list** page.

To edit TPA record click on Edit icon and to delete TPA record click on Delete icon present at last column on mouse hover.

To see specific TPA charge details click on Organization Profile icon, for which you want to check tpa details, this will redirect you in details page, fro here you can check TPA charge details.

To check all details click on the Search button this will show you all charges.

Here you can edit or delete different associated charges for this TPA organization in different charge types. Associated charges should be applied first from hospital charges module.

Add TPA charges on hospital charges -

To add TPA charges on hospital charges, go to **Setup > Hospital Charges**, this will redirect you in **Charges Details List** page, here click on **+Add Charges** button present at the top right corner of the page, then enter all mandatory details like **Charge Type**, **Charge Category**, **Unit Type**, **Charge Name**, **Tax Category**, **Tax Category** and **Scheduled Charges For TPA** (enter amount for different TPA) and then finally click on the **Save** button.

Once TPA amount is saved, you can use it in different module. For example you have added TPA for OPD charges, now when you add any opd charge you need to selected TPA and **Charge Category**, **Charge**

and this will automatically calculated your TPA amount. For example your OPD consultation Fees was Rs.150 and you have select CGHS TPA for which opd consultation charge was Rs.100 so your applied charge will be Rs.100 .

404 Or Page Not Found Error In Installation

Mon, 18 Oct, 2021

ArticlesCommon Issues & Troubleshooting

During installation if you are getting 404 or Page not found error then following possible causes may be behind this -

1. Check .htaccess file is present in your Smart Hospital hosting directory. By default .htaccess files are hidden in cpanel, you can enable visible .(dot) hidden files from cpanel file manager setting option. .htaccess file already present in your downloaded package in respective folder.
2. url rewriting module is disabled in your hosting.

5.56 Unable To Login Or Missing Login URL

Vendor article · category: Common Issues & Troubleshooting (13) · Tue, 02 Nov, 2021 · source: https://smart-hospital.in/article/unable-to-login-or-missing-login-url

Unable To Login Or Missing Login URL

Tue, 02 Nov, 2021

ArticlesCommon Issues & Troubleshooting

When you open Smart Hospital url then it will be open User Panel URL **http://yourdomain/site/userlogin** (if Front CMS is not enabled). By default Smart Hospital opens User Panel instead of Admin Panel (due to security reasons).

In Smart Hospital your **Admin Panel** login url is **http://yourdomain/site/login**
Here superadmin, admin, doctor, accountant or any staff can be login through their email id and password.

And **User Panel** login is **http://yourdomain/site/userlogin**
Here only patient login through their username and password.

Please check you are login with right panel with right credentials.

5.57 ONLY_FULL_GROUP_BY Issue On Server

Vendor article · category: Common Issues & Troubleshooting (13) · Mon, 18 Oct, 2021 · source: https://smart-hospital.in/article/only_full_group_by-issue-on-server

ONLY_FULL_GROUP_BY Issue On Server

Mon, 18 Oct, 2021

ArticlesCommon Issues & Troubleshooting

If Smart Hospital showing **ONLY_FULL_GROUP_BY** error message on your server that means on your hosting **ONLY_FULL_GROUP_BY** is enabled in your mysql **SQL_MODE**. This issue comes due to on some hosting server mysql is not configured properly. Please contact to your hosting provider

to **disable/remove ONLY_FULL_GROUP_BY** in your hosting mysql **SQL_MODE** or follow the below instruction to fix this issue (it will require full **root access** of your mysql server) -

Open **phpMyadmin** of your server then go to **Variables** tab then edit **sql mode** variable value and remove **ONLY_FULL_GROUP_BY**.

Note: This fix is temporary and if your mysql server will be restart or update it will comes on default state. So ask your hosting admin to make it permanently in mysql config file.

Generally this issue occurred in cheap or non professional hosting. If you will go with hosting providers like **godaddy** or **hostgator** or any reputed hosting provider then you will not face this issue.

5.58 Can I use special character in Smart Hospital?

Vendor article · category: FAQ (17) · Mon, 18 Oct, 2021 · source: https://smart-hospital.in/article/can-i-use-special-character-in-smart-hospital

Can I use special character in Smart Hospital?

Mon, 18 Oct, 2021

ArticlesFAQ

In Smart Hospital avoid to enter or using special character (special character is non-alphabetic and non-numeric like @, #, $, <, %, ^, &, *, !) for any field like Patient, Staff, Income, Expense, Transport, Custom Field etc, otherwise it may fail PHP or JavaScript processing.
